1 Introduction and Background

1.1 Introduction

This Remedial Investigation (RI) report presents the results of the investigative activities performed as part of the Phase 2 Remedial Investigation of the Lincoln Park/Milwaukee River Channel (hereinafter referred to as the Lincoln Park/Milwaukee River Site or the Site), within the Milwaukee River Estuary Area of Concern (AOC). It is being submitted pursuant to the U.S. Environmental Protection Agency (USEPA) statement of work as part of Work Assignment No. 064-RICO-2508 under Contract No. EP-S5-06-01.

The Lincoln Park/Milwaukee River Site is part of the Estabrook Impoundment within the Milwaukee Estuary AOC and includes Lincoln Creek downstream of Green Bay Road and the Milwaukee River from one-quarter mile north of the western and eastern oxbows to the Estabrook Park Dam. The 103-acre impoundment is located within the cities of Glendale and Milwaukee, Wisconsin. The Phase 2 investigation area includes Zones 3b through 7, which is outlined in Figure 1.

1.2 General Site Description

The Site was initially divided into Zones 1 through 5 within Phase 1 and portions of the Phase 2 project areas during the Estabrook Impoundment Sediment Remediation Pre-Design Study (Wisconsin Department of Natural Resources [WDNR], 2005). Two additional zones have been subsequently added (Zones 6 and 7) to the Phase 2 project area. The objective of this RI report is to sufficiently characterize the nature and extent of the contaminated sediment in a subzone of Zone 3 (Zone 3b), as well as Zones 4 through 7. This RI report may be used to support a feasibility study (FS) that will allow for selection of a remedial action to eliminate, reduce, or control risks to human health and the environment and assist to alleviate the Milwaukee Estuary AOC beneficial use impairments (BUIs). Zones 1, 2, and the northern portion of Zone 3 (Zone 3a) have been addressed separately in the following documents:

- *Final Focused Remedial Investigation – Lincoln Park/Milwaukee River Channel Sediments, Milwaukee, WI.* (STN Environmental, August 2009a). The study area for the RI included the west oxbow of the Milwaukee River (Zone 1) and an approximately one-mile stretch of the Lincoln Creek (Zone 2) to the confluence with the primary channel of the Milwaukee River.
- *Feasibility Study – Lincoln Park/Milwaukee River Channel Sediments Site, Milwaukee Estuary Area of Concern.* (CH2M HILL, 2009). The FS focused on Zones 1, 2, and the northwestern part of Zone 3 (Zone 3a).
- Remedial Investigation/Feasibility Study—Lincoln Park/Blatz Pavilion Site, Milwaukee, WI (Natural Resource Technology, Incorporated [NRT], March 2007). The RI/FS document focused on a subsection of Zone 3 that included Blatz Pavilion.

- *Remedial Construction Documentation Report – PCB-Impacted Sediment Removal Lincoln Park/Blatz Pavilion Site, Milwaukee, WI* (NRT, January 2009). The Remedial Construction Documentation Report presented the results of the polychlorinated biphenyl (PCB) remedial activities performed at the Blatz Pavilion.

1.3 Background

The Lincoln Park area was originally occupied by an oxbow of the Milwaukee River. The area was excavated in the 1930s to create the west oxbow, into which Lincoln Creek empties, and the east oxbow. The sediments in the Lincoln Park area are comprised of sediments that were transported from Lincoln Creek and the Milwaukee River and have been deposited following the excavation of the oxbows (STN, 2009). The Estabrook Dam located at the southern extent of the project area was built on a limestone outcrop in 1936 for flood control and to provide a recreation area. The dam is currently owned and operated by Milwaukee County. The bottom draw design of the dam and periodic opening and closing of the dam has caused the contaminated sediment to be released downstream and dewatered upstream, resulting in some compaction of the sediment upstream within the impoundment (WDNR, 2005).

Inspections by WDNR have identified the need for significant repair work on the dam. WDNR issued a Repair or Abandon Order to Milwaukee County on July 28, 2009. The order establishes deadlines for Milwaukee County to meet related to outstanding maintenance and repair requirements. The order also gives Milwaukee County the option of deciding whether to abandon the dam. The decision for repair or abandonment is the responsibility of Milwaukee County, the owner of the dam.

PCB contamination in the river was initially identified in the Milwaukee River through fish tissue sampling in 1981. A PCB mass balance study conducted by Baird & Associates in 1997 estimated that the Lincoln Park/ Milwaukee River sediments hold over 100,000 cubic yards (yd^3) of sediment contaminated with an estimated 5,200 kilograms (11,500 pounds) of PCBs (as Aroclor 1242). The mass balance study determined the Lincoln Park/Milwaukee River site contribute the greatest mass loading of PCBs to the Milwaukee River and Harbor, and that remediation of contaminated sediment within this area is expected to result in a long-term reduction in PCB mass transport in the Milwaukee River of up to 70 percent (Baird & Associates, 1997). Contaminated sediment is a major contributor to BUIs within the Milwaukee Estuary AOC (Milwaukee River Estuary Remedial Action Plan, 1994). BUIs within the AOC include the following:

- Restrictions on fish and wildlife consumption
- Eutrophication or undesirable algae
- Degradation of fish and wildlife populations
- Beach closings
- Fish tumors or other deformities
- Degradation of aesthetics
- Bird or animal deformities or reproduction problems
- Degradation of benthos
- Degradation of phytoplankton and zooplankton population
- Restriction on dredging activities
- Loss of fish and wildlife habitat

BUIs specifically associated with the Lincoln Park/Milwaukee River site include restrictions on fish and wildlife consumption, degradation of fish and wildlife populations, degradation of benthos, and restrictions on dredging activities.

From March through August 2008, approximately 4,700 yd^3 of contaminated sediment/soil were removed and the area backfilled at a small area immediately adjacent to the Blatz Pavilion Lagoon (located within Zone 3) through funding from WDNR (NRT, 2009). The Blatz Pavilion Lagoon area is isolated from the other contaminated areas in Zones 1 through 7 and has easy public access. WDNR selected the Blatz Pavilion Lagoon site to be the first area remediated.

1.4 Summary of Previous Investigations

Investigations conducted by the WDNR since 2000 have indicated that PCBs are the main contaminant of concern (COC) within the Estabrook impoundment. The historical total PCB concentrations within the Phase 1 and 2 area sediments ranged from nondetected to a maximum of 870 milligrams per kilogram (mg/kg) at location EST 10A collected in 1995 within Zone 2 of the Phase 1 area. The maximum historical total PCB concentration detected in the Phase 2 area was 62 mg/kg at location EST 2-14 collected in 2002. Location EST 2-14 is located on the western side of the main channel of the Milwaukee River, immediately downstream from the confluence of Lincoln Creek.

In 2000, the WDNR began a pre-design study of the Lincoln Park/Milwaukee River project area through a grant by USEPA Great Lakes National Program Office (GLNPO). Water and sediment samples within Zones 1 through 5 were collected between October 2001 and September 2003. A total of 246 sediment samples were collected to examine the occurrence and distribution of PCBs, polynuclear aromatic hydrocarbons (PAHs), and metals in Zones 1 through 5. Other data collected included water depth, sediment thickness probe transects, sediment total organic carbon (TOC), and geotechnical characteristics (WDNR, 2005).

In December 2007, the Milwaukee County Parks Department collected surface and subsurface sediment samples from four locations (SS-1 through SS-4) immediately upstream of the fixed spillway at the Estabrook Dam. Sampling was performed to characterize the sediments that could potentially become displaced during debris removal activities. Each sediment sample was analyzed for semivolatile organic compounds (SVOCs) and PCBs. Selected surface and subsurface samples were also analyzed for volatile organic compounds (VOCs) and Resource Conservation and Recovery Act metals (Himalayan, 2008).

GLNPO conducted additional sediment sampling activities in March 2009 to primarily fill Phase 1 area data gaps and support the RI/FS. However, one sample location (MR-ZZ01) was collected within the Phase 2 project area in Zone 5 at the Estabrook Dam spillway and analyzed for total PCBs (STN, 2009).

After the completion of RI activities in July 2010, the Milwaukee County Parks Department collected surface and subsurface sediment samples from 15 locations (S-1 through S-15) immediately upstream of the fixed spillway at the Estabrook Dam. Sampling was performed to characterize the sediments required to be removed as part of the Estabrook Dam rehabilitation and sediment removal planning. Each sediment sample was collected in at least two depth intervals and analyzed for PCBs (AECOM, 2010).

Historical sediment characterization data within the Phase 2 project area was located in Zones 3b through 5, and primarily consisted of total PCB results. The portions of the Phase 2 project area that lacked sediment characterization data include the segment of the Milwaukee River south of the railroad bridge to the southern confluence of the western oxbow (Zone 7), as well as the eastern oxbow (Zone 6). The investigative design and technical approach for the Phase 2 RI activities designed to fill that data gap are detailed in Section 3.

2 Site Characteristics

2.1 Local Demographics and Land Use

The Lincoln Park/Milwaukee River Site is primarily Milwaukee County Parks property consisting of approximately 312 acres, which is used for recreational purposes including canoeing, kayaking, and fishing. Picnic areas, baseball and softball diamonds, football/soccer fields, a playground, a swimming pool, and walking trails are also available in the vicinity of Blatz Pavilion. Portage and launch access of nonmotorized watercraft across park land is controlled by the Milwaukee County Parks Department and includes the Milwaukee River and the Estabrook Impoundment. There are three designated access sites for canoeing and kayaking in Estabrook Park and one near the Lincoln Park fishing pier, which is located in the Phase 1 project area along the east bank of the western oxbow, north of Hampton Avenue (STN, 2009; NRT, 2007). A segment of the Estabrook impoundment, called the Blatz Lagoon, immediately adjacent to the Blatz Pavilion, was selected by WDNR and Milwaukee County to be the first area to be remediated in the impoundment (NRT, 2007).

Several private residences are located on the southern shore of the Milwaukee River within Zone 4, which transitions into commercial development downstream of the I-43 Bridge and the North Port Washington Road Bridge.

2.2 Climate

The following temperature and precipitation data were obtained from the Midwestern Regional Climate Center using the Milwaukee Mitchell Airport weather station[1]. The averages cited are based on the period of record from 1971 to 2000. The average temperature for Milwaukee, Wisconsin, ranges from 20.7 to 72.0 degrees Fahrenheit (°F) in January and July, respectively. The annual average temperature is 47.5 °F. The Milwaukee area receives an average of 34.8 inches of precipitation every year, ranging from an average of 1.65 inches of precipitation in January to 4.08 inches in August. The annual average snowfall is 52.6 inches, with the maximum snowfall generally occurring in January (15.3 inches). The prevailing winds are west-northwest.

2.3 Topography

River banks are characterized by a moderately steep bank that grades into gently rolling hills in much of the northern and eastern areas of the Milwaukee County Park property portion of the Phase 2 project area (hereafter referred to as the park). The highest elevation is approximately 642 feet above mean sea level (amsl) and is located approximately 800 feet north of the river and 350 feet west of I-43. The highest elevation on the northern end of the island between the east oxbow and the main channel of the Milwaukee River is approximately 630 feet amsl. The south and southwest area of the park, west of Zone 3 and south of Zones 4 and 5, are generally flat and the major topographic feature is the surface

[1] http://mcc.sws.uiuc.edu/climate_midwest/mwclimate_data_summaries.htm

drainage near the boundary of Zones 3 and 4. The bathymetry of the riverbed within the Phase 2 Lincoln Park/Milwaukee River Site is discussed in Section 3.3.1.

2.4 Geology

The regional geology of the site is dominated by the effects of multiple glacial advances and retreats (such as ground and end moraines). Coarse-grained (sand and gravel) glacial outwash deposits predominate along the Milwaukee River, which occupies the course of a former glacial outwash channel. Surface and near-surface deposits outside the area immediately along the Milwaukee River tend to be dominantly fine-grained (silt and clay) glacial till deposits. The unconsolidated materials are underlain by Devonian dolomite bedrock of the Milwaukee Formation (STN, 2009).

The banks of the Milwaukee River between the west and east oxbows, as well as the eastern oxbow channel, consist of wide, exposed, sediment flats and shallow water. The sediment has previously been characterized as deposits of silt and fine sand of varying thickness between 0 and 8 feet. Along the main channel north and south of the west and east oxbows, the banks are steeper and historical data indicated fewer depositional areas with shallow sediment thicknesses ranging from 0 to 3.5 feet. Sediments located directly upstream of the Estabrook Dam impoundment are approximately 3 feet thick. Sediment thickness data collected as part of the Phase 2 investigation is discussed in Section 4.

2.5 Hydrology—Milwaukee River

The general direction of flow in the Milwaukee River is south-southeast from Silver Spring Road toward the Estabrook Dam, which regulates flow within the study area. The drainage area for the Milwaukee River upstream of the Estabrook Dam is approximately 696 square miles. The dam backs the Milwaukee River water up for approximately 2.5 miles, to approximately 0.3 mile upstream of Silver Spring Road, and Lincoln Creek is influenced to approximately 0.5 mile upstream of the confluence of the Milwaukee River. The impoundment is 103-acres, has a hydraulic height of 8 feet, and a maximum storage of 700 acre-feet (STN, 2009).

The water depths in the project area are largely a function of whether Estabrook Dam is open or closed and range from approximately 1 to 4 feet. Historically the dam was operated to be opened to allow unrestricted water flow in early October and closed in early May through the summer months to sustain a target water elevation of 616 feet amsl. Since July 2009 the dam has remained open due to a WDNR-issued Repair or Abandon Order to Milwaukee County requiring the dam to remain open until it is repaired or abandoned.

Peak flow events occur in March and April, when individual averages are as great as 1,300 cubic feet per second (ft^3/s), while the historic monthly mean flows for March and April are 1,030 ft^3/s and 960 ft^3/s, respectively (NRT, 2007). The 2-year storm discharge event is approximately 4,730 ft^3/s; flow for the 100-year storm event is 14,770 ft^3/s (Walker and Krug, 2003). NRT (2007) analyzed hydrographs for the river and documented the influence of the dam on flow within the river. The flow decreases substantially during late April and early May (when the dam is closed) and continues to be reduced until it ranges from 210 to 265 ft^3/s between July and September, even though over 50 percent of the precipitation occurs between May and September. The average monthly flows between

November and February range from 300 to 395 ft^3/s and are more indicative of an unrestricted flow regime where the flow tends to mimic precipitation.

On July 15, 2010, an intense rainfall produced approximately 5.5 inches of rainfall and was measured to exceed a 100-year storm event by the Milwaukee Metropolitan Sewer District. On July 22, 2010, an additional 4 inches of rain was received in a 1-hour duration, exceeding the 100-year equivalent of 2.93 inches of rainfall received in a 1-hour duration (Huff, 1992). Both of the events are potential sources of sediment transport that followed the RI activities.

3 Sediment Investigation and Analysis

The following section briefly describes the objectives, rationale, and approach of the Phase 2 investigation. Additional detail can be found in the *Lincoln Park/Milwaukee River Channel Sediments Site Phase 2 Remedial Investigation Field Sampling Plan* (FSP; CH2M HILL, 2010a).

3.1 Objectives

The Phase 2 field investigation was designed to collect information to evaluate existing sediment conditions. The focus of the investigation was to verify existing data, fill identified data gaps, and collect site-specific information to evaluate the extent of contaminants within the Phase 2 project area. The specific objectives of the remedial investigation were:

- Measure sediment thickness and collect elevation data to determine sediment distribution and support volume calculations.
- Characterize the nature and extent of total PCB concentrations (as Aroclors) to estimate the volume of material with total PCB concentrations exceeding the 1-mg/kg site remedial action limit (RAL) and the 50 mg/kg Toxic Substances Control Act criteria.
- Conduct comprehensive analytical sampling of other potential site contaminants (PCBs [Aroclors and congeners], SVOCs, pesticides, and target analyte list [TAL] metals) to expand upon and refine the current understanding of the nature and extent of contamination.
- Collect sediment particle size and TOC data to indicate depositional nature of location (relatively higher percentage of fine-grained particles and higher TOC values indicate depositional zones), and give indications of cohesion/erodibility of the sediment and the bioavailability of contaminants to receptors.
- Conduct a baseline habitat survey to document stream and riparian habitat features, including an inventory of aquatic and riparian vegetation, as well as fish habitat features within the Lincoln Park Phase 2 project area.

3.2 Investigation Rationale

The Phase 2 investigation was designed to achieve the objectives listed in Section 3.1 by using a series of transects to acquire sediment thickness data and to collect sediment cores for the aforementioned chemical and physical analyses. The transect spacing from which sediment thickness poling and coring activities were performed was selected based on the spatial distribution of historical sediment probe and core data, the known physical characteristics of the site, and data density required to develop a representative and defensible site model to illustrate the horizontal and vertical extent of sediment deposits and PCB concentrations above 1 mg/kg and 50 mg/kg.

Transects were spaced every 200 feet within Phase 2 areas with known depositional areas based on historic sediment thickness data, such as the east oxbow and the main river

channel between both the west and east oxbows. Areas with little historical evidence of sediment deposition were investigated using a 400-foot transect spacing.

Prior to sediment coring activities, sediment probing was conducted to collect sediment thickness data along each transect using 25-foot interval spacing to capture the potential variability of sediment deposition within the project area. A total of 558 sediment thickness data points were collected along 58 transects (Figure 2). In addition to sediment thickness survey data, elevation data was collected at each sediment probe location, as well as the toe and top of defined banks at each transect location in order to establish a bathymetric surface and define the riverbed channel width.

Sediment cores were collected at a minimum of one per transect at the probe location with the greatest sediment thickness. Additional sediment cores were collected if more than one depositional area was encountered in a transect, or if a depositional area had a width greater than the adjacent transect spacing. For example, if a depositional area greater than 200 feet wide was identified along a transect with a spacing of 200 feet from the adjacent transect, an additional sediment core was collected, resulting in two core locations evenly spaced along the transect. A total of 88 sediment cores were collected from the study area and processed for analysis.

3.3 Investigation Approach

3.3.1 Sediment Thickness and Bathymetry Survey

Sediment thickness and bathymetry data were collected during two field events conducted from mid-February through mid-April 2010. The first field event was conducted when the sediment flats and portions of the Milwaukee River were frozen solid, which allowed for ease of access to the sediment flats with GeoProbe direct-push technology (DPT) probe and sampling equipment. The second field event was performed during open water conditions after the spring thaw of the river.

During frozen conditions, two DPT rigs outfitted with solid drive points were used to collect sediment thickness data to refusal within the frozen sediment flats. The refusal depth was calibrated to the manual poling process, as well as the textural classes of the sediment cores. Calibration consisted of initially performing manual poling using 0.75- and 0.5–inch-diameter steel rods. Results of the manual poling were compared to the initial depth at which refusal started using the DPT rig. Following the manual and DPT poling activities, a sediment core from the location was collected 2 feet past the refusal depth of the DPT rig. A correlation between the textural classes and depths of refusal for each poling method was examined. The process was performed at several locations where sediment textures varied between silt, silty clay, and fine to coarse sand. The calibration exercise demonstrated similar sediment thickness results between the manual poling process using the 0.5-inch-diameter steel rod and the initial refusal depth of the DPT rig.

In areas of the river where the ice thickness was deemed sufficient to support personnel but not a DPT rig, a gas-powered auger was first used to auger through the ice to allow access to the sediment surface for conducting the manual poling process. Sediment poling locations collected during open water conditions were collected using the manual poling process with a 0.5-inch-diameter steel rod along the proposed transects from a jon boat.

The surface elevation from which work was performed (water, ice, or sediment flat) was surveyed using survey-grade sub-meter geographic positioning system equipment capable of a horizontal accuracy of +/- 3 feet and a vertical accuracy of less than or equal to 0.1 foot. Poling locations performed from ice or water surfaces used a survey rod outfitted with a 0.5–foot-diameter disk to measure the distance from the sediment surface to the respective surveyed work surface from which the sediment bathymetry elevation was calculated. Top and toe of the defined bank slope elevation was also surveyed at each proposed transect location during the sediment thickness survey to define the project extent at each transect.

Sediment bathymetry elevations in thawed river conditions used a series of four staff gauges that spanned the project extent to determine real-time water elevations. Sediment bathymetry elevations were calculated as the difference of measured water depth from the water elevation. Upstream and downstream staff gauge readings were also collected prior to poling activities at each transect to determine real-time water elevation. A staff gauge reading was also collected at each of the four staff gauges daily, prior and after poling activities, from which a correction factor was developed and applied to each transect during the data reduction to account for the river gradient. Briefly, the process included determining the average daily value for each staff gage, calculating the slope between each of the four staff gages (such as, slope between SG1 and SG2, SG2 and SG3, and SG3 and SG4), and applying the correction to the field-measured values. The correction factor applied ranged from 0 to 0.5 foot.

A summary of the sediment probing data and defined bank survey data are located in Tables 1 and 2, respectively.

3.3.2 Sediment Core Collection and Processing

Sediment cores were collected 3 to 5 feet upstream of the target probe location to avoid disturbed sediment. A minimum of three sets of cores were collected from each location to provide adequate volume for the scheduled chemical and physical analyses.

During the initial mobilization during frozen conditions sediment cores were collected and surveyed concurrently with sediment thickness survey activities. Sediment cores collected at this time used DPT rigs as detailed in FOP-02, *DPT Drilling and Sediment Sample Collection* per the FSP (CH2M HILL, 2010a). Remaining sediment coring was performed after the spring thaw during open water conditions following the completion of remaining sediment thickness and bathymetry activities.

The coring process during open water conditions was performed using hand coring methods due to low water levels that would not have allowed for access with a barge-mounted DPT rig. Hand coring was completed with a 2- or 4-inch-diameter core liner that was driven to the probe or refusal depth using a fence post or slide hammer. Once driven to the required depth the core liner was filled with water and capped to create a vacuum to prevent sediment from escaping as the core was retrieved. The core was then pulled from the sediment and capped at the bottom prior to exiting the water column to maintain the created vacuum. Photographs documenting the sediment core collection process are located in Appendix A.

The sediment cores were processed immediately upon collection using the methods prescribed in the FSP. The sediment cores were visually characterized for texture, color,

consistency, visible evidence of staining, and other observations. Sediment was described using the Unified Soil Classification System (modified slightly for sediment characterization) based on visual identification and recorded on sediment core logs located in Appendix B.

Sediment samples for chemical and physical analyses were collected continually throughout the core. Surface intervals were collected from 0 to 0.5 foot below the sediment surface and subsurface sediment was sampled using a 1-foot interval to the bottom of the core. If the last sample interval was less than 0.5 foot, it was included in the previous interval, if it was greater than 0.5 foot, it was treated as a separate sample. The corresponding sampling intervals from the multiple cores collected at each location for appropriate sample volume were combined into pre-cleaned mixing containers. Rocks, twigs, leaves, and other debris were removed, and the sediments were mixed until a uniform color and texture was achieved. The homogenate was then transferred to the appropriate sample containers. All samples were stored on ice until shipment to the receiving laboratories. All sediment samples were analyzed for PCB Aroclors, SVOCs, pesticides, TAL metals, and TOC. Samples from approximately 10 percent of the locations were submitted for particle size analysis. A summary of sediment core samples collected is in Table 3. Analytical results and photographs for each sample are located in Appendixes C and D, respectively.

Aliquots for PCB congener samples were collected from 50 percent of the core locations and were shipped to an offsite USEPA-contracted facility for archiving until preliminary Aroclor data was received and reviewed to inform the selection of sample for PCB congener analysis. Representative samples were selected for congener analysis to capture the range of conditions at the site, as follows:

- Samples with elevated PCB concentrations and relatively low PAH concentrations
- Samples containing elevated PCB and PAH concentrations
- Samples containing a range of total PCB concentrations
- Samples containing different types and ratios of the different Aroclors detected

The samples submitted for PCB congener analysis are summarized in Table 4. PCB congener results and respective laboratory case narratives, as reported by ESAT, are within Appendix E.

3.4 Analytical Methods

Sediment samples and associated quality assurance/quality control (QA/QC) samples were analyzed by laboratories within the USEPA Contract Laboratory Program (CLP). PCB Aroclors, SVOCs, and pesticides were analyzed using Method SOM01.2, which was modified to account for the high moisture content of the sediment samples. PCB congeners were analyzed using method CBC01.2, and TAL metals were analyzed by Method ILM05.4. TOC and particle size analyses were performed by the USEPA Central Regional Laboratory (CRL) using CRL standard operating procedures AIG009 and AIG038A, respectively.

Waste characterization analyses (toxicity characteristic leaching procedure [TCLP] analyses) were also performed by participating CLP laboratories. The TCLP extraction method used for all parameters was SW-846 1311. The TCLP VOCs, SVOCs, and pesticides were analyzed using SOM01.2. TCLP metals were analyzed using ILM05.4, and TCLP herbicides were analyzed with SW-846 8151A.

The specific analyte lists and required reporting limits for the CLP and CRL laboratory analyses are presented in the *Lincoln Park/Milwaukee River Channel Sediments Site Phase 2 Remedial Investigation Quality Assurance Project Plan* (CH2M HILL, 2010b). The analytical methods were selected such that the quantitation limits for each analysis achieved the investigation objectives.

3.5 Summary Data Quality Evaluation

A detailed Data Quality Evaluation (DQE) memorandum is provided in Appendix F. The key findings of that evaluation indicated that the completeness objective of 90 percent was met for all method/analyte combinations. The evaluation also found that the precision and accuracy of the data, as measured by field and laboratory QC indicators, indicated that the data quality objectives were met.

The DQE did note a small number of PCB Aroclor data points were rejected due to a percent difference (>100 percent) between the primary and confirmation columns. Some results that were nondetects were also rejected due to extremely low surrogate recoveries, which could result in the data being biased very low. The data should not be used to make project decisions. The DQE memo also noted rejected data points for selected pesticide, metals, and SVOC data.

4 Sediment Investigation Results

The results of the field surveys, chemical and physical analyses, and the comparison of the chemistry concentration data to selected screening values are summarized below. This section is organized to first discuss the results of the sediment thickness survey followed by a summary of the physical and chemical characteristics, respectively. A discussion of the nature and extent of total PCB concentrations completes this section.

4.1 Sediment Thickness

The results of the sediment thickness survey are summarized in Table 1 and Figure 2. Figure 3 illustrates the elevation of the sediment surface in the study area.

The measured sediment thickness ranged from 0 to 10.6 feet. The average sediment thickness was approximately 2.2 feet. The largest depositional areas were observed on Transects 5 through 34, which are located in the eastern oxbow and in the shoals that have formed in the main channel of the Milwaukee River adjacent to and immediately upstream of the eastern oxbow (Zones 6 and 7). Three additional smaller depositional areas were observed on Transect 35 at the confluence of Lincoln Creek with the Milwaukee River (Zone 3), on the northern ends of Transects 43 through 46, on the inside bend of the main River Channel (Zone 4), and on the southern end of Transect 58, immediately upstream of the Estabrook Dam (Zone 5).

Sediment thickness in the eastern oxbow (Zone 6) ranged from not present to 10.0 feet. Sediment thickness within the main channel adjacent to the eastern oxbow (Zone 7) ranged from 0.1 to 10.6 feet. The sediment in the main channel in Zone 3 ranged from not present to 6.7 feet. Sediment thickness in Zone 4 ranged from not present to 6.1 feet. In Zone 5, sediment deposits ranged from not present to a thickness of 4.1 feet.

4.2 Sediment Physical Characteristics

Core logs for each sediment core location are presented in Appendix B. The core logs indicate that the sediment deposits in this reach of the river are largely interbedded layers of silt or sandy silt, silty to gravely sand, and silty to sandy gravel. In the eastern oxbow (Zone 6), the surface sediment was dominantly silt, underlain by sand or sandy gravel in the northern two-thirds of the oxbow and by a dense clay or sandy clay in the southern portion of the oxbow. The surface sediment in the main river channel adjacent to and downstream of the eastern oxbow (Zones 7 and 3) was dominantly sand or silty sand. Sediment deposits along the western side of the channel tended to be dominated by silts. The large shoal near the southern confluence of the eastern oxbow was composed of silty sand underlain by dense, firm clay or sandy clay. The main channel in Zone 4 contained a very thin to nonexistent sand layer of sediment above a bedrock subsurface. The depositional area in Zone 4, just downstream of the eastern bend in the river channel, was generally comprised of silt, clayey silt, or sandy silt overlying sand deposits. Zone 5 was found to be similar to Zone 4 until reaching thicker sediment deposits located along the southern shore and directly upstream of the Estabrook Spillway ranging from very organic, rich silt to loose sand.

Grain size results indicate sediment in the depositional areas is typically sandy silt/clay or a mixture of sand and gravel. TOC results ranged from 0.1 to 13.8 percent, with a mean value of 4.8 percent. The percent solids (dry solids at 60° Celsius) ranged from 18.7 to 95.1 percent, with a mean value of 72.3 percent. Grain size, TOC, and percent solids results are presented in Tables C-1 through 3 within Appendix C.

4.3 Sediment Chemistry Results

The following section is limited to PCBs, which are the primary COCs at the site. Total PAHs, metals, and pesticides analytical results will undergo further review for determination of RALs at a later date following initial review of this report. The analytical results for PCBs, PAHs, metals, and pesticides are tabulated in Appendix C.

4.3.1 PCBs

Total PCB concentrations were determined by summing the positive results for any PCB Aroclor detected in a given sample. The data were evaluated to determine the predominant Aroclor mixture and if the predominant Aroclors were not detected in any particular sample, then one-half the reporting limit for that Aroclor was used. PCB samples were analyzed for nine Aroclors, including Aroclors 1016, 1221, 1232, 1242, 1248, 1254, 1260, 1262, and 1268. Aroclors 1221, 1232, 1242, 1262, and 1268 were not detected in any samples, and thus were not considered predominant and were not included in the summation. Total PCB concentrations ranged from 0.004 to 25.8 mg/kg, with a mean concentration of 0.5 mg/kg and a median value of 0.09 mg/kg.

The total PCB values (Appendix C) were compared to the site-specific RAL of 1 mg/kg. Eighteen sample results from 16 sediment core locations exhibited total PCB concentrations greater than 1 mg/kg (Table 4). The locations were generally clustered in three areas: the shoals on either side of the main channel of the Milwaukee River at and between the two confluences with the eastern oxbow (Transects 7 through 36), the shoal located on the inside bend of where the main channel turns eastward (Transects 44, 46, and 47), and the sediment deposits on the southern bank of the main river channel immediately upstream of the Estabrook Impoundment (Transects 55, 56, and 58). The areas with total PCB concentrations above the site-specific RAL are generally located within the depositional areas described in Section 4.1 above and represented in Figure 4, which depicts the maximum total PCB value per sediment core, as well as the depth interval of the sample. The distribution of total PCBs is further discussed in Section 4.4.

Aroclors 1248 and 1260 were the most commonly detected PCBs in the site samples and were detected in 48 and 38 percent of the samples, respectively. Aroclor 1248 was also present in high concentrations, ranging from 0.001 to 23 mg/kg. Aroclor 1260 was detected at concentrations ranging from 0.001 to 2.8 mg/kg. Aroclor 1016 was detected in 2 percent of site samples, ranging in concentration from 0.003 to 0.13 mg/kg. Aroclor 1254 was detected in 8 percent of the site samples, with concentrations ranging from 0.03 to 2.9 mg/kg. A summary of statistics for each PCB Aroclor is presented in Table 5. The lateral and vertical distribution of sediments greater than 1 mg/kg is further discussed in Section 4.4.

4.3.2 PAHs

Total PAH concentrations ranged from 0.02 to 139 mg/kg, with a mean concentration of 6.2 mg/kg and a median concentration of 2.4 mg/kg. The high molecular weight

parameters (for example, the four- and five-ring compounds) were generally detected in the highest concentrations. The highest mean concentrations were observed within the top 1.5 feet of sediment. Figure 5 illustrates the maximum PAH concentration per sediment core location and notates the depth at which the maximum concentration occurs.

PAHs were the predominant SVOCs detected in sediment samples; however, di-n-butyl phthalate and bis(2-ethylhexyl) phthalate were detected at relatively low concentrations in a number of samples. The compounds are not uncommon, as they have been widely used as plasticizers.

SVOC analyses was performed using both a standard mass spectrometry method and selected ion mode (SIM) quantitation method and, in some cases needed dilutions, resulting in up to 5 separate results for each of the 17 individual compound PAH results. The data results received by CH2M HILL did not indicate which value should be used as the result. In order to determine which validated results to use in the total PAH sum, the decision tree within Exhibit 1 on the following page was developed and implemented to determine the most representative result for incorporation into the dataset. The selection process started with evaluating the results and associated qualifiers from the mass spectrometry analysis. If the qualifiers assigned to the mass spectrometry result were "U" (nondetect) or "J" (estimated value), the SIM results were evaluated. Based on the qualifiers assigned to the SIM results, the data were either used or rejected for the initial mass spectrometry result. If the original mass spectrometry result was qualified with either an "E" (result outside of the high calibration range) or "=" or "J", which were only assigned by the data validation (for example, not the laboratory), then the results from the mass spectrometry quantitation were used.

Further discussion of total PAH results in relationship to sediment quality guidelines (SQGs) is located in Appendix H (COC Screening).

4.3.3 Pesticides and Metals

The analytical data for pesticides and metals were also compared to SQGs. Results indicate that pesticide concentrations present in the sediments are not likely to pose potential risk to benthic organisms since there were no parameters that exceeded the Midpoint Effect Concentration (MEC) or Probable Effect Concentration (PEC). The metals screening did indicate exceedances of the TEC values for all the parameters and PEC exceedances for six parameters. The most common exceedances were for lead (in 16 samples) and these were generally co-located with locations where the 1 mg/kg RAL for PCBs was exceeded. Based on these results, the pesticide and metals data will not be further evaluated during the RI process.

4.3.4 Comparison of COCs to Preliminary Screening Level Values

Appendix H details the selection of preliminary screening level values for metals, pesticides, and PAHs. WDNR SQGs were selected to be used for preliminary data evaluation purposes. If WDNR SQGs were not available, USEPA Region III Biological Technical Advisory Group Freshwater Sediment Screening values were used. These values are not to be considered as RALs for the site and were chosen as an initial step to conduct a preliminary evaluation of concentration levels. Further evaluation of metals, pesticides, and PAH data is needed prior to determining appropriate RALs specific to protecting human health and ecological risk at the site.

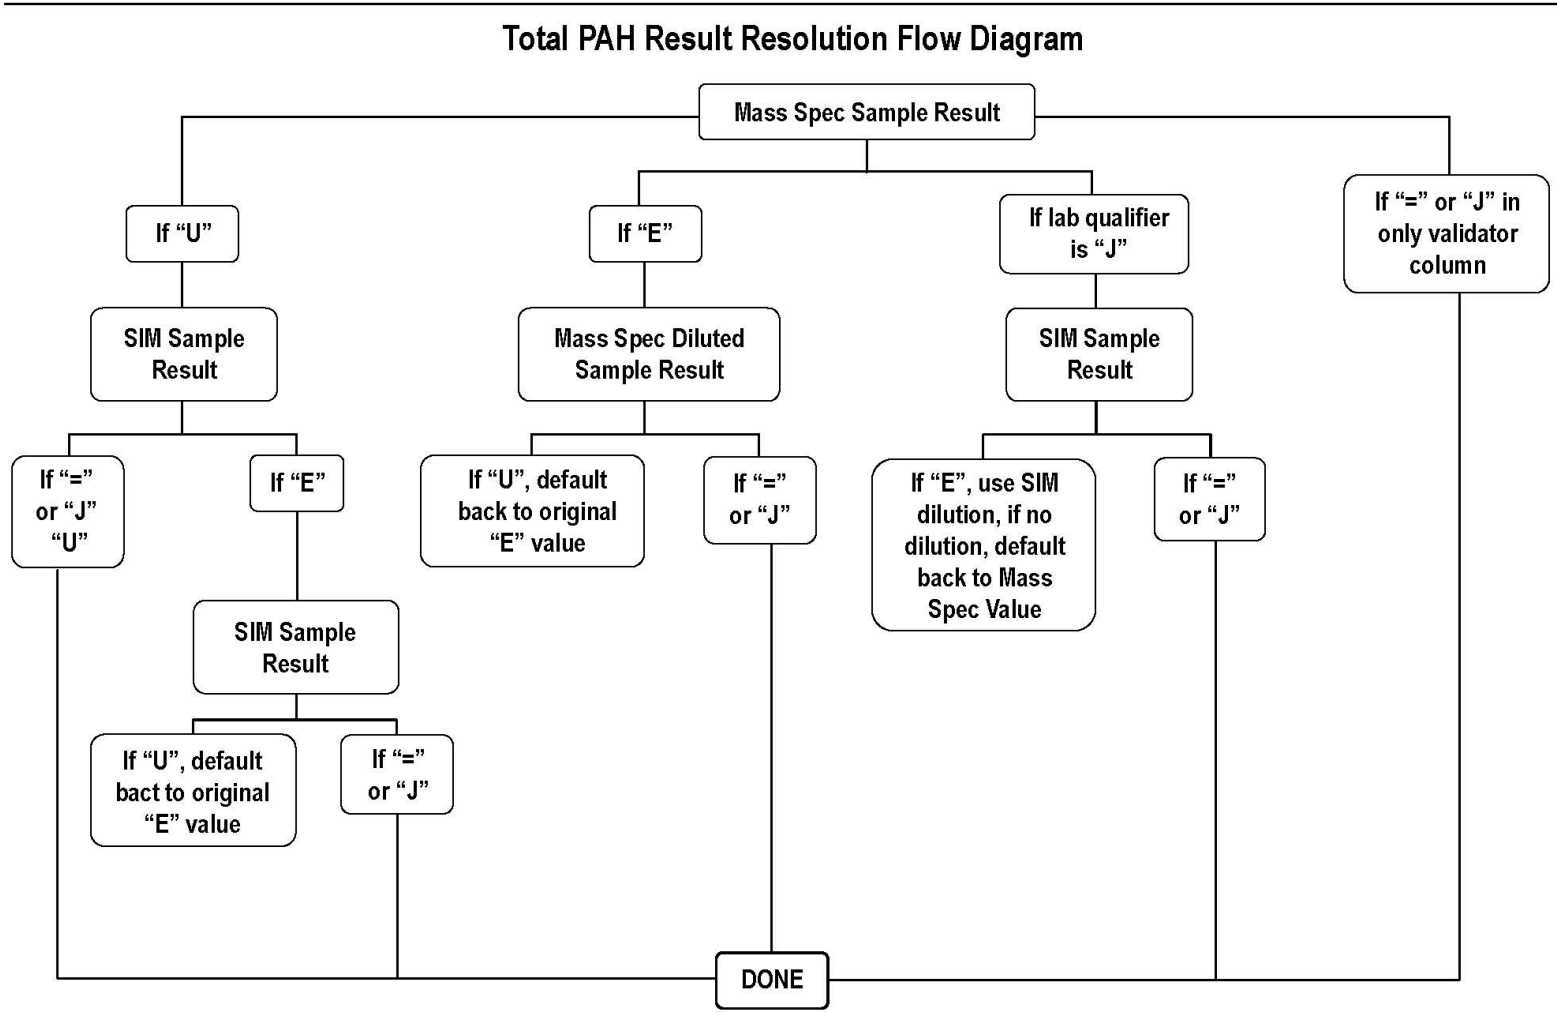

EXHIBIT 1
Lincoln Park Phase 2 - Remedial Investigation
Glendale, WI

Figure_X_LincolnPark_v2 12.03.10 sls/cae

CH2MHILL.

The guidance specifies the following three screening values for selected parameters:

- Threshold Effect Concentration (TEC) is the concentration, if below, toxicity effects to benthic dwelling organisms are predicted to be unlikely.
- Midpoint Effect Concentration (MEC) is the midpoint concentration between the TEC and Probable Effect Concentrations.
- Probable Effect Concentration (PEC) is the concentration, if exceeded, toxicity effects to benthic organisms are probable.

4.4 Nature and Extent of Contaminants of Concern

4.4.1 PCBs

Total PCB concentrations are generally low and range from 0.004 to 25.8 mg/kg, with a mean concentration of 0.5 mg/kg and were composed primarily of Aroclors 1248 and 1260. The highest total PCB concentration encountered during Phase 2 RI activities was 25.8 mg/kg and is located within the surface sample collected from location SD55N-J, which is on the south bank of the main channel, approximately 500 feet upstream from the Estabrook Impoundment. The next highest total PCB concentration is 7.1 mg/kg located at 1.5 feet below sediment surface (bss) at location SD18W-B. Based on observation of the data results there is no apparent correlation between total PCB concentrations and the TOC content of the sediment. However, the highest PCB concentrations were generally in areas described in the sediment core logs as having higher silt and clay content. Project areas where total PCB concentrations exceeded 1 mg/kg are located in nine distinct deposits within Zones 3a, 4, 5, and 7.

Location SD-23N-C located in the northern portion of the eastern oxbow (Zone 6) contained a sample collected from 1.5 to 2.5 feet below the sediment surface with a total PCB concentration of 1.013 mg/kg. However, due to the minimal exceedance above 1 mg/kg and its vertical distribution within the sediment profile, the area represented by this sample was not considered for further evaluation in this report.

A description of the nine deposits is found below with estimated volumes for remedial action as described in Section 4.5.3. Remedial action volumes reported includes overburden quantities to account for typical excavation construction methods. A summary of sediment volumes and areas per deposit is located in Table 7. A visual representation of the modeled horizontal and vertical 1 mg/kg total PCB remedial action extent is located in Figure 6.

4.4.1.1 Deposit 3a-1

Deposit 3a-1 is located at the western oxbow southern confluence to the Milwaukee River along the north shore and is described as being mostly silt with fine to medium sand. This deposit has been added to the proposed Phase 1 Remedial Design project area slated for remedial action in order to allow for complete excavation of the Zone 3a depositional area. Total PCB concentrations are relatively low and range from 1.2405 to 1.554 mg/kg (SD-35W-A and SD-36N-C, respectively) at 0.5 to 1.5 feet bss. No further concentrations greater 1 mg/kg were detected below 1.5 feet. Estimated quantities of sediments greater than 1 mg/kg equal 160 yd^3, with an estimated remedial action volume of 560 yd^3.

4.4.1.2 Deposit 4-1 and 4-2

Deposits 4-1 and 4-2 are located at the northern shore of Zone 4 within the interior bend directly downstream of the Hampton Street Bridge. Total PCB concentrations are relatively low ranging from 1.37 to 1.8905 mg/kg (SD-44N-A and SD-47S-I, respectively) and are located at the surface (0 to 0.5 foot) of the sediment profile in deposit 4-1 and extend to 1.8 feet bss in deposit 4-2 . Sediment thickness in deposit 4-1 and 4-2 extends to a maximum of 4.4 and 1.8 feet, respectively and is described as clayey silt at the surface with increasing sand at depth. Estimated quantities of sediments greater than 1 mg/kg equal 40 and 470 yd^3 (4-1 and 4-2, respectively). The estimated remedial action volume is also 40 and 470 yd^3, respectively, which is due to the sediments greater than the RAL being located at the sediment surface.

4.4.1.3 Deposit 4-3

Deposit 4-3 is located at the southern shore of Zone 4 directly west of the Interstate I-43 Bridge. The deposit is comprised of one sample location (SD-50N-J) with a total PCB concentration of 3.925 mg/kg collected from 0 to 0.8 feet, which represents the complete sediment profile. Sediments in this deposit are described as fine sandy silt throughout the sediment profile. Estimated quantities of sediments greater than the RAL equal 60 yd^3 with the same respective remedial action volume.

4.4.1.4 Deposit 5-1

Deposit 5-1 is located immediately upstream of the Estabrook Spillway and represents the downstream extent of the project area. The greatest total PCB concentrations encountered during the CH2M HILL RI activities are located within this deposit and range from 1.198 to 25.835 mg/kg at locations SD-56S-A and SD-55N-J, respectively. Sediment thickness within deposit 5-1 extends to a maximum depth of 4 feet with an average thickness of 2.5 feet, and is described as fine sandy silt throughout the sediment profile. Analytical data collected by Milwaukee County (2007 and 2010) and STN (2009) was also used to provide additional analytical resolution during the three-dimensional (3D) modeling of sediment volume estimates greater than the RAL of 1 mg/kg. Estimated quantities of sediments greater than the RAL equal 3,890 yd^3 with an estimated remedial action volume of 6,810 yd^3. During the RI activities conducted by CH2M HILL, no sediments greater than 50 mg/kg were detected; however, during sampling conducted by Milwaukee County in 2010 as part of the Estabrook Dam rehabilitation and sediment removal planning 6 of 15 sample locations collected contained concentrations greater than 50 mg/kg. Sediment volumes greater than 50 mg/kg were estimated within the Estabrook Dam cost estimate prepared by AECOM and reported to be approximately 1,380 yd^3 (AECOM, 2010).

4.4.1.5 Deposit 7-1

Deposit 7-1 is located directly west of the eastern oxbow upstream confluence. The deposit is comprised of one location (SD-07E-G) with a total PCB concentration of 3.02 mg/kg at 4.5 to 5.5 feet bss. The sediment profile within this deposit is described as coarse sand and gravel at the surface, transitioning to silty sands at depth. Estimated quantity of sediment greater than 1 mg/kg is 40 yd^3 with an estimated remedial action volume of 3,960 yd^3. The difference in volumes is a direct result of the depth at which the sediments exceeding 1 mg/kg are located (4.5 to 5.5 feet bss), which results in a significant overburden included within the remedial action volume.

4.4.1.6 Deposit 7-2

Deposit 7-2 is located downstream of the northern western oxbow confluence in Zone 7. The deposit is comprised of one sample location (SD-15E-I) with a total PCB concentration of 6.348 mg/kg collected from 1.5 to 2.5 feet bss. The sediment profile thickness is approximately 4 feet and is described as medium sand overlaying firm fine sandy clay encountered at 2.7 feet bss. Estimated quantities of sediments greater than 1 mg/kg is 260 yd^3 with an estimated remedial action volume of 1,210 yd^3.

4.4.1.7 Deposit 7-3

Deposit 7-3 is located along the western shore in the main channel of the Milwaukee River in Zone 7. Total PCB concentrations range from 2.551 to 7.1051 mg/kg (SD-17W-E and SD-18W-B, respectively) and are located at 1.5 to 2.5 feet bss. The maximum sediment profile thickness in this deposit ranges from approximately 5 to 7 feet composed of silty clay with fine sand to 2.5 feet bss followed by increasing sandy silt to refusal. Estimated quantities of sediment greater than 1 mg/kg equal 1,320 yd^3 with an estimated remedial action volume of 3,800 yd^3.

4.4.1.8 Deposit 7-4

Deposit 7-4 is located at the eastern oxbow downstream confluence in Zone 7. This deposit is comprised of three sample locations (SD-20E-I, SD-21E-J, and SD-21E-F) with total PCB concentrations ranging from 1.105 to 2.448 mg/kg collected between 0.5 to 3.5 feet bss. Maximum sediment profile thickness is 4.5 feet at location SD-21E-F and is described as sandy silt. Estimated quantities of sediments greater than 1 mg/kg is 710 yd^3, with a remedial action volume of 2,090 yd^3.

4.5 Data Evaluation Summary

The RI data were evaluated by using a 3D interpolation method to delineate the horizontal and vertical extent of sediment containing total PCB concentrations equal to or greater than 1 mg/kg. The computer application Mining Visualization System (MVS) v9.22 by CTECH (www.ctech.com) was used to interpolate PCB concentrations. The PCB concentration distribution was modeled within a 3D mesh using a geostatistical process called kriging. The MVS model software uses expert systems to analyze the spatial distribution and number of field data points; construct a multidimensional variogram, which is a best fit to the dataset being analyzed; and then perform kriging in the domain of the model. One of the fundamental design criteria used in developing the variogram and kriging algorithms was to produce modeled distributions that honor the measured distributions as closely as possible.

4.5.1 Chemical Dataset

The chemical dataset included total PCB analytical results from sediment core samples collected during the 2010 RI conducted by CH2M HILL, as well as data collected immediately upstream of the Estabrook Spillway, which included the following PCB sediment core sample data: 2007 Milwaukee County data (Himalayan, 2008), 2009 STN data collected as part of the Phase 1 RI activities (STN, 2009), and Milwaukee County data collected in July 2010 (AECOM, 2010). The dataset resulted in a total of 287 samples from 108 locations (88—CH2M HILL, 19—Milwaukee County, and 1—STN, respectively). Historical data collected by WDNR from 2002 through 2003 within the Phase 2 project area

were not included due to age of the data resulting in potentially not representing current concentrations or sediment deposit conditions within a highly dynamic river system.

4.5.2 Interpolation Methods

Key attributes of the MVS-based interpolation approach for delineation of the extent of PCB concentrations are discussed in this subsection.

Total PCB concentrations were represented as point values located at corresponding horizontal coordinates (such as northing and easting) for each sampling station. The vertical position was represented by the sample midpoint depth below the top of the sediment surface. Analytical results from QA/QC samples were excluded.

Interpolation of PCB data was performed within two separate 3D meshes representing the project site. One 3D mesh was used from the start of Zone 4 to the upstream extent of the project north of the railroad bridge and the second 3D mesh started at Zone 4 and extended to the Estabrook Spillway (Zones 4 and 5). The eastern oxbow (Zone 6) was not included within either 3D mesh due to the low concentrations of total PCBs detected. Z-spacing of each grid was determined by sediment thickness and represented a maximum depth of 0.5 foot to represent the minimum sample interval and provide appropriate vertical resolution of the 3D mesh. During interpolation to each of the 3D meshes, the complete PCB dataset was used to prevent potentially different interpolation results at zone boundaries.

The 3D meshes of each zone and subzone were constructed with a normalized, flat-top and bottom sediment surface determined by probe refusal. The bottom sediment surface was measured in depth to better correlate PCB concentrations within sediment stratigraphy, rather than elevation. The lower boundary of the 3D mesh was defined by the sediment thickness data as determined by the sediment poling results and defined bank extent survey data previously discussed in Section 3.3.1. A sediment thickness value of 0.0 feet was assigned to the defined bank toe of slope survey location and was used to define the horizontal extent of the modeled area. Sediment thickness data representing the lower boundary surface of the 3D mesh was linearly interpolated to a 20- by 20-foot square grid using MicroStation Geopak tool, and then imported into MVS to define the vertical extent of the 3D analytical model.

4.5.3 Results

Once the 3D distribution of PCB concentrations was modeled, the sediment volume associated with a concentration greater or equal to 1 mg/kg total PCBs were calculated using MVS. In addition to a volume representative of total PCBs exceeding 1 mg/kg, an area and volume was calculated to estimate a remedial action volume. The remedial action volume includes overburden quantities to account for typical excavation construction methods. Overburden volumes include 1:1 (horizontal to vertical) side slopes and sediments less than 1 mg/kg located above targeted sediments greater or equal to 1 mg/kg.
A summary of sediment volumes and areas per deposit is located in Table 7. A visual representation of the modeled horizontal and vertical 1 mg/kg total PCB remedial action extent is located in Figure 6.

5 Ecological Survey

A baseline habitat assessment associated with the Lincoln Park/Milwaukee River Channel Phase 2 RI was performed on September 16 and 17, 2010. Appendix G contains a technical memorandum describing the objectives, procedures, and results of the habitat survey, as well as field documentation, photographs, and figures.

6 Summary and Conclusions

6.1 Physical Site Characteristics

The Lincoln Park/Milwaukee River Site includes approximately 1.5 miles of the Milwaukee River and is an active area that supports many recreational activities with the majority of access provided through public property owned by Milwaukee County. Water depths in the project area are largely a function of whether Estabrook Dam is open or closed and currently range from approximately 1 to 4 feet since the dam has remained open since 2009. Peak flow events occur in March and April, when individual averages are as great as 1,300 ft^3/s.

The banks of the Milwaukee River north of the Hampton Street Bridge consist of wide, exposed, sediment flats characterized as deposits of silt and sands with areas of gravel deposition having a varying thickness between 0 and 10 feet. The main channel north of the Hampton Street Bridge consisted of sands varying from 0.5 to 3 feet thick. South of the Hampton Street Bridge the river banks generally become steeper with narrow depositional areas located immediately adjacent to the banks with relatively shallow sediment thicknesses ranging from 0 to 6 feet. The main channel in this area contained a very thin to nonexistent sand layer of sediment above a bedrock subsurface.

Sediments located directly upstream of the Estabrook Spillway and along the southern shore are approximately 3 to 4 feet thick and range from a very organic rich surface layer transitioning to silty sand above a bedrock subsurface.

6.2 Nature and Extent of Contamination

Historical information, as well as current investigation, results have not identified any discrete contamination sources in Lincoln Creek, or the western oxbow of the Milwaukee River. Of the five separate PCB compounds (Aroclors 1016, 1248, 1254, and 1260) that have been detected during the RI activities, Aroclors 1248 and 1260 were the most frequently detected and detected at the highest concentrations. In general, total PCB concentrations greater than the RAL of 1 mg/kg occurred below the surficial sediments (greater than 0.5 foot) within deposits north of the Hampton Street Bridge, while deposits located downstream of the river bend at Zone 4 contained total PCB concentrations greater than the RAL beginning at the sediment surface. The maximum total PCB concentrations detected during RI activities was in the vicinity of the Estabrook Spillway with a concentration of 25.8 mg/kg.

However, analytical data collected by Milwaukee County in 2010 as part of the Estabrook Dam rehabilitation and sediment removal planning were shown to contain concentrations greater than 50 mg/kg at six of 15 sample locations collected at the spillway (AECOM, 2010).

Approximately 6,950 yd^3 of sediment with a concentration above the RAL of 1 mg/kg exists in 9 separate deposits within the project area. The estimated volume for the remedial action, which includes additional overburden estimates, is 19,000 yd^3 within a footprint of approximately 9.2 acres if excavation is selected as the preferred remedy for each deposit .

The largest sediment deposit is located directly upstream of the Estabrook Spillway and contains an estimated volume of 6,810 yd^3 (includes overburden) for remedial action if excavation is performed with approximately 1,380 yd^3 of the sediments being greater than 50 mg/kg.

TABLE 7
Summary of Sediment Volume >1 mg/kg total PCBs
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Deposit ID	>1 mg/kg Volume (yd^3)	>1 mg/kg Removal Volume (yd^3) w/ Overburden[a]	>1 mg/kg Removal Area (ft^2) w/ Overburden[a]
3a-1	160	560	14,400
4-1	40	40	7,100
4-2	470	470	43,500
4-3	60	60	31,900
5-1	3,890	6,810	122,300
7-1	40	3,960	50,200
7-2	260	1,210	26,000
7-3	1,320	3,800	62,100
7-4	710	2,090	42,700
TOTAL	6,950	19,000	400,200

Notes:
ft^2 - square feet
mg/kg - milligrams per kilogram
yd^3 - cubic yards

[a] Overburden represents the volume of sediment required to be removed for excavation stability (estimated at 1:1 side slope) and quantity of sediment < 1 mg/kg necessary for removal of sediments > 1 mg/kg.

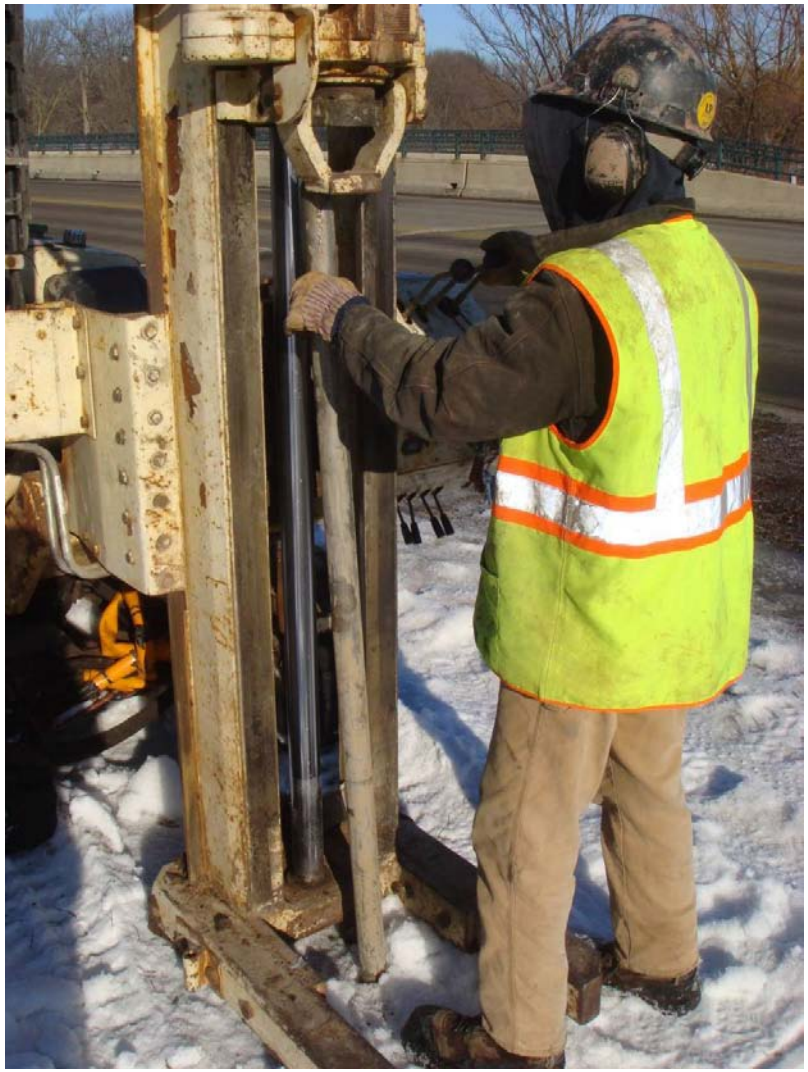
Appendix A
Coring Photograph Log

ATV-mounted Geoprobe rig used for sediment probing and core collection

Solid drive-point used for sediment probing with Geoprobe rig



Macro-core discrete sampler loaded with acetate sleeve for sediment core collection.

Solid point attached to rods prior to probing.

Discrete sampler can be driven to desired depth, opened, and then driven up to 5ft for sample collection into acetate sleeve.

Lexan core tubes used for manual core collection. Once driven to refusal, they are filled with water and capped to create vacuum.

Lexane is driven to desired depth or refusal using a fence post driver.

Lexane is capped to create vacuum to hold sediment in.

Lexane manually removed sediment and measured for recovery.

Retrieval of sediment sample using ponar device.

Ponar samples were collected for 0.0-0.5′ interval.

Removal of sample from ponar device.

Qualifier Definitions:

J : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.

J+ : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.

J- : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.

R : The data are unusable. (The compound may or may not be present.)

U : The analyte was analyzed for, but was not detected above the reported sample quantitation limit.

UJ : The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

TABLE C-5
Analytical Results - Pesticides
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Abbreviations:

ND - non detect

Qualifier Definitions:

J : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.

NJ : The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.

U : The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

R : The data are unusable. (The compound may or may not be present.)

Abbreviations:

ND - non detect

Qualifier Definitions:

J : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.

U : The analyte was analyzed for, but was not detected above the reported sample quantitation limit.

UJ : The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

NJ : The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.

R : The data are unusable. (The compound may or may not be present.)

TABLE C-7

Analytical Results - PAHs

Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Qualifier Definitions:

U : The analyte was analyzed for, but was not detected above the reported sample quantitation limit.

J : The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.

UJ : The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.

Appendix E
PCB Congener Results

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY
REGION V
SUPERFUND DIVISION

DATE:

SUBJECT: Review of Data
Received for Review on November 2, 2010

FROM: Timothy Prendiville, Supervisor (SR-6J)
Superfund Contract Management Section

TO: Data User: GLNPO/ CH2MHill
Email address: jones.brenda@epa.gov, goehl.sara@epa.gov, Adrienne.Korpela@ch2m.com, Huck.Raddemann@CH2M.com
Level 3 Data Validation

We have reviewed the data for the following case:

Site Name: Lincoln Park Sediment (WI)

Project Number: 40412 SDG Number: E4SH2-Congeners

Number and Type of Samples: 9 soils (PCB Congeners)

Sample Numbers: E4SH2, E4SN4, E4SN7, E4SP6, E4SQ0, E4SQ2 – E4SQ5

Laboratory: Cape Fear Analytical, LLC (CFA) Hrs for Review:

Following are our findings:

CC: Howard Pham
Region 5 TPO
Mail Code: SA-5J

Site Name: Lincoln Park Sediment (WI) SDG Number: E4SH2-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

Below is a summary of the out-of-control audits and the possible effects on the data for this case:

Nine (9) soil samples identified in the following table were collected between April 14, 2010 and April 16, 2010. All samples were received by Microbac Laboratories (AXYS Anal Serv.) located in Baltimore, MD on April 17 and 20, 2010 for PCB congeners analysis. The samples were then shipped to Cape Fear Analytical located in Wilmington, NC. The samples were received by Cape Fear Analytical at the proper shipping temperature range of 2 - 6°C. Two (2) samples E4SN7 and E4SP6 were broken upon receipt. The remaining (7) samples; E4SH2, E4SN4, E4SQ0 and E4SQ2 – E4SQ5 were received in good condition.

The samples were analyzed for the list of 209 PCB Congeners. The samples were analyzed according to CBC01.2, December 2009, [SOW for Analysis of Chlorinated Biphenyl (CB) Congeners] and qualified according to the National Functional Guidelines for Chlorinated Biphenyl Congeners, April 2009 and the Approach for Review of PCB Congener Data for GLNPO Legacy Act Projects, June 2009.

Sample No.	Station Location	Col. Date	Col. Time	Ext. date	Anal. date
E4SH2	LP2-SD04E-A0.0/1.0	4/14/2010	10:50	9/1/10	10/3/10
E4SN4	LP2-SD49N-A0.5/1.3	4/15/2010	15:35	8/25/10	9/10/10
E4SN7	LP2-SD50N-J0.0/0.8	4/15/2010	9:40	8/25/10	9/10/10
E4SP6	LP2-SD55N-J0.0/0.5	4/16/2010	12:10	8/25/10	10/6/10
E4SQ0	LP2-SD56S-A0.5/1.3	4/16/2010	12:30	8/25/10	9/10/10
E4SQ2	LP2-SD56S-K0.0/0.5	4/16/2010	13:00	8/25/10	9/10/10
E4SQ3	LP2-SD58S-B0.0/0.5	4/16/2010	12:10	8/25/10	9/10/10
E4SQ4	LP2-SD58S-B0.5/1.5	4/16/2010	12:15	8/25/10	9/10/10
E4SQ5	LP2-SD58S-B1.5/2.3	4/16/2010	12:20	8/25/10	9/10/10

The LCS/LCSD pairs were identified as LCS13332/LCSD13332 (extracted 08-25-10) and LCS13752/LCSD13752 (extracted 09-01-10).

The Method Blanks were identified as MB13332 (extracted 08-25-10) and MB13752 (extracted 09-01-10).

No samples were identified as field duplicate.

The samples were extracted on 08-25-2010 and 09-01-2010 and promptly analyzed in less than 1 year; therefore all results meet holding time criteria.

Site Name: Lincoln Park Sediment (WI) SDG Number: E4SH2-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

1. HOLDING TIME

No problems were found.

2. SYSTEM PERFORMANCE CHECK AND INSTRUMENT STABILITY

PFK and a molecular leak were used to tune the instrument to meet the minimum resolution power of 10,000 (10% valley) at the following m/z(s).

m/z	m/z	m/z	m/z
180.988	204.988	218.985	230.985
242.985	254.985	280.982	292.982
304.982	318.979	330.979	354.979
366.979	380.976	392.976	404.976
416.976	430.972	442.972	454.972
466.972	480.969	492.969	504.969
516.969			

Static resolving power checks were performed at the beginning and end of each 12-hour shift in the analytical sequence.

CS3/WDM standards (analyzed 9/9/10 @ 21:50 and 10/3/10 @ 0:19) were not reported on the associated 5B-Form V CB-2 (Instrument Performed Check-CB Congener Chromatographic Resolution Summary). However, raw data and Form 5A-Form V CB-1 (Instrument Performed Check-CB Congener WDM Summary) for these standards were submitted with the data package.

No problems were found.

3. CALIBRATION

Wrong Ion Abundance Ratio QC limit for PCB-16 was listed on all form 6E-Form VI CB-5. It was listed in-correctly as 1.33 – 1.79. The corrected IAR limit for PCB-16 is 0.88 – 1.2 according to table 8 (Theoretical Ion Abundance Ratios and QC limits) in SOW CBC01.2. The Ion Ratio for PCB-16 in all 209 Daily CCVs were within the QC limit; therefore, no qualification is required.

The values reported in “Conc. Found” column for 7B,D-Form VII CB-2,4 were actually the %Ds not the concentration found for the PCB congeners in the CCVs. All %Ds for CCVs were within the QC limits of +/-30%.

4. BLANKS

The Method Blanks were identified as MB13332 (extracted 08-25-10) and MB13752 (extracted 09-01-10).

MB13752 contains PB-52 at 2.57 pg/g, PCB-95 at 3.11 pg/g, PCB-118 at 2.16 pg/g, total Tetra PCBs at 2.57 pg/g and total Penta PCBs at 5.27 pg/g. However, no qualification is required for the associated sample (E4SH2) because the sample results were greater than 10X the blank results.

5. IDENTIFICATION CRITERIA

Ion Abundance Ratio was not reported on the laboratory sample summary form. Raw data were used to evaluate this criterion. All Ion Abundance Ratios for the reported PCB congeners were within the QC limits according to the raw data. Therefore, no qualification is required.

6. TOXIC CB CONGENERS

The list of Toxic CB Congeners consists of PCB-77, PCB-81, PCB-105, PCB-114, PCB-118, PCB123, PCB-126, PCB-156/157, PCB-167, PCB-169 and PCB-189.

8. LAB CONTROL SAMPLE (QUALITY CONTROL SUMMARY SPIKE RECOVER REPORT)

The LCS/LCSD pairs were identified as LCS13332/LCSD13332 (extracted 08-25-10) and LCS13752/LCSD13752 (extracted 09-01-10).

The recoveries and percent RPDs for the spiked PCB congeners were within the QC limit; therefore, no action is required.

9. LABELED COMPOUND RECOVERIES (SURROGATE RECOVERY REPORT)

According to the laboratory narrative, No labeled compound percent recoveries were reported for samples E4SQ0 (DF=20), E4SQ2 (DF=10), E4SQ3 (DF=10), E4SQ4 (DF=20), E4SQ5 (DF=20), E4SN4 (DF=20), E4SN7 (DF=20) and E4SP6 (DF=100) because these samples were analyzed at dilution and surrogate were diluted out.

The labeled compound percent recoveries were only reported for the method blanks, LCS/LCSD and sample E4SH2. The recoveries for these samples were within the QC limits; therefore, no qualification is required.

10. FIELD QC SAMPLES

No samples were identified as field blanks or field duplicates.

11. LAB QC SAMPLES

No PE (Performance Evaluation Sample) was provided to the laboratory for analysis. No laboratory duplicate samples were analyzed. However the Laboratory Control Samples were analyzed in duplicate for precision evaluation and the RPDs were within the QC limit; therefore, no qualification is required.

12. TARGET COMPOUND IDENTIFICATION

The non-detected congeners were reported at the adjusted CRQLs as identified in SOW CBC01.2 (12/09) Exhibit C – Section 1 [Pages C-3 thru C-7]. The adjusted CRQLs were reported as the Practical Quantitation Limits (PQL) on the "Certificate of Analysis – Sample Summary" form.

No problems were found.

13. ADDITIONAL INFORMATION

No Exes file is available for this SDG.

The following samples have one or more congeners whose concentration exceeded the laboratory's upper calibration limit and no further dilution was performed. The detected congeners are qualified "J".

E4SP6
PCB-15, PCB-16, PCB-17, PCB-18, PCB-20, PCB-22, PCB-25, PCB-31, PCB-32, PCB-37, PCB-40, PCB-42, PCB-44, PCB-49, PCB-52, PCB-56, PCB-61, PCB-64, PCB-66, PCB-95, PCB-118

E4SQ0
PCB-52, PCB-66

The samples were analyzed accordingly to the SOW CBC01.2. However, non-standard Forms were used in the data package. The following Forms were used to evaluate the sample results:

- "Certificate of Analysis – Sample Summary" form is equivalent to 1A-Form I CB-1, 1B-Form I CB-2, 2A-Form II CB-1

- Quality Control Summary – Spike Recovery Report is equivalent to forms 3A-Form III CB-1, and 3B-Form III CB-2.

- Surrogate Recovery Report is equivalent to 2A - Form II CB-1 [Toxics/LOC CB Congener (Labeled) Compound Recovery]. This forms were used for the method blanks LCS/LCSD and sample E4SH2 only. This form was not used for samples

E4SQ0, E4SQ2, E4SQ3, E4SQ4, E4SQ5, E4SN4, E4SN7 and E4SP6 because these samples were analyzed at dilution and surrogate were diluted out.

- Laboratory forms "6A,C-Form VI CB-1,3" is equivalent to 6A-Form VI CB-1, 6C-Form VI CB-3 and 6F-Form VI CB-6 of SOW CBC01.2.

- Laboratory forms "6B,D-Form VI CB-2,4" is equivalent to 6B-Form VI CB-2, 6D-Form VI CB-4 and 6G-Form VI CB-7 of SOW CBC01.2.

- Laboratory forms "7A,C-Form VII CB-1,3" is equivalent to 7A-Form VII CB-1, 7C-Form VII CB-3 and 7F-Form VII CB-5 of SOW CBC01.2.

- Laboratory forms "7B,D-Form VII CB-2,4" is equivalent to 7B-Form VII CB-2, 7D-Form VII CB-4 and 7G-Form VII CB-6 of SOW CBC01.2.

Site Name: Lincoln Park Sediment (WI) SDG Number: E4SH2-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

Data Qualifier Definitions

U The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted Contract Required Quantitation Limit (CRQL) for sample and method.

J The analyte was positively identified and the associated numerical value is the approximated concentration of the analyte in the sample [due either to the quality of the data generated because certain Quality Control (QC) criteria were not met, or the concentration of the analyte was below the adjusted CRQL].

UJ The analyte was not detected at a level greater than or equal to the adjusted CRQL or the reported adjusted CRQL is approximate and may be inaccurate or imprecise.

R The sample results are unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.

EML Estimated Minimum Level of Quantitation – level at which the congener can be determined with laboratory contamination present.

EMDL Estimated Method Detection Limit – level at which the congener can be determined with no interferences present.

SUPERFUND DIVISION

DATE:

SUBJECT: Review of Data
Received for Review on November 3, 2010

FROM: Timothy Prendiville, Supervisor (SR-6J)
Superfund Contract Management Section

TO: Data User: GLNPO/ CH2MHill
Email address: jones.brenda@epa.gov, goehl.sara@epa.gov, Adrienne.Korpela@ch2m.com, Huck.Raddemann@ch2m.com
Level 3 Data Validation

We have reviewed the data for the following case:

Site Name: Lincoln Park Sediment (WI)

Project Number: 40412 SDG Number: E4RX9-Congeners

Number and Type of Samples: 20 soils (PCB Congeners)

Sample Numbers: E4RX9, E4S07, E4S17, E4S88, E4S99, E4SA0, E4SA8, E4SC0, E4SF5, E4SH3, E4SH6, E4SJ1, E4SJ9, E4SL1, E4SL7, E4SM6, E4SM7, E4SM8, E4SM9, E4SN0

Laboratory: Cape Fear Analytical, LLC (CFA) Hrs for Review:

Following are our findings:

CC: Howard Pham
Region 5 TPO
Mail Code: SA-5J

Site Name: Lincoln Park Sediment (WI) SDG Number: E4RX9-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

Below is a summary of the out-of-control audits and the possible effects on the data for this case:

Twenty (20) soil samples identified in the following table were collected between February 24, 2010 and April 15, 2010. All samples were received by Microbac Laboratories (AXYS Anal Serv.) located in Baltimore, MD between March 1, 2010 and April 20, 2010 for PCB congeners analysis. The samples were then shipped to Cape Fear Analytical located in Wilmington, NC. The samples were received by Cape Fear Analytical at the proper shipping temperature range of 2 - 6°C. Two (2) samples; E4SA0 and E4SL1 were broken upon receipt. The remaining (18) samples were received in good condition.

The samples were analyzed for the list of 209 PCB Congeners. The samples were analyzed according to CBC01.2, December 2009, [SOW for Analysis of Chlorinated Biphenyl (CB) Congeners] and qualified according to the National Functional Guidelines for Chlorinated Biphenyl Congeners, April 2009 and the Approach for Review of PCB Congener Data for GLNPO Legacy Act Projects, June 2009.

Sample No.	Lab ID	Station Location	Collection Date	Collection Time	Extraction date	Analysis date

Site Name: Lincoln Park Sediment (WI) SDG Number: E4RX9-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

The LCS and LCSD were extracted on 08-24-10 and identified as LCS13252 and LCSD13252.

The Method Blank was extracted 08-24-10 and identified as MB13252.

Sample E4S07 was designated by the samplers to be used for laboratory QC, i.e. MS / MSD analyses.

Sample E4SM7 was identified as field duplicate of sample E4SM6. Sample E4SH3 was identified as field duplicate sample but its duplicate sample is not included in this SDG.

The samples were extracted on 08-24-2010 and promptly analyzed in less than 1 year; therefore, all results meet holding time criteria.

Site Name: Lincoln Park Sediment (WI) SDG Number: E4RX9-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

1. HOLDING TIME

No problems were found.

2. SYSTEM PERFORMANCE CHECK AND INSTRUMENT STABILITY

PFK and a molecular leak were used to tune the instrument to meet the minimum resolution power of 10,000 (10% valley) at the following m/z(s).

m/z	m/z	m/z	m/z
180.988	204.988	218.985	230.985
242.985	254.985	280.982	292.982
304.982	318.979	330.979	354.979
366.979	380.976	392.976	404.976
416.976	430.972	442.972	454.972
466.972	480.969	492.969	504.969
516.969			

Static resolving power checks were performed at the beginning and end of each 12-hour shift in the analytical sequence.

CS3/WDM standards (analyzed 9/6/10 @ 05:45 and 09/10/10 @ 08:59) were not reported on the associated 5B-Form V CB-2 (Instrument Performed Check-CB Congener Chromatographic Resolution Summary). However, raw data and Form 5A-Form V CB-1 (Instrument Performed Check-CB Congener WDM Summary) for these standards were submitted with the data package.

No problems were found.

3. CALIBRATION

The wrong Ion Abundance Ratio QC limit for PCB-16 was listed on all form 6E-Form VI CB-5. It was listed in-correctly as 1.33 – 1.79. The correct IAR limit for PCB-16 is 0.88 – 1.2 according to table 8 (Theoretical Ion Abundance Ratios and QC limits) in SOW CBC01.2. The Ion Ratio for PCB-16 in all 209 Daily CCVs were within the QC limit; therefore, no qualification is required.

The values reported in “Conc. Found” column for 7B,D-Form VII CB-2,4 were actually the %Ds not the concentration found for the PCB congeners in the CCVs. All %Ds for CCVs were within the QC limits (+/-30% for toxic congeners and +/-50% for surrogates and cleanup standards).

Site Name: Lincoln Park Sediment (WI) SDG Number: E4RX9-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

The RRT (1.001) of PCB-1 for closing CS3 standard (analyzed 9/6/10 @ 5:45) was outside the QC limit of 1.005 – 1.02. However, none of the samples in this SDG was analyzed in this analytical sequence.

4. BLANKS

The Method Blank was extracted 08-24-10 and identified as MB13252.

MB13252 contains PB-52 at 2.35 pg/g. No qualification is required for the associated samples because the sample results were non-detected or greater than 10X the blank result.

5. IDENTIFICATION CRITERIA

The Ion Abundance Ratios were not reported on the laboratory sample summary forms. Raw data were used to evaluate this criterion. All Ion Abundance Ratios for the reported PCB congeners were within the QC limits according to the raw data; therefore, no qualification is required.

6. TOXIC CB CONGENERS

The list of Toxic CB Congeners consists of PCB-77, PCB-81, PCB-105, PCB-114, PCB-118, PCB123, PCB-126, PCB-156/157, PCB-167, PCB-169 and PCB-189.

8. MATRIX SPIKE / MATRIX SPIKE RECOVERIES

Sample E4S07 was designated by the samplers to be used for laboratory QC, i.e. MS / MSD analyses.

The RPDs for PCB-4, PCB-37, PCB-54, PCB-77, PCB-81, PCB-104, PCB-105, PCB-114, PCB-118, PCB-123, PCB-126, PCB-155, PCB-156/157, PCB-167, PCB-169, PCB-188, PCB-189, PCB-202, PCB-205, PCB-206, PCB-208 and PCB-209 in the MS/MSD analyses of sample E4S07 were above the QC limits. As a result of non-compliant RPDs, the following detected results were qualified as estimated (J) and non-detected results as estimated (UJ) in the associated parent sample:

- PCB-4, PCB-37, PCB-54, PCB-77, PCB-81, PCB-104, PCB-105, PCB-114, PCB-118, PCB-123, PCB-126, PCB-155, PCB-156/157, PCB-167, PCB-169, PCB-188, PCB-189, PCB-202, PCB-205, PCB-206, PCB-208 and PCB-209 in sample E4S07.

The recoveries of PCB-4, PCB-15, PCB-19 and PCB-37 in E4S07MS and E4S07MSD were above the QC limits. The recoveries of PCB-77, PCB-81, PCB-105, PCB-114, PCB-118, PCB-156/157, PCB-167 and PCB-169 in E4S07MS were above the QC limits. Non-detected PCB-81 and PCB-169 are not qualified for elevated recoveries but qualified (UJ) for non-compliant RPDs. As a result of the elevated recoveries, the following detected results were qualified as estimated (J) in the associated parent sample:

- PCB-4, PCB-15, PCB-19, PCB-37, PCB-77, PCB-81, PCB-105, PCB-114, PCB-118, PCB-156/157, PCB-167 and PCB-169 in E4S07.

The recoveries of PCB-206 in E4S07MS and E4S07MSD were below the QC limits. The recoveries of PCB-77, PCB-105, PCB-118, PCB-123, PCB-156/157, PCB-167, PCB-189, PCB-202, PCB-205, PCB-208 and PCB-209 in E4S07MSD were below the QC limits. As a result of the low recoveries, the following detected results were qualified as estimated (J) in the associated parent sample:

- PCB-77, PCB-105, PCB-118, PCB-123, PCB-156/157, PCB-167, PCB-189, PCB-202, PCB-205, PCB-206, PCB-208 and PCB-209 in E4S07.

9. LAB CONTROL SAMPLE (QUALITY CONTROL SUMMARY SPIKE RECOVER REPORT)

The LCS and LCSD were extracted on 08-24-10 and identified as LCS13252 and LCSD13252.

The relative percent different ((RPDs) for the spiked PCB congeners in the LCS-13252 and LCSD-13252 analyses were within the QC limit. The recovery for PCB-15 (157%) in the LCSD-13252 analysis was above the QC limit of 50% - 150%. As a result of the elevated recovery, the following detected results were qualified as estimated (J):

- PCB-15 in samples E4RX9, E4S07, E4S17, E4S88, E4S99, E4SA0, E4SA8, E4SC0, E4SF5, E4SH6, E4SJ1, E4SJ9, E4SL7, E4SM6, E4SM7, E4SM8, E4SM9, E4SN0

10. LABELED COMPOUND RECOVERIES (SURROGATE RECOVERY REPORT)

According to the laboratory narrative, no labeled compound percent recoveries were reported for the field samples because all samples were analyzed at the dilution and surrogates were diluted out. The dilution factors for the field samples were summarized in the following table:

EPA ID	Lab ID	Dilution factors	EPA ID	Lab ID	Dilution factors
E4RX9	1555003	10	E4SH3	1555010	10
E4S07	1555001	10	E4SH6	1555011	50
E4S07MS	1555001	10	E4SJ1	1555012	50
E4S07MSD	1555001	10	E4SJ9	1555013	40
E4S17	1555002	10	E4SL1	1555015	20
E4S88	1555007	20	E4SL7	1555014	20
E4S99	1555005	100	E4SM6	1555016	20
E4SA0	1555006	100	E4SM7	1555017	50
E4SA8	1555004	20	E4SM8	1555018	80
E4SC0	1555008	20	E4SM9	1555019	100
E4SF5	1555009	100	E4SN0	1555020	100

The labeled compound percent recoveries were only reported for the method blank and LCS/LCSD. The recoveries for these QC samples were within the QC limits; therefore, no qualification is required.

11. FIELD QC SAMPLES

Sample E4SM7 was identified as field duplicate of sample E4SM6. Sample E4SH3 was identified as field duplicate sample but its duplicate sample is not included in this SDG. A summary of the field duplicate sample results and RPDs for E4SM6 and E4SM7 are presented in the Excel spreadsheet included with this report.

Sample results are not qualified based on the results of field duplicate samples.

12. LAB QC SAMPLES

No PE (Performance Evaluation Sample) was provided to the laboratory for analysis. No laboratory duplicate samples were analyzed. However the Laboratory Control Samples were analyzed in duplicate for precision evaluation and the RPDs were within the QC limit; therefore, no qualification is required.

13. TARGET COMPOUND IDENTIFICATION

The non-detected congeners were reported at the adjusted CRQLs as identified in SOW CBC01.2 (12/09) Exhibit C – Section 1 [Pages C-3 thru C-7]. The adjusted CRQLs were reported as the Practical Quantitation Limits (PQL) on the "Certificate of Analysis – Sample Summary" form.

No problems were found.

14. ADDITIONAL INFORMATION

No Exes file is available for this SDG. A summary of the sample results and the recommended qualifications are presented in the Excel spreadsheet included with this report.

The following samples have one or more congeners whose concentration exceeded the laboratory's upper calibration limit and no further dilution was performed. The detected congeners are qualified "J".

E4SA0
PCB-4, PCB-17, PCB-20/28, PCB-31, PCB-52

E4SF5
PCB-31, PCB-40/71, PCB-44/47/65, PCB-52, PCB-56, PCB-64, PCB-66, PCB-118

E4SM7
PCB-52

E4SM9
PCB-52, PCB-66

The samples were analyzed accordingly to the SOW CBC01.2. However, non-standard Forms were used in the data package. The following Forms were used to evaluate the sample results:

- "Certificate of Analysis – Sample Summary" form is equivalent to 1A-Form I CB-1, 1B-Form I CB-2, 2A-Form II CB-1

- Quality Control Summary – Spike Recovery Report is equivalent to forms 3A-Form III CB-1, and 3B-Form III CB-2.

- Surrogate Recovery Report is equivalent to 2A - Form II CB-1 [Toxics/LOC CB Congener (Labeled) Compound Recovery]. This forms were used for the method blanks LCS/LCSD and sample E4SH2 only. This form was not used for samples E4SQ0, E4SQ2, E4SQ3, E4SQ4, E4SQ5, E4SN4, E4SN7 and E4SP6 because these samples were analyzed at dilution and surrogate were diluted out.

- Laboratory forms "6A,C-Form VI CB-1,3" is equivalent to 6A-Form VI CB-1, 6C-Form VI CB-3 and 6F-Form VI CB-6 of SOW CBC01.2.

- Laboratory forms "6B,D-Form VI CB-2,4" is equivalent to 6B-Form VI CB-2, 6D-Form VI CB-4 and 6G-Form VI CB-7 of SOW CBC01.2.

- Laboratory forms "7A,C-Form VII CB-1,3" is equivalent to 7A-Form VII CB-1, 7C-Form VII CB-3 and 7F-Form VII CB-5 of SOW CBC01.2.

- Laboratory forms "7B,D-Form VII CB-2,4" is equivalent to 7B-Form VII CB-2, 7D-Form VII CB-4 and 7G-Form VII CB-6 of SOW CBC01.2.

Site Name: Lincoln Park Sediment (WI) SDG Number: E4RX9-Congeners
Case Number: 40412 Lab: Cape Fear Analytical

Data Qualifier Definitions

U The analyte was analyzed for, but was not detected at a level greater than or equal to the level of the adjusted Contract Required Quantitation Limit (CRQL) for sample and method.

J The analyte was positively identified and the associated numerical value is the approximated concentration of the analyte in the sample [due either to the quality of the data generated because certain Quality Control (QC) criteria were not met, or the concentration of the analyte was below the adjusted CRQL].

UJ The analyte was not detected at a level greater than or equal to the adjusted CRQL or the reported adjusted CRQL is approximate and may be inaccurate or imprecise.

R The sample results are unusable due to the quality of the data generated because certain criteria were not met. The analyte may or may not be present in the sample.

EML Estimated Minimum Level of Quantitation – level at which the congener can be determined with laboratory contamination present.

EMDL Estimated Method Detection Limit – level at which the congener can be determined with no interferences present.

Data Quality Evaluation

2010 Data Quality Evaluation
Lincoln Park/Milwaukee River Channel Sediments Site—Milwaukee, Wisconsin
WA No. 064-RICO-2508 / Contract No. EP-S5-06-01

PREPARED FOR: Brenda Jones /USEPA, GLNPO
Louis Blume/USEPA, GLNPO

PREPARED BY: Heather Hodach/CH2M HILL

COPIES TO: Dan Plomb/CH2M HILL
Huck Raddemann/CH2M HILL
Adrienne Korpela/CH2M HILL

DATE: August 27, 2010

Introduction

The objective of the Data Quality Evaluation memorandum is to assess the data quality of analytical results for samples collected at the Lincoln Park/Milwaukee River Channel Sediment site, during February, March, and April 2010. Samples were collected and analyzed with the objective to verify existing data, fill identified data gaps, and collect site-specific information to support the evaluation of remedial alternatives and the subsequent development of a remedial design. Individual method requirements and guidelines from the *Quality Assurance Project Plan* (CH2M HILL, 2010), *Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review* (USEPA, 2008), and *Contract Laboratory Program National Functional Guidelines for Inorganic Data Review* (USEPA, 2004) were used in this assessment.

This report is intended as a general data quality assessment designed to summarize data issues.

Analytical Data

The following are the analytical laboratory analyses for samples collected:

- 267 sediment samples from 88 locations (exclusive of field quality control [QC] samples) were analyzed for one or more of the following: polychlorinated biphenyl (PCB) Aroclors, pesticides, semivolatile organic compounds (SVOCs), metals, total organic carbon (TOC), and grain size.
- 27 field duplicate samples were collected at 25 locations for the same analyses as the sediment sample at the given location.

- 29 sediment samples from 23 locations were selected for PCB congener analysis. The congener data were sent for analysis in August 2010 and will be evaluated separately at a later date.
- Three equipment blanks were collected during the sampling events to evaluate field sampling and decontamination procedures.
- Waste characterization analysis (toxicity characteristic leaching procedure [TCLP]) samples were collected from each of the two 55-gallon waste drums. One sediment and one aqueous sample were collected.

The PCB Aroclor, PCB congener, metals, pesticide, and SVOC data were analyzed by the USEPA Contract Laboratory Program (CLP) and subsequently reviewed by CSC. Attachment 1 contains the case narratives prepared by CSC during data reviews. The findings of the reviews are summarized in the following paragraphs.

The TOC and grain size data were analyzed by the USEPA Central Regional Laboratory (CRL) and reviewed by CH2M HILL. See Attachment 2 for the TOC and grain size data summary.

Samples were collected and shipped by overnight carrier to the laboratories for analysis. Selected samples were analyzed for one or more of the analytes/methods in Table 1.

TABLE 1
Analytical Parameters

Parameter	Method	Laboratory
PCB Aroclors	SOM01.2 Modified	CLP
PCB Congeners	CBC01.2	CLP
SVOCs	SOM01.2 Modified	CLP
Pesticides	SOM01.2 Modified	CLP
Target Analyte List Metals	ILM05.4	CLP
Total Organic Carbon	SOP – AIG009 Rev#5.1	CRL
Grain Size	SOP – AIG038A Rev#00&Rev#02	CRL
Waste Characterization		
Total PCB Aroclors	SOM01.2 Modified	CLP
TCLP Volatile Organic Compounds	SOM01.2 Modified	CLP
TCLP SVOC	SOM01.2 Modified	CLP
TCLP Pesticides	SOM01.2 Modified	CLP
TCLP Metals	ILM05.4 Modified	CLP

The assessment of data included a review of the following:

- Chain-of-custody documentation

- Holding-time compliance
- Required QC samples at the specified frequencies
- Flagging for method blanks
- Laboratory control spiking samples
- Surrogate spike recoveries for organic analyses
- Analytical spike data
- Matrix spike/matrix spike duplicate samples on a site/location basis
- Equipment blank samples
- Field duplicate samples
- Trip blank samples

Findings

The following sections summarize the data validation findings and usability of the final reportable results. The sample numbers and locations do not include quality assurance/QC samples.

PCB Aroclor and PCB Congener Data

PCB Aroclor data were assessed for nine Aroclors from 267 sediment samples collected at 88 locations, resulting in 2,403 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the PCB Aroclor data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the method detection limit (MDL) and the reporting limit (RL).

Thirty eight of the PCB Aroclor results (1.6%) from 29 samples were rejected, which consisted of one or more of the following nine analytes: Aroclor 1016, Aroclor 1221, Aroclor 1232, Aroclor 1242, Aroclor 1248, Aroclor 1254, Aroclor 1260, Aroclor 1262, and Aroclor 1268, and should not be used to make project decisions. Most of the data were rejected due to a percent difference (>100%) between the primary and confirmation columns. With a variation of >100%, the concentration could not be reliably established. Some parameters that were nondetects were rejected due to extremely low surrogate recoveries, which could result in the data being biased very low.

The PCB congener data were sent to the laboratory for analysis at the beginning of August 2010. The analytical results will be reviewed and reported at a later date.

Pesticide Data

Pesticide data were assessed for 21analytes from 267 sediment samples collected at 88 locations, resulting in 5,607 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the pesticide data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

Three-hundred and fifty-one of the pesticide results (6.3%) from 127 samples were rejected, which consisted of one or more of the following 17 analytes: 4,4'-DDD, 4,4'-DDT, 4,4'-DDE, alpha-BHC, alpha-chlordane, beta-BHC, beta-chlordane, delta-BHC, dieldrin, endosulfan I, endosulfan II, endosulfan sulfate, endrin, endrin aldehyde, endrin ketone, gamma-BHC, heptachlor, heptachlor epoxide, and methoxychlor, and should not be used to make project decisions. Most of the data were rejected due to a percent difference (>100%) between the primary and confirmation columns. With a variation of >100%, the concentration could not be reliably established.

Semivolatile Data

Polycyclic aromatic hydrocarbon data were assessed for 17 analytes from 267 sediment samples collected at 88 locations resulting in 4,539 results. In addition, 68 of the samples from 44 locations were assessed for 50 semivolatile analytes resulting in 3,400 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the semivolatile data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

None of the reported SVOC results were rejected. One hundred percent of the SVOC data, as qualified, can be used to make project decisions.

Metals Data

Metals data were assessed for 23 analytes from 267 sediment samples collected at 88 locations, resulting in 6,141 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the metals data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

Nineteen of the metals results (0.3%) from 17 samples were rejected, which consisted of one or more of the following analytes: antimony, copper, and zinc, and should not be used to make project decisions. Most of the data were rejected due to a matrix spike recovery outside the expanded low criteria and/or a post-digestion spike less than the low limit, which could result in the data being biased very low. The copper and zinc results were rejected due to a sample in a field duplicate pair having >5 times the contract-required quantification limit and an absolute difference of >4 times the contract-required quantification limit, which could result in the data being biased very high.

TCLP Data

One sample was collected from each of the two 55-gallon waste drums: one sediment, one aqueous. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

Both sample results for PCB Aroclor 1254 were rejected and should not be used to make project decisions. The data were rejected due to a percent difference >100 percent between the primary and confirmation columns. With a variation of >100 percent, the

concentration could not be reliably established. Some parameters that were nondetects were rejected due to extremely low surrogate recoveries, which could result in the data being biased very low

Overall Assessment

The final activity in the data quality evaluation is an assessment of whether the data meets the data quality objectives. The goal of the assessment was to demonstrate that a sufficient number of representative samples were collected, and the resulting analytical data can be used to support the decision making process. The following summary highlights the data evaluation findings for the above-defined events:

1. The completeness objective of 90 percent was met for all method/analyte combinations.
2. The precision and accuracy of the data, as measured by field and laboratory QC indicators, indicate that the data quality objectives were met.

DATE: June 4, 2010

SUBJECT: Review of Data
Received for Review on: 7 April 2010

FROM: Caryn Wojtowicz
Senior Chemist

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1886.0, 1887.0, 1888.0

SDG Number: E4RS0

Number and Type of Samples: Sixteen (16) sediment samples

Sample Numbers: E4RS0 - E4RS2, E4RS4-E4RS9, E4RT2 - E4RT6, E4RX0 and E4RX1

Laboratory: ALS Laboratory Group (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA

Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Sixteen (16) sediment samples, labeled E4RS0 through E4RS2, E4RS4 through E4RS9, E4RT2 through E4RT6, E4RX0 and E4RX1, were shipped to ALS Laboratory Group (DataChem) located in Salt Lake City, Utah. All samples were collected on 2/25/2010 and were received intact on 2/27/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 8 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Sample results were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 data validation SOPs.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually sediment samples.

Some samples in this SDG were originally reported with some sample results below the sample specific MDLs with a "J" flag. The EDD, Form 1s and other data summary forms for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s

There is a slight difference between the CRQL values reported on the Form 1s and the values reported in the EDD for several samples, due to rounding errors. In addition, the Forms 1, 3 and 10 for some samples report compound concentrations below the MDL. The EDD contains the correct values. Specific instances are detailed in the Additional Information section of this review narrative.

GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data based on these discrepancies.

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples E4RT5 and E4RT6 as field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction as follows: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "NJ", "UJ", "U", "J".

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

All semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for Benzo(b)fluoranthene and Benzo(k)fluoranthene. Detected Benzo(b)fluoranthene and Benzo(k)fluoranthene are qualified J. Nondetected Benzo(b)fluoranthene and Benzo(k) remain unchanged.

E4RS0, E4RS1, E4RS1MS, E4RS1MSD, E4RS2, E4RS4, E4RS5, E4RS6, E4RS7, E4RS8, E4RS9, E4RT2, E4RT3, E4RT4, E4RT5, E4RT6, E4RT6DL, E4RX0, E4RX1

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria for the compound Benzo(b)fluoranthene. Detected Benzo(b)fluoranthene are qualified J. Nondetected Benzo(b)fluoranthene are qualified UJ.

E4RS7, E4RT5, E4RT6, E4RT6DL, E4RX1

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table:

Semivolatile analytes	E4RT5 µg/Kg	E4RT6 µg/Kg	%RPDs
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	130	150	14
Fluorene	200	260	26
Phenanthrene	1100	1600	37
Anthracene	240	290	19
Fluoranthene	1500	1900	24
Pyrene	1400	2600	60
Benzo(a)anthracene	900	1200	29
Chrysene	850	1200	34
Benzo(b)fluoranthene	1100	1600	37
Benzo(k)fluoranthene	290	490	51
Benzo(a)pyrene	800	1000	22
Indeno(1,2,3-cd)pyrene	390	420	7.4
Dibenzo(a,h)anthracene	120	120	0
Benzo(g,h,i)perylene	420	510	19

Benzo (k) fluoranthene has a % RPD exceeding 50%. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds remain unchanged.

E4RS1 Benzo(k)fluoranthene
E4RS1MS Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS1MSD Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene
E4RS2 Fluorene, Anthracene
E4RS4 Anthracene, Benzo(k)fluoranthene
E4RS5 Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo (g,h,i)perylene
E4RS6 Anthracene
E4RS7 Acenaphthene, Fluorene, Anthracene, Benzo(k)fluoranthene
E4RS8 Fluoranthene

E4RS9 Phenanthrene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT2 Acenaphthene, Dibenzo(a,h)anthracene
E4RT4 Anthracene, Benzo(k)fluoranthene
E4RT5 Acenaphthene, Dibenzo(a,h)anthracene
E4RT6 Acenaphthene, Dibenzo(a,h)anthracene
E4RT6DL Acenaphthene, Fluorene, Anthracene
E4RX0 Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1 Anthracene, Benzo(k)fluoranthene

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS4, E4RS5, ER4S7, E4RT6DL, E4RX1, E4RS1MS, E4RS1MSD

The following original semivolatile sample reported a concentration that exceeded the calibration range of the instrument and was flagged “E” by the laboratory. As per the NFG, the result was flagged “J”. A diluted sample analysis was performed as required. The results from the diluted sample should be used for result validation.

E4RT6 Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile SIM sample has an analyte concentration reported less than the CRQL. The associated method blank concentration is less than the CRQL. The detected compound is qualified U at the CRQL.

E4RT3 Benzo(k)fluoranthene

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

The semivolatile SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Sample levels were greater than10 times the spiking level; detected compounds are qualified J.

E4RS1, E4RS1MS, E4RS1MSD Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are field duplicates according to the field sampling plan**.** Results are summarized in the following tables:

Semivolatile SIM analytes	**E4RT5** µg/Kg	**E4RT6** µg/Kg	**%RPDs**
Naphthalene	10	22	75
2-Methylnaphthalene	24	37J	43

Semivolatile SIM analytes	E4RT5 µg/Kg	E4RT6 µg/Kg	%RPDs
Acenaphthylene	5.7	6.3	10
Acenaphthene	50J	70J	33
Fluorene	73J	98J	29
Phenanthrene	320J	590J	59
Anthracene	73J	130J	56
Fluoranthene	400J	710J	56
Pyrene	860J	1200J	33
Benzo(a)anthracene	500J	650J	26
Chrysene	490J	600J	20
Benzo(b)fluoranthene	690J	1000J	37
Benzo(k)fluoranthene	190J	260J	31
Benzo(a)pyrene	500J	700J	33
Indeno(1,2,3-cd)pyrene	360J	580J	47
Dibenzo(a,h)anthracene	82J	130J	45
Benzo(g,h,i)perylene	290J	460J	45

Semivolatile SIM analytes	E4RT5DL µg/Kg	E4RT6DL µg/Kg	%RPDs
Naphthalene	ND	ND	NA
2-Methylnaphthalene	23J	33	36
Acenaphthylene	9.9J	10J	1.0
Acenaphthene	76	110	37

Benzo(a)anthracene	690J	930J	30
Chrysene	700J	890J	24
Benzo(b)fluoranthene	870J	1100J	23
Benzo(k)fluoranthene	250	330J	28
Benzo(a)pyrene	630J	770J	20
Indeno(1,2,3-cd)pyrene	400J	490J	20
Dibenzo(a,h)anthracene	81	97	18
Benzo(g,h,i)perylene	350J	410J	16

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS1DL, E4RS8, E4RS8DL, E4RX0DL, E4RX1DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RS0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS4	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS5	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS7	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS8	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RS9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT2	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT4	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT5	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT6	2-Methylnaphthalene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RX0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed.

E4RS0DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS4DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS5DL	Fluoranthene

E4RS6DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS7DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT4DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT6DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene,

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RS0	gamma-BHC (Lindane), Dieldrin, 4,4'-DDD
E4RS1	Endosulfan I
E4RS4	Endosulfan I, Dieldrin
E4RS6DL	Aldrin
E4RS7DL	alpha-BHC, beta-BHC, Dieldrin, Endrin ketone
E4RS8	beta-BHC, delta-BHC, gamma-BHC (Lindane), Dieldrin, Endosulfan II, Endrin aldehyde
E4RS9	gamma-BHC (Lindane), Endosulfan I, Dieldrin, alpha-Chlordane
E4RT2DL	alpha-BHC, beta-BHC, Aldrin
E4RT3	beta-BHC, Dieldrin, Endosulfan sulfate, Endrin aldehyde
E4RT4	beta-BHC
E4RT5	Aldrin, Endrin ketone
E4RT6DL	Aldrin
E4RX0	gamma-BHC (Lindane), Endosulfan I, Endosulfan II, Endrin ketone Endrin aldehyde
E4RX1	gamma-BHC (Lindane), Aldrin, Endosulfan I, Endrin ketone, Endrin aldehyde
E4RX1DL	Dieldrin

The following pesticide samples have percent differences between analyte results on the two GC columns in the range of 26-50%. Detected compounds are qualified J.

E4RS1	4,4'-DDE, Endrin aldehyde
E4RS1MSD	4,4'-DDE, gamma-Chlordane
E4RS2	Dieldrin, 4,4'-DDD
E4RS4	4,4'-DDE, 4,4'-DDT, Methoxychlor
E4RS5	4,4'-DDE, gamma-Chlordane
E4RS6	Endosulfan I, Dieldrin, 4,4'-DDD
E4RS6DL	4,4'-DDD
E4RS7	Methoxychlor
E4RS9	gamma-Chlordane
E4RT2	Endosulfan I, Methoxychlor, alpha-Chlordane
E4RT2DL	4,4'-DDE
E4RT3	4,4'-DDT
E4RT4	Dieldrin, 4,4'-DDE
E4RT5	Endosulfan I, 4,4'-DDE, 4,4'-DDD
E4RX0	Dieldrin, 4,4'-DDD, 4,4'-DDT
E4RX1	Heptachlor, Heptachlor epoxide
E4RX1DL	Heptachlor epoxide

The following pesticide samples have percent differences between analyte results on the two GC columns in the range of 51-100%. Detected compounds are qualified NJ.

E4RS0	gamma-Chlordane
E4RS1	Heptachlor epoxide, alpha-Chlordane, gamma-Chlordane
E4RS1MS	Heptachlor, Aldrin, alpha-Chlordane, gamma-Chlordane

E4RS1	Endrin, 4,4'-DDD, 4,4'-DDT, Methoxychlor
E4RS1MS	alpha-BHC, gamma-BHC (Lindane), Heptachlor epoxide, 4,4'-DDD, Methoxychlor
E4RS1MSD	Heptachlor epoxide, 4,4'-DDD
E4RS2	Heptachlor, Heptachlor epoxide, 4,4'-DDE, Endrin, 4,4'-DDT, gamma-Chlordane
E4RS4	Heptachlor, Heptachlor epoxide
E4RS5	Heptachlor epoxide, 4,4'-DDD
E4RS6	Heptachlor, Endrin, Endrin aldehyde
E4RS6DL	Endosulfan I, Endrin
E4RS7	beta-BHC, Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDD, 4,4'-DDT
E4RS7DL	Heptachlor, Heptachlor epoxide, 4,4'-DDD, 4,4'-DDT
E4RT2	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, Endrin, Endosulfan II, 4,4'-DDD
E4RT2DL	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDD
E4RT3	Heptachlor, Heptachlor epoxide, 4,4'-DDD
E4RT4	Heptachlor, Heptachlor epoxide, Methoxychlor, Endrin ketone
E4RT5	gamma-BHC (Lindane), Heptachlor epoxide
E4RT6	gamma-BHC (Lindane), Heptachlor epoxide, Endosulfan I, Endrin, Methoxychlor
E4RT6DL	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide
E4RX0	beta-BHC

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS0, E4RS2, E4RS4, E4RS5, E4RS7, E4RS7DL, E4RS9, E4RT4, E4RT6, E4RT6DL, E4RX1, E4RX1DL

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. A diluted sample analysis was performed for all these samples, placing the concentrations within the calibration range. The results from the diluted sample should be used for result validation.

E4RS6 gamma-BHC (Lindane), Heptachlor, 4,4'-DDE, 4,4'-DDD, 4,4'-DDT
E4RS7 4,4'-DDD
E4RT2 gamma-BHC (Lindane), Heptachlor, 4,4'-DDE, 4,4'-DDT
E4RT5 Heptachlor
E4RT6 gamma-BHC (Lindane), 4,4'-DDE, 4,4'-DDD, 4,4'-DDT
E4RX1 Heptachlor epoxide

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

In all cases, undiluted samples had acceptable surrogate recoveries on one or both columns. No data were qualified based on surrogate recovery.

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. All target Aroclors are affected. Detected and nondetected compounds remain unchanged.

E4RS2DL, E4RS6DL, E4RT2DL, E4RT6DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

The relative percent difference (RPD) of Aroclor-1260 between the matrix spike and matrix spike duplicate recoveries of Aroclor-1260 is outside criteria. Detected compounds are qualified J. Nondetected compounds remain unchanged.

The Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column. All sample results for the compounds listed below reported from this column are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

E4RS9 Aroclor-1016
E4RS1MSD, E4RS4, E4RS5, E4RS9, E4RX1 Aroclor-1260

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are field duplicates according to the field sampling plan**.** Results are summarized in the following table:

Aroclor Analytes	**E4RT5DL** µg/Kg	**E4RT6DL** µg/Kg	**%RPDs**
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	2400	2100	13
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results on the two GC columns in the range of 26-50%. Detected compounds are qualified J.

E4RS1 Aroclor-1260
E4RT2DL, E4RT5, E4RT5DL, E4RT6DL Aroclor-1248

The following Aroclor samples have percent differences between analyte results on the two GC columns in the range of 51-100%. Detected compounds are qualified NJ.

E4RS9 Aroclor-1260
E4RS1, E4RS5 Aroclor-1248

The following Aroclor samples have percent differences between analyte results on the two GC columns exceeding 100%. Detected compounds are qualified R.

E4RS4 Aroclor-1260
E4RS1MS, E4RS1MSD, E4RS4 Aroclor-1016

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS1, E4RS8, E4RS9, E4RT5, E4RT6, E4RX0, E4RX1

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". A diluted sample analysis was performed for all these samples, placing the concentrations within the calibration range. The results from the diluted sample should be used for result validation.

E4RS2 Aroclor-1248
E4RS6 Aroclor-1248
E4RS7 Aroclor-1248
E4RT2 Aroclor-1248
E4RT5 Aroclor-1248
E4RT6 Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Receipt: Sixteen (16) sediment samples labeled E4RS3, E4RT0, E4RT1, E4RT7 - E4RT9, E4RW0 – E4RW9 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All sixteen (16) samples were collected on 2/25/2010 and were received on 2/27/2010, intact. Samples exceeded the proper shipping temperature of 2 - 6 ºC, and were received at the facility at 8 ºC. No data have been qualified based on temperature. For samples E4RW1 – E4RW7, the recipient signature is missing from the traffic report; no sample results were qualified for this non-compliance.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4RT8 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a

particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified "J". Nondetected compounds are not qualified.

E4RS3, E4RT0, E4RT1, E4RT7, E4RT8, E4RT9, E4RW0, E4RW0DL, E4RW1, E4RW2, E4RW3, E4RW4, E4RW5, E4RW6, E4RW7, E4RW8, E4RW9
Benzo(b)fluoranthene
Benzo(k)fluoranthene

The following semivolatile samples are associated with an opening continuing calibration percent difference (%D) outside criteria. Detected compounds are qualified "J". Nondetected compounds are qualified "UJ"

E4RT8, E4RW0, E4RW2, E4RW7, E4RW8, E4RW9
2-Methylnaphthalene

Benzo(g,h,i)perylene in sample E4RW1 was flagged "J" during the automated flagging process for a %D in the closing calibration. Examination of the data showed that the %D was within the criteria. The "J" flag has been removed from the "B" and "Z" files.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with a dilution factor greater than 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4RW0DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4RT9 and E4RW0

Semivolatile compounds	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Naphthalene	ND	1	440	10	
2-Methylnaphthalene	ND	1	550	10	
Acenaphthylene	ND	1	ND	10	
Acenaphthene	ND	1	3000	10	
Fluorene	ND	1	2800	10	
Phenanthrene	520	1	17000	10	190
Anthracene	120	1	5000	10	190
Fluoranthene	1100	1	22000	10	180
Pyrene	660	1	16000	10	180
Benzo(a)anthracene	480	1	10000	10	180
Chrysene	470	1	9300	10	180
Benzo(b)fluoranthene	590	1	13000	10	180
Benzo(k)fluoranthene	190	1	5500	10	190
Benzo(a)pyrene	380	1	11000	10	190
Indeno(1,2,3-cd)pyrene	190	1	4600	10	180
Dibenzo(a,h)anthracene	ND	1	1000	10	
Benzo(g,h,i)perylene	210	1	4800	10	180

For field duplicates E4RT9 and E4RW0, all detected compounds had RPD values above 50%. Note that the original analysis of E4RW0 was analyzed using a ten-fold dilution.

E4RW1 and E4RW2

Semivolatile compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	160	1	52	1	100
Anthracene	51	1	ND	1	
Fluoranthene	280	1	110	1	90
Pyrene	220	1	69	1	100
Benzo(a)anthracene	150	1	ND	1	
Chrysene	150	1	ND	1	
Benzo(b)fluoranthene	260	1	64	1	120

Semivolatile compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Benzo(k)fluoranthene	120	1	ND	1	
Benzo(a)pyrene	230	1	ND	1	
Indeno(1,2,3-cd)pyrene	170	1	ND	1	
Dibenzo(a,h)anthracene	110	1	ND	1	
Benzo(g,h,i)perylene	190	1	ND	1	

For field duplicate samples E4RW1 And E4RW2, compounds Phenanthrene, Fluoranthene, Pyrene, and Benzo(b)fluoranthene have RPD values above 50%.

E4RW3 and E4RW4

Semivolatile compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	240	1	320	1	30
Anthracene	62	1	85	1	30
Fluoranthene	510	1	430	1	20
Pyrene	350	1	330	1	6
Benzo(a)anthracene	210	1	200	1	5
Chrysene	220	1	180	1	20
Benzo(b)fluoranthene	360	1	210	1	50
Benzo(k)fluoranthene	95	1	90	1	5
Benzo(a)pyrene	210	1	160	1	30
Indeno(1,2,3-cd)pyrene	110	1	67	1	50
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	130	1	72	1	60

For field duplicate samples E4RW3 and E4RW4, Benzo(g,h,i)perylene had an RPD value above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified “J”.

E4RS3	Anthracene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Benzo(g,h,i)perylene
E4RT1	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene,
E4RT7	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT9	Anthracene
E4RW0	Naphthalene, 2-Methylnaphthalene, Dibenzo(a,h)anthracene
E4RW1	Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene
E4RW2	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RW3	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW4	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW6	Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW7	Fluoranthene, Pyrene, Benzo(b)fluoranthene

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile sample reported a concentration that exceeded the calibrated range of the instrument and was flagged “E” by the laboratory. As per the NFG, this result is flagged “J”. The result from the diluted sample should be used for result validation.

E4RW0	Fluoranthene

The nondetected results reported at the CRQL level for the following compounds in the samples below are incorrect in the EDD. These results were reported correctly on the Form 1s. The EDD has been updated to include the nondetected results at the correct CRQLs.

E4RT0	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Acenaphthene, Fluorene, Anthracene, Dibenzo(a,h)anthracene
E4RW0DL	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Dibenzo(a,h)anthracene
E4RW5	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene

Semivolatiles-SIM compounds	E4RT9DL µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Fluoranthene	720	10	9200	10	170
Pyrene	580	10	8600	10	170
Benzo(a)anthracene	390	10	7300	10	180
Chrysene	340	10	5000	10	170
Benzo(b)fluoranthene	620	10	5600	10	160
Benzo(k)fluoranthene	170	10	1900	10	170
Benzo(a)pyrene	400	10	4200	10	170
Indeno(1,2,3-cd)pyrene	290	10	2900	10	160
Dibenzo(a,h)anthracene	50	10	560	10	170
Benzo(g,h,i)perylene	220	10	2200	10	160

For field duplicate pair E4RT9 and E4RW0, all detected compounds except Acenaphthylene had RPD values above 50%. Note that sample E4RW0 was originally analyzed using a ten-fold dilution and that most of the detected analyte results exceeded the calibrated instrument range. No further semivolatiles-SIM dilution analysis was performed for sample E4RW0.

E4RW1 and E4RW2

Semivolatiles-SIM compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Naphthalene	5.7	1	4.5	1	24
2-Methylnaphthalene	2.7	1	1.6	1	51
Acenaphthylene	1	1	0.8	1	28
Acenaphthene	8	1	2.1	1	120
Fluorene	9.6	1	2.7	1	110
Phenanthrene	97	1	34	1	96
Anthracene	32	1	11	1	98
Fluoranthene	170	1	82	1	70
Pyrene	140	1	63	1	76
Benzo(a)anthracene	110	1	50	1	75
Chrysene	84	1	42	1	67
Benzo(b)fluoranthene	140	1	60	1	80
Benzo(k)fluoranthene	32	1	15	1	72
Benzo(a)pyrene	93	1	41	1	78
Indeno(1,2,3-cd)pyrene	91	1	35	1	89
Dibenzo(a,h)anthracene	14	1	5.5	1	87
Benzo(g,h,i)perylene	52	1	20	1	89

E4RW1DL and E4RW2DL

Semivolatiles-SIM compounds	E4RW1DL µg/kg	DF	E4RW2DL µg/kg	DF	%RPD
Naphthalene	ND	10	ND	5	
2-Methylnaphthalene	ND	10	ND	5	
Acenaphthylene	ND	10	ND	5	

Semivolatiles-SIM compounds	E4RW1DL µg/kg	DF	E4RW2DL µg/kg	DF	%RPD
Acenaphthene	10	10	ND	5	
Fluorene	12	10	ND	5	
Phenanthrene	110	10	35	5	100
Anthracene	31	10	11	5	95
Fluoranthene	190	10	81	5	80
Pyrene	160	10	66	5	83
Benzo(a)anthracene	98	10	43	5	78
Chrysene	85	10	42	5	68
Benzo(b)fluoranthene	120	10	61	5	65
Benzo(k)fluoranthene	48	10	19	5	87
Benzo(a)pyrene	89	10	43	5	70
Indeno(1,2,3-cd)pyrene	59	10	26	5	78
Dibenzo(a,h)anthracene	10	10	4.7	5	72
Benzo(g,h,i)perylene	46	10	22	5	71

For field duplicate pair E4RW1 and E4RW2, all compounds except Naphthalene and Acenaphthylene had RPD values above 50%. Note that most detected results in the neat analyses for these samples exceeded the calibrated instrument range. Diluted analyses were performed. The RPDs are also above than 50% for all detected compounds in the diluted analyses.

E4RW3 and E4RW4

Semivolatiles-SIM compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Naphthalene	6.1	1	6.6	1	7.9
2-Methylnaphthalene	2.6	1	5.5	1	72
Acenaphthylene	5	1	4.5	1	11
Acenaphthene	14	1	17	1	19
Fluorene	13	1	20	1	42
Phenanthrene	140	1	180	1	25
Anthracene	38	1	61	1	47
Fluoranthene	280	1	280	1	0
Pyrene	240	1	240	1	0
Benzo(a)anthracene	170	1	180	1	5.7
Chrysene	150	1	140	1	6.9
Benzo(b)fluoranthene	200	1	160	1	22
Benzo(k)fluoranthene	51	1	38	1	29
Benzo(a)pyrene	120	1	110	1	8.7
Indeno(1,2,3-cd)pyrene	95	1	96	1	1
Dibenzo(a,h)anthracene	20	1	16	1	22
Benzo(g,h,i)perylene	74	1	54	1	31

E4RW3DL and E4RW4DL

Semivolatiles-SIM compounds	E4RW3DL µg/kg	DF	E4RW4DL µg/kg	DF	%RPD
Naphthalene	ND	10		10	
2-Methylnaphthalene	ND	10		10	
Acenaphthylene	6.6	10	5.7	10	15
Acenaphthene	18	10	21	10	15
Fluorene	16	10	25	10	44
Phenanthrene	160	10	180	10	12
Anthracene	39	10	56	10	36
Fluoranthene	340	10	290	10	16
Pyrene	250	10	200	10	22
Benzo(a)anthracene	140	10	130	10	7.4
Chrysene	130	10	120	10	8
Benzo(b)fluoranthene	210	10	160	10	27
Benzo(k)fluoranthene	64	10	45	10	35
Benzo(a)pyrene	140	10	110	10	24
Indeno(1,2,3-cd)pyrene	92	10	64	10	36
Dibenzo(a,h)anthracene	17	10	13	10	27
Benzo(g,h,i)perylene	77	10	53	10	37

For field samples E4RW3 and E4RW4, compounds 2-Methylnaphthalene, Fluorene, and Anthracene had RPD values that exceeded 50%. All RPDs are less than 50% in the diluted analyses.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that the semivolatiles-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatiles-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

E4RS3DL	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RT0	Acenaphthylene
E4RT0DL	Acenaphthene, Fluorene, Anthracene
E4RT1DL E4RT7DL	Acenaphthylene
E4RT8	2-Methylnaphthalene, Anthracene, Benzo(k)fluoranthene

E4RT9DL	Acenaphthylene, Acenaphthene,
E4RW0 E4RW1	Acenaphthylene
E4RW1DL	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW2	2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene,
ER4W2DL	Anthracene, Dibenzo(a,h)anthracene
E4RW3	2-Methylnaphthylene
E4RW3DL	Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW4DL	Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW5	2-Methylnaphthylene
E4RW5DL	Acenaphthene, Fluorene
E4RW6	Acenaphthylene
E4RW6DL	Acenaphthene, Fluorene, Anthracene, Dibenzo(a,h)anthracene
E4RW7	2-Methylnaphthylene, Acenaphthene, Fluorene
E4RW7DL	Acenaphthene, Anthracene, Dibenzo(a,h)anthracene
E4RW8	2-Methylnaphthalene, Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h) anthracene
E4RW9	Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatiles-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

E4RS3	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT1	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT7	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RW1	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW2	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RW3, E4RW4	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW5	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene.
E4RW6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW7	Fluoranthene, Pyrene, Benzo(a)anthracene, Benzo(b)fluoranthene

The following semivolatiles-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed.

E4RT0DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RT1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT7DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4RT9DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4RW0	Naphthalene, 2-Methylnaphthalene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RW3DL E4RW4DL	Fluoranthene
E4RW5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene

The following semivolatile SIM samples have compound concentrations below the MDL reported on the Form 1s. Detected compounds were qualified U and reported at the CRQL. The results are reported correctly in the EDD.

E4RT1DL E4RT7DL E4RW4DL	Naphthalene, 2-Methylnaphthalene
E4RS3DL	Naphthalene, 2-Methylnaphthalene, Acenaphthylene
E4RT0DL E4RT9DL E4RW1DL E4RW3DL E4RW6DL	Naphthalene
E4RW2DL	Naphthalene, Acenaphthene, Fluorene
E4RW5DL	Naphthalene, Acenaphthylene
E4RW7DL	Naphthalene, Fluorene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the CRQL. Detected compounds are qualified "U". Nondetected compounds remain unchanged. Reported sample concentrations have been elevated to the CRQL.

E4RT8, E4RW1, E4RW7, E4RW8, E4RW9	4,4'-DDT
E4RS3, E4RT1DL, E4RT8, E4RW1, E4RW5, E4RW7, E4RW8, E4RW9	Methoxychlor
E4RT1DL, E4RT8, E4RT9, E4RW0, E4RW7	Endrin aldehyde

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the CRQL. Detected compounds are qualified "U" and the sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RT8, E4RW1, E4RW8, E4RW9	beta-BHC
E4RT8, E4RW1, E4RW7, E4RW8, E4RW9	4,4'-DDT
E4RW5, E4RW6	alpha-Chlordane
E4RS3, E4RT1, E4RT1DL, E4RT7, E4RT8, E4RW1, E4RW4 - E4RW8	Methoxychlor
E4RW9	4,4'-DDD
E4RT1DL, E4RW3 E4RW4, E4RW5	Endrin aldehyde
E4RT0, E4RT8, E4RW0 – E4RW6, E4RW8	Heptachlor

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Samples E4RS3, E4RT0, E4RT1, E4RT7, E4RT8, E4RT9, E4RW0, E4RW1, E4RW2, E4RW3, E4RW4, E4RW6, E4RW7, E4RW8, and E4RW9 had acceptable surrogate recoveries on one or both columns. No data for these samples was qualified based on surrogate recovery.

However, a high surrogate recovery was obtained on one column for samples E4RT0, E4RW3, and E4RW6. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, for samples E4RT0, E4RW3, and E4RW6, the "J" flags applied during the automated check process have been removed for the affected compounds.

E4RT0	alpha-chlordane, Dieldrin
E4RW3	4,4'-DDE, Endrin ketone
E4RW6	4,4'-DDD, 4,4'-DDE

Pesticide sample E4RW5 had surrogate recoveries greater than the 200% on both columns. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4RT8, the pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column. All sample results for the following compounds which were reported from the RTXCLP2 column are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds remain unchanged

gamma-BHC, Heptachlor, Aldrin, Dieldrin

For sample E4RT8, the pesticide MSD had a percent recovery for Endrin that was greater than the upper acceptance limit on both columns. All samples results for Endrin are affected. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

For sample E4RT8, the pesticide MSD had a percent recovery for 4,4'-DDT that was greater than the upper acceptance limit on the RTXCLP column. All samples results for 4,4'-DDT which were reported from the RTXCLP column are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds remain unchanged.

In addition, the relative percent difference (RPD) between the MS and MSD is outside criteria for Heptachlor and Endrin. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4RT9 and E4RW0

Pesticide compound	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	0.14	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.27	1	0.14	1	63
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	0.25	1	
4,4'-DDE	1.1	1	1.6	1	37
Endrin		1	0.27	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	1	1	1.2	1	18
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.77	1	1.2	1	44
Methoxychlor		1		1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane		1	0.66	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RT9 and E4RW0, Heptachlor epoxide had an RPD value greater than 50%. The Endrin, Methoxychlor, and gamma-chlordane results for sample E4RT9; and the Methoxychlor result for sample E4RW0 were associated with an “R” flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW1 and E4RW2

Pesticide compound	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.12	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	0.12	1	0.15	1	22
Aldrin	ND	1	ND	1	

Pesticide compound	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Heptachlor epoxide		1		1	
Endosulfan I	ND	1	ND	1	
Dieldrin	0.1	1	ND	1	
4,4'-DDE	0.5	1		1	
Endrin	0.24	1	2	1	160
Endosulfan II	0.24	1	ND	1	
4,4'-DDD	0.76	1	1.1	1	37
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.24	1		1	
Methoxychlor	1.2	1		1	
Endrin ketone	0.24	1	0.3	1	22
Endrin aldehyde	ND	1	0.45	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	1.3	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RW1 and E4RW2, Endrin, 4,4'-DDT, and Methoxychlor had RPD values greater than 50%. Results for Heptachlor epoxide in sample E4RW1; and for Heptachlor epoxide, 4,4'-DDE, 4,4'-DDT, and Methoxychlor in sample E4RW2 were associated with an "R" flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW3 and E4RW4

Pesticide compound	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	0.15	1	0.13	1	14
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1	0.39	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	0.36	1	0.26	1	32
4,4'-DDE	1.6	1	1.2	1	29
Endrin	ND	1		1	
Endosulfan II	0.3	1	0.26	1	14
4,4'-DDD	3	1	2.2	1	31
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.64	1	0.27	1	82
Methoxychlor		1	1.3	1	
Endrin ketone	0.42	1	ND	1	

Pesticide compound	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Endrin aldehyde	0.3	1	0.26	1	14
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	1.3	1	0.17	1	150
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RW3 and E4RW4, 4,4'-DDT and gamma-Chlordane had RPD values that were greater than 50%. Results for Heptachlor epoxide and Methoxychlor in sample E4RW3; and for Endrin in sample E4RW4 were associated with an "R" flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

E4RT8	Heptachlor epoxide
E4RW7	4,4'-DDE
E4RW0, E4RW1	Dieldrin
E4RW9	Dieldrin, 4,4'-DDE

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J".

E4RS3	4,4'-DDT, 4,4'-DDE
E4RT1	Heptachlor, Dieldrin, 4,4'-DDE
E4RT1DL	Dieldrin
E4RT7	Endrin, 4,4'-DDT
E4RT8	Heptachlor, Heptachlor epoxide
E4RT9	Heptachlor epoxide, 4,4'-DDE
E4RW2	gamma-chlordane

E4RW3	4,4'-DDD
E4RW8	4,4'-DDD, 4,4'-DDE, Methoxychlor

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ".

E4RS3	Endrin
E4RT0	4,4'-DDE, 4,4'-DDT
E4RT7	Heptachlor, 4,4'-DDE
E4RT9	4,4'-DDD
E4RW0	gamma-Chlordane
E4RW2	Endrin, 4,4'-DDD, Endrin aldehyde
E4RW3	Dieldrin, gamma-Chlordane, 4,4'-DDT
E4RW4	Heptachlor epoxide, 4,4'-DDT
E4RW5	Gamma-chlordane
E4RW6	Dieldrin, gamma-Chlordane
E4RW7	Heptachlor epoxide

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

E4RS3	Heptachlor epoxide, Endosulfan II, Methoxychlor,
E4RT0	Heptachlor
E4RT1	Endosulfan II, Methoxychlor
E4RT1DL	Heptachlor epoxide, Endrin, Endrin aldehyde, Methoxychlor
E4RT7	Endosulfan II, Methoxychlor, Endrin aldehyde
E4RT8	Alpha-BHC, beta-BHC, 4,4'-DDT, Endrin ketone, Methoxychlor
E4RW0	Heptachlor, Heptachlor epoxide, Endrin
E4RW1	beta-BHC, Heptachlor, Endrin, Endosulfan II, Methoxychlor, Endrin ketone
E4RW2	Heptachlor, Endrin ketone

E4RW3	Heptachlor, Endosulfan II, Endrin aldehyde
E4RW4	Heptachlor, Dieldrin, Endosulfan II, Methoxychlor, Endrin aldehyde
E4RW5	Heptachlor, Endosulfan II, Methoxychlor, Endrin aldehyde, alpha-Chlordane
E4RW6	Heptachlor, Endrin, Endosulfan II, Methoxychlor, Endrin ketone, alpha-Chlordane,
E4RW7	4,4'-DDT, Dieldrin, Methoxychlor, Endrin ketone
E4RW8	beta-BHC, Heptachlor epoxide, Endrin, Endrin ketone, gamma-Chlordane
E4RW9	beta-BHC, Heptachlor epoxide, 4,4'-DDD, 4,4'-DDT, gamma-Chlordane

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R".

E4RS3	Heptachlor
E4RT0	Heptachlor epoxide, Endrin, 4,4'-DDD, Methoxychlor
E4RT1	Heptachlor epoxide, Endrin, Endrin aldehyde
E4RT1DL	4,4'-DDD
E4RT7	Alpha-BHC, Heptachlor epoxide
E4RT9	Endrin, Methoxychlor, gamma-Chlordane
E4RW0	Methoxychlor
E4RW1	Heptachlor epoxide
E4RW2	4,4'-DDE, 4,4'-DDT, Heptachlor epoxide, Methoxychlor
E4RW3	Heptachlor epoxide, Methoxychlor
E4RW4	Endrin, gamma-Chlordane
E4RW5	Dieldrin, Endosulfan sulfate, Endrin ketone, Heptachlor epoxide
E4RW6	Heptachlor epoxide

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide sample had reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The result from the diluted sample should be used for result validation.

E4RT1 4,4'-DDE

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples due to rounding errors, and do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

Alpha-chlordane and dieldrin in sample E4RW9 was reported as a detected result at the CRQL in the original "Z" file. Examination of the raw data showed that the value was a nondetected result. The "U" flag was added to the sample result.

E4RS3, E4RT0, E4RT1, E4RT1DL, E4RW2, E4RW6, E4RW7, ER4W9

The following pesticide samples were assigned the unique qualifier flags "U" and "J" during the automated check process. Based on review findings, the flag was adjusted to "U" in the "B" and "Z" files.

E4RT0, E4RT8, E4RW3, E4RW5, E4RW6	Heptachlor
E4RT1DL, E4RW0, E4RW1, E4RW6, E4RW8	Endrin
E4RT8, E4RW1, E4RW7 – E4RW9	4,4'-DDT
E4RT8MS	4,4'-DDE
E4RT8MSD	beta-BHC
E4RW3, E4RW5, E4RW6,	Endosulfan II
E4RW3, E4RW5	Endrin aldehyde
E4RW5, E4RW6	alpha-chlordane
E4RW6	Endrin ketone
E4RW5, E4RW6, E4RW8	Methoxychlor

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

Samples E4RS3, E4RT0, E4RT1, E4RT1DL, E4RT7, E4RT8, E4RT9, E4RW0, E4RW1, E4RW2, E4RW3, E4RW4, E4RW5, E4RW6, E4RW7, E4RW8, and E4RW9 had acceptable surrogate recoveries on one or both columns. No data for these samples was qualified based on surrogate recovery.

However, a high surrogate recovery was obtained on one column for samples E4RT0, E4RT1, E4RT9, E4RW0, E4RW2 - E4RW5. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, the "J" flags applied during the automated check process have been removed for the following compounds.

E4RT0, E4RT9 , E4RW4, E4RW5	Aroclor-1260
E4RW5	Aroclor-1016

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4RT9 AND E4RW0

Aroclor compounds	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Aroclor-1016	5.7	1	5.3	1	7.3
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	5.7	1	5.7	1	0
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4RW1 and E4RW2

Aroclor compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Aroclor-1016	2.7	1	7.6	1	95.1
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	2.1	1		1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For field duplicates E4RW1 and E4RW2, Aroclor-1016 had an RPD value above 50%. The result for Aroclor-1260 in sample E4RW2 was associated with an “R” flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW3 and E4RW4

Aroclor compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Aroclor-1016	9.9	1	8.7	1	12.9
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	6.4	1	5.9	1	8.1
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

E4RT8, E4RW1, E4RW7, E4RW8, E4RW9 Aroclor-1260

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

E4RT8, E4RW3 Aroclor-1260

E4RS3, E4RW1 Aroclor-1016

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

E4RW0, E4RW6 Aroclor-1260

E4RT9, E4RW0, E4RW2, E4RW3, E4RW4 Aroclor-1016

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below the CRQL. Detected compounds are qualified "U". Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4RT8, E4RW7, E4RW8, E4RW9 Aroclor-1016

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R".

E4RW2 Aroclor-1260
E4RW6 Aroclor-1016

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RT7	Aroclor-1016
E4RT1	Aroclor-1016, Aroclor-1260

The reported CRQLs listed on laboratory Form 1s are incorrect for the following samples, due to rounding errors, and do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS3, ER4T0, ER4T1, ER4T1DL, E4RW2, E4RW6, E4RW7, E4RW9

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

DATE: **August 3, 2010**

SUBJECT: **Revised Review Narrative Report**
Review of Data
Received for Review on: 16 April 2010

FROM: Caryn Wojtowicz
Senior Chemist

TO: Data User: GLNPO

This data review narrative supersedes the narrative sent on June 14, 2010 for the review of data in SDG E4RX2. The changes made to this narrative include clarifications added to the Semivolatile-SIM and Pesticide sections of this narrative. The changes are highlighted in bold face type. The "reportable results" field in the 'Z" file has been updated to reflect the sample dilutions and reanalyses detailed in this narrative.

We have reviewed the data for the following case:

SITE Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1886.0, 1887.0, 1888.0

SDG Number: E4RX2

Number and Type of Samples: Thirteen (13) soil samples

Sample Numbers: E4RX2 - E4RX9, and E4RY0-E4RY4

Laboratory: ALS Laboratory Group

SDG Summary

Introduction: Thirteen (13) sediment samples, labeled E4RX2 through E4RX9, and E4RY0-through E4RY4 were shipped to ALS Laboratory Group located in Salt Lake City, Utah. All samples were collected on 2/24/2010 and 2/25/2010. All samples were received on 2/27/2010 intact. Samples exceeded the proper shipping temperature range of 2 – 6 ºC. Samples were received at the facility at 8 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

No sample was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses. The laboratory chose E4RY4 as the QC sample.

Using the field dup identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples that no samples from this SDG are field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RY0, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD

Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

The following semivolatile samples have reported analyte concentrations less than the CRQL. The associated method blank concentration of the analyte is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Indeno(1,2,3-cd)pyrene:	E4RX2, E4RX3, E4RX4, E4RX6, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Benzo(b)fluoranthene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RY0, E4RY4MS, E4RY4MSD
Benzo(k)fluoranthene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RX9, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Benzo(a)pyrene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Dibenzo(a,h)anthracene:	E4RX2, E4RX3, E4RX4, E4RX6, E4RX7, E4RX8, E4RX9, E4RY0, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile sample has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY1 Anthracene-d_{10} (affected compounds Anthracene, Phenanthrene)

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

All semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

The CRQLs specified in Modification Reference Number: 1888.0 were not achieved for sample E4RX7, due to limited sample volume. The CRQL is two times greater than requested, because 25 grams rather than 50 grams of sample was extracted.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RX8, E4RX9, E4RY3 - Anthracene
E4RX7, E4RY0 - Pyrene
E4RX7, E4RY4 - Benzo(g,h,i)perylene
E4RX7, E4RY0 - Benzo(b)fluoranthene
E4RX7, E4RY0 - Fluoranthene
E4RX9 - Benzo (k) fluoranthene
E4RY4 - Chrysene
E4RX7, E4RY4 - Benzo(a)pyrene
E4RY3 - Dibenzo(a,h)anthracene
E4RY4 - Benzo(a)anthracene
E4RY4 - Phenanthrene
E4RY3 - Fluorene

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

No dilutions for semivolatiles are associated with this SDG. Due to suspected rounding differences, the reported CRQLs listed on laboratory Form 1s do not agree with the B-file Spreadsheet results.
E4RX7, E4RX9, E4RY0, E4RY2

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene:	E4RX4, E4RX5, E4RX6
Indeno(1,2,3-cd)pyrene:	E4RX4, E4RX5, E4RX6
Benzo(b)fluoranthene:	E4RX5, E4RX6
Benzo(a)pyrene:	E4RX5, E4RX6

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Acenaphthene spike recoveries and %RPD met criteria. Pyrene in the matrix/matrix spike duplicate samples had negative percent recovery because spiking levels of this compound were significantly lower than the levels of pyrene found in the unspiked sample. Results were not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1888.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 25 grams rather than 50 grams of sample was extracted.

The following semivolatile samples have compound concentrations below the MDL on the originally submitted Form 1s. Refer to the resubmitted corrected Form 1s when evaluating data. The EDD is correct.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX7DL, E4RX8DL, E4RX9DL, E4RY0, E4RY0DL, E4RY1DL, E4RY2DL, E4RY3DL, E4RY4DL, E4RY4MS, E4RY4MSD

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX7DL, E4RX8DL, E4RX9DL, E4RY0, E4RY0DL, E4RY1, E4RY1DL, E4RY3DL, E4RY4, E4RY4DL, E4RY4MS, E4RY4MSD

Anthracene:	E4RX2, E4RX3, E4RX7, E4RY0DL, E4RY1DL, E4RY4DL, E4RY4MS, E4RY4MSD
Pyrene;	E4RX5, E4RX6
Benzo(g,h,i)perylene:	E4RX4, E4RX5, E4RX6
Indeno(1,2,3-cd)pyrene:	E4RX4, E4RX5, E4RX6
Benzo(b)fluoranthene:	E4RX5, E4RX6
Fluoranthene:	E4RX5, E4RX6
Benzo(k)fluoranthene:	E4RX4
Acenaphthylene:	E4RY1, E4RY3DL, E4RY4
Chrysene:	E4RX5, E4RX6
Benzo(a)pyrene:	E4RX5, E4RX6
Dibenzo(a,h)anthracene:	E4RX2, E4RX3, E4RX7DL, E4RY0DL, E4RY4DL, E4RY4MS, E4RY4MSD
Benzo(a)anthracene:	E4RX4, E4RX5, E4RX6
Acenaphthene:	E4RX8DL, E4RX9DL, E4RY0, E4RY1DL, E4RY4
Phenanthrene:	E4RX5, E4RX6
Fluorene:	E4RX2, E4RX3, E4RX7, E4RX9DL, E4RY0DL, E4RY1DL
2-Methylnaphthalene:	E4RY4

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RX4, E4RX7DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RX7	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RX9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY0	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene,
E4RY1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY3	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY4	**Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene**

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. **Results for the following samples provide qualified, but usable data, and should be used in result validation.**

E4RX8DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4RX9DL	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4RY1DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RY2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene

E4RY3DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for Decachlorobiphenyl exceeding criteria. All detected compounds are qualified J. All nondetected compounds are qualified UJ.

E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

4. BLANKS

The following pesticide samples have Endrin aldehyde concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4, E4RY4MS, E4RY4MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide:	E4RY3DL
Endosulfan sulfate:	E4RX4
Endosulfan II:	E4RX8, E4RX9, E4RX9DL, E4RY0
Dieldrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1
4,4'-DDD:	E4RY4MS
4,4'-DDE:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7,
Endrin aldehyde:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY1, E4RY4, E4RY4MS, E4RY4MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide:	E4RX2, E4RX5, E4RX6, E4RY3DL,
Endosulfan sulfate:	E4RX4,
Endosulfan II:	E4RX8, E4RX9, E4RX9DL, E4RY0
4,4'-DDT:	E4RY4
gamma-Chlordane:	E4RX2, E4RX3, E4RX4,
Dieldrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1
Endrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4
Methoxychlor:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
4,4'-DDD:	E4RY0, E4RY4MS
4,4'-DDE:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
Endrin aldehyde:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY1, E4RY4, E4RY4MS, E4RY4MSD
Heptachlor:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
Endosulfan I:	E4RX7

6. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

In all cases, undiluted samples had acceptable surrogate recoveries on one or both columns. No data was qualified based on high surrogate recovery on one column.

The following pesticide samples have surrogate percent recoveries that are greater than 200%. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flags applied to samples E4RY2 and E4RY3 during the automated check process would have been removed for all detected compounds, but the J flags have been retained for other reasons detailed in this report.

E4RY2 and E4RY3

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4RX9DL, E4RY3DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flags applied to samples E4RX8 and E4RX9 during the automated check process would have been removed for all detected compounds, but the J flags have been retained for other reasons detailed in this report.

E4RX8, E4RX9

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1886.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 30 grams rather than 50 grams of sample was extracted.

The following pesticide samples have compound concentrations below the MDL on the originally submitted Form 1. Refer to the resubmitted corrected Form 1 for data evaluation. The EDD is correct.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX9DL, E4RY3DL

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RX2, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1

beta-BHC	E4RX5, E4RX6
4,4’-DDD	E4RX5, E4RX6
4,4’-DDT	E4RX2, E4RX7
Aldrin	E4RY0
alpha-Chlordane	E4RX9DL

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Aldrin	E4RY0, E4RY4MSD
beta-BHC	E4RX6
Endosulfan II	E4RX2

4,4'-DDT	E4RX7, E4RY1, E4RY4MSD
alpha-Chlordane	E4RX8
gamma-Chlordane	E4RX4, E4RY0, E4RY1
Endrin ketone	E4RX4, E4RX6, E4RY2
Dieldrin	E4RX6, E4RX8, E4RY2, E4RY4MS, E4RY4MSD
Endrin	E4RX8, E4RY1, E4RY3, E4RY4MS, E4RY4MSD
4,4'-DDD	E4RX5, E4RX6, E4RX8, E4RX9DL, E4RY4, E4RY4MS, E4RY4MSD
4,4'-DDE	E4RX8, E4RY3, E4RY4MSD
Endosulfan I	E4RX9

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4RX3, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY2, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX3, E4RX9, E4RX9DL, E4RY0
delta-BHC	E4RX7
4,4'-DDT	E4RY4MS
gamma-BHC (Lindane)	E4RX8, E4RY2, E4RY4MS, E4RY4MSD
4,4'-DDD	E4RX9, E4RY2
4,4'-DDE	E4RY3DL, E4RY4

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Reported sample concentrations have been elevated to the CRQL. Detected compounds are qualified U.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX2, E4RX5, E4RX6, E4RY3DL
Endosulfan sulfate	E4RY0
Aldrin	E4RX2, E4RX3, E4RX5, E4RY4
alpha-BHC	E4RX9, E4RY1, E4RY4, E4RY4MS
beta-BHC	E4RX3, E4RY0, E4RY1
delta-BHC	E4RX2
Endosulfan II	E4RX3, E4RX5, E4RX8, E4RX9, E4RY0, E4RY2, E4RY3, E4RY4, E4RY4MSD
4,4'-DDT	E4RX4, E4RX5
alpha-Chlordane	E4RY3DL
gamma-Chlordane	E4RX2, E4RX3
Endrin ketone	E4RX2, E4RX3, E4RX5, E4RX8, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD
gamma-BHC (Lindane)	E4RX2, E4RY0, E4RY1, E4RY4
Dieldrin	E4RX2, E4RX4, E4RX5, E4RX7, E4RX9DL, E4RY1, E4RY3DL, E4RY4
Endrin	E4RX7, E4RX9
Methoxychlor	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

4,4'-DDD	E4RX2, E4RX3, E4RX4, E4RY0
4,4'-DDE	E4RX2, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4MS
Endrin aldehyde	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4, E4RY4MS, E4RY4MSD
Heptachlor	E4RX7, E4RX9, E4RY1
Endosulfan I	E4RY3DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

E4RX4, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX4, E4RX7, E4RX8, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD
4,4'-DDT	E4RX8, E4RX9, E4RX9DL, E4RY2, E4RY3, E4RY3DL
alpha-Chlordane	E4RX9, E4RY2, E4RY3
gamma-Chlordane	E4RX7, E4RX9, E4RY2, E4RY3, E4RY4, E4RY4MSD
Dieldrin	E4RY3
4,4'-DDD	E4RX7, E4RY1, E4RY3, E4RY3DL
4,4'-DDE	E4RX9, E4RX9DL, E4RY1
Endrin aldehyde	E4RY0
Heptachlor	E4RX8, E4RY2
Endosulfan I	E4RX8, E4RY2, E4RY3

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RX7, E4RX8, E4RX9, E4RY0, E4RY1

Pesticide sample E4RX9 reported a concentration for 4,4'-DDD that exceeded the calibrated range of the instrument. The result was flagged "E" by the laboratory and, as per the NFG, is flagged estimated, "J". The result from diluted sample E4RX9DL should be used for result validation.

Pesticide sample E4RY3 had an R-flagged result for 4,4'-DDD and 4,4'-DDT in both the neat analysis and the dilution. Consequently, no results are available for 4,4'-DDD or 4,4'-DDT for this sample. The "reportable results" in the "Z" file remain the results from the neat analysis.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200%. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected compounds are not qualified.

E4RX9RE, E4RY2, E4RY2RE, E4RY3RE

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4RY2REDL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected compounds are not qualified

E4RX9, E4RY1, E4RY3

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RX9REDL, E4RY3REDL

The following undiluted Aroclor samples have surrogate percent recoveries less than 10%. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4RY1

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) of Aroclor-1016 between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified. Only the unspiked sample, MS and MSD are affected.

E4RY4, E4RY4MS, E4RY4MSD

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries of Aroclor-1016 that are greater than the upper acceptance. The high spike recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention times for that Aroclor. Since the spike recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected Aroclor-1016 results are not qualified for high recovery, but are qualified for %RPD.

E4RY4, E4RY4MS, E4RY4MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1887.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 30 grams rather than 50 grams of sample was extracted.

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4RX2, E4RX8RE, E4RY2RE, E4RY2REDL, E4RY4MS, E4RY4MSD

Aroclor-1260	E4RX2
Aroclor-1248	E4RX8RE, E4RY2RE, E4RY2REDL
Aroclor-1016	E4RY4MS, E4RY4MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4RX7, E4RX9, E4RY3RE, E4RY3REDL

Aroclor-1260 E4RX7
Aroclor-1254 E4RX9
Aroclor-1248 E4RY3RE, E4RY3REDL

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1254 E4RX9RE, E4RX9REDL, E4RY2RE, E4RY2REDL, E4RY3RE, E4RY3REDL

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4RX4, E4RX5, E4RX6, E4RX9, E4RY0, E4RY1

Samples E4RX8, E4RX9, E4RY2 and E4RY3 were analyzed and reported twice as undiluted analyses. During the first analysis, the laboratory determined the presence of an Aroclor for which a valid calibration was not in place. As a result, the “S” flag was applied by the laboratory and the sample was reanalyzed with a valid calibration. This analysis has a “RE” suffix. The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample (suffix DL) should be used for result validation.

E4RX8, E4RX8RE, E4RX9, E4RX9RE, E4RY2, E4RY2RE, E4RY3, E4RY3RE

However, in the case of Aroclor-1254, Samples E4RX9RE, E4RX9REDL, E4RY2RE, E4RY2REDL, E4RY3RE, and E4RY3REDL have all been flagged “R” (rejected, unusable) as the percent differences between column results exceeds 100%. Results for Aroclor-1254 from the original analysis of E4RX9, E4RY2 and E4RY3 provide qualified, but usable data.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction Twenty (20) sediment samples, labeled E4RY5 through E4RY7, E4RZ7 through E4RZ9, E4RS0 through E4S03, E4S05, E4S07, E4S08, E4SB9, E4SC0, E4SC1, E4SC3, E4SC8, E4SD9 and E4SE0 were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The SDG consisted of two shipments of samples. The first shipment of samples was collected on 2/26/2010 and was received at the laboratory on 03/02/2010, intact at 9 ºC. The second shipment was collected on 03/04/2010 and received on 03/06/2010 intact at 5 ºC. Samples received 03/02/2010 exceeded the proper shipping temperature range of 2 – 6 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually ”sediment” samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the “J” flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of “J” if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator “J” flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the “result value” in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file “quantitation limit” are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The “U” values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the “J” flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S07 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

Using the field dup identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples that Samples E4S07 and E4S08 are field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction in the following order Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08
Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table

Semivolatile analytes	**E4S07** µg/Kg	**E4S08** µg/Kg	**%RPD**
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	ND	ND	NA
Fluorene	ND	ND	NA
Phenanthrene	190	ND	#

Semivolatile analytes	E4S07 µg/Kg	E4S08 µg/Kg	%RPD
Anthracene	ND	ND	NA
Fluoranthene	480	100	131
Pyrene	530	94	140
Benzo(a)anthracene	240	ND	#
Chrysene	250	ND	#
Benzo(b)fluoranthene	360	72	133
Benzo(k)fluoranthene	160	ND	#
Benzo(a)pyrene	270	ND	#
Indeno(1,2,3-cd)pyrene	180	ND	#
Dibenzo(a,h)anthracene	ND	ND	NA
Benzo(g,h,i)perylene	110	ND	#

ND= Not Detected, NA= Not Applicable, #= Not Calculable

Fluoranthene, Pyrene and Benzo(b)fluoranthene have RPDs exceeding 50%. For several other compounds, RPDs cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY5, E4S03, E4S07MS, E4SC8, E4SE0
Pyrene	E4S05, E4S08
Benzo(g,h,i)perylene	E4RY5, E4RY6, E4RZ7, E4RZ8, E4RZ9, E4S03, E4S07, E4S07MS, E4S07MSD
Indeno(1,2,3-cd)pyrene	E4RY5, E4RY6, E4RZ7, E4S03, E4S07, E4S07MSD
Benzo(b)fluoranthene	E4RZ8, E4S05, E4S08
Fluoranthene	E4S05, E4S08
Benzo(k)fluoranthene	E4RY5, E4RY6, E4S03, E4S07, E4S07MSD
Chrysene	E4RY6, E4RZ7, E4RZ8, E4RZ9
Benzo(a)pyrene	E4RZ7, E4RZ8, E4RZ9
Dibenzo(a,h)anthracene	E4SB9, E4SE0
Benzo(a)anthracene	E4RY6, E4RZ7, E4RZ8, E4RZ9
Acenaphthene	E4S02
Phenanthrene	E4RZ7, E4RZ8, E4RZ9, E4S07
Fluorene	E4S02
2-Methylnaphthalene	E4SC8

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RZ8, E4S02, E4S07MS, E4SE0

No dilutions for semivolatiles are associated with this SDG.

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile SIM samples are associated with a method blank (SBLK99) in which Indeno(1,2,3-cd)pyrene was at levels greater than the MDL but less than the CRQL. For samples in which Indeno(1,2,3-cd)pyrene is detected above the MDL but below the CRQL, reported sample concentrations have been elevated to the CRQL and qualified U. For samples in which Indeno(1,2,3-cd)pyrene is detected above the CRQL results are not qualified.

E4SB9, E4SC0, E4SC0DL, E4SC1, E4SC3, E4SC8, E4SC8DL, E4SD9, E4SD9DL, E4SE0, E4SE0DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Samples E4RZ7DL and E4S08DL with dilution factors less than or equal to 5 have deuterated monitoring compound 2-Methylnaphthalene-d_{10} recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Affected compounds are

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene, Naphthalene, Phenanthrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The RPD between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S07, E4S07MS, E4S07MSD Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table

Semivolatile analytes	E4S07 µg/Kg	E4S08 µg/Kg	%RPD
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	12	ND	#
Fluorene	12	ND	#
Phenanthrene	150	26	141
Anthracene	29	5	141
Fluoranthene	410	79	135
Pyrene	340	66	135
Benzo(a)anthracene	190	37	135
Chrysene	190	41	129
Benzo(b)fluoranthene	280	60	129
Benzo(k)fluoranthene	70	16	126
Benzo(a)pyrene	180	41	126
Indeno(1,2,3-cd)pyrene	150	38	119
Dibenzo(a,h)anthracene	28	7.2	118
Benzo(g,h,i)perylene	91	26	111

ND= Not Detected, NA= Not Applicable, #= Not Calculable

With the exception of Naphthalene, 2-Methylnaphthalene and Acenaphthylene, all RPDs either exceed 50%, or cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY6DL, E4RY7, E4RZ8DL, E4S05DL, E4S08DL, E4SC0DL, E4SC1, E4SC3, E4SD9DL
Pyrene	E4S01
Benzo(g,h,i)perylene	E4RY7, E4S01
Indeno(1,2,3-cd)pyrene	E4S00, E4S01
Benzo(b)fluoranthene	E4S01
Fluoranthene;	E4S01
Benzo(k)fluoranthene	E4RY7, E4S00, E4S05DL, E4S08DL

Acenaphthylene	E4RY5, E4RY5DL, E4RY6, E4RZ8, E4RZ9, E4S02, E4S02DL, E4S03, E4S03DL, E4S07, E4S07MSD, E4SC0DL, E4SC8DL, E4SD9, E4SE0DL
Chrysene	E4S01
Benzo(a)pyrene	E4S00, E4S01
Dibenzo(a,h)anthracene	E4RY6DL, E4RY7, E4RZ7DL, E4RZ8DL, E4S05DL, E4S08DL, E4SC1, E4SC3
Benzo(a)anthracene	E4S00, E4S01
Acenaphthene	E4RY5DL, E4RY6DL, E4RZ7, E4RZ9DL, E4S05, E4S07DL, E4S08, E4SB9, E4SC8DL, E4SD9DL, E4SE0DL
Phenanthrene	E4S00, E4S01
Fluorene	E4RY6DL, E4RY7, E4RZ7, E4RZ9DL, E4S05, E4S05DL, E4S07DL, E4S08, E4SB9, E4SC0DL, E4SC1, E4SC8DL, E4SD9DL, E4SE0DL
Naphthalene	E4RZ9, E4SC3, E4SC8DL
2-Methylnaphthalene	E4RY7, E4RZ9, E4S02DL, E4S03, E4SC1, E4SC3, E4SC8DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RY5, E4S00, E4S05DL, E4S07, E4S08DL, E4SB9, E4SD9DL, E4SE0DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4RY5	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RY6	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RZ7	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RZ8	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RZ9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S02	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S03	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S05	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4S07	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S08	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene,
E4SB9	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SC0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SC8	Naphthalene, 2-Methylnaphthalene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SC9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SE0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4RY5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RY6DL	Fluoranthene
E4RZ9DL	Fluoranthene, Pyrene

E4S02DL	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S03DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4S07DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene
E4SC0DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4SC8DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4SC9DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene, Indeno(1,2,3-cd)pyrene
E4SE0DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected as Decachlorobiphenyl (surrogate) was one of the compounds failing to meet criteria.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0DL, E4SD9, E4SE0

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4SC0DL
Endosulfan II	E4RY7, E4RZ7, E4S05

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4SC0DL
Endosulfan II	E4RY6, E4RY7, E4RZ7, E4S05, E4S07, E4SB9, E4SC0, E4SC1, E4SC3, E4SE0
4,4'-DDT	E4RY7, E4RZ7, E4RZ9, E4S05

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SC3 has one surrogate percent recovery greater than 150%, but less than or equal to 200%, on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The “J” flags applied to samples E4SC3 during the automated check process have been removed for all detected compounds, unless the flag has been applied for another reason.

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10% on one or both columns. All target analytes are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Automated flags have been

overridden if a compound has been reported from the GC column having acceptable recovery, unless the flag has been applied for another reason.

E4RY7, E4RZ8, E4S07, E4SC0, E4SC3, E4SC8, E4SE0

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The RPD between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

Aldrin	E4S07MS, E4S07MSD
4,4'-DDT	E4S07MS, E4S07MSD

The RPD between pesticide analyte results is less than the lower acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

gamma-BHC (Lindane)	E4S07MS, E4S07MSD

The RPD between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Dieldrin	E4S07MS, E4S07MSD
Endrin	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than or equal to the lower expanded criteria limit but less than the lower primary criteria limit Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Heptachlor	E4S07MS

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are less than the lower expanded criteria limit Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table.

Pesticide analytes	**E4S07** µg/Kg	**E4S08** µg/Kg	**%RPD**
alpha-BHC	ND	ND	NA
beta-BHC	0.19	0.2	5.1
delta-BHC	ND	ND	NA
gamma-BHC(Lindane)		ND	
Heptachlor	1.6	0.78	68.9
Aldrin	ND	ND	NA
Heptachlor epoxide			
Endosulfan I	ND	ND	NA
Dieldrin	1.6	1.3	20.7
4,4'-DDE	3.5	2.5	33.3
Endrin	0.96	0.79	19.4
Endosulfan II	0.38	ND	#
4,4'-DDD	ND	ND	NA
Endosulfan sulfate	ND	ND	NA
4,4'-DDT	ND		
Methoxychlor	1.9	2	5.1
Endrin ketone	0.38	ND	#
Endrin aldehyde	ND	ND	NA
alpha-Chlordane	ND	0.33	#
gamma-Chlordane	ND	ND	NA
Toxaphene	ND	ND	NA

ND = Not Detected, NA = Not Applicable, # = Not Calculable

Results for gamma-BHC(Lindane), Heptachlor epoxide, and 4,4'-DDT were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

RPD exceeded 50% for Heptachlor. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aldrin E4S07MS, E4S07MSD

alpha-BHC	E4SC3
alpha-Chlordane	E4S07MS, E4S07MSD
Endrin ketone	E4SC0DL
Dieldrin	E4S07
4,4'-DDD	E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ9, E4S02, E4S03, E4SC0, E4SC1
4,4'-DDE	E4S02, E4S07, E4SB9, E4SD9, PLCSS3
Endrin aldehyde	E4RZ8, E4S07MS, E4S07MSD
Heptachlor	E4SC1
Endosulfan I	E4SC0

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

4,4'-DDT	E4S07MSD, E4SC0, E4SC0DL
alpha-Chlordane	E4S08
gamma-Chlordane	E4SC0
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Endrin	E4S03, E4S07, E4S08, E4SC0, E4SE0
4,4'-DDE	E4RY5, E4RY6, E4RZ9, E4S03, E4S03DL, E4SC8
Endrin aldehyde	E4RZ9
Heptachlor	E4S07, E4S07MS

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4RY7, E4S00, E4S01, E4S05, E4SC1, E4SC3, E4SC8
alpha-BHC	E4SC1
beta-BHC	E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0DL, E4SC3
Endosulfan II	E4RY6, E4S03, E4S07, E4SB9, E4SC0, E4SE0
4,4'-DDT	E4RZ7, E4RZ9, E4SC1
alpha-Chlordane	E4RZ8, E4SC0DL
Endrin ketone	E4S07, E4SB9, E4SE0
Dieldrin	E4SC0DL, E4SC1, E4SC3
Endrin	E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S03DL, E4S05, E4SD9
Methoxychlor	E4RY6, E4RZ7, E4RZ9, E4S02, E4S03, E4S07, E4S08, E4SB9, E4SC0, E4SC8, E4SD9, E4SE0
4,4'-DDD	E4S03DL
4,4'-DDE	E4RY7, E4S05, E4SC1, E4SC3
Endrin aldehyde	E4S00, E4S01, E4S05, E4SE0
Heptachlor	E4RZ7, E4SC0DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4RY5, E4RY6, E4RZ7, E4RZ8, E4RZ9, E4S02, E4S03, E4S03DL, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0, E4SC0DL, E4SD9, E4SE0
beta-BHC	E4S02, E4S03

4,4'-DDT	E4RY5, E4RY6, E4RZ8, E4S08, E4SB9, E4SD9, E4SE0
gamma-BHC (Lindane)	E4RZ8, E4S03, E4S03DL, E4S07
Dieldrin	E4SC0
Endrin	E4S02, E4SB9, E4SC8
4,4'-DDD	E4SE0
4,4'-DDE	E4RZ7, E4SC0DL
Heptachlor	E4RY5, E4RY6, E4RZ8, E4RZ9, E4S02, E4S03, E4S03DL, E4S07MSD, E4S08, E4SB9, E4SC0, E4SD9, E4SE0
Endosulfan I	E4SB9

11. SYSTEM PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SB9, E4SC0, E4SC0DL, E4SC1, E4SC3, E4SC8, E4SD9, E4SE0

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S03	Heptachlor
E4SC0	4,4’-DDD

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RZ7, E4RZ8, E4S00, E4S01, E4S02, E4SB9, E4SD9, E4SE0

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following Aroclor samples have no associated sulfur cleanup blank. Detected and nondetected compounds are not qualified.

E4RZ8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor sample has surrogate percent recoveries that are greater than 200% on both columns. Detected compounds are qualified J. Nondetected compounds are not qualified. All target compounds are affected.

E4S07MS

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S02DL, E4S03DL, E4SC0, E4SC0DL, E4SE0

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The “J” flags applied to samples these samples during the automated check process have been removed for all detected compounds, unless the flag has been applied for another reason.

E4S02, E4S03, E4S07MSD, E4S08, E4SD9

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RZ8DL, E4S02DL, E4SB9

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1260 E4S07MS, E4S07MSD
Aroclor-1016 E4S07MS, E4S07MSD

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified. Although not reported as present, Aroclor-1248 is present in the MS/MSD samples in addition to the spiking compounds (Aroclor-1016 and Aroclor-1260) and may have attributed to the high recovery of the spike compounds.

Aroclor-1260 E4S07MS, E4S07MSD
Aroclor-1016 E4S07MS, E4S07MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table.

Aroclor Analytes	**E4S07DL** µg/Kg	**E4S08DL** µg/Kg	**%RPD**
Aroclor-1016	ND	ND	NA
Aroclor-1221	ND	ND	NA
Aroclor-1232	ND	ND	NA
Aroclor-1242	ND	ND	NA
Aroclor-1248	190	110	53.3
Aroclor-1254	ND	ND	NA
Aroclor-1260	80	ND	#
Aroclor-1262	ND	ND	NA
Aroclor-1268	ND	ND	NA

ND= Not Detected, NA= Not Applicable, #= Not Calculable

The RPD for Aroclor-1248 exceeds 50%. The RPD for Aroclor-1260 cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Samples E4SB9 and E4SE0 are only reported as ten-fold dilutions, which place the detected Aroclor-1248 results within the calibration range. Analyses of a ten-times more concentrated aliquot of these samples were not performed because the laboratory was granted a waiver from this requirement by SMO.

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4S08
Aroclor-1248	E4RY6DL
Aroclor-1016	E4S07MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260	E4RZ7
Aroclor-1248	E4RY6

The following Aroclor sample has percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1248	E4S05

The following Aroclor sample has percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1248	E4RZ7

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S00, E4SB9, E4SD9

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample analysis should be used for result validation.

E4RY6, E4RZ8, E4S02, E4S03, E4S07, E4S08, E4SC0

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

GREAT LAKES NATIONAL PROGRAM OFFICE

Date: June 18, 2010

Subject: Review of Data
Received for Review on: April 14, 2010

From: Julie Rest
Environmental Chemist

To: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4RY8

Number and Type of Samples: 20 Sediment Samples

Sample Numbers: E4RY8, E4RY9, E4RZ0, E4RZ1 – E4RZ6, E4S06, E4S09, E4S10, E4S49 – E4S52, E4S59, E4S77 – E4S79

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

Sample Receipt: Twenty (20) sediment samples labeled E4RY8, E4RY9, E4RZ0 – E4RZ6, E4S06, E4S09, E4S10, E4S49 – E4S52, E4S59, E4S77, and E4S79 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. Samples E4RY8, E4RY9, E4RZ0 –E4RZ6, E4S06, E4S09, and E4S10 were collected on 2/26/2010 and were received on 3/2/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 8 ºC. Samples E4S49 – E4S52, E4S59, E4S77, E4S78 and E4S79 were collected on 3/2/2010 and were received on 3/4/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 7 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4RZ1 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4RZ3 and E4RZ4, and E4S78 and E4S79, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10, E4S49, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79

The following semivolatile samples are associated with an opening CCV percent difference (%D) outside criteria for 2-Methylnaphthalene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4RY8, E4RZ1, E4RZ1MSD, E4RZ5DL

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Sample E4RZ3 has a deuterated monitoring compound recovery above the upper limit of the criteria window. Affected compounds Anthracene and Phenanthrene are qualified “J” in sample E4RZ3.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4RZ3 and E4RZ4

Semivolatile compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	61	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	650	1	350	1	60
Anthracene	210	1	100	1	71
Fluoranthene	1500	1	860	1	54
Pyrene	1300	1	1100	1	17
Benzo(a)anthracene	530	1	600	1	12
Chrysene	820	1	630	1	26
Benzo(b)fluoranthene	700	1	720	1	2.8
Benzo(k)fluoranthene	300	1	250	1	18
Benzo(a)pyrene	580	1	620	1	6.7
Indeno(1,2,3-cd)pyrene	290	1	290	1	0
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	170	1	180	1	5.7

For field duplicates E4RZ3 and E4RZ4, RPD values for Phenanthrene, Anthracene, and Fluoranthene were above 50%.

E4S78 and E4S79

Semivolatile compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicate samples E4S78 and E4S79, RPDs could not be calculated because both sets of results were nondetects.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY8, E4RZ4, E4S09
Pyrene	E4S50
Benzo (g,h,i) perylene	E4RZ0, E4RZ2, E4RZ3, E4RZ5DL, E4S06, E4S09, E4S59
Indeno (1,2,3-cd) pyrene	E4RZ2, E4RZ5DL, E4S06, E4S59
Benzo (b) fluoranthene	E4RZ0, E4S49, E4S50
Fluoranthene	E4S50
Benzo (k) fluoranthene	E4RZ2, E4RZ5DL, E4S06, E4S09, E4S59
Acenaphthylene	E4RZ5DL
Chrysene	E4RZ0, E4S49, E4S59
Benzo (a) pyrene	E4RZ0, E4S49, E4S50, E4S59
Dibenzo (a,h) anthracene	E4RY9, E4RZ5
Benzo (a) anthracene	E4RZ0, E4S06, E4S49, E4S59
Acenaphthene	E4RY9, E4RZ3, E4RZ5DL
Phenanthrene	E4RZ0, E4S06, E4S49, E4S59

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4RZ5 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene, Phenanthrene, and Pyrene, and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(b)fluoranthene E4S79

Indeno(1,2,3-cd)pyrene E4S78, E4S79

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the MS and MSD prepared for semivolatile-SIM sample E4RZ1 were above criteria for Acenaphthene and Pyrene. All sample results for Acenaphthene and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4RZ3 and E4RZ4

Semivolatile-SIM compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Naphthalene	12	1	5.4	1	76
2-Methylnaphthalene	6.8	1	3.8	1	57
Acenaphthylene	3.8	1	3.8	1	0

Semivolatile-SIM compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Acenaphthene	32	1	12	1	91
Fluorene	33	1	13	1	87
Phenanthrene	330	1	220	1	40
Anthracene	75	1	59	1	24
Fluoranthene	590	1	470	1	23
Pyrene	930	1	700	1	28
Benzo(a)anthracene	460	1	440	1	4.4
Chrysene	460	1	390	1	17
Benzo(b)fluoranthene	590	1	520	1	13
Benzo(k)fluoranthene	140	1	120	1	15
Benzo(a)pyrene	380	1	360	1	5.4
Indeno(1,2,3-cd)pyrene	330	1	280	1	16
Dibenzo(a,h)anthracene	65	1	60	1	8
Benzo(g,h,i)perylene	130	1	120	1	8

For field duplicate pair E4RZ3 and E4RZ4, Naphthalene, 2-Methylnaphthalene, Acenaphthene, and Fluorene had RPD values above 50%.

E4RZ3DL and E4RZ4DL

Semivolatile-SIM compounds	E4RZ3DL µg/kg	DF	E4RZ4DL µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	42	10	3.6	10	95
Fluorene	43	10	4.5	10	82
Phenanthrene	420	10	49	10	47
Anthracene	82	10	9.1	10	20
Fluoranthene	940	10	80	10	28
Pyrene	810	10	66	10	25
Benzo(a)anthracene	450	10	38	10	2.2
Chrysene	460	10	40	10	14
Benzo(b)fluoranthene	600	10	59	10	12
Benzo(k)fluoranthene	150	10	17	10	6.9
Benzo(a)pyrene	420	10	39	10	4.9
Indeno(1,2,3-cd)pyrene	340	10	27	10	9.2
Dibenzo(a,h)anthracene	66	10	5.8	10	3.1
Benzo(g,h,i)perylene	150	10	22	10	0

For the dilute analysis of field duplicate pair E4RZ3DL and E4RZ4DL, Acenaphthene and Fluorene had RPD values above 50%.

E4S78 and E4S79

Semivolatile-SIM compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	1.8	1	0.72	1	86
Anthracene	ND	1	ND	1	
Fluoranthene	3.2	1	0.81	1	120
Pyrene	3.6	1	1.4	1	88
Benzo(a)anthracene	1.6	1	ND	1	
Chrysene	2.1	1	0.88	1	82
Benzo(b)fluoranthene	2.8	1	2.2	1	24
Benzo(k)fluoranthene	0.84	1	ND	1	
Benzo(a)pyrene	2	1	0.61	1	110
Indeno(1,2,3-cd)pyrene	2.3	1	2.2	1	4.4
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	1.7	1	1.1	1	43

For field duplicate pair E4S78 and E4S79, the RPD calculated for Phenanthrene, Fluoranthene, Chrysene, Pyrene, and benzo(a)pyrene were above 50% .

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified “J”. Nondetected compounds are not qualified.

Anthracene	E4RZ0DL, E4RZ1, E4RZ2DL, E4RZ6, E4S06DL, E4S10, E4S49DL, E4S50DL, E4S59DL
Pyrene	E4S79
Benzo (g,h,i) perylene	E4RZ1MS, E4RZ1MSD, E4S50DL, E4S78, E4S79
Indeno (1,2,3-cd) pyrene	E4RZ1, E4RZ1MS, E4RZ1MSD, SBLK09
Benzo (b) fluoranthene	E4RZ1MSD

Fluoranthene	E4S52, E4S79
Benzo (k) fluoranthene	E4RZ0DL, E4RZ1, E4RZ1MS, E4RZ6, E4S50DL, E4S51, E4S52, E4S77, E4S78
Acenaphthylene	E4RY8, E4RY9DL, E4RZ0, E4RZ2, E4RZ3, E4S06, E4S49, E4S50, E4S59
Chrysene	E4RZ1MS, E4RZ1MSD, E4S51, E4S77, E4S78, E4S79
Benzo (a) pyrene	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S78, E4S79
Dibenzo (a,h) anthracene	E4RZ0DL, E4RZ1MSD, E4RZ2DL, E4RZ6, E4S06DL, E4S10, E4S49DL, E4S50DL, E4S52, E4S59DL, E4S77
Benzo (a) anthracene	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S51, E4S52, E4S77, E4S78
Acenaphthene	E4RY8DL, E4RZ0DL, E4RZ2DL, E4RZ4DL, E4S09DL, E4S10, E4S50, E4S59
Phenanthrene	E4RZ1MSD, E4S51, E4S52, E4S77, E4S78, E4S79
Fluorene	E4RY8DL, E4RZ0DL, E4RZ2DL, E4RZ4DL, E4RZ6, E4S10, E4S50, E4S59
Naphthalene	E4RZ2
2-Methylnaphthalene	E4RZ2

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

Acenaphthene	E4RY9, E4RZ5
Acenaphthylene	E4RZ5
Anthracene	E4RY8, E4RY9, E4RZ3, E4RZ4, E4RZ5, E4S09
Benzo(a)anthracene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(a)pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59

Benzo(b)fluoranthene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(g,h,i)perylene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(k)fluoranthene	E4RY8, E4RY9, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Chrysene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Dibenzo(a,h)anthracene	E4RY8, E4RY9, E4RZ3, E4RZ4, E4RZ5, E4S09
Fluoranthene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Fluorene	E4RY9, E4RY25
Indeno(1,2,3-cd)pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Naphthalene	E4RZ5
Phenanthrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Anthracene	E4RZ5DL
Benzo(a)anthracene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Benzo(a)pyrene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Benzo(b)fluoranthene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL, E4S09DL
Benzo(g,h,i)perylene	E4RY9DL
Benzo(k)fluoranthene	E4RZ5DL
Chrysene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Fluoranthene	E4RY8DL, E4RY9DL, E4RZ2DL, E4RZ3DL, E4RZ4DL, E4RZ5DL, E4S09DL

Fluorene	E4RZ5DL
Indeno(1,2,3-cd)pyrene	E4RY8DL, E4RY9DL, E4RZ5DL
Naphthalene	E4RZ5DL
Phenanthrene	E4RY85DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Pyrene	E4RY8DL, E4RY9DL, E4RZ2DL, E4RZ3DL, E4RZ4DL, E4RZ5DL E4S09DL

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. . Detected compounds are qualified J. Nondetected compounds are qualified UJ. Despite the CCV issue, the Decachlorobiphenyl recoveries in the associated samples, except for diluted E4RZ5, met the acceptance criteria.

E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4RZ6, E4S06, E4S09, E4S10, E4S49, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4RZ5DL
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10
alpha-Chlordane	E4S49, E4S52
Endrin ketone	E4RY8DL, E4RZ5DL
gamma-BHC (Lindane)	E4RZ1, E4RZ2, E4RZ6, E4S06, E4S10
Dieldrin	E4S52, E4S59
Endrin	E4RY8DL, E4RZ1, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S50, E4S51
Methoxychlor	E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S06, E4S10
4,4'-DDD	E4RY8DL, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
4,4'-DDE	E4RY8DL, E4S51

Endrin aldehyde	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ5DL, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
Endosulfan I	E4RY8DL, E4RZ5DL, E4S49, E4S50, E4S59

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S49, E4S51, E4S52, E4S77, E4S78, E4S79
beta-BHC	E4RZ5DL, E4S77, E4S78, E4S79
delta-BHC	E4S51, E4S52, E4S77, E4S78, E4S79
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10, E4S51, E4S52, E4S79
4,4'-DDT	E4S49, E4S50, E4S51, E4S52, E4S77, E4S78, E4S79
alpha-Chlordane	E4S49, E4S52
Endrin ketone	E4RY8DL, E4RZ5DL, E4S51, E4S52, E4S59, E4S77, E4S79
gamma-BHC (Lindane)	E4RZ1, E4RZ2, E4RZ6, E4S06, E4S10
Dieldrin	E4S52, E4S59
Endrin	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ2, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S49, E4S50, E4S51, E4S59
Methoxychlor	E4RY8, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ4, E4RZ6, E4S06, E4S09, E4S10
4,4'-DDD	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
4,4'-DDE	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S06, E4S10, E4S51
Endrin aldehyde	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ5DL, E4RZ6, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
Endosulfan I	E4RY8DL, E4RZ2, E4RZ5DL, E4S06, E4S49, E4S50, E4S59

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery.

However, diluted pesticide sample E4RZ5DL with a dilution factor greater than 5 had surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4RZ3 and E4RZ4

Pesticide compound	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	1.1	1		1	
Heptachlor	ND	1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1	ND	1	
Endosulfan I	0.68	1		1	
Dieldrin	3	1	2.2	1	31
4,4'-DDE	4	1	2.2	1	58
Endrin		1	0.6	1	
Endosulfan II	0.39	1	0.33	1	17
4,4'-DDD		1	3.8	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	6	1	3.3	1	58
Methoxychlor		1	1.7	1	
Endrin ketone	0.39	1	ND	1	
Endrin aldehyde		1	1.9	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

Results for gamma-BHC(Lindane), Heptachlor, Heptachlor epoxide, Endosulfan I, Endrin, Methoxychlor, and Endrin aldehyde were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

For field duplicate samples E4RZ3 and E4RZ4, where calculated, RPD values were less than 50 %, with the exception of 4,4'-DDT and 4,4'-DDE.

E4S78 and E4S79

Pesticide compound	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.12	1	0.11	1	8.7
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	0.02	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.24	1	ND	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S78 and E4S79, beta-BHC had an RPD value less than 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following compounds were reported at a concentration below the MDL in the samples listed below. The results are qualified "U" and elevated to the CRQL. The results are considered to be nondetects at the CRQL.

4,4'-DDT	E4S10
Endosulfan sulfate	E4S10
Heptachlor epoxide	E4S77.E4S78

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

beta-BHC	E4S10
Heptachlor	E4S59
Heptachlor epoxide	E4S79

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J".

Heptachlor epoxide	E4S77, E4S79
beta-BHC	E4RZ1MS, E4S51
Endosulfan II	E4RZ1
4,4'-DDT	E4S78
Endrin ketone	E4RZ1MSD
gamma-BHC (Lindane)	E4RY9, E4RZ1MS, E4RZ1MSD, E4RZ3
Dieldrin	E4S59
Methoxychlor	E4RY9
4,4'-DDD	E4RY9, E4RZ4, E4RZ6, E4S10, E4S49
4,4'-DDE	E4RZ1MSD, E4RZ3, E4S09, E4S49
Endrin aldehyde	E4RZ1MSD, E4RZ6
Heptachlor	E4RZ1MSD, E4S59
Endosulfan I	E4RZ3, E4RZ5

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

4,4'-DDT	E4RY9, E4RZ2, E4RZ4, E4RZ5DL, E4S06, E4S59
Endrin	E4RZ4

4,4'-DDD	E4RZ0, E4RZ5, E4RZ5DL
4,4'-DDE	E4RY9, E4RZ2, E4RZ4, E4RZ5, E4RZ5DL, E4S50, E4S59
Endrin aldehyde	E4RZ5, E4S06
Endosulfan I	E4S09

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S50, E4S51, E4S52
Endosulfan sulfate	E4RZ1
alpha-BHC	E4S59
beta-BHC	E4RZ1MSD, E4RZ5DL, E4RZ6, E4S77, E4S78, E4S79
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ6, E4S06, E4S09, E4S51
4,4'-DDT	E4RZ1, E4RZ6, E4S50
alpha-Chlordane	E4S52
Endrin ketone	E4RY9, E4RZ3, E4S09, E4S59
gamma-BHC (Lindane)	E4RZ1, E4RZ6, E4S06, E4S52
Dieldrin	E4S52
Endrin	E4RY8, E4RY8DL, E4RZ0, E4RZ2, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S49, E4S50, E4S59
Methoxychlor	E4RY8, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ4, E4RZ5DL, E4S06, E4S09, E4S49, E4S50, E4S52, E4S59
4,4'-DDD	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S50, E4S51
4,4'-DDE	E4RZ1MS, E4S06, E4S10, E4S51
Endrin aldehyde	E4RY8, E4RZ0, E4RZ1, E4RZ1MS
Heptachlor	E4RZ6, E4S10, E4S51

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4RY8, E4RZ0, E4RZ3, E4RZ5, E4S09
beta-BHC	E4RZ2
delta-BHC	E4S06, E4S49
4,4'-DDT	E4RZ0, E4RZ5
gamma-BHC (Lindane)	E4RZ4, E4S09
Endrin	E4RY9, E4RZ3, E4S09
Methoxychlor	E4RZ3, E4RZ5
4,4'-DDD	E4RY8, E4RZ3, E4S09
4,4'-DDE	E4RY8, E4RZ0
Endrin aldehyde	E4RY9, E4RZ2, E4RZ3, E4S09
Heptachlor	E4RZ4, E4RZ5, E4RZ5DL, E4S09
Endosulfan I	E4RZ0, E4RZ4

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of diluted sample E4RY9DL. No sample results were qualified based on surrogate recovery. However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4RY8, E4RY9, E4RZ3, E4RZ4, and E4S49. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RY9DL, E4RZ3DL, E4RZ4DL, E4S09DL

Diluted Aroclor sample E4RY9DL, with a dilution factor greater than 5, has surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4RZ1, the Aroclor MS and MSD sample has a percent recovery greater than the upper acceptance limit on RTX-CLP2 column for Aroclor-1016. In addition, the relative percent difference (RPD) between the MS and MSD for Aroclor-1016 was above criteria on both columns. All samples are affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SZ3 and E4SZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SZ3 and E4SZ4

Aroclor compounds	E4SZ3 µg/kg	DF	E4SZ4 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	240	1	180	1	29
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4SZ3DL and E4SZ4DL

Aroclor compounds	E4SZ3DL µg/kg	DF	E4SZ4DL µg/kg	DF	%RPD
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	290	10	240	10	19
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	
Aroclor-1268	ND	10	ND	10	

For the neat and diluted analysis of field duplicate samples E4SZ3 and E4SZ4, RPD values were not calculated when both values were nondetects. The RPD for Aroclor-1248 was below 50%.

E4S78 and E4S79

Aroclor compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Aroclor-1016	ND		ND		
Aroclor-1221	ND		ND		
Aroclor-1232	ND		ND		
Aroclor-1242	ND		ND		
Aroclor-1248	ND		ND		
Aroclor-1254	ND		ND		
Aroclor-1260	ND		ND		

Aroclor compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Aroclor-1262	ND		ND		
Aroclor-1268	ND		ND		

For field duplicate samples E4S78 and E4S79, RPD values were not calculated because both results were nondetects.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1260 E4RZ6, E4S10, E4S51

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4RZ2, E4RZ6, E4S51

Aroclor-1248 E4RY8, E4S09DL

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S59

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S52

For the MS and MSD prepared for sample E4RZ1, Aroclor-1016 had a percent difference between the results on the two GC columns exceeding 100%. Detected Aroclor-1016 results in the MS and MSD are qualified "R".

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4RY9, E4RZ0, E4RZ3 – E4RZ5, E4S09	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4S11

Number and Type of Samples: 19 Sediment Samples

Sample Numbers: E4RS11 – E4S18, E4S25 – E4S27, E4S34 – E4S36, E4S38 – E4S42

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

Sample Receipt: Nineteen (19) sediment samples labeled E4S11 – E4S18, E4S25 – E4S27, E4S34 – E4S36, and E4S38 – E4S42 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All nineteen samples were collected on 3/1/2010 and were received on 3/3/2010, intact, at 6 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4S35 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4S14 and E4S15, and E4S39 and E4S40, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S11, E4S12, E4S13, E4S14, E4S15, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S35MS, E4S35MSD, E4S36, E4S38, E4S39, E4S40, E4S41, E4S42

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria for benzo(b)fluoranthene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S11, E4S14, E4S15, E4S16, E4S18, E4S25, E4S26, E4S27, E4S34, E4S38, E4S39, E4S40, E4S41, E4S42

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Sample E4S41 has a deuterated monitoring compound recovery slightly above the upper limit of the criteria window. Since affected compounds, Anthracene and Phenanthrene were not detected in sample E4S41, the data are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene had low recoveries in the MS/MSD prepared for sample E4S35 and the relative percent difference (RPD) between the MS and MSD exceeded criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4S14 and E4S15

Semivolatile compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	53	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicates E4S14 and E4S15, the RPD values were not calculated because either one or both of the values was zero.

E4S39 and E4S40

Semivolatile compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	99	1	78	1	24
Anthracene	ND	1	ND	1	
Fluoranthene	160	1	120	1	29
Pyrene	120	1	97	1	21
Benzo(a)anthracene	52	1	54	1	3.8
Chrysene	74	1	ND	1	
Benzo(b)fluoranthene	82	1	81	1	1.2
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	55	1	49	1	12
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	

Semivolatile compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicate samples E4S39 and E4S40, where the RPD could be calculated, the values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S12, E4S17, E4S36
Pyrene	E4S18, E4S25, E4S27, E4S39, E4S40
Benzo(g,h,i)perylene	E4S11, E4S16, E4S18, E4S25, E4S26, E4S34, E4S35MS, E4S35MSD, E4S38
Indeno(1,2,3-cd)pyrene	E4S11, E4S16, E4S26, E4S34, E4S35MS
Benzo(b)fluoranthene	E4S25, E4S35MSD, E4S39, E4S40
Fluoranthene	E4S14, E4S25, E4S27, E4S35MSD, E4S40
Benzo(k)fluoranthene	E4S36
Chrysene	E4S18, E4S26, E4S34, E4S35MS, E4S39
Benzo(a)pyrene	E4S16, E4S18, E4S25, E4S34, E4S35MSD, E4S38, E4S39, E4S40
Dibenzo(a,h)anthracene	E4S12, E4S13, E4S17, E4S35
Benzo(a)anthracene	E4S11, E4S16, E4S18, E4S25, E4S34, E4S35MSD, E4S38, E4S39, E4S40
Acenaphthene	E4S13, E4S36
Phenanthrene	E4S11, E4S16, E4S18, E4S26, E4S27, E4S34, E4S35MSD, E4S39, E4S40
Fluorene	E4S13, E4S36

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene E4S14DL, E4S27DL, E4S42

Indeno(1,2,3-cd)pyrene E4S27DL, E4S42

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

An MS/MSD was prepared for sample E4S35. The results for spiking compounds acenaphthene and pyrene reported in the MS/MSD were approximately ten times lower than the amount detected for these compounds in the unspiked sample, resulting is negative recoveries, which have no physical meaning. The differences may have resulted from matrix interference, high levels of the compounds in the unspiked sample, or variable sediment consistency. Both compounds required dilution in the unspiked sample. No dilutions were performed for the MS/MSD. No other samples are qualified based on the MS/MSD. Results for acenaphthene and pyrene in Sample E4S35 are reported from the sample dilution.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4S14 and E4S15

Semivolatile-SIM compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	1.5	1	ND	1	
Fluorene	1.7	1	0.63	1	92
Phenanthrene	19	1	6.6	1	97
Anthracene	4	1	1.3	1	100
Fluoranthene	33	1	13	1	87
Pyrene	26	1	11	1	81
Benzo(a)anthracene	14	1	5.8	1	83
Chrysene	15	1	6.1	1	84
Benzo(b)fluoranthene	21	1	9.2	1	78
Benzo(k)fluoranthene	6.3	1	2.7	1	80
Benzo(a)pyrene	14	1	6.5	1	73
Indeno(1,2,3-cd)pyrene	9.5	1	5	1	62
Dibenzo(a,h)anthracene	2	1	1	1	67
Benzo(g,h,i)perylene	7.5	1	4.1	1	59

For field duplicate pair E4S14 and E4S15, all detected compounds had RPD values above 50%.

E4S39 and E4S40

Semivolatile-SIM compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	0.66	1	ND	1	
Acenaphthene	4.6	1	3.6	1	24
Fluorene	5.4	1	4.5	1	18
Phenanthrene	57	1	49	1	15
Anthracene	9	1	9.1	1	1.1
Fluoranthene	91	1	80	1	13
Pyrene	73	1	66	1	10
Benzo(a)anthracene	41	1	38	1	7.6
Chrysene	44	1	40	1	9.5
Benzo(b)fluoranthene	67	1	59	1	13
Benzo(k)fluoranthene	20	1	17	1	16
Benzo(a)pyrene	43	1	39	1	9.8
Indeno(1,2,3-cd)pyrene	32	1	27	1	17
Dibenzo(a,h)anthracene	6.6	1	5.8	1	13
Benzo(g,h,i)perylene	25	1	22	1	13

E4S39DL and E4S40DL

Semivolatile-SIM compounds	E4S39DL µg/kg	DF	E4S40DL µg/kg	DF	%RPD
Naphthalene	ND	5	ND	5	
2-Methylnaphthalene	ND	5	ND	5	
Acenaphthylene	ND	5	ND	5	
Acenaphthene	5.8	5	4.8	5	19
Fluorene	7.3	5	5.8	5	23
Phenanthrene	62	5	51	5	20
Anthracene	10	5	9.5	5	5.1
Fluoranthene	100	5	88	5	13
Pyrene	73	5	62	5	16
Benzo(a)anthracene	39	5	35	5	11
Chrysene	45	5	39	5	14
Benzo(b)fluoranthene	55	5	51	5	7.5
Benzo(k)fluoranthene	17	5	15	5	13
Benzo(a)pyrene	39	5	37	5	5.3
Indeno(1,2,3-cd)pyrene	30	5	29	5	3.4
Dibenzo(a,h)anthracene	5.8	5	5.6	5	3.5
Benzo(g,h,i)perylene	26	5	25	5	3.9

For field duplicate pair E4S39DL and E4S40DL, all calculated RPD values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4S14DL, E4S15, E4S18DL, E4S25DL, E4S26DL, E4S34DL, E4S39DL, E4S40DL, E4S41
Benzo(g,h,i)perylene	E4S14DL, E4S27DL, E4S42
Indeno(1,2,3-cd)pyrene	E4S27DL, E4S42, SBLK41
Benzo(b)fluoranthene	SBLK41
Fluoranthene	E4S42

Benzo(k)fluoranthene	E4S14DL, E4S27DL, E4S41, E4S42
Acenaphthylene	E4S11, E4S17DL, E4S18, E4S26, E4S35, E4S36, E4S38, E4S39
Benzo(a)pyrene	E4S42
Dibenzo(a,h)anthracene	E4S14, E4S14DL, E4S15, E4S18DL, E4S25DL, E4S26DL, E4S27, E4S36DL, E4S38DL, E4S39DL, E4S40DL, E4S41
Benzo (a) anthracene	E4S42
Acenaphthene	E4S11DL, E4S12DL, E4S14, E4S16, E4S17DL, E4S18, E4S25, E4S26DL, E4S27DL, E4S34, E4S38DL, E4S39DL, E4S40DL
Phenanthrene	E4S42
Fluorene	E4S11DL, E4S12DL, E4S14, E4S15, E4S16DL, E4S18DL, E4S25, E4S26DL, E4S27DL, E4S34DL, E4S35MS, E4S35MSD, E4S39DL, E4S40DL, E4S41
Naphthalene	E4S11, E4S27
2-Methylnaphthalene	E4S27, E4S35DL, E4S36

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

Acenaphthene	E4S13, E4S35
Anthracene	E4S12, E4S13, E4S17, E4S35, E4S36
Benzo(a)anthracene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(a)pyrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(b)fluoranthene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(g,h,i)perylene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38

Benzo(k)fluoranthene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S26, E4S34, E4S35, E4S36, E4S38
Chrysene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Dibenzo(a,h)anthracene	E4S12, E4S13, E4S17, E4S35, E4S36,
Fluoranthene	E4S11, E4S12, E4S13, E4S14, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Fluorene	E4S13, E4S35
Indeno(1,2,3-cd)pyrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Naphthalene	E4S35
Phenanthrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Pyrene	E4S11, E4S12, E4S13, E4S14, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Anthracene	E4S35DL
Benzo(a)anthracene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Benzo(a)pyrene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Benzo(b)fluoranthene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL
Benzo(g,h,i)perylene	E4S12DL, E4S17DL, E4S35DL
Chrysene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Fluoranthene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S18DL, E4S26DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL
Indeno(1,2,3-cd)pyrene	E4S12DL, E4S13DL, E4S17DL, E4S35DL
Phenanthrene	E4S12DL, E4S13DL, E4S17DL, E4S36DL
Pyrene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL

For the MS/MSD prepared for sample E4S35, the following compounds reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed

Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4S34, E4S35, E4S40, E4S41, E4S42
Endrin	E4S14, E4S15, E4S16, E4S25, E4S38, E4S39, E4S40, E4S41
Endrin aldehyde	E4S15, E4S16, E4S38, PLCSS1

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4S17, E4S27, E4S34, E4S35, E4S40, E4S41, E4S42
4,4'-DDT	E4S34, E4S41, E4S42
Endrin	E4S12, E4S14, E4S15, E4S16, E4S17, E4S25, E4S26, E4S35, E4S38, E4S39, E4S40, E4S41
4,4'-DDD	E4S34, E4S41, E4S42
Endrin aldehyde	E4S15, E4S16, E4S25, E4S26, E4S27, E4S34, E4S38, E4S41

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a high surrogate recovery was obtained on one column for samples E4S13 and E4S17. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, for samples E4S13

and E4S17, the "J" flags applied during the automated check process have been removed for the following compounds.

E4S13 4,4'-DDE, Endrin, 4,4'-DDD

E4S17 4,4'-DDD

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S35, the pesticide MS and/or MSD samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column for gamma-BHC and Heptachlor. All samples in the SDG are affected. However, since the results for gamma-BHC and Heptachlor were reported from the RTXCLP column for all samples in this SDG, the data are not qualified.

On the other column, RTX-CLP, the relative percent difference (RPD) between the MS and MSD is outside of criteria for 4,4'-DDT. All samples are affected. Detected compounds are qualified "J".

E4S11 – E4S18, E4S25 – E4S27, E4S34, E4S35, E4S36, E4S38 – E4S42

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4SRW1 and E4RW2, E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4S14 and E4S15

Pesticide compound	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	0.12	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	0.21	1	0.16	1	27
Endrin	0.24	1	0.23	1	4.3
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.21	1	0.14	1	40
Endosulfan sulfate	0.24	1	ND	1	
4,4'-DDT	0.24	1	0.23	1	4.3
Methoxychlor	1.2	1	ND	1	

Pesticide compound	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	0.12	1	0.17	1	35
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S14 AND E4S15, where calculated, RPD values were less than 50%.

E4S39 and E4S40

Pesticide compound	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.17	1	0.24	1	34
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	0.11	1	
4,4'-DDE	0.68	1	1	1	38
Endrin	0.26	1	ND	1	
Endosulfan II	ND	1	0.24	1	
4,4'-DDD	0.66	1	1	1	41
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.29	1	0.44	1	41
Methoxychlor	1.3	1	0.2	1	150
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	0.28	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S39 and E4S40, one compound, Methoxychlor, had an RPD value greater than 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Methoxychlor was reported at a concentration below the MDL in sample E4S15. This result is qualified "U" and elevated to the CRQL. The result for Methoxychlor in sample E4S15 is considered a nondetect at the level of the CRQL. The following compounds were flagged "UJ" during the automated check process. These compounds were affected by blank contamination and/or percent difference between the two columns outside of criteria, resulting in the "U" flag. The flags for these compounds have been adjusted to "U" in the "B" and "Z" data files.

4,4'-DDT	E4S42
Endrin	E4S17, E4S35
Endosulfan II	E4S17
Endrin ketone	E4S17

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

4,4'-DDD	E4S14, E4S41
4,4'-DDE	E4S14, E4S15
4,4'-DDT	E4S16
alpha-chlordane	E4S35MS, E4S35MSD
Heptachlor	E4S25

The following pesticide samples have percent differences between the results on the two GC columns in the range of 26-50%. Detected compounds are qualified "J".

Heptachlor epoxide	E4S12, E4S39, E4S40
Aldrin	E4S35MS
4,4'-DDT	E4S12, E4S17, E4S35MS, E4S38, E4S39
alpha-Chlordane	E4S18
gamma-BHC (Lindane)	E4S35MSD
Dieldrin	E4S13, E4S17, E4S40
Endrin	E4S27
Methoxychlor	E4S15, E4S18, E4S35, E4S40
4,4'-DDD	E4S15, E4S18, E4S38, E4S39, E4S42

4,4'-DDE	E4S12, E4S25, E4S26, E4S27, E4S34, E4S35MS, E4S35MSD, E4S38, E4S40, E4S41
Heptachlor	E4S12, E4S35MS

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Heptachlor epoxide	E4S25
4,4'-DDT	E4S35
alpha-Chlordane	E4S17
gamma-Chlordane	E4S13
gamma-BHC (Lindane)	E4S35MS
Endrin	E4S11
4,4'-DDD	E4S35
4,4'-DDE	E4S17
Endrin aldehyde	E4S17
Heptachlor	E4S13

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S15, E4S16, E4S27, E4S34, E4S41
Endosulfan sulfate	E4S11
alpha-BHC	E4S16
beta-BHC	E4S41, E4S42
Endosulfan II	E4S17, E4S35, E4S40, E4S42
4,4'-DDT	E4S14, E4S15, E4S25, E4S34, E4S41, E4S42
alpha-Chlordane	E4S11
gamma-Chlordane	E4S14
Endrin ketone	E4S12, E4S17, E4S27, E4S35, E4S35MSD, PLCSS1
gamma-BHC (Lindane)	E4S41, E4S42

Dieldrin	E4S18
Endrin	E4S12, E4S14, E4S15, E4S16, E4S17, E4S25, E4S26, E4S35, E4S38, PLCSS1
Methoxychlor	E4S11, E4S12, E4S14, E4S16, E4S25, E4S26, E4S27, E4S34, E4S35MS, E4S35MSD, E4S38, E4S39, E4S41
4,4'-DDD	E4S41, E4S42
4,4'-DDE	E4S16
Endrin aldehyde	E4S16, E4S25, E4S26, E4S27, E4S34, E4S38, E4S41, PLCSS1
Heptachlor	E4S18

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4S13, E4S17, E4S18, E4S26, E4S35, E4S35MS, E4S35MSD, E4S36, E4S38
delta-BHC	E4S25
4,4'-DDT	E4S26, E4S36
alpha-Chlordane	E4S13
gamma-Chlordane	E4S16, E4S17, E4S18, E4S27
gamma-BHC (Lindane)	E4S13
Endrin	E4S34, E4S36
Methoxychlor	E4S13, E4S17, E4S36
4,4'-DDD	E4S26, E4S36, E4S40
Endrin aldehyde	E4S36
Heptachlor	E4S17, E4S36

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4S12, E4S13 and E4S17. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted Aroclor sample E4S13DL, with a dilution factor greater than 5, has surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Diluted Aroclor samples E4S13DL and E4S17DL, with dilution factors greater than 5, have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S35, the Aroclor MSD sample has a percent recovery greater than the upper acceptance limit on the RTX-CLP2 column for Aroclor-1016. All samples are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

For the same MS/MSD, Aroclor-1260 had a percent recovery less than the lower acceptance limit on both columns in the MS. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified “UJ”.

The relative percent difference (RPD) between the MS and MSD recoveries of Aroclor-1016 and Aroclor-1260 are also outside of criteria for MS/MSD E4S35. All samples are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

Since neither spiking compound met the recovery criteria on at least one column, and both had RPD values that exceeded criteria, all Aroclor compounds were qualified “J” based on MS/MSD recoveries and RPD as follows:

Aroclor-1248 E4S11, E4S34, E4S36, E4S36DL

Aroclor-1260 E4S11, E4S18, E4S26, E4S40

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4S14 and E4S15

Aroclor compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4S39 and E4S40

Aroclor compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Aroclor-1016	ND		ND		
Aroclor-1221	ND		ND		
Aroclor-1232	ND		ND		
Aroclor-1242	ND		ND		
Aroclor-1248	ND		4.6		
Aroclor-1254	ND		ND		
Aroclor-1260	3.8		3.3		14
Aroclor-1262	ND		ND		
Aroclor-1268	ND		ND		

For field duplicate samples E4S14 and E4S15, and E4S39 and E4S40, RPD values were not calculated when both results were nondetects. The RPD value calculated for Aroclor-1260 was acceptable.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1248 E4S41

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4S17DL, E4S34, E4S35, E4S35MS, E4S36, E4S38, E4S39

Aroclor-1248 E4S13DL, E4S38, E4S40

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S12, E4S13, E4S13DL, E4S35MSD

Aroclor-1248 E4S13

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S16, E4S25

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4S13	Aroclor-1248, Aroclor-1260
E4S17	Aroclor-1260
E4S36	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Seventeen (17) sediment samples, labeled E4S19-E4S24, E4S29-E4S33, E4S43, E4S44, E4S46, E4S48, E4SA0, and E4SB2, were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The samples were collected from 03/01/2010 through 03/03/2010 and were received at the laboratory on 03/03/2010 and 03/06/2010 intact at 5 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S20 was designated by the samplers to be used for laboratory QC, i.e., MS/MSD analyses.

There are no field duplicates or field blanks associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S33, E4S43, E4S44, E4S46, E4S48

Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10} E4S20MS, E4S21

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S20, E4S33, E4S43, E4S44, E4SB2
Benzo(g,h,i)perylene	E4S20, E4S30, E4S33
Indeno(1,2,3-cd pyrene	E4S30, E4S33
Benzo(b)fluoranthene	E4S20MS, E4S20MSD
Fluoranthene	E4S20MS, E4S20MSD, E4S46
Benzo(k)fluoranthene	E4S30, E4S33
Dibenzo(a,h)anthracene	E4S31, E4S32, E4SA0
Benzo(a)anthracene	E4S30
Acenaphthene	E4S32, E4S33
Phenanthrene	E4S20MSD, E4S30
Fluorene	E4S32, E4S33, E4SB2
Naphthalene	E4SA0DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S31, E4S43, E4SA0DL, E4SB2

The following semivolatile sample reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SA0 Phenanthrene, Fluoranthene, Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S30, E4S31: Indeno(1,2,3-cd)pyrene

4. BLANKS

The following semivolatile SIM samples are associated with a method blank (SBLK99) in which Indeno(1,2,3-cd)pyrene was at levels greater than the MDL but less than the CRQL. For samples in which Indeno(1,2,3-cd)pyrene is detected above the MDL but below the CRQL, reported sample concentrations have been elevated to the CRQL and qualified U. For samples in which Indeno(1,2,3-cd)pyrene is detected above the CRQL results are not qualified.

E4SA0, E4SB2, E4SB2DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with dilution factors greater than 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4SA0 Fluoranthene-d_{10}

Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S20, E4S20MS, E4S20MSD Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S19, E4S20, E4S20DL, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S30DL, E4S31DL, E4S32DL, E4S33, E4S33DL, E4S43DL, E4S44DL, E4S46, E4S46DL, E4S48, E4SA0, E4SB2DL

Anthracene	E4S20MS, E4S20MSD, E4S30DL, E4S31DL, E4S46DL, E4S48
Pyrene	E4S22, E4S24
Benzo(g,h,i)perylene	E4S19, E4S21, E4S24
Indeno(1,2,3-cd)pyrene	E4S19, E4S21, E4S24
Benzo(b)fluoranthene	E4S19, E4S22, E4S24
Fluoranthene;	E4S22, E4S24
Benzo(k)fluoranthene	E4S19, E4S21, E4S29, E4S46DL, E4S48
Acenaphthylene	E4S30, E4S32DL, E4S33, E4S43DL, E4S44DL, E4SA0
Chrysene	E4S19, E4S21, E4S22, E4S23
Benzo(a)pyrene	E4S19, E4S21, E4S24
Dibenzo(a,h)anthracene	E4S20MS, E4S20MSD, E4S29, E4S30DL, E4S33DL, E4S46, E4S46DL, E4S48
Benzo(a)anthracene	E4S19, E4S21, E4S24, E4S48
Acenaphthene	E4S20DL, E4S29, E4S30, E4S31DL, E4S33DL, E4S43DL, E4S44DL, E4S46, E4SB2DL
Phenanthrene	E4S20DL, E4S29, E4S30, E4S31DL, E4S33DL, E4S43DL, E4S44DL, E4S46, E4SB2DL
Fluorene	E4S20DL, E4S20MS, E4S20MSD, E4S29, E4S31DL, E4S44DL, E4S46, E4S46DL
Naphthalene	E4S29, E4S46
2-Methylnaphthalene	E4S20, E4S29, E4S30, E4S46, E4SB2DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S19, E4S20MS, E4S23, E4S43DL, E4S44DL, E4S46DL, E4S48, E4SB2DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S20	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S30	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S31	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S32	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S33	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S43	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S44	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S46	Fluoranthene, Pyrene
E4SA0	2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SB2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4S20DL	Fluoranthene, Pyrene
E4S31DL	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S32DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S33DL	Phenanthrene, Fluoranthene, Pyrene
E4S43DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S44DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene
E4SB2DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

The laboratory reported that the samples were "dirty," resulting in failure of some compounds to achieve continuing calibration criteria. Elevated baselines were observed in several samples.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected as Decachlorobiphenyl (surrogate) was one of the compounds failing to meet criteria.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S32DL, E4S33, E4S33DL, E4S43, E4S44, E4S46, E4S48, E4SA0

4. BLANKS

The following pesticide samples have 4,4'-DDT analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration of 4,4'-DDT is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4S19, E4S21, E4S22, E4S24, E4S29

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4S19, E4S20MS, E4S21, E4S22, E4S23, E4S29, E4S32DL, E4S48
4,4'-DDT	E4S19, E4S21, E4S22, E4S24, E4S29, E4S33DL, E4S46

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4SA0, E4SA0DL

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S32DL, E4S33DL, E4SA0DL

The following diluted pesticide samples have surrogate percent recoveries of less than 10%. The diluted samples exceeded dilution factor of 5. Detected and nondetected compounds are not qualified.

E4SA0

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10%. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S20, E4S24, E4S29, E4S33, E4S44, E4S46, E4S48, E4SB2

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S20, E4S20MS, E4S20MSD

Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, Heptachlor

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not applicable to Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified with the exception of target compound hits exceeding the calibrated range in the undiluted sample which upon dilution proved not to be present in the samples.

E4S32	gamma-BHC (Lindane), 4,4'-DDD
E4SA0	Heptachlor

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S20, E4S21, E4S44
Aldrin	E4S20MSD
alpha-BHC	E4S46
beta-BHC	E4S20MS, E4S20MSD, E4S22, E4S29
4,4'-DDT	E4S44, E4S46

alpha-Chlordane	E4S32, E4SB2
gamma-BHC (Lindane)	E4S20MSD, E4S32
Dieldrin	E4S20MS, E4SB2
Endrin	E4S31, E4S32, E4S32DL
4,4'-DDD	E4S20MSD, E4S33, E4S33DL, E4S43
4,4'-DDE	E4S30, E4S32, E4S32DL, E4S33
Heptachlor	E4S20MS, E4S20MSD
Endosulfan I	E4SA0DL

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Heptachlor epoxide	E4S23, E4S31, E4S43
Aldrin	E4S33, E4S33DL, E4SA0, E4SA0DL
4,4'-DDT	E4S20, E4S43
alpha-Chlordane	E4S33, E4S43
gamma-Chlordane	E4S44, E4SB2
gamma-BHC (Lindane)	E4S20MS, E4SA0
Dieldrin	E4S20
Endrin	E4S43, E4SA0, E4SB2
Methoxychlor	E4S43
4,4'-DDE	E4S33DL, E4SA0, E4SB2
Heptachlor	E4S46, E4SA0

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4S22, E4S29, E4S48, E4SA0DL
Endosulfan sulfate	E4SA0DL
Aldrin	E4S22
beta-BHC	E4S19, E4S21, E4S23, E4S32DL
Endosulfan II	E4S32, E4S32DL, E4SA0
4,4'-DDT	E4S21, E4S24, E4S33DL
alpha-Chlordane	E4S20MS, E4S20MSD, E4S32DL
gamma-Chlordane	E4S29
Endrin ketone	E4S31, E4S32, E4S46, E4SB2
gamma-BHC (Lindane)	E4S21, E4S46
Dieldrin	E4S19, E4S24, E4S29
Endrin	E4S20, E4S21, E4S29, E4S30, E4S46, E4SA0DL
Methoxychlor	E4S20, E4S20MS, E4S20MSD, E4S30, E4S31, E4S44, E4SB2
4,4'-DDD	E4S19, E4S21, E4S24
4,4'-DDE	E4S21, E4S46, E4S48, E4SA0DL
Endrin aldehyde	E4S21, E4S43, E4SA0
Heptachlor	E4S33DL
Endosulfan I	E4S33DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4S20MS, E4S20MSD, E4S24, E4S32, E4S32DL, E4S33, E4SB2
beta-BHC	E4S20, E4S43, E4S46

delta-BHC	E4S30
4,4'-DDT	E4S30, E4S31, E4S33, E4SB2
gamma-Chlordane	E4S20
gamma-BHC (Lindane)	E4SA0DL
Endrin	E4S33, E4S44
4,4'-DDD	E4S32
Endrin aldehyde	E4S32DL, E4S33
Heptachlor:	E4S31, E4S32, E4S32DL, E4S33, E4S44, E4SB2

11. SYSTEM PERFORMANCE

All the pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. As Decachlorobiphenyl was one of the compounds failing to meet criteria, all compounds are affected.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S32DL, E4S33, E4S33DL, E4S43, E4S44, E4S46, E4S48, E4SA0, E4SA0DL, E4SB2

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S32	Heptachlor, Dieldrin, 4,4’-DDE, 4,4’-DDD
E4S33	4,4’-DDD
E4SA0	Heptachlor

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S19, E4S20MS, E4S20MSD, E4S22, E4S29, E4S30, E4S44, E4SA0, E4SA0DL, E4SB2

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200% All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S43, E4S44

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S31DL, E4S32DL, E4SA0, E4SA0DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries that are greater than 200%. All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S43DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified. In the case of sample E4S32, the “J” flag applied in the automated check process was overridden for Aroclor-1248 as that result was reported from the column having acceptable surrogate recovery.

E4S30, E4S31, E4S32

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S32DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S33DL

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries less than 10%. Detected and nondetected compounds are not qualified.

E4SA0DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1016 E4S20MS, E4S20MSD

The Aroclor matrix/matrix spike duplicate samples (E4S20MS, E4S20MSD) have percent recoveries and relative percent difference between analyte results that are less than the lower expanded criteria limit for Aroclor-1260. In this instance the matrix spike recoveries are negative; these negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. No sample results have been qualified due to negative recoveries or RPDs.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260 E4S31, E4S32, E4S43DL
Aroclor-1016 E4S20MS, E4S20MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260 E4S20, E4S30, E4S33DL, E4S43

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260 E4S33

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S30, E4S44, E4SA0, E4SAODL, E4SB2

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample analysis should be used for result validation.

E4S31, E4S32, E4S33, E4S43, E4SA0

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Twenty (20) sediment samples, labeled E4S53-E4S56, E4S62, E4S73 – E4S76, E4S80, E4S81, E4S83 – E4S8º8, E4S91, E4S98, and E4S99, were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The samples were collected on 03/02/2010 and 03/03/2010. They were received at the laboratory on 03/04/2010 and 03/06/2010 intact at 7 ºC and 5 ºC, respectively.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S75 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

Two samples, E4S80 and E4S81 had elevated pH, greater than 9. The laboratory was instructed to proceed with analysis following pH adjustment to the appropriate range. No notation indicating any pH adjustments were made was noted in the data package.

There are no field duplicates or field blanks associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (% RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S53, E4S54, E4S55, E4S56, E4S62, E4S73, E4S74, E4S75, E4S75MS, E4S75MSD, E4S76

Benzo(b)fluoranthene and Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile sample E4S87 has two deuterated monitoring compound recoveries above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo (a) pyrene-d_{12}, affected compounds; Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene, Indeno(1,2,3-cd)pyrene

Fluorene-d_{10}, affected compounds: Carbazole, Dibenzofuran, Fluorene

Semivolatile sample E4S99DL with dilution factors less than or equal to 5 has one deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Acenaphthylene-d_8, affected compounds: 2-Chloronaphthalene, 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Naphthalene

Semivolatile sample E4S56L has deuterated one monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10}, affected compounds: Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

As the percent recoveries for Acenaphthene were acceptable in both the MS and MSD, and the % RPD was just slightly above the criteria, only the original, MS and MSD samples are affected.

E4S75, E4S75MS, E4S75MSD: Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S80, E4S87, E4S88DL, E4S99DL
Pyrene	E4S74
Benzo(g,h,i)perylene	E4S53, E4S55, E4S73, E4S80, E4S81, E4S83, E4S84, E4S85, E4S91
Indeno(1,2,3-cd)pyrene	E4S73, E4S80, E4S81, E4S83, E4S85
Benzo(b)fluoranthene	E4S55, E4S74, E4S91
Fluoranthene	E4S55, E4S74, E4S91
Benzo(k)fluoranthene	E4S53, E4S80, E4S81, E4S83, E4S84, E4S85
Chrysene	E4S80, E4S81, E4S83, E4S85
Benzo(a)pyrene	E4S74, E4S80, E4S81, E4S85
Dibenzo(a,h)anthracene	E4S88DL, E4S99DL
Benzo(a)anthracene	E4S73, E4S74, E4S80, E4S81, E4S85
Acenaphthene	E4S87, E4S88DL, E4S98, E4S99DL
Phenanthrene	E4S73, E4S83, E4S84, E4S85
Fluorene	E4S54, E4S87, E4S88DL, E4S98, E4S99DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form 1s for the following samples do not agree with the B-file Spreadsheet results.

E4S53, E4S73, E4S75MSD, E4S86, E4S88DL, E4S99DL

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S88 Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4S99 Fluoranthene, Pyrene, Benzo(b)fluoranthene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Indeno(1,2,3-cd)pyrene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Benzo(a)pyrene	E4S56DL, E4S75, E4S75MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with dilution factors greater than 5 has deuterated monitoring compound recovery below the lower limit of the criteria window. Detected and nondetected compounds are not qualified.

E4S73DL, E4S84DL	2-Methylnaphthalene-d_{10}, affected compounds: Naphthalene, 2-Methyl naphthalene, Acenaphthene, Acenaphthylene, Fluorene, Phenanthrene, Anthracene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile-SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S53DL, E4S55DL, E4S56DL, E4S62, E4S73DL, E4S76, E4S84DL, E4S86
Pyrene	E4S75
Benzo(g,h,i)perylene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Indeno(1,2,3-cd)pyrene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Benzo(b)fluoranthene	E4S75, E4S75MS, E4S75MSD
Fluoranthene	E4S75, E4S75MS, E4S75MSD
Benzo(k)fluoranthene	E4S56DL, E4S86, E4S91DL
Acenaphthylene	E4S53, E4S54DL, E4S55, E4S56, E4S73, E4S80, E4S81, E4S83, E4S84, E4S85, E4S87, E4S88, E4S98, E4S99
Chrysene	E4S56DL, E4S75, E4S75MS
Benzo(a)pyrene	E4S56DL, E4S75, E4S75MSD, E4S91DL
Dibenzo(a,h)anthracene	E4S53DL, E4S55DL, E4S56, E4S62, E4S73DL, E4S74DL, E4S76, E4S80DL, E4S81DL, E4S83DL, E4S84DL, E4S85DL, E4S86, E4S91DL
Benzo(a)anthracene	E4S56DL, E4S75, E4S91DL
Acenaphthene	E4S54DL, E4S55, E4S56, E4S62, E4S74, E4S76, E4S80DL, E4S83, E4S84DL, E4S85DL, E4S91
Phenanthrene	E4S75
Fluorene	E4S55, E4S56DL, E4S62, E4S74, E4S76, E4S80DL, E4S81DL, E4S85DL, E4S86, E4S91DL
Naphthalene	E4S53, E4S99
2-Methylnaphthalene	E4S55, E4S56, E4S73, E4S81, E4S83, E4S84, E4S99

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results for the following samples:

E4S53, E4S53DL, E4S55DL, E4S75MSD, E4S86, E4S87

Dilution analysis was not required for the following SIM samples because the levels of target compounds were greater than the CRQL for the full-scan semivolatile analysis: E4S87, E4S88, E4S98, E4S99

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S53	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S54	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S55	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene
E4S56	Phenanthrene, Fluoranthene,
E4S73	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S74	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4S81	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S83	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S84	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S85	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S85	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S86	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S91	Phenanthrene, Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene

E4S98	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S99	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4S54DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S84DL	Fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

The laboratory reported that the samples were "dirty," resulting in failure of some compounds to achieve continuing calibration criteria. Elevated baselines were observed in several samples.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected because Decachlorobiphenyl (a surrogate) was one of the compounds failing to meet criteria.

E4S85DL, E4S88DL, E4S99

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S56, E4S75, E4S75MS, E4S75MSD
beta-BHC	E4S55, E4S75, E4S75MSD, E4S88DL
Endrin aldehyde	E4S56, E4S62
Endosulfan I	E4S53, E4S55, E4S74, E4S75MS, E4S75MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S56, E4S75, E4S75MS, E4S75MSD
beta-BHC	E4S55, E4S75, E4S75MSD, E4S76, E4S88DL
Endosulfan II	E4S84, E4S85, E4S86, E4S87, E4S88, E4S91, E4S98
4,4'-DDT	E4S85DL
4,4'-DDE	E4S85DL
Endrin aldehyde	E4S56, E4S62
Endosulfan I	E4S53, E4S55, E4S74, E4S75MS, E4S75MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4S91 has a surrogate percent recovery that is greater than 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S85DL, E4S88DL, E4S99DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S85, E4S88, E4S98, E4S99

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S88DL, E4S99DL

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10%. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected.

E4S87, E4S88

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S75, E4S75MS, E4S75MSD
Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, Heptachlor

The result for beta-BHC was rejected in sample E4S75MSD for reasons detailed later in this review. Therefore, that value was not used to calculate an RPD.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S56
Aldrin	E4S75MSD
beta-BHC	E4S75, E4S75MSD, E4S81
4,4'-DDT	E4S91, E4S99DL
alpha-Chlordane	E4S54, E4S87
gamma-Chlordane	E4S81, E4S83, E4S84
gamma-BHC (Lindane)	E4S75MS, E4S75MSD, E4S99, E4S99DL
Dieldrin	E4S55, E4S74, E4S75MSD, E4S83
Endrin	E4S84
4,4'-DDD	E4S53, E4S62, E4S74, E4S75MSD, E4S81, E4S86
4,4'-DDE	E4S62, E4S83, E4S84, E4S88, E4S88DL, E4S91
Heptachlor:	E4S55, E4S75MS, E4S75MSD

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Heptachlor epoxide	E4S83, E4S87
delta-BHC	E4S53
Endosulfan II	E4S73
4,4'-DDT	E4S53, E4S54, E4S73, E4S88, E4S88DL
alpha-Chlordane	E4S73, E4S88, E4S99, E4S99DL
gamma-Chlordane	E4S80, E4S85, E4S88
Dieldrin	E4S54, E4S80, E4S81
Endrin	E4S83, E4S88, E4S99
4,4'-DDE	E4S53, E4S85, E4S87
Heptachlor	E4S99
Endosulfan I	E4S98

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4S55, E4S62, E4S75MSD, E4S76, E4S80, E4S81, E4S85DL, E4S86
beta-BHC	E4S55, E4S76, E4S88DL, E4S91
Endosulfan II	E4S74, E4S75MSD, E4S84, E4S85, E4S87, E4S88, E4S98, E4S99
4,4'-DDT	E4S62, E4S76, E4S81, E4S85DL, E4S86
alpha-Chlordane	E4S55, E4S74, E4S75MS, E4S75MSD
Endrin ketone	E4S73, E4S75MSD, E4S76, E4S83, E4S84, E4S85, E4S87, E4S88, E4S98
Dieldrin	E4S76

Endrin	E4S53, E4S55, E4S74, E4S80, E4S81, E4S85DL, E4S86, E4S88DL, E4S91, E4S99DL
Methoxychlor	E4S53, E4S55, E4S80, E4S81, E4S83, E4S84, E4S85, E4S87, E4S98, E4S99, E4S99DL
4,4'-DDD	E4S75MS
4,4'-DDE	E4S75MS, E4S75MSD, E4S85DL, E4S86
Endrin aldehyde	E4S83, E4S85, E4S88, E4S99
Heptachlor	E4S54, E4S80, E4S81, E4S83, E4S85DL
Endosulfan I	E4S75MS, E4S88DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4S53, E4S54, E4S74, E4S84, E4S85, E4S88, E4S88DL
alpha-BHC	E4S87
beta-BHC	E4S74, E4S75MS
4,4'-DDT	E4S55, E4S80, E4S83, E4S84, E4S85, E4S87, E4S98
gamma-BHC (Lindane)	E4S74
Dieldrin	E4S73
Endrin	E4S54, E4S85, E4S87, E4S98
Methoxychlor	E4S54, E4S88
4,4'-DDD	E4S84, E4S87, E4S99DL
4,4'-DDE	E4S73, E4S99DL
Heptachlor	E4S73, E4S74, E4S84, E4S85, E4S88, E4S98, E4S99DL
Endosulfan I	E4S99DL

11. SYSTEM PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Because Decachlorobiphenyl, a surrogate, was one of the compounds failing to meet criteria, all compounds are affected.

E4S80, E4S81, E4S83, E4S84, E4S85, E4S85DL, E4S86, E4S87, E4S88, E4S88DL, E4S91, E4S98, E4S99, E4S99DL

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S85	4,4’-DDD
E4S88	4,4’-DDE, 4,4’-DDD, gamma-Chlordane
E4S99	4,4’-DDE, Heptachlor

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S53, E4S55, E4S62, E4S75, E4S83, E4S86, E4S91

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S54, E4S91

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S54DL, E4S84, E4S85, E4S88, E4S99, E4S99DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flag applied in the automated check process was overridden unless applied for another reason. Detected compounds are nondetected compounds are not qualified.

E4S53, E4S86, E4S87

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S88, E4S98, E4S99DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The automated report incorrectly calculated percent recoveries of Aroclor-1016 and Aroclor-1260. Spike compound Aroclor-1016 recovery in Sample E4S75MSD slightly exceeds the upper acceptance limit on

one column. All other spike recoveries and % RPD are within criteria. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S75, E4S75MS, E4S75MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260 E4S53, E4S54DL

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260 E4S55
Aroclor-1016 E4S75MS, E4S75MSD

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260 E4S80, E4S81, E4S87

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S53, E4S87

Several samples were initially analyzed at a ten-fold dilution. Mistakenly, the laboratory analyzed Sample E4S99 at an additional dilution, when in fact its original 10X analysis yielded results near, but not

exceeding the upper calibrated range. The dilution analysis of this sample was not required. Allowance was granted by SMO not to analyze a ten-fold more concentrated sample.

The following Aroclor sample reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample analysis should be used for result validation.

E4S54	Aroclor-1260

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: Nineteen (19) sediment samples labeled E4S57, E4S58, E4S60, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE3, E4SE5, E4SE7, and E4SE8 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. Samples E4S57, E4S58, E4S60, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, and E4S72 were collected on 3/2/2010 and were received on 3/4/2010. Samples E4SE1, E4SE3, E4SE5, E4SE7, and E4SE8 were collected on 3/4/2010 and were received on 3/6/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 9 ºC. No data have been qualified based on receipt temperature. Sample E4S57 had a pH of 9.16, outside of the allowable limits. GLNPO staff instructed the laboratory to adjust the pH and proceed with the analysis of the sample.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag in the EDD. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4S60 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4S65 and E4S66 as the field duplicate pair.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene	E4S63, E4S68, E4S70, E4S71, E4S72, E4SE5, E4SE7
Benzo(g,h,i)perylene	E4S63, E4S68, E4S70, E4S71, E4S72
Indeno(1,2,3-cd)pyrene	E4S63, E4S68, E4S70, E4S71, E4S72

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile sample E4SE1, with a dilution factor less than or equal to 5, had a deuterated monitoring compound recovery for Anthracene-d_{10} that was above the upper limit of the criteria window. Sample results for Anthracene and Phenanthrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

Semivolatile sample E4S57 had a deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4S65 and E4S66

Semivolatile compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicates E4S65 and E4S66, RPDs were not calculated because all target compound results were nondetects.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original semivolatile analysis for sample E4SE1 was performed using a 5-fold dilution. No neat analysis was performed for this sample. The quantitation limits reflect the dilution factor.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene E4S60MS, E4S64, E4SE1, E4SE3, E4SE7

Pyrene	E4S61, E4S63
Benzo(g,h,i)perylene	E4S60, E4S60MS, E4S60MSD, E4S63, E4S64, E4S67, E4S68, E4S70, E4S71
Indeno(1,2,3-cd)pyrene	E4S60MS, E4S60MSD, E4S64, E4S70
Benzo(b)fluoranthene	E4S61, E4S63, E4S67, E4S68, E4S69, E4S71
Fluoranthene	E4S63, E4S69
Benzo(k)fluoranthene	E4S60, E4S60MS, E4S60MSD, E4S64, E4S70, E4SE3
Chrysene	E4S60, E4S63, E4S67, E4S68, E4S69
Benzo(a)pyrene	E4S61, E4S63, E4S67, E4S68, E4S69, E4S71
Dibenzo(a,h)anthracene	E4SE1, E4SE7
Benzo(a)anthracene	E4S61, E4S63, E4S67, E4S68, E4S70, E4S71
Acenaphthene	E4SE1, E4SE5DL, E4SE7
Phenanthrene	E4S61, E4S63, E4S67, E4S69, E4S71
Fluorene	E4SE1, E4SE5, E4SE5DL, E4SE7

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SE5 reported concentrations that exceeded the calibrated range of the instrument for Pyrene. These results were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The original analysis of semivolatile-SIM sample E4SE1, with a dilution factor greater than or equal to 5, had a deuterated monitoring compound recovery for Fluoranthene-d_{10}, above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Semivolatile-SIM samples E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S67, and E4S68, with a dilution factor greater than or equal to 5, had a deuterated monitoring compound recovery for 2-Methylnaphthalene-d_{10}, below the lower limit of the criteria window. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene was recovered in the MS/MSD prepared for sample E4S60 at levels above the upper acceptance limit. The problem seems to be limited to the MS/MSD and may be due to the high amounts of Pyrene in the unspiked sample. No MS/MSD failures were reported in the SVOA full scan analyses. Therefore, only sample E4S60 is affected. The result for Pyrene in sample E4S60 is qualified "J".

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4S65 and E4S66 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4S65 and E4S66

Semivolatile-SIM compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	

Semivolatile-SIM compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Acenaphthene	ND	1	ND	1	
Fluorene	0.56	1	ND	1	
Phenanthrene	4	1	4.1	1	2.5
Anthracene	1.2	1	1.2	1	0
Fluoranthene	7.1	1	10	1	34
Pyrene	8	1	14	1	55
Benzo(a)anthracene	3.7	1	6.5	1	55
Chrysene	3.5	1	6.8	1	64
Benzo(b)fluoranthene	2.3	1	7.4	1	110
Benzo(k)fluoranthene	0.76	1	1.8	1	81
Benzo(a)pyrene	2.2	1	7.1	1	110
Indeno(1,2,3-cd)pyrene	1.6	1	4.1	1	88
Dibenzo(a,h)anthracene	ND	1	0.75	1	
Benzo(g,h,i)perylene	2.1	1	5.4	1	88

For field duplicates E4S65 and E4S66, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, and Benzo(g,h,i)perylene had RPD values above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original semivolatile-SIM analysis for samples E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S67-E4S71, E4SE1, E4SE3, E4SE5, E4SE7 was performed using a 10-fold dilution. No neat analyses were performed for these samples. The quantitation limits reflect the dilution factor.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4S58, E4S61, E4S63, E4S65–E4S71, E4SE8
Acenaphthene	E4S60, E4S64, E4S69, E4SE3, E4SE8
Acenaphthylene	E4SE1, E4SE5, E4SE7
Benzo(a)anthracene	E4S57, E4S72

Indeno(1,2,3-cd)pyrene	E4S57, E4S65, E4S69, E4S72
Benzo(k)fluoranthene	E4S58, E4S61, E4S63, E4S65, E4S66 – E4S69
Dibenzo(a,h)anthracene	E4S58, ES460, ES460MS, E4S60MSD, E4S61, E4S63, E4S64, E4S66, E4S67, E4S68, E4S70, E4S71, E4SE3, E4SE8
Fluorene	E4S60, E4S64, E4S65, E4S70, E4S71, E4SE3, E4SE8
Chrysene	E4SE57, E4S72
Fluoranthene	E4S57, E4S72
Benzo(a)pyrene	E4S57, E4S65, E4S69, E4S72
Benzo(b)fluoranthene	E4S57, E4S65, E4S72
Benzo(g,h,i)perylene	E4S57, E4S65, E4S69
Naphthalene	E4SE8
Phenanthrene	E4S57, E4S72
Pyrene	E4S72

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. Although the original analysis for some of these samples may have included a dilution, no further dilutions were performed.

Anthracene	E4SE1
Benzo(a)anthracene	E4SE1, E4SE5, E4SE7
Indeno(1,2,3-cd)pyrene	E4SE1, E4SE5, E4SE7
Benzo(k)fluoranthene	E4SE1, E4SE5
Chrysene	E4SE1, E4SE5, E4SE7
Fluoranthene	E4S60MS, E4S60MSD, E4S64, E4S70, E4SE1, E4SE3, E4SE5, E4SE7
Benzo(a)pyrene	E4SE1, E4SE5, E4SE7

Benzo(b)fluoranthene	E4SE1, E4SE5, E4SE7
Benzo(g,h,i)perylene	E4SE1, E4SE5, E4SE7
Phenanthrene	E4S60MS, E4SE1, E4SE5
Pyrene	E4S60MS, E4S60MSD, E4S64, E4SE1, E4SE5, E4SE7

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for surrogate compound Decachlorobiphenyl is outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for surrogate compound Decachlorobiphenyl, and for several target compounds that exceeded criteria in one or more CCVs. All samples are affected. Detected target compounds are qualified J. Nondetected compounds are qualified UJ.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is also less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endrin aldehyde	E4S57, E4S58, E4S60, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S72

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank and continuing instrument blank concentrations are also less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

gamma-Chlordane	E4S57, E4S58, E4S65, E4S72
4,4'-DDE	E4S65, E4S69, E4S71, E4S72, E4SE1DL, E4SE8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SE7 had a surrogate percent recovery that was outside the lower limit of the criteria window, but greater than 10% on the RTXCLP column. All target analytes are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds are qualified "UJ". .

Surrogate recoveries between 150 – 200 %, and greater than 200% were obtained on only one column for sample E4SE1. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted pesticide sample E4SE1DL and E4SE7DL, with a dilution factor greater than 5 had all surrogate percent recoveries greater than 150% and some greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The Pesticide MS prepared for sample E4S60 had a percent recovery below the acceptance criteria for Endrin on both columns. All samples are affected. Sample results for Endrin are qualified "J". Nondetected results are qualified "UJ".

The Pesticide MS prepared for sample E4S60 had a percent recovery below the acceptance criteria for 4,4'-DDT and the MSD was recovered above the acceptance criteria for 4,4'-DDT on the RTXCLP2 column. However the Heptachlor results in the MS/MSD were rejected for reasons noted elsewhere in this narrative and, therefore, no 4,4'-DDT results have been qualified for MS/MSD recovery.

Pesticide MS/MSD E4S60 had RPD values outside of criteria for Dieldrin, and Endrin on both columns. All samples are affected. Sample results for Dieldrin, and Endrin are qualified "J". Nondetected results are not qualified.

Pesticide MS/MSD E4S60 had RPD values outside of criteria for Heptachlor on both columns. However the Heptachlor results in the MS/MSD were rejected for reasons noted elsewhere in this narrative and therefore, no Heptachlor results have been qualified for MS/MSD recovery.

The Pesticide MS/MSD prepared for sample E4S60 had percent recoveries above the acceptance criteria for gamma-BHC (Lindane), and RPD values outside of criteria for Aldrin on the RTXCLP2 column. All samples are affected. Sample results for Aldrin, and gamma-BHC (Lindane) that are reported from this column are qualified "J". Nondetected results are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

The result for beta-BHC was rejected in sample E4S66 for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs

E4S65 and E4S66

Pesticide compound	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.11	1		1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)	ND	1	ND	1	
Heptachlor	0.12	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.12	1	0.14	1	15
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	0.23	1	ND	1	
Endrin	ND	1	0.23	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.23	1	0.23	1	0
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.23	1	ND	1	
Methoxychlor	ND	1	1.6	1	
Endrin ketone	ND	1	0.23	1	
Endrin aldehyde	0.23	1	0.23	1	0
alpha-Chlordane	ND	1	0.14	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4S65 and E4S66, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples RPD values were less than 50 %.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original pesticide analysis for sample E4SE1 was performed using a 10-fold dilution. No neat pesticide analysis was performed for this sample. The reported quantitation limits reflect the dilution factor.

The following non-detected sample results were reported correctly on Form 1s, but were either reported below the reporting detection limit or were flagged incorrectly in the EDD. The results have been elevated to the quantitation limit and are flagged “U”, unless affected by another qualifier.

E4S58 4,4’-DDD, beta-BHC, Endosulfan II, Heptachlor epoxide

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

alpha-BHC	E4S68, E4S69
alpha-Chlordane	E4SE7DL
Aldrin	E4S68
beta-BHC	E4S57, E4S58, E4S60, E4S63 - E4S65, E4S72, E4SE8
delta-BHC	E4S69, E4S72
Dieldrin	E4S57, E4S61, E4S63, E4S68, E4S71
Endrin	E4S63, E4S64, E4S66, E4S67, E4S71, E4SE1DL, E4SE3, E4SE7
Endrin aldehyde	E4S57, E4S58, E4S60, E4S64 - E4S70, E4S72, E4SE7
Endrin ketone	E4S63, E4S66, E4S70, E4SE5, E4SE7
gamma-BHC (Lindane)	E4SE8
gamma-Chlordane	E4S57, E4S58
4,4'-DDD	E4S65 – E4S69, E4S71, E4SE8
4,4'-DDE	E4S65, E4S69, E4S71, E4SE8
4,4'-DDT	E4S65 – E4S69, E4S71, E4SE8
Heptachlor	E4S57, E4S64, E4S65, E4S67 – E4S69, E4S71, E4S72
Endosulfan I	E4S68, E4SE8
Endosulfan II	E4S60, E4S60MS, E4S60MSD, E4S68, E4SE1, E4SE3, E4SE5, E4SE7, E4SE8
Heptachlor epoxide	E4S57, E4S63 – E4S65, E4S67, E4S68, E4S70 – E4S72, E4SE8
Methoxychlor	E4S63, E4S64, E4SE3, E4SE5, E4SE7, E4SE7DL

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S61
beta-BHC	E4S65, E4S69, E4S71
delta-BHC	E4S69

4,4'-DDT	E4S61
alpha-Chlordane	E4S60, E4SE7
gamma-Chlordane	E4S58
Dieldrin	E4S61, E4S67, E4S68
Endrin	E4S60MS, E4S60MSD
Methoxychlor	E4S66
4,4'-DDD	E4S63, E4S70, E4SE7, E4SE8
4,4'-DDE	E4S60, E4S60MS, E4S60MSD, E4S71, E4SE1
Endrin aldehyde	E4S72, E4SE3
Heptachlor	E4S72

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Aldrin	E4S60MS, E4S60MSD
4,4'-DDT	E4S70
Alpha-Chlordane	E4S66
gamma-BHC (Lindane)	E4S60MS, E4S60MSD
Endrin	E4S60, E4S70
4,4'-DDD	E4S61, E4S74
4,4'-DDE	E4S64, E4S70, E4SE5

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S63, E4S64, E4S65, E4S67, E4S68, E4S70, E4S71, E4S72, E4SE1DL, E4SE8
Aldrin	E4S68
alpha-BHC	E4S69
beta-BHC	E4S57, E4S60, E4S63, E4S64, E4S72, E4SE7DL, E4SE8

Endosulfan II	E4S60, E4S60MS, E4S60MSD, E4S68, E4S70, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8
4,4'-DDT	E4S65, E4S67, E4S68, E4S69, E4S71, E4SE8
alpha-Chlordane	E4SE7DL
Endrin ketone	E4S60, E4S60MS, E4S60MSD, E4S63, E4S66, E4S70, E4SE5, E4SE7
gamma-BHC (Lindane)	E4SE7DL, E4SE8
Dieldrin	E4S57, E4S63, E4S71, E4SE7DL
Endrin	E4S63, E4S64, E4S66, E4S67, E4S71, E4S72, E4SE1DL, E4SE3, E4SE7
Methoxychlor	E4S61, E4S63, E4S64, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8
4,4'-DDD	E4S65, E4S66, E4S67, E4S68, E4S69, E4S71
4,4'-DDE	E4SE1DL
Endrin aldehyde	E4S58, E4S60, E4S64, E4S66, E4S68, E4S69, E4S70, E4SE7
Heptachlor	E4S57, E4S64, E4S65, E4S67, E4S68, E4S69, E4S71
Endosulfan I	E4S58, E4SE8

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified “R”.

Heptachlor epoxide	E4S60, E4S60MS, E4S60MSD, E4SE1, E4SE3, E4SE7, E4SE7DL
beta-BHC	E4S60MS, E4S60MSD, E4S61, E4S66, E4S67, E4S68, E4S70, E4SE3, E4SE7
4,4'-DDT	E4S60MS, E4S60MSD, E4S64, E4SE7
gamma-BHC (Lindane)	E4SE1, E4SE1DL, E4SE3, E4SE7
Dieldrin	E4SE7
Endrin	E4SE1, E4SE5
4,4'-DDE	E4SE3, E4SE7, E4SE7DL
Endrin aldehyde	E4S60MS, E4S60MSD, E4SE8
Heptachlor	E4S60, E4S60MS, E4S60MSD, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. For sample E4SE7, the 4,4’-DDD result from dilute sample be used for result validation. For sample E4SE1, the Heptachlor results for both the original sample analysis and the diluted analysis have been rejected for reasons mention elsewhere in this narrative.

4,4'-DDD	E4SE7
Heptachlor	E4SE1

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All Aroclor samples in this SDG had acceptable surrogate recoveries on one or both columns for the original analyses. No samples were qualified based on surrogate recovery.

However, diluted Aroclor samples E4SE1DL, E4SE5DL, and E4SE7DL, with dilution factors greater than five, had percent recoveries that are between 150 - 200%, and some that exceeded 200%. The diluted samples are not qualified based on surrogate recovery.

Aroclor sample E4SE1DL with dilution factors greater than 5 also had surrogate percent recoveries less than 10%. Detected and nondetected compounds are not qualified.

A surrogate recovery between 150 – 200 % was obtained on only one column for Aroclor sample E4S60, E4S60DL, E4S66, E4S3DL, E4SE1, E4SE5, E4SE7, and E4S60MS and E4S60MSD. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4S60, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260, and the RPD exceeded criteria for Aroclor-1260 on one column. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4S60 is affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4S65 and E4S66

Aroclor compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4S65 and E4S66, RPD values were not calculated because both values were nondetects for all compounds.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1248 E4S71, E4S72

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified “J”.

Aroclor-1248 E4S72

Aroclor-1260 E4S70

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified “NJ”.

Aroclor-1248 E4S61

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1248 E4S71

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1248 E4S70, E4SE1

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted samples should be used for result validation.

Aroclor-1248 E4S60, E4SE1, E4SE3, E4SE5, E4SE7

Aroclor-1260 ES460

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Subject: R**evised Review Narrative Report**
Review of Data
Received for Review on: April 14, 2010

From: Melody Jensen
Senior Scientist, CSC

To: Data User: GLNPO

This narrative review supersedes the narrative sent on June 24, 2010 for the review of data in SDG E4S89. The changes made to this narrative include clarifications added to the Semivolatile and Pesticide Additional Information sections of the narrative. The changes have been highlighted in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarifications. No sample results or review qualifiers have been changed based on these changes.

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4S89

Number and Type of Samples: 14 Sediment Samples

Sample Numbers: E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB7, E4SG5, E4SG6

Laboratory: ALS Laboratories (DATAC)

SDG Summary

Sample Receipt: Fourteen (14) sediment samples labeled E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB7, E4SG5, and E4SG6 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All except E4SG5 and E4SG6 were collected on 3/3/2010 and were received on 3/5/2010 at 2 °C. Samples E4SG5 and E4SG6 (equipment blanks) were collected on 3/5/2010 and were received on 3/6/2010 at 7 °C. These samples exceeded the proper shipping temperature range of 2 - 6 ºC; no data have been qualified based on receipt temperature. Two of the three containers for sample E4SA3 were received broken. Because the box for each container was intact, the laboratory did not believe that cross contamination occurred. In accordance with direction from EPA, samples were transferred to new containers and used for analyses. Samples E4S89 and E4SB7 were received at pH 9.1, which is outside the allowable limits. In accordance with direction from EPA, the pH was adjusted and the analyses conducted. No data were qualified based on the broken containers or sample pH.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as “soil” on Form1s and in the EDD for the samples in this SDG. The samples are actually “sediment” samples.

Sample E4S92 contained less than 50% solids. Results were reported on a dry-weight basis using the percent solids (45.3%) determined by the laboratory.

As designated by the samplers, Sample E4SB6 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SA3 and E4SA6 as field duplicate pairs.

Per the laboratory narrative, manual edits were made in the semivolatiles calibration standards for a variety of miscalled peaks. Every manual integration is noted by an “m” footnote on the quantitation report.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening CCV percent Difference (%D) outside criteria for Pyrene. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4S89, E4S92, E4SA6, E4SG6

The following semivolatile sample is associated with an opening CCV percent Difference (%D) outside criteria for Benzo (g,h,i) perylene and Indeno (1,2,3-cd) pyrene. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4SG6

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile samples with dilution factors less than or equal to 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Pyrene-d_{10}	E4S89DL
Anthracene-d_{10}	E4S89DL, E4SA4
Benzo (a) pyrene-d_{12}	E4SA4
Fluorene-d_{10}	E4S89DL
Acenaphthylene-d_8	E4S89DL, E4SA4

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates. In addition to undiluted analyses of E4SA3, a 1:2 dilution of this sample was also analyzed (E4SA3DL). Results are summarized in the

following tables. Note that results are not qualified based upon the results of the field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Semivolatile compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	100	1	ND	1	
Acenaphthene	69	1	77	1	11
Fluorene	110	1	94	1	16
Phenanthrene	880	1	710	1	21
Anthracene	300	1	220	1	31
Fluoranthene	1400	1	1300	1	7.4
Pyrene	2100	1	1600	1	27
Benzo(a)anthracene	1300	1	860	1	41
Chrysene	1000	1	910	1	9.4
Benzo(b)fluoranthene	1400	1	1200	1	15
Benzo(k)fluoranthene	380	1	310	1	20
Benzo(a)pyrene	1000	1	820	1	20
Indeno(1,2,3-cd)pyrene	1000	1	770	1	26
Dibenzo(a,h)anthracene	190	1	150	1	24
Benzo(g,h,i)perylene	830	1	640	1	26

For field duplicates E4SA3 and E4SA6, where detects were reported for both samples, all RPD values were 50% or less.

E4SA3DL and E4SA6

Semivolatile compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	2	ND	1	
2-Methylnaphthalene	ND	2	ND	1	
Acenaphthylene	120	2	ND	1	
Acenaphthene	78	2	77	1	1.3
Fluorene	120	2	94	1	24
Phenanthrene	1100	2	710	1	43
Anthracene	370	2	220	1	51
Fluoranthene	2000	2	1300	1	42
Pyrene	2200	2	1600	1	32
Benzo(a)anthracene	1400	2	860	1	48
Chrysene	1200	2	910	1	28
Benzo(b)fluoranthene	1600	2	1200	1	29
Benzo(k)fluoranthene	490	2	310	1	45
Benzo(a)pyrene	1300	2	820	1	45
Indeno(1,2,3-cd)pyrene	1200	2	770	1	44
Dibenzo(a,h)anthracene	260	2	150	1	54

Semivolatile compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Benzo(g,h,i)perylene	1100	2	640	1	53

For field duplicates E4SA3DL and E4SA6, where detects were reported for both samples, all RPD values were less than 50% except for Anthracene, Dibenzo(a,h)anthracene, and Benzo(g,h,i)perylene.

Equipment Blanks E4SG5 and E4SG6

Semivolatile compounds	E4SG5 µg/L	E4SG6 µg/L
Naphthalene	ND	ND
2-Methylnaphthalene	ND	ND
Acenaphthylene	ND	ND
Acenaphthene	ND	ND
Fluorene	ND	ND
Phenanthrene	ND	ND
Anthracene	ND	ND
Fluoranthene	ND	ND
Pyrene	ND	ND
Benzo(a)anthracene	ND	ND
Chrysene	ND	ND
Benzo(b)fluoranthene	ND	2.6
Benzo(k)fluoranthene	ND	ND
Benzo(a)pyrene	ND	2.7
Indeno(1,2,3-cd)pyrene	ND	ND
Dibenzo(a,h)anthracene	ND	ND
Benzo(g,h,i)perylene	ND	ND

No target compounds were detected in equipment blanks E4SG5. In equipment blank E4SG6, target compounds Benzo(b)fluoranthene and Benzo(a)pyrene were detected at levels below the CRQL.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene E4S90, E4S92, E4SB4

Pyrene E4SB0, E4SB6

Benzo (b) fluoranthene	E4SB6, E4SB6MS, E4SB6MSD, E4SG6
Fluoranthene	E4SB0, E4SB6, E4SB6MS, E4SB6MSD
Benzo (k) fluoranthene	E4SB4
Acenaphthylene	E4SA3, E4SA3DL
Benzo (a) pyrene	E4SG6
Dibenzo (a,h) anthracene	E4S89DL, E4SA2, E4SA4, E4SA9DL
Acenaphthene	E4S89DL, E4S92, E4SA2, E4SA3, E4SA3DL, E4SA4, E4SA6, E4SA9DL
Phenanthrene	E4SB6MS
Fluorene	E4S89DL, E4S92, E4SA2, E4SA3, E4SA3DL, E4SA6, E4SA9, E4SA9DL
Naphthalene	E4S89, E4SA9
2-Methylnaphthalene	E4S89

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4S89 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene, Chrysene, Benzo(b)fluoranthene, and Pyrene; and samples E4SA3 and E4SA9 had concentrations for Pyrene that exceeded the instrument calibration range. These results were flagged "E" by the laboratory and, as per the NFG, are flagged estimated, "J". The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike (E4SB6MS) and matrix spike duplicate (E4SB6MSD) recoveries is outside criteria for Acenaphthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

The matrix spike (E4SB6MS) and matrix spike duplicate (E4SB6MSD) have percent recoveries that are greater than the upper acceptance limit for Pyrene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 are identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. Semivolatile, but not Semivolatile-SIM, analyses were conducted for the equipment blanks E4SG5 and E4SG6. Results for the equipment blanks are reported in the Semivolatiles Section 7.0 above.

E4SA3 and E4SA6

Semivolatile-SIM compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	54	10	7.9	10	150
Acenaphthene	35	10	41	10	15.8

Semivolatile-SIM compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Fluorene	59	10	52	10	12.6
Phenanthrene	630	10	470	10	29.1
Anthracene	190	10	130	10	37.5
Fluoranthene	1700	10	1300	10	26.7
Pyrene	1200	10	910	10	27.5
Benzo(a)anthracene	800	10	560	10	35.3
Chrysene	630	10	550	10	13.6
Benzo(b)fluoranthene	990	10	760	10	26.3
Benzo(k)fluoranthene	300	10	230	10	26.4
Benzo(a)pyrene	730	10	510	10	35.5
Indeno(1,2,3-cd)pyrene	460	10	380	10	19
Dibenzo(a,h)anthracene	93	10	75	10	21.4
Benzo(g,h,i)perylene	370	10	300	10	20.9

For field duplicate pair E4SC5 and E4SC6, all compounds detected in both samples had RPD values less than 50%, except for Acenaphthylene (150%).

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, and E4SB4 were performed using 10-fold dilutions. The original analysis for samples E4SB0 and E4SB6 were performed using 2-fold and 5-fold dilutions, respectively.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SB0DL, E4SB6DL
Indeno (1,2,3-cd) pyrene	E4SB7
Benzo (b) fluoranthene	E4SB7
Fluoranthene	E4SB7
Benzo (k) fluoranthene	E4SB6DL
Acenaphthylene	E4S89, E4SA4, E4SA6, E4SA9, E4SB6, E4SB6MS

Chrysene	E4SB7
Benzo (a) pyrene	E4SB7
Dibenzo (a,h) anthracene	E4SB0, E4SB0DL, E4SB6DL
Benzo (a) anthracene	E4SB7
Acenaphthene	E4S90, E4S92, E4SB0, E4SB0DL, E4SB4, E4SB6
Phenanthrene	E4SB7
Fluorene	E4S90, E4SB0, E4SB0DL, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Naphthalene	E4SB6MSD
2-Methylnaphthalene	E4SA9, E4SB6, E4SB6MSD

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where diluted results are provided, these should be used for result validation.

Anthracene	E4S89, E4SA4
Benzo(a)anthracene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(a)pyrene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(b)fluoranthene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB4, E4SB6, E4SB6MSD
Benzo(g,h,i)perylene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(k)fluoranthene	E4S89, E4SA3, E4SA4, E4SA9
Chrysene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Fluoranthene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Fluorene	E4SA4
Indeno(1,2,3-cd)pyrene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9

Phenanthrene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Pyrene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB4, E4SB6, E4SB6MS, E4SB6MSD

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4S89, E4S89DL, E4S90, E4S90DL, E4S92, E4SA2, E4SA3, E4SA4, E4SA4DL, E4SA6, E4SA9, E4SA9DL, E4SB0, E4SB4, E4SB6, E4SB6MS, E4SB6MSD, E4SB7

All pesticide samples are associated with a CCV with % Difference that exceeded criteria for the target compounds Endosulfan I, Endosulfan II, 4,4'-DDT, Endrin ketone, Endrin, Methoxychlor, beta-BHC, delta-BHC, alpha-Chlordane, gamma-BHC (Lindane), and Endrin aldehyde. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDE	E4SB0, E4SB6MS
Endrin aldehyde	E4SG5, E4SG6

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

gamma-Chlordane	E4SB7
4,4'-DDE	E4SB0, E4SB6MS
Endrin aldehyde	E4SG5, E4SG6

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following pesticide samples have surrogate percent recoveries that are greater than 200%. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4, E4SA6
Tetrachloro-m-xylene	E4SA9

The following pesticide samples have surrogate percent recoveries that are greater than 200%. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4DL, E4SA9DL
Tetrachloro-m-xylene	E4SA4DL, E4SA9DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected results for Heptachlor compounds are qualified "J." Nondetected compounds are not qualified.

Heptachlor	E4SB6MS, E4SB6MSD

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates**.** Results are summarized in the following table. Results for gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, 4,4'-DDT, Methoxychlor, and Endrin aldehyde were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs. Sample results are not qualified based on the results of field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Pesticide compound	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)		1	ND	1	
Heptachlor		1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1		1	
Endosulfan I	0.46	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	2.5	1	3.1	1	21
Endrin	0.25	1	0.26	1	3.9
Endosulfan II	0.25	1	0.26	1	3.9
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT		1		1	

Pesticide compound	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Methoxychlor	1.3	1		1	
Endrin ketone	0.25	1		1	
Endrin aldehyde		1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	2.6	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4SA3 and E4SA6, where calculated, RPD values were less than 50%.

Equipment Blanks E4SG5 and E4SG6

Pesticide compound	E4SG5 µg/L	E4SG6 µg/L
alpha-BHC	ND	ND
beta-BHC	ND	ND
delta-BHC	ND	ND
gamma-BHC (Lindane)	ND	ND
Heptachlor	ND	ND
Aldrin	ND	ND
Heptachlor epoxide	ND	ND
Endosulfan I	ND	ND
Dieldrin	ND	ND
4,4'-DDE	ND	ND
Endrin	ND	ND
Endosulfan II	ND	ND
4,4'-DDD	ND	ND
Endosulfan sulfate	ND	ND
4,4'-DDT	ND	ND
Methoxychlor	ND	ND
Endrin ketone	ND	ND
Endrin aldehyde	ND	ND
alpha-Chlordane	ND	ND
gamma-Chlordane	ND	ND
Toxaphene	ND	ND

No target compounds were detected in equipment blanks E4SG5 or E4SG6.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

alpha-BHC	E4SB7
Methoxychlor	E4SA4DL
Heptachlor epoxide	E4SG6

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

Endosulfan sulfate	E4S90DL, E4SB0
Aldrin	E4S92, E4SA3, E4SB4
alpha-BHC	E4S90DL
beta-BHC	E4SB0
delta-BHC	E4S90DL, E4SB7
Endosulfan II	E4SB6
alpha-Chlordane	E4S90DL, E4SB6
gamma-Chlordane	E4SB7, E4SG5
Endrin ketone	E4S89DL, E4S90
gamma-BHC (Lindane)	E4S89, E4S90, E4SB7
Dieldrin	E4SB0, E4SB6
Endrin	E4S90DL, E4SB0, E4SB7
Methoxychlor	E4SB7
Endrin aldehyde	E4SG5
Endosulfan I	E4S89DL, E4S90, E4S90DL, E4S92, E4SB0, E4SB7

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Heptachlor epoxide	E4S90DL
alpha-BHC	E4SA4DL

beta-BHC	E4S90, E4SB7, E4SG5
4,4'-DDT	E4S90, E4SA4
alpha-Chlordane	E4S89
gamma-BHC (Lindane)	E4SA4DL, E4SB6MSD
Dieldrin	E4S89, E4S90, E4S92, E4SB4, E4SB6MS
Endrin	E4SB6MS, E4SB6MSD
4,4'-DDD	E4S90DL, E4SA4DL, E4SG5
4,4'-DDE	E4S89DL, E4S92, E4SA2, E4SA3, E4SA9DL, E4SB4
Endrin aldehyde	E4SB0, E4SB7
Heptachlor	E4SB6MS, E4SB6MSD
Endosulfan I	E4SA3, E4SA4

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified “NJ”.

Heptachlor epoxide	E4S90
alpha-BHC	E4SA9, E4SA9DL
4,4'-DDT	E4S89DL, E4SA2, E4SA9DL
gamma-Chlordane	E4S90, E4SA6
Dieldrin	E4SA9, E4SB6MSD
Methoxychlor	E4S89
4,4'-DDD	E4S89DL
4,4'-DDE	E4S89, E4S90, E4S90DL, E4SA4DL
Endrin aldehyde	E4S90, E4S92, E4SA2
Heptachlor	E4S90, E4SA9, E4SB6

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified “U” and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4SA2, E4SA9DL, E4SB0, E4SB6, E4SB6MS, E4SB6MSD, E4SB7, E4SG5

Endosulfan sulfate	E4SB6MS, E4SB7
alpha-BHC	E4SB0
beta-BHC	E4S89DL, E4S90DL
delta-BHC	E4SG5
Endosulfan II	E4S89, E4S89DL, E4S90, E4S90DL, E4S92, E4SA3, E4SA4, E4SA4DL, E4SA6, E4SA9, E4SA9DL, E4SB4, E4SB7
4,4'-DDT	E4SB7
alpha-Chlordane	E4SA4DL, E4SB0
Endrin ketone	E4S89, E4S92, E4SA3, E4SA4, E4SA9, E4SB4
Endrin	E4S89DL, E4SA3, E4SA4DL, E4SA6
Methoxychlor	E4S90DL, E4S92, E4SA2, E4SA3, E4SA9DL, E4SB0, E4SB4, E4SB6
4,4'-DDD	E4SB0, E4SB6, E4SB6MS, E4SB6MSD, E4SB7
4,4'-DDE	E4SB0
Endrin aldehyde	E4S90DL
Heptachlor	E4S89DL, E4S90DL, E4SB0
Endosulfan I	E4SA4DL

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified “R”.

Heptachlor epoxide	E4S89, E4S89DL, E4S92, E4SA3, E4SA6, E4SA9, E4SB4
Endosulfan sulfate	E4S90, E4SA9
beta-BHC	E4S89, E4SA2, E4SB6
4,4'-DDT	E4S89, E4S92, E4SA3, E4SA6, E4SA9, E4SB4
gamma-Chlordane	E4S89
Endrin ketone	E4SA6
gamma-BHC (Lindane)	E4SA3
Endrin	E4S89, E4S92, E4SA4, E4SB4
Methoxychlor	E4S90, E4SA4, E4SA6, E4SA9

4,4'-DDD	E4S92
4,4'-DDE	E4SA9
Endrin aldehyde	E4SA3, E4SA9, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Heptachlor	E4S89, E4SA3, E4SA4DL, E4SA6, E4SA9DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, the results are flagged "J". The results from the diluted samples should be used for result validation.

4,4'-DDD	**E4S89, E4S90, E4SA9**
4,4'-DDE	**E4S89**
gamma-BHC (Lindane)	**E4SA4**

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of diluted sample E4S89DL. No sample results were qualified based on surrogate recovery. However, a surrogate recovery greater than 150% was obtained on only one column for samples E4S89, E4S90, E4S92, E4SSA3, E4SA6, and E4SA9. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following Aroclor samples have surrogate percent recoveries that are greater than 200% Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S89, E4S90, E4S92, E4SA3, E4SA6
Tetrachloro-m-xylene	E4SA9

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4S89DL, E4S92DL, E4SA3DL, E4SA4DL, E4SA6DL, E4SA9DL, E4SB4DL
Tetrachloro-m-xylene	E4SA3DL, E4SA4DL, E4SA6DL, E4SA9DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4, E4SA9, E4SB4
Tetrachloro-m-xylene	E4SA3, E4SA6

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Tetrachloro-m-xylene E4S89DL, E4SA9DL, E4SB4DL

The following Aroclor sample has surrogate percent recoveries less than 30% but greater than 10%. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Decachlorobiphenyl E4SA2

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SB6, the Aroclor MS and MSD sample has a percent recovery greater than the upper acceptance limit on both the RTX-CLP and RTX-CLP2 columns for Aroclor-1260. In addition, the relative percent difference (RPD) between the MS and MSD for Aroclor-1260 was above criteria on column RTX-CLP. For column RTX-CLP2, the MS for Arochlor-1016 had a RPD greater than the upper acceptance limit. All samples are affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates. In addition to undiluted analyses of each sample, a dilution was also analyzed (E4SA3DL, E4SA6DL). Results are summarized in the following two tables. Note that results are not qualified based upon the results of the field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	260	1	290	1	11
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4SA3 and E4SC6DL

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	50	
Aroclor-1221	ND	1	ND	50	

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1232	ND	1	ND	50	
Aroclor-1242	ND	1	ND	50	
Aroclor-1248	260	1	450	50	54
Aroclor-1254	ND	1	ND	50	
Aroclor-1260	ND	1	ND	50	
Aroclor-1262	ND	1	ND	50	
Aroclor-1268	ND	1	ND	50	

E4SA3DL and E4SC6

Aroclor compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Aroclor-1016	ND	50	ND	1	
Aroclor-1221	ND	50	ND	1	
Aroclor-1232	ND	50	ND	1	
Aroclor-1242	ND	50	ND	1	
Aroclor-1248	390	50	290	1	29
Aroclor-1254	ND	50	ND	1	
Aroclor-1260	ND	50	ND	1	
Aroclor-1262	ND	50	ND	1	
Aroclor-1268	ND	50	ND	1	

E4SA3DL and E4SC6DL

Aroclor compounds	E4SA3DL µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1016	ND	50	ND	50	
Aroclor-1221	ND	50	ND	50	
Aroclor-1232	ND	50	ND	50	
Aroclor-1242	ND	50	ND	50	
Aroclor-1248	390	50	450	50	14
Aroclor-1254	ND	50	ND	50	
Aroclor-1260	ND	50	ND	50	
Aroclor-1262	ND	50	ND	50	
Aroclor-1268	ND	50	ND	50	

For the neat and diluted analysis of field duplicate samples E4SA3 and E4SA6, RPD values were not calculated when both values were nondetects. The RPDs for Aroclor-1248 were below 50% except for RPDs for E4SA3 and E4SC6DL.

Equipment Blanks E4SG5 and E4SG6

Aroclor compounds	E4SG5 µg/L	E4SG6 µg/L
Aroclor-1016	ND	ND
Aroclor-1221	ND	ND
Aroclor-1232	ND	ND

Aroclor compounds	E4SG5 µg/L	E4SG6 µg/L
Aroclor-1242	ND	ND
Aroclor-1248	ND	ND
Aroclor-1254	ND	ND
Aroclor-1260	ND	ND
Aroclor-1262	ND	ND
Aroclor-1268	ND	ND

No target compounds were detected in equipment blanks E4SG5 or E4SG6.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1260 E4RZ6, E4S10, E4S51

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4RZ2, E4RZ6, E4S51

Aroclor-1248 E4RY8, E4S09DL

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S59

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S52

For the MS and MSD prepared for sample E4RZ1, Aroclor-1016 had a percent difference between the results on the two GC columns exceeding 100%. Detected Aroclor-1016 results in the MS and MSD are qualified "R".

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

Aroclor-1248 E4SA3, E4SA4, E4SA6, E4SA9

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "NJ". The results from the diluted sample should be used.

Aroclor-1260 E4S92, E4SB4

The following Aroclor sample reported concentrations that exceeded the calibrated range of the instrument and was flagged "E" by the laboratory. As per the NFG, this results is flagged "J" as the percent difference was between 26 and 50%. Where provided, the results from the diluted sample should be used.

Aroclor-1260 E4S89

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Receipt: Thirteen (13) sediment samples labeled E4S93, E4S94, E4S95, E4S96, E4S97, E4SA1, E4SA5, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5, and E4SB8 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All samples were collected on 3/3/2010 and shipped on 3/4/2010. All samples were received on 3/6/2010 at 5 °C. One of the three containers for sample E4SB3 was received broken; however, the remaining two containers had sufficient sample for analyses. In accordance with direction from EPA, analyses proceeded. Sample E4SB3 was received at pH 9.05, which is outside the allowable limits. In accordance with direction from EPA, the pH was adjusted and the analyses conducted. No data were qualified based on the late delivery, the broken container, or sample pH.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

Samples E4S92 and E4SB1 contained less than 50% solids (45.3066% and 44.4634%, respectively). Results were reported on a dry-weight basis using the percent solids determined by the laboratory. As designated by the samplers, Sample E4S95 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no samples were identified as field duplicate pairs.

Per the laboratory narrative, manual edits were made in the semivolatiles calibration standards for a variety of miscalled peaks. Every manual integration is noted by an "m" footnote on the quantitation report.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile compounds and samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(g,h,i)perylene	E4S93
Benzo(b)fluoranthene	E4S93

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for Benzo(b)fluoranthene and Benzo(k)fluoranthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4S97, E4SA1, E4SA5, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5, E4SB8

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile samples E4S95 and E4S95MS have deuterated monitoring compound recovery below the lower limit of the criteria window for Pyrene-d_{10}. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene	E4S94
Pyrene	E4S96
Benzo(g,h,i)perylene	E4S95, E4S95MSD, E4SA8
Indeno(1,2,3-cd)pyrene	E4S95, E4SA7, E4SA8
Benzo(b)fluoranthene	E4S95MS, E4S95MSD, E4S96
Fluoranthene	E4S95MS
Benzo(k)fluoranthene	E4S95, E4SA7, E4SB5
Chrysene	E4S95MSD
Benzo(a)pyrene	E4S95MSD, E4S96
Dibenzo(a,h)anthracene	E4S93
Benzo(a)anthracene	E4S96
Phenanthrene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA8
Fluorene	E4S93

The following semivolatile samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Anthracene	E4S95, E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5
Pyrene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(g,h,i)perylene	E4S95MS, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Indeno(1,2,3-cd)pyrene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SB3
Benzo(b)fluoranthene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Fluoranthene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(k)fluoranthene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA8, E4SB3
Acenaphthylene	E4S93, E4S94, E4SA7, E4SA8, E4SB1
Chrysene	E4S95MS, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(a)pyrene	E4S95MS, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Dibenzo(a,h)anthracene	E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(a)anthracene	E4S95MS, E4S95MSD, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Acenaphthene	E4S93, E4S94, E4S95, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Phenanthrene	E4S97, E4SA5, E4SB3, E4SB8
Fluorene	E4S94, E4S95, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5

Naphthalene	E4S93, E4S94, E4S95, E4SA1, E4SA8, E4SB1
2-Methylnaphthalene	E4S94, E4S95MSD, E4SA1

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

SEMIVOLATILES-SIM

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples and compounds have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(k)fluoranthene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SB3, E4SB8
Benzo(a)pyrene	E4SA5, E4SB8
Dibenzo(a,h)anthracene	E4S96DL, E4S97, E4SA1, E4SA1DL, E4SA5, E4SB3, E4SB8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike (E4S95MS) and matrix spike duplicate (E4S95MSD) recoveries is outside criteria for Acenaphthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4S93, E4S94, E4S92, E4S95 E4S96, E4SA7, E4SA8, E4SB1, and E4SB4 were performed using 10-fold dilutions. The original analysis for sample E4SA1 was performed using 3-fold dilution.

The following semivolatile samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Acenaphthylene	E4S96, E4SA8DL
Acenaphthene	E4S96DL, E4S97, E4SA5, E4SA7DL
Fluorene	E4S96DL, E4S97, E4SA5
Naphthalene	E4S93DL, E4S94DL, E4S95DL, E4S95MS, E4S97, E4SA1DL, E4SA5, E4SA8DL, E4SB1DL, E4SB3, E4SB8
2-Methylnaphthalene	E4S93DL, E4S94DL, E4S95MS, E4S96, E4S97, E4SA5, E4SB5DL, E4SB8

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SA8DL, E4SB1DL, E4SB8
Benzo(k)fluoranthene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SB3, E4SB8
Acenaphthylene	E4S93DL, E4S94DL, E4S95, E4S95MS, E4S95MSD, E4SB1, E4SB5
Benzo(a)pyrene	E4SA5, E4SB8
Dibenzo(a,h)anthracene	E4S96DL, E4S97, E4SA1, E4SA1DL, E4SA5, E4SB3, E4SB8
Acenaphthene	E4S94DL, E4S95DL, E4SA8DL, E4SB1DL, E4SB3, E4SB5DL
Fluorene	E4S95DL, E4S95MS, E4SA7DL, E4SA8DL, E4SB1DL, E4SB3, E4SB5DL
Naphthalene	E4S96
2-Methylnaphthalene	E4S95, E4SA7, E4SB3

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are qualified "J".

Acenaphthene	E4S93
Anthracene	E4S93, E4S94, E4S95, E4SA7, E4SB5

Benzo(a)anthracene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(a)pyrene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(b)fluoranthene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(g,h,i)perylene	E4S93, E4S94, E4S95, E4S95MSD, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(k)fluoranthene	E4S93, E4S94, E4S95, E4S95MSD, E4SA7, E4SA8, E4SB1, E4SB5
Chrysene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Dibenzo(a,h)anthracene	E4S93, E4S94, E4SA7, E4SB1
Fluoranthene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Fluorene	E4S93
Indeno(1,2,3-cd)pyrene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Pyrene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5

The following *diluted* semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are qualified "J".

Benzo(a)anthracene	E4S93DL, E4S94DL
Benzo(a)pyrene	E4S93DL, E4S94DL
Benzo(b)fluoranthene	E4S93DL, E4S94DL
Benzo(g,h,i)perylene	E4S93DL
Benzo(k)fluoranthene	E4S93DL
Chrysene	E4S93DL, E4S94DL
Fluoranthene	E4S93DL, E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Indeno(1,2,3-cd)pyrene	E4S93DL, E4S94DL
Phenanthrene	E4S93DL, E4S94DL
Pyrene	E4S93DL, E4S94DL, E4SB5DL

The following *diluted* semivolatile-SIM samples reported concentrations that *did not* exceed the calibrated range of the instrument and were *not* flagged "E" by the laboratory.

Acenaphthene	E4S93DL
Anthracene	E4S93DL, E4S94DL, E4S95DL, E4SA7DL, E4SB5DL
Benzo(a)anthracene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(a)pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(b)fluoranthene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(g,h,i)perylene	E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(k)fluoranthene	E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Chrysene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Dibenzo(a,h)anthracene	E4S93DL, E4S94DL, E4SA7DL, E4SB1DL
Fluorene	E4S93DL
Indeno(1,2,3-cd)pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL

Phenanthrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL

PESTICIDES

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *method* blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDT	E4S94DL, E4S96, E4SA1, E4SA5, E4SB3

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endrin aldehyde	E4S97, E4SA5, E4SB3, E4SB8

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDE	E4S97, E4SA1, E4SA5, E4SB3
Endrin aldehyde	E4S93DL, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. All pesticide compounds are affected. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected compounds are qualified "J." All pesticide compounds are affected. Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. All pesticide compounds are affected. Detected and nondetected compounds are not qualified.

Tetrachloro-m-xylene	E4S93DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Heptachlor	E4S95MS, E4S95MSD

For the pesticide matrix/matrix spike pair E4S95/MS/E4S95MSD, percent recoveries are greater than the upper acceptance limit for Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, and Heptachlor. All samples are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Aldrin	E4SB5
4,4'-DDT	E4SB8
alpha-Chlordane	E4SB8
Endrin ketone	E4SA1, E4SB3, E4SB8
gamma-BHC (Lindane)	E4S93DL, E4S95, E4S96, E4SA5, E4SB1, E4SB3, E4SB5, E4SB8
Dieldrin	E4SA5

Endrin	E4SB8
4,4'-DDD	E4SB8

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Endosulfan sulfate	E4SA1
Aldrin	E4S96, E4SA8
alpha-BHC	E4S93DL, E4SA1, E4SA5
beta-BHC	E4S95, E4S96, E4SA5, E4SA8, E4SB8
delta-BHC	E4S93DL, E4S95
Endosulfan II	E4SA1, E4SB3
alpha-Chlordane	E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB5
Endrin ketone	E4S93DL, E4SB1, E4SB5
gamma-BHC (Lindane)	E4S93, E4S97, E4SA1, E4SA7
Dieldrin	E4S96, E4SA1, E4SB3, E4SB5
Endrin	E4SA1, E4SA5, E4SB3
Methoxychlor	E4SA5, E4SB8
4,4'-DDE	E4S97
Endrin aldehyde	E4SB5
Heptachlor	E4S97, E4SB3, E4SB8
Endosulfan I	E4S93DL, E4S94, E4S95, E4SA7, E4SB1, E4SB5

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Heptachlor epoxide	E4S95, E4S95MSD
Aldrin	E4S95MS, E4S95MSD
alpha-BHC	E4SB8
4,4'-DDT	E4S94DL, E4SA8
alpha-Chlordane	E4S93, E4S93DL, E4S94, E4SB1
gamma-Chlordane	E4SB3, E4SB5
gamma-BHC (Lindane)	E4SA8
Endrin	E4S95MS, E4S95MSD
4,4'-DDD	E4S93DL, E4S95MS
4,4'-DDE	E4SA7, E4SB3, E4SB5
Endrin aldehyde	E4S95MS, E4SB1, E4SB3
Heptachlor	E4S95MS
Endosulfan I	E4SA8

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Heptachlor epoxide	E4S93DL, E4S95MS
4,4'-DDT	E4S93, E4S93DL, E4S94, E4S95, E4SA7, E4SB1, E4SB5
gamma-Chlordane	E4S93, E4S95, E4S95MS, E4S95MSD, E4SB1
gamma-BHC (Lindane)	E4S95MS, E4S95MSD
Dieldrin	E4S93, E4S93DL, E4S95MS, E4S95MSD, E4SA8
Methoxychlor	E4S93
4,4'-DDD	E4SA7
4,4'-DDE	E4S94, E4S94DL, E4SB1

Endrin aldehyde	E4S95, E4S95MSD, E4SA7, E4SA8
Heptachlor	E4S95MSD

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below the CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S96, E4S97, E4SA1, E4SA5, E4SB5, E4SB8
Endosulfan sulfate	E4SB3
Aldrin	E4SA1
alpha-BHC	E4S97, E4SA7
beta-BHC	E4S93DL, E4S97, E4SA1, E4SB5
delta-BHC	E4SB3
Endosulfan II	E4S93, E4S93DL, E4S94, E4S94DL, E4SA8
4,4'-DDT	E4S96, E4SA5, E4SB3
gamma-Chlordane	E4S97, E4SA5, E4SB8
Endrin ketone	E4S95, E4S95MS, E4S95MSD, E4SA7, E4SA8
Dieldrin	E4S94, E4S94DL, E4S95, E4SB8
Endrin	E4S93DL, E4S97, E4SA8, E4SB1
Methoxychlor	E4S93DL, E4S94DL, E4S95, E4S95MS, E4S95MSD, E4S96, E4S97, E4SA1, E4SA8, E4SB3, E4SB5
4,4'-DDD	E4SA1, E4SA5, E4SB3
4,4'-DDE	E4SA1, E4SA5
Endrin aldehyde	E4S93DL, E4S96, E4S97, E4SA1, E4SA5, E4SB8
Heptachlor	E4S94, E4S95, E4S96, E4SA1, E4SA5, E4SB5

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4S93, E4SA7, E4SA8
Endosulfan sulfate	E4S94, E4SA7
delta-BHC	E4S96, E4SB1
gamma-Chlordane	E4S94, E4S96
Endrin	E4S93, E4SA7
Methoxychlor	E4S94, E4SA7, E4SB1
4,4'-DDE	E4SA8
Endrin aldehyde	E4S93
Heptachlor	E4SA7, E4SA8

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a surrogate recovery greater than 150% was obtained on only one column for samples E4S93, E4S94, E4SA7, E4SSA8, and E4S95MS. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries that are greater than 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL, E4SA7DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93, E4S94, E4SA7, E4SA8
Tetrachloro-m-xylene	E4S94, E4S95MS

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA8DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL, E4SA7DL
Tetrachloro-m-xylene	E4SA7DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S95, the Aroclor MS and MSD samples have a percent recovery greater than the upper acceptance limit on the RTX-CLP and RTX-CLP2 columns for Aroclor-1016 and on the RTX-CLP column for Aroclor-1260. The results for Aroclor-1016 and Aroclor-1260 were rejected in sample E4S95MSD for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs. All samples are affected.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Not applicable.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1260	E4S93DL, E4SB5

The following Aroclor sample has percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1248	E4SB5

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R."

Aroclor-1260	E4S95MSD
Aroclor-1016	E4S95MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where provided, the results from the diluted sample should be used.

Aroclor-1016	E4S95MS
Aroclor-1248	E4SA7, E4SA8
Aroclor-1260	E4S93

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SUBJECT: Review of Data
Received for Review on: April 8, 2010

FROM: Eric Boring
Senior Chemist

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4SC2

Number and Type of Samples: 20 Sediment Samples

Sample Numbers: E4SC2, E4SD4-E4SD7, E4SE2, E4SF0, E4SF2-E4SF8, E4SG0-E4SG4, E4SG7

Laboratory: DATAC

Following are our findings:

Judy Schofield, CSC

SDG SUMMARY

Sample Receipt: Twenty (20) sediment samples labeled E4SC2, E4SD4 – E4SD7, E4SE2, E4SF0, E4SF2 - E4SF8, E4SG0 – E4SG4 and E4SG7 were shipped to DataChem Laboratories, Inc., in Salt Lake City, Utah. Samples E4SC2, E4SD4 – E4SD7, E4SE2, and E4SG7 were collected on 3/4/2010 and were received on 3/6/2010, intact and at 4 ºC. Sample E4SF0, E4SF2 – E4SF4 were collected on 3/4/2010 and received on 3/6/2010, intact and at 6 ºC. Samples E4SF5 - E4SF7 were collected on 3/5/2010 and were received on 3/6/2010, intact and at 6 ºC. Samples E4SG0 – E4SG4 were collected on 3/5/2010 and received, intact and at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, ***with the following exception***. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Some samples in this SDG were originally reported with results below the sample-specific MDLs and qualifier by the laboratory with a "J" flag. The EDD, Form 1s and other data summary forms for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s.

Several of the Form 1s reported target compound results less than the MDL for the semivolatile, Semivolatiles-SIM, and pesticide analyses. The forms were revised and resubmitted by the laboratory and should be used when viewing the data package. For the Semivolatiles-SIM analysis, however, some corrected Form 1s were not provided and are noted in the appropriate section of this report. For these samples, the EDD provides the sample results at the appropriate levels.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed. GLNPO may wish to obtain revised copies of the summary forms packages from the laboratory if there is a problem identifying the appropriate data based on the noted discrepancies.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples

Sample E4SF0 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Samples E4SC1/E4SC2, E4SE1/E4SE2, and E4SG1/E4SG4 were identified as field duplicates. Field Duplicate pairs E4SC1/E4SC2 and E4SE1/E4SE2 had high RPDs (> 50%) for many target compounds. In addition, it should be noted that E4SE1 was analyzed at a dilution factor of 10, while its duplicate, E4SE2 was analyzed at a dilution factor of 1. *Note: Samples E4SC1, E4SE1, and E4SE1DL were not part of this SDG. Sample E4SC1 is part of SDG E4RY5 and sample E4SE1 is part of SDG E4S57. Data from these three samples were added to the field duplicate tables in the narrative in order to calculate RPDs.*

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo (g,h,i) perylene	E4SF4, E4SF7, E4SG0, E4SG2
Indeno (1,2,3-cd) pyrene	E4SF4, E4SF7, E4SG0, E4SG2
Benzo (b) fluoranthene	E4SF4, E4SF7, E4SG0, E4SG2

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The original analysis of the following semivolatile sample E4SG0 has a dilution factor greater than 5 and a deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene, Anthracene, Phenanthrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Pyrene, Acenaphthene E4SF0, E4SF0MS, E4SF0MSD

6B. LABORATORY CONTROL SAMPLE

An LCS was not required.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2 and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Semivolatile Compounds	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

E4SE1 and E4SE2

Semivolatile Compounds	E4SE1 µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Naphthalene	ND	5	ND	1	
2-Methylnaphthalene	ND	5	ND	1	
Acenaphthylene	ND	5	ND	1	
Acenaphthene	410	5	130	1	100
Fluorene	340	5	120	1	96
Phenanthrene	2600	5	880	1	99
Anthracene	660	5	200	1	110
Fluoranthene	6700	5	1700	1	120
Pyrene	7600	5	2400	1	100
Benzo(a)anthracene	3400	5	1100	1	100
Chrysene	4200	5	1300	1	110
Benzo(b)fluoranthene	5800	5	1700	1	110
Benzo(k)fluoranthene	1400	5	510	1	93
Benzo(a)pyrene	3600	5	1200	1	100
Indeno(1,2,3-cd)pyrene	4000	5	1100	1	110
Dibenzo(a,h)anthracene	790	5	250	1	100
Benzo(g,h,i)perylene	3400	5	1000	1	110

E4SG1 and E4SG4

Semivolatile Compounds	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	2	
2-Methylnaphthalene	ND	1	ND	2	
Acenaphthylene	ND	1	ND	2	
Acenaphthene	74	1	ND	2	
Fluorene	99	1	110	2	11
Phenanthrene	1100	1	1300	2	17
Anthracene	270	1	290	2	7.1
Fluoranthene	1700	1	2100	2	21
Pyrene	2300	1	2300	2	0
Benzo(a)anthracene	1300	1	1300	2	0
Chrysene	1400	1	1400	2	0
Benzo(b)fluoranthene	1700	1	1700	2	0
Benzo(k)fluoranthene	550	1	550	2	0
Benzo(a)pyrene	1300	1	1300	2	0
Indeno(1,2,3-cd)pyrene	1200	1	1000	2	18
Dibenzo(a,h)anthracene	260	1	210	2	21
Benzo(g,h,i)perylene	1000	1	890	2	12

For field duplicates E4SC1 and E4SC2, the RPD values could not be calculated because either one or both of the values was zero. For field duplicates E4SE1 and E4SE2 the RPDs are near 100% or higher for most of the detected analytes.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SD4, E4SD5, E4SF2, E4SF3, E4SG0, E4SG1DL, E4SG4
Pyrene	E4SD6
Benzo (g,h,i) perylene	E4SD4, E4SD5, E4SF0, E4SF0MS, E4SF0MSD, E4SF3, E4SF4, E4SF6, E4SF7, E4SG0, E4SG2
Indeno (1,2,3-cd) pyrene	E4SD4, E4SD5, E4SF3, E4SF6, E4SG0, E4SG2
Benzo (b) fluoranthene	E4SD6

Fluoranthene	E4SD6
Benzo (k) fluoranthene	E4SD4, E4SD5, E4SF0, E4SF0MS, E4SF2, E4SF3, E4SF6, E4SF7, E4SG0, E4SG2
Chrysene	E4SF0, E4SF0MS, E4SF7
Benzo (a) pyrene	E4SD6, E4SF0, E4SF0MS, E4SF6
Dibenzo (a,h) anthracene	E4SG1DL, E4SG4
Benzo (a) anthracene	E4SF0, E4SF0MS, E4SF6, E4SF7
Acenaphthene	E4SE2, E4SF3, E4SF4, E4SF5, E4SG1
Phenanthrene	E4SD6, E4SF0, E4SF0MS, E4SF6, E4SF7
Fluorene	E4SE2, E4SF0MSD, E4SF3, E4SF5, E4SG1, E4SG4

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile samples have reported concentrations that exceeded the calibration range. These results were flagged “E” by the laboratory and are estimated “J”. The results from the diluted sample analyses were within the calibration range.

Pyrene	E4SG1

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Indeno (1,2,3-cd) pyrene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3
Dibenzo (a,h) anthracene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Diluted semivolatile-SIM sample E4SG0, with a dilution factor greater than 5, had a deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

Acenaphthene	E4SF0, E4SF0MS, E4SF0MSD

6B. LABORATORY CONTROL SAMPLE

An LCS was not required

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2 and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Semivolatiles-SIM Compounds	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Naphthalene	2.7	1	2	1	30
2-Methylnaphthalene	1.9	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	0.88	1	ND	1	
Phenanthrene	8.1	1	3.7	1	75
Anthracene	1.6	1	0.69	1	80
Fluoranthene	18	1	5.5	1	110
Pyrene	23	1	7.9	1	98
Benzo(a)anthracene	8.6	1	2.2	1	120
Chrysene	12	1	3.6	1	110
Benzo(b)fluoranthene	16	1	4.2	1	120
Benzo(k)fluoranthene	3.8	1	1.2	1	100
Benzo(a)pyrene	12	1	2.7	1	130
Indeno(1,2,3-cd)pyrene	10	1	2.9	1	110
Dibenzo(a,h)anthracene	2	1	2.4	1	18
Benzo(g,h,i)perylene	11	1	3.3	1	110

E4SE1 and E4SE2

Semivolatiles-SIM Compounds	E4SE1 µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Naphthalene	40	10	13	1	100
2-Methylnaphthalene	42	10	11	1	120
Acenaphthylene	32	10	7	1	130
Acenaphthene	200	10	45	1	130
Fluorene	170	10	42	1	120
Phenanthrene	1600	10	570	1	95
Anthracene	390	10	130	1	100
Fluoranthene	6000	10	1700	1	110
Pyrene	3600	10	1200	1	100
Benzo(a)anthracene	1900	10	650	1	98
Chrysene	2100	10	640	1	110
Benzo(b)fluoranthene	4000	10	1600	1	86
Benzo(k)fluoranthene	1000	10	480	1	70
Benzo(a)pyrene	2200	10	1100	1	67
Indeno(1,2,3-cd)pyrene	1700	10	740	1	79
Dibenzo(a,h)anthracene	320	10	160	1	67
Benzo(g,h,i)perylene	1400	10	610	1	79

E4SG1 and E4SG4

Semivolatile Compounds	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
Naphthalene	22	1	21	1	4.7
2-Methylnaphthalene	14	1	14	1	0
Acenaphthylene	17	1	19	1	11
Acenaphthene	29	1	34	1	16
Fluorene	36	1	45	1	22
Phenanthrene	650	1	940	1	37
Anthracene	140	1	200	1	35
Fluoranthene	1500	1	2100	1	33
Pyrene	1500	1	1800	1	18
Benzo(a)anthracene	950	1	1100	1	15
Chrysene	830	1	1000	1	19
Benzo(b)fluoranthene	1600	1	1800	1	12
Benzo(k)fluoranthene	370	1	470	1	24
Benzo(a)pyrene	990	1	1100	1	11
Indeno(1,2,3-cd)pyrene	660	1	740	1	11
Dibenzo(a,h)anthracene	140	1	160	1	13
Benzo(g,h,i)perylene	520	1	560	1	7.4

For field duplicates E4SC1 and E4SC2, the RPD values could not be calculated where one or both of the values was zero. Of those that could be calculated, only Naphthalene and Dibenzo(ah)anthracene had an RPD value below 50%. For field duplicates E4SE1 and E4SE2 the RPDs are near 100% or higher for all of the detected analytes. For field duplicates E4SG1 and E4SG4 all RPD values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SC2, E4SD6DL, E4SF0DL, E4SF6DL, E4SF7DL, E4SF8, E4SG3
Indeno (1,2,3-cd) pyrene	E4SD7, E4SG7
Benzo (b) fluoranthene	E4SD7, E4SG7
Fluoranthene	E4SD7, E4SG7

Benzo (k) fluoranthene	E4SC2, E4SD6DL, E4SD7, E4SF8
Acenaphthylene	E4SD4, E4SD5, E4SE2DL, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5DL, E4SF6, E4SF7DL, E4SG1DL, E4SG2, E4SG4DL
Chrysene	E4SD7, E4SG7
Benzo (a) pyrene	E4SD7, E4SG7
Dibenzo (a,h) anthracene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3
Benzo (a) anthracene	E4SC2, E4SD7, E4SG7
Acenaphthene	E4SD4DL, E4SD5DL, E4SD6, E4SF0, E4SF2DL, E4SF3DL, E4SF6, E4SF7, E4SF8, E4SG2DL, E4SG3
Phenanthrene	E4SD7, E4SG7
Fluorene	E4SD4DL, E4SD5DL, E4SD6, E4SF0MSD, E4SF2DL, E4SF6, E4SF8, E4SG2DL, E4SG3
Naphthalene	E4SC2, E4SF0, E4SF0MS, E4SF0MSD, E4SG7
2-Methylnaphthalene	E4SD5, E4SD6, E4SF0, E4SF0MS, E4SF0MSD, E4SF6

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following Semivolatiles-SIM samples have reported concentrations that exceeded the calibration range. These results were flagged “E” by the laboratory and are estimated “J”. The results from the diluted sample analyses were within the calibration range.

Phenanthrene	E4SD4, E4SD5, E4SE2, E4SF0, E4SF0MS, E4SF0MS, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, E4SG0, E4SG1, E4SG2, E4SG4
Anthracene	E4SD4, E4SD5, E4SE2, E4SF2, E4SF3, E4SF4, E4SF5, E4SG0, E4SG1, E4SG2, E4SG4
Fluoranthene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4

Benzo(a)anthracene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Chrysene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(b)fluoranthene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(k)fluoranthene	E4SD4, E4SD5, E4SE2, E4SF0, E4SF0MS, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(a)pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Indeno(1,2,3-cd)pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(g,h,i)perylene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Dibenzo(a,h)anthracene	E4SD4, E4SF0MS, E4SF0MSD, E4SF5, E4SG0, E4SG1, E4SG4
Acenaphthene	E4SE2, E4SF4, E4SF5, E4SG0, E4SG1, E4SG4
Fluorene	E4SE2, E4SF4, E4SF5, E4SG0, E4SG1, E4SG4

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Fluoranthene	E4SD5DL, E4SF4DL
Phenanthrene	E4SF4DL
Pyrene	E4SF4DL
Benzo(b)fluoranthene	E4SF4DL

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

beta-BHC	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endosulfan II	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
alpha-Chlordane	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin ketone	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Dieldrin	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Methoxychlor	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
4,4'-DDD	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin aldehyde	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endosulfan I	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SF5 had surrogate percent recoveries greater than 150% but less than or equal to 200%. Pesticide sample E4SF5 also had surrogate percent recoveries that are greater than 200% (the same surrogate was out on both columns). Detected compounds are qualified J. Nondetected compounds are not qualified.

Diluted pesticide sample E4SF5DL, with a dilution factor greater than 5 has surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

A high surrogate recovery was obtained on only one column for samples E4SE2DL, E4SF4, E4SF4DL, E4SG1, E4SG4, E4SG4DL, and E4SF2. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SF4, E4SG1, E4SG4, and E4SF2, the "J" flags applied during the automated check process for surrogate recovery have been removed for detected compounds.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

According to the modified analysis, the laboratory was required to spike MS/MSD analytes at levels different than the SOW. For samples E4SF0, E4SF0MS, E4SF0MSD, all analytes were within acceptance limits based on the modified analysis procedures; therefore, the "J" flags applied during the automated check process have been removed for the following compounds.

Aldrin, 4,4'DDT, Gamma-BHC (Lindane), Dieldrin, Endrin, and Heptachlor

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2DL and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Pesticide compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
alpha-BHC	0.13	1	ND	1	
beta-BHC	ND	1	0.12	1	
delta-BHC	ND	1	0.12	1	
gamma-BHC (Lindane)	ND	1	ND	1	
Heptachlor	0.14	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.13	1	0.12	1	8
Endosulfan I	ND	1	ND	1	
Dieldrin	0.25	1	ND	1	

Pesticide compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
4,4'-DDE	0.25	1	0.24	1	4.1
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.083	1	0.24	1	97
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.25	1	ND	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	0.1	1	
Toxaphene	ND	1	ND	1	

E4SE1 and E4SE2DL

Pesticide compound	E4SE1 µg/kg	DF	E4SE2DL µg/kg	DF	%RPD
alpha-BHC	ND	10	ND	10	
beta-BHC	ND	10	ND	10	
delta-BHC	ND	10	ND	10	
gamma-BHC (Lindane)	25	10		10	
Heptachlor	38	10	ND	10	
Aldrin	ND	10	ND	10	
Heptachlor epoxide	8.5	10		10	
Endosulfan I	ND	10	3.9	10	
Dieldrin	ND	10	7.6	10	
4,4'-DDE	25	10	11	10	78
Endrin	6.3	10	4.5	10	33
Endosulfan II	3.4	10	ND	10	
4,4'-DDD	ND	10	7.5	10	
Endosulfan sulfate	ND	10	3.3	10	
4,4'-DDT	ND	10	32	10	
Methoxychlor	ND	10	17	10	
Endrin ketone	ND	10	ND	10	
Endrin aldehyde	ND	10	3.3	10	
alpha-Chlordane	ND	10	3.3	10	
gamma-Chlordane	ND	10	ND	10	
Toxaphene	ND	10	ND	10	

E4SG1 and E4SG4

Pesticide compound	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
alpha-BHC	0.14	1	ND	1	
beta-BHC		1		1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)		1		1	
Heptachlor		1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1		1	
Endosulfan I	ND	1	ND	1	
Dieldrin	1.3	1	1.2	1	8
4,4'-DDE	3.4	1	3.4	1	0
Endrin		1	0.3	1	
Endosulfan II	0.28	1	0.3	1	6.9
4,4'-DDD	9.5	1	9.3	1	2.1
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	2.5	1		1	
Methoxychlor	1.4	1	1.5	1	6.9
Endrin ketone	ND	1	ND	1	
Endrin aldehyde		1		1	
alpha-Chlordane	0.83	1	0.89	1	7
gamma-Chlordane		1		1	
Toxaphene	ND	1	ND	1	

Results for beta-BHC, gamma-BHC(Lindane), Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDT, Endrin aldehyde, and gamma-Chlordane were rejected in one or both samples in field duplicate pairs E4SE1 and E4SE2DL and E4SG1 and E4SG4 for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

RPD values could not be calculated where one or both of the values was zero. For field duplicates E4SC1 and E4SC2, 4,4"-DDD had an RPD value above 50%. For field duplicates E4SE1 and E4SE2DL, gamma-BHC (Lindane) and 4,4'-DDE had RPD values above 50% . For field duplicates E4SG1 and E4SG4 all RPD values were below 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4SF0, E4SF0MS
Aldrin	E4SF0MS
beta-BHC	E4SD7
4,4'-DDT	E4SE2, E4SF0MS, E4SF0MSD, E4SG1, E4SG2
alpha-Chlordane	E4SE2, E4SE2DL, E4SF5, E4SG1
gamma-Chlordane	E4SC2, E4SD4, E4SE2, E4SF0, E4SF2
Gamma-BHC (Lindane)	E4SF0MS, E4SF0MSD, E4SF6
Dieldrin	E4SF2
Endrin	E4SD4, E4SD5, E4SF2
4,4'-DDD	E4SE2DL, E4SF2, E4SF5, E4SG0
4,4'-DDE	E4SD5, E4SF6, E4SG0, E4SG1
Heptachlor	E4SF7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

alpha-Chlordane	E4SG0
Endrin ketone	E4SF5DL
Dieldrin	E4SE2, E4SE2DL, E4SF3, E4SG1, E4SG4
Endrin	E4SE2DL
4,4'-DDD	E4SD5, E4SE2, E4SF3
4,4'-DDE	E4SE2, E4SE2DL, E4SG4
Endrin aldehyde	E4SF4
Heptachlor	E4SF5
Endosulfan I	E4SE2, E4SE2DL

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

alpha-BHC	E4SE2, E4SG1, E4SG2
beta-BHC	E4SC2, E4SF2, E4SF6, E4SF7, E4SF8, E4SG0, E4SG7
delta-BHC	E4SC2, E4SG2, E4SG3
Endosulfan II	E4SD4, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF6, E4SG0, E4SG1, E4SG4, E4SG4DL
4,4'-DDT	E4SF0, E4SF7, E4SG3
alpha-Chlordane	E4SD4
Endrin ketone	E4SD4, E4SF2, E4SF3
Gamma-BHC (Lindane)	E4SD4, E4SG1DL, E4SG4DL
Dieldrin	E4SG1DL, E4SG4DL
Endrin	E4SF0, E4SF4DL, E4SF6, E4SG1DL, E4SG4, E4SG4DL
Methoxychlor	E4SD4, E4SE2DL, E4SF2, E4SF4DL, E4SF5DL, E4SG0, E4SG1, E4SG4
4,4'-DDD	E4SC2, E4SD5DL, E4SD6
4,4'-DDE	E4SC2, E4SF7, E4SF8, E4SG3, E4SG7
Endrin aldehyde	E4SD4, E4SD5, E4SD6, E4SE2DL, E4SF0MS, E4SF0MSD, E4SF4DL, E4SF7, E4SG2, E4SG4DL, E4SG7
Heptachlor	E4SG1DL, E4SG3, E4SG4DL
Endosulfan I	E4SD4, E4SG1DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4SD4, E4SE2DL, E4SF2, E4SF3, E4SF5DL, E4SF6, E4SG0, E4SG1, E4SG1DL, E4SG4, E4SG4DL
beta-BHC	E4SF3, E4SF4, E4SG1, E4SG4
Endosulfan II	E4SF4, E4SF5
4,4'-DDT	E4SD4, E4SF2, E4SF3, E4SF5, E4SG0, E4SG1DL, E4SG4, E4SG4DL

gamma-Chlordane	E4SF5, E4SG1, E4SG4
Endrin ketone	E4SF5
Gamma-BHC (Lindane)	E4SE2DL, E4SF3, E4SF4, E4SF4DL, E4SF5, E4SF5DL, E4SG0, E4SG1, E4SG4
Endrin	E4SG1
Methoxychlor	E4SE2, E4SF4, E4SF5
4,4'-DDD	E4SF0
4,4'-DDE	E4SG1DL, E4SG2
Endrin aldehyde	E4SE2, E4SF3, E4SF6, E4SG0, E4SG1, E4SG4
Heptachlor	E4SF4, E4SF4DL, E4SF6, E4SG1, E4SG4
Endosulfan I	E4SF5, E4SF5DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples had reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The result from the diluted sample should be used for result validation.

E4SD5	4,4’-DDT
E4SE2	4,4’-DDT, gamma-chlordane
E4SF4, ES4F5	Heptachlor, 4,4’-DDE, 4,4’-DDD
E4SG1, E4SG4	4,4’-DDD

The following pesticide samples had reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. However, the analyte was undetected in the diluted reanalysis and flagged “U” by the laboratory. The dilution factor should have been less than 10 for this analyte; however, the other analyte in this sample with an “E” flag was diluted within the calibration range.

E4SE2	gamma-Chlordane

For gamma-chlordane, the result from the original analysis, E4SE2, should be used.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

A high surrogate recovery, greater than 200%, was obtained on only one column for samples E4SD4, E4SF0, E4SF0MSD, and E4SG4. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SD4, E4SF0, E4SF0MSD, E4SG4, the "J" flags applied during the automated check process have been removed for detected compounds.

A high surrogate recovery, which exceed 150% but are less than or equal to 200%, was obtained on only one column for samples E4SF0, E4SF0MS and E4SF2. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SF0, E4SF0MS and E4SF2, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor samples E4SE2, E4SF4, E4SF5, E4SG2, with dilution factors greater than 5 had surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

Aroclor samples E4SG1 and E4SG4DL, with dilution factors greater than five, had high surrogate recoveries, greater than 200%, on only one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SG1 and E4SG4DL, detected and non-detected compounds are not qualified.

Aroclor samples E4SE2, E4SF4, E4SF5, E4SG0, with dilution factors greater than 5 had surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Aroclor sample E4SF3, with a dilution factor greater than five had a high surrogate recovery, which exceed 150% but was less than or equal to 200% on only one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the

surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For sample E4SF3, detected and non-detected compounds are not qualified.

Aroclor sample E4SD5, with a dilution factor less than or equal to 5 had surrogate percent recoveries which exceed 150% but are less than or equal to 200%, and a surrogate recovery greater than 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SF0, the Aroclor MS and/or MSD samples have percent recoveries that are greater than the upper acceptance limit for Aroclor 1016 and less than the lower acceptance limit for Aroclor 1260 on the RTXCLP2 column. However, since the results of Aroclor 1016 and 1260 were reported from the RTXCLP column for all samples in this SDG, the data are not qualified. For samples E4SF0, E4SF0MS and E4SF90MSD, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor 1016 and 1260

On the other column, RTX-CLP, the relative percent difference (RPD) between the MS and MSD, recalculated using concentrations instead of recoveries in the RPD calculation, is within the acceptance limits for both Aroclor 1016 and 1260. For samples E4SF0, E4SF0MS and E4SF90MSD, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor 1016 and 1260

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1DL/E4SE2 and E4SG1/E4SG4DL were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Aroclor compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	4.4	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	

E4SE1DL and E4SE2

Aroclor compound	E4SE1DL µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Aroclor-1016	ND	1000	ND	100	
Aroclor-1221	ND	1000	ND	100	
Aroclor-1232	ND	1000	ND	100	
Aroclor-1242	ND	1000	ND	100	
Aroclor-1248	7100	1000	2200	100	110
Aroclor-1254	ND	1000	ND	100	
Aroclor-1260	ND	1000	ND	100	
Aroclor-1262	ND	1000	ND	100	

E4SG1 and E4SG4DL

Aroclor compound	E4SG1 µg/kg	DF	E4SG4DL µg/kg	DF	%RPD
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	130	10	190	10	38
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	

RPD values could not be calculated where one or both of the values were zero. For field duplicates E4SC1 and E4SC2, no RPD values were calculated. For field duplicates E4SE1 and E4SE2DL, Aroclor-1248 had an RPD value above 50%. For field duplicates E4SG1 and E4SG4 the RPD value calculated for Aroclor-1248 was below 50%.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4SF0MS
Aroclor-1248	E4SD6, E4SF3, E4SF7, E4SF8, E4SG7

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1016	E4SF0MS

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260	E4SD4, E4SF0
Aroclor-1016	E4SF0MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following sample reported concentration that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SG4	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Subject: **Revised Narrative Report**
Review of Data
Received for Review on: April 13, 2010

From: Julie Rest
Environmental Chemist, CSC

To: Data User: GLNPO

This data review narrative supersedes the narrative sent to you on June 24, 2010 for the review of data in SDG E4SC4. The changes made to the narrative include clarifications added to the Pesticide Additional Information section. These appear in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarifications. No sample results or review qualifiers have been changed based on these corrections.

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4SC4

Number and Type of Samples: 12 Sediment Samples

Sample Numbers: E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2 – E4SD4, E4SE6, E4SE9, E4SF1

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Receipt: Twelve (12) sediment samples labeled E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2 – E4SD4, E4SE6, E4SE9, and E4SF1 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All were collected on 3/4/2010 and were received on 3/6/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 7 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4SD2 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SC5and E4SC6 as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

For semivolatile sample E4SF1, the fourteen-day extraction holding time was exceeded by five days, due to poor deuterated monitoring compound (DMC) recoveries in the original analysis. All detected compounds are flagged "J". Nondetected compounds are flagged "UJ".

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening CCV percent difference (%D) outside criteria for fluoranthene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC5 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD2MS, E4SD2MSD, E4SD3, E4SE4, E4SE6, E4SE9

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4SC5 and E4SC6

Semivolatile compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	160	1	ND	1	
Fluorene	260	1	ND	1	

Semivolatile compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Phenanthrene	2100	1	500	1	120
Anthracene	690	1	90	1	150
Fluoranthene	3600	1	1600	1	77
Pyrene	3000	1	1300	1	79
Benzo(a)anthracene	1800	1	740	1	84
Chrysene	1400	1	790	1	56
Benzo(b)fluoranthene	2200	1	1200	1	59
Benzo(k)fluoranthene	650	1	440	1	39
Benzo(a)pyrene	1700	1	830	1	69
Indeno(1,2,3-cd)pyrene	950	1	550	1	53
Dibenzo(a,h)anthracene	200	1	120	1	50
Benzo(g,h,i)perylene	730	1	440	1	50

For field duplicates E4SC5 and E4SC6, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of benzo(k)fluoranthene, the RPD values were 50% or greater.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SC6, E4SC7
Pyrene	E4SF1
Benzo(g,h,i)perylene	E4SC4, E4SD2, E4SE9
Indeno(1,2,3-cd)pyrene	E4SE9
Benzo(b)fluoranthene	E4SD2, E4SD2MS, E4SD2MSD, E4SF1
Fluoranthene	E4SD2MS, E4SD2MSD, E4SF1
Benzo(k)fluoranthene	E4SC4, E4SE9
Chrysene	E4SD2, E4SE9

Benzo(a)pyrene	E4SD2, E4SD2MS, E4SE9
Dibenzo (a,h) anthracene	E4SC5DL, E4SC6, E4SC7, E4SD0, E4SE6DL
Benzo (a) anthracene	E4SD2, E4SE9
Acenaphthene	E4SC5, E4SC5DL, E4SC7, E4SD0
Phenanthrene	E4SC4, E4SE9, E4SF1
Fluorene	E4SC5DL, E4SD0
Naphthalene	E4SE6
2-Methylnaphthalene	E4SE6

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SC5 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene and Pyrene; and sample E4SE6 reported concentrations that exceeded the calibrated range of the instrument for Benzo(b)fluoranthene, Fluoranthene, Phenanthrene and Pyrene. These results were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted samples E4SC5 and E4SE6 should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

For semivolatile-SIM sample E4SF1, the fourteen-day extraction holding time was exceeded by five days, due to poor deuterated monitoring compound (DMC) recoveries in the original analysis. All detected compounds are flagged "J". Nondetected compounds are flagged "UJ".

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene was not recovered in the MSD prepared for sample E4SD2 and was recovered below criteria in the MS. All sample results for Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SC5 and E4SC6 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4SC5 and E4SC6

Semivolatile-SIM compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	100	10	22	10	130
Fluorene	140	10	22	10	150
Phenanthrene	1200	10	290	10	120
Anthracene	400	10	62	10	150
Fluoranthene	2200	10	900	10	84

Semivolatile-SIM compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Pyrene	1700	10	780	10	74
Benzo(a)anthracene	1100	10	470	10	80
Chrysene	960	10	480	10	67
Benzo(b)fluoranthene	1500	10	710	10	72
Benzo(k)fluoranthene	420	10	200	10	71
Benzo(a)pyrene	1100	10	500	10	75
Indeno(1,2,3-cd)pyrene	820	10	410	10	67
Dibenzo(a,h)anthracene	160	10	78	10	69
Benzo(g,h,i)perylene	640	10	340	10	61

For field duplicates E4SC5 and E4SC6, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all compounds had RPD values above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SE4, E4SE6, E4SE9, and E4SF1 was performed using a 10-fold dilution.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SC4, E4SD2, E4SE4, E4SE9, E4SF1
Benzo(g,h,i)perylene	E4SD2MS, E4SD2MSD
Indeno(1,2,3-cd)pyrene	E4SD2MS, E4SD2MSD, E4SD3
Benzo(k)fluoranthene	E4SD2, E4SD2MS, E4SD2MSD, E4SD3, E4SE9, E4SF1
Acenaphthylene	E4SC7, E4SD0, E4SE6
Chrysene	E4SD2MS, E4SD2MSD, E4SF1
Benzo(a)pyrene	E4SD2MS, E4SD2MSD, E4SD3
Dibenzo(a,h)anthracene	E4SC4, E4SD2, E4SE9, E4SF1
Benzo(a)anthracene	E4SD2MS, E4SD2MSD, E4SD3, E4SF1

Acenaphthene	E4SC6, E4SC9, E4SD2MS
Phenanthrene	E4SD2MS, E4SD2MSD, E4SD3
Fluorene	E4SC6, E4SC7, E4SC9, E4SE4

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J".

Acenaphthene	E4SE6
Anthracene	E4SC5, E4SC6
Benzo(a)anthracene	E4SC5 – E4SC7, E4SD0, E4SE6
Benzo(a)pyrene	E4SC5 – E4SC7, E4SD0, E4SE6
Benzo(b)fluoranthene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6
Benzo(g,h,i)perylene	E4SC5, E4SC7, E4SD0, E4SE6
Benzo(k)fluoranthene	E4SC5, E4SE6
Chrysene	E4SC5 – E4SC7, E4SD0, E4SE6
Fluoranthene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6
Fluorene	E4SE6
Indeno(1,2,3-cd)pyrene	E4SC5 – E4SC7, E4SD0, E4SE6
Phenanthrene	E4SC5, E4SD0, E4SE6
Pyrene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a surrogate compound is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SD2MS, E4SD2MSD, E4SD3, E4SE4, E4SE6, E4SE6DL, E4SE9, E4SF1

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD3, E4SE4, E4SE6, E4SE9, E4SF1

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the target compounds Endosulfan sulfate, Endosulfan II, 4,4'-DDT, Endrin ketone, Endrin, Methoxychlor, 4,4'-DDD, 4,4'-DDE, and Endrin aldehyde. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD3, E4SE4, E4SE6, E4SE9, E4SF1

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4SC5, E4SC5DL, E4SC7, E4SC9, E4SD0, E4SE6DL
4,4'-DDT	E4SD3
Methoxychlor	E4SC4, E4SC5DL, E4SC9, E4SD2, E4SD2MS, E4SD2MSD, E4SE6DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery.

However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4SC6, E4SD0, E4SE6, and E4SF1. The high recovery likely indicates a coelution or matrix interference

on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted pesticide sample E4SE6DL, with a dilution factor greater than 5 had a surrogate percent recovery greater than 200%, and a surrogate percent recovery that was less than 10%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pesticide MSD sample E4SD2 had a percent recovery greater than the upper acceptance limit on RTX-CLP2 column for gamma-BHC and Heptachlor, and the MS had a percent recovery greater than the acceptance limit for Heptachlor. Also, the relative percent difference (RPD) between the MS and MSD exceeded criteria for Aldrin on the RTX-CLP2 column and for gamma-BHC on the RTX-CLP column. All samples are affected. Detected results for gamma-BHC are qualified "J" in all samples. Detected results for Heptachlor and Aldrin are qualified "J" in samples reported from the RTX-CLP column. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

Results for Endosulfan I, 4,4'-DDE, Endosulfan II, Endrin, and 4,4'-DDD, were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs

E4SC5 and E4SC6

Pesticide compound	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	4.9	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	1.5	1		1	
Dieldrin	ND	1	3.1	1	
4,4'-DDE		1		1	
Endrin		1		1	
Endosulfan II	0.36	1		1	
4,4'-DDD		1		1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	9.8	1	3.7	1	90

Pesticide compound	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Methoxychlor	3.9	1	3.5	1	11
Endrin ketone	0.36	1	ND	1	
Endrin aldehyde	2.1	1	3.1	1	39
alpha-Chlordane		1	0.4	1	
gamma-Chlordane	6.2	1	3.6	1	53
Toxaphene	ND	1	ND	1	

For field duplicate samples E4SC5and E4SC6, where calculated, RPD values were less than 50 %, with the exception of 4,4'-DDT and gamma chlordane.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDT	E4SC6, E4SD2MSD, E4SE9
alpha-chlordane	E4SC6, E4SC7, E4SC9, E4SE6
gamma-chlordane	E4SC4, E4SD0, E4SE6, E4SF1
gamma-BHC(Lindane)	E4SC5DL
Dieldrin	E4SD2MS, E4SD2MSD
Methoxychlor	E4SE9
4,4'-DDD	E4SC7, E4SD2
4,4'-DDE	E4SD2MSD, E4SF1, PLCSS1
Endrin aldehyde	E4SC7
Heptachlor	E4SD2MS

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Aldrin	E4SD2MSD

4,4'-DDT	E4SC4, E4SE4, E4SF1
gamma-Chlordane	E4SC5, E4SC7, E4SD2MS
gamma-BHC(Lindane)	E4SD2MS
Endrin	E4SE6
Methoxychlor	E4SC5, E4SC6, E4SC7, E4SD0, E4SE6, E4SF1
4,4'-DDD	E4SD0, E4SD2MS, E4SD2MSD, E4SE6, E4SE6DL
4,4'-DDE	E4SC7, E4SC9, E4SD2MS, E4SE4, E4SE9
Endrin aldehyde	E4SC5, E4SC6
Heptachlor	E4SD2MSD
Endosulfan I	E4SC5, E4SC5DL
Heptachlor epoxide	E4SF1

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified “U” and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4SD2, E4SD3, E4SE9
Endosulfan sulfate	E4SE9
alpha-BHC	E4SC9
beta-BHC	E4SD3
Endosulfan II	E4SC5, E4SC5DL, E4SC7, E4SC9, E4SD0, E4SE6DL
4,4'-DDT	E4SD3
alpha-Chlordane	E4SD2, E4SD2MS, E4SD2MSD, E4SE9, E4SF1
Endrin ketone	E4SC5, E4SC7, E4SC9, E4SD0, E4SE6, E4SE9
Dieldrin	E4SE9
Endrin	E4SC5DL, E4SC7, E4SC9, E4SD0, E4SD2, E4SE6DL, E4SF1
Methoxychlor	E4SC4, E4SC5DL, E4SC9, E4SD2, E4SD2MSD, E4SE6DL
Endrin aldehyde	E4SD0, E4SD2MS, E4SD2MSD, E4SE6DL, E4SE9
Heptachlor	E4SF1

Endosulfan I	E4SC4, E4SD0, E4SD2, E4SD2MS, E4SD2MSD

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4SC4, E4SC9, E4SD2MS, E4SD2MSD, E4SE6DL
alpha-BHC	E4SE4
beta-BHC	E4SC9, E4SE4
Endosulfan II	E4SC6, E4SE6
4,4'-DDT	E4SC9, E4SD2
alpha-Chlordane	E4SC5
Gamma-BHC(Lindane)	E4SE6DL
Endrin	E4SC5, E4SC6, E4SE4
Methoxychlor	E4SE4
4,4'-DDD	E4SC4, E4SC5, E4SC6, E4SC9, E4SF1
4,4'-DDE	E4SC4, E4SC5, E4SC6, E4SE6, E4SE6DL
Endrin aldehyde	E4SC5DL
Heptachlor	E4SC4
Endosulfan I	E4SC6

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where provided, the results from the diluted samples should be used for result validation.

4,4'-DDT	E4SC5, E4SE6
4,4'-DDD	E4SE6
gamma-BHC (Lindane)	**E4SC5**

Pesticide sample E4SE6 had an R-flagged result for 4,4'-DDE in both the neat analysis and the dilution. Consequently, no result is available for 4,4'-DDE for this sample. The "reportable result" in the EDD remains the result reported from the neat analysis.

The results for gamma-Chlordane in Pesticide samples E4SC5 and E4SE6 exceeded the calibration range in the neat analysis and were reported as non-detects in the dilutions. The qualified results from the neat analyses should be used for result validation.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of the original analysis of samples E4SC5, E4SC6 and E4SE6, which have ten-fold dilutions; and diluted samples E4SC5DL – E4SC7DL, and E4SE6DL, which have 100-fold dilutions. None of the samples are qualified based on surrogate recovery.

However, a ten-fold dilution was used for the original analysis of Aroclor samples E4SC5, E4SC6, and E4SE6. Due to the dilution, detected and nondetected results are not qualified.

Aroclor samples E4SC5DL – E4SC7DL, E4SE4DL, and E4SE6DL with 100-fold dilutions have multiple surrogate failures. Detected and nondetected compounds are not qualified.

A surrogate recovery between 150 – 200 % was obtained on only one column for sample E4SE4. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4SD2, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260. All samples are affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SC5 and E4SC6

Aroclor compounds	**E4SC5 µg/kg**	**DF**	**E4SC6 µg/kg**	**DF**	**%RPD**
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	890	10	1400	10	44
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	
Aroclor-1268	ND	10	ND	10	

E4SC5DL and E4SC6DL

Aroclor compounds	**E4SC5DL µg/kg**	**DF**	**E4SC6DL µg/kg**	**DF**	**%RPD**
Aroclor-1016	ND	100	ND	100	
Aroclor-1221	ND	100	ND	100	
Aroclor-1232	ND	100	ND	100	
Aroclor-1242	ND	100	ND	100	
Aroclor-1248	290	100	240	100	19
Aroclor-1254	ND	100	ND	100	
Aroclor-1260	ND	100	ND	100	
Aroclor-1262	ND	100	ND	100	
Aroclor-1268	ND	100	ND	100	

For the neat and diluted analysis of field duplicate samples E4SC5 and E4SC6, RPD values were not calculated when both values were nondetects. The RPD for Aroclor-1248 was below 50%.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4SD2MS, E4SD2MSD, E4SE4, E4SE4DL

Aroclor-1016 E4SD2MS, E4SD2MSD, E4SE4, E4SE4DL

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1248 E4SC4

The following Aroclor samples had percent differences between analyte results exceeding 100% for Aroclor-1260. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1260 E4SE4, E4SE9, E4SF1

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4SC5 – E4SC7, E4SE6	Aroclor-1248
E4SE4	Aroclor-1016

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Introduction: Three coolers containing twenty (20) sediment samples, labeled E4SG8, E4SG9, E4SH0-E4SH3, E4SK0-E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2 and E4SM4 were shipped to KAP Technologies, Inc. located in The Woodlands, Texas. The samples were collected on 04/14/2010 and 04/15/2010 and were received at the laboratory on 04/15/2010 and 04/16/2010 intact at 4.1, 2.6, and 3.3 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The Form 1 for semivolatile SIM analysis of sample E4SK9DL (page 1547) is missing from the data package. The quantitation report, chromatogram and spectral information were provided. The results for this sample are reported in both the spreadsheet and superset EDD.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4SG9 and E4SH0 are field duplicates. There are no field blanks associated with this SDG. No sample was designated for laboratory QC, i.e. MS/MSD. Sample E4SK9 was selected as the laboratory QC sample.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Sample E4SK9DL is associated with an initial calibration percent relative standard deviation (%RSD) for Pentachlorophenol outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

The following semivolatile samples are associated with a % difference between the continuing calibration response factor and the initial calibration that exceeds criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. The relative response factor (RRF) for 4- Methyl phenol was greater in the continuing calibration than in the initial calibration, therefore the automated UJ flag affixed for nondetected 4-Methylphenol was overridden because the compound would have been detected if present.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1, E4SK1DL, E4SK1RE, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SMS

2,4-Dimethylphenol	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3
4-Methylphenol	E4SH3DL, E4SK1DL, E4SK1RE
4-Chloro-3-methylphenol	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3
Pentachlorophenol	E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
2-Methylnaphthalene	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1, E4SK1DL, E4SK1RE, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Nitrobenzene-d_5 E4SK1, E4SK1RE
Affected compounds: 2,4-Dinitrotoluene, 2,6-Dinitrotoluene, Acetophenone, Hexachloroethane, N-Nitroso-di-n-propylamine, N-Nitrosodiphenylamine, Nitrobenzene

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10} E4SG8, E4SH3, E4SK0, E4SK5, E4SK9, E4SM2, E4SM4
Affected compounds: Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

Dimethylphthalate-d_6 E4SK1
Affected compounds: 1,1'-Biphenyl, bis(2-Ethylhexyl)phthalate, Butylbenzylphthalate, Caprolactam, Di-n-butylphthalate, Di-n-octylphthalate, Diethylphthalate, Dimethylphthalate

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The percent recovery of 4-Nitrophenol exceeded the upper criterion in sample E4SK9MSD. Detected and nondetected compounds are not qualified.

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified. The automated NFG report mistakenly reported N-Nitroso-di-n-propylamine as an outlier when it was within limits. The J flag was removed for this compound.

E4SK9, E4SK9MS, E4SK9MSD Pyrene, Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Benzaldehyde	ND	ND	
Phenol	ND	ND	
bis(2-chloroethyl)ether	ND	ND	
2-Chlorophenol	ND	ND	
2-Methylphenol	ND	ND	
2,2'-Oxybis(1-chloropropane)	ND	ND	
Acetophenone	ND	ND	
4-Methylphenol	ND	ND	
N-Nitroso-di-n-propylamine	ND	ND	

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Hexachloroethane	ND	ND	
Nitrobenzene	ND	ND	
Isophorone	ND	ND	
2-Nitrophenol	ND	ND	
Bis(2-chloroethoxy)methane	ND	ND	
2,4-Dichlorophenol	ND	ND	
Naphthalene	ND	ND	
4-Chloroaniline	ND	ND	
2,4-Dimethylphenol	ND	ND	
Hexachlorobutadiene	ND	ND	
Caprolactam	ND	ND	
4-Chloro-3-methylphenol	ND	ND	
2-Methylnaphthalene	ND	ND	
Hexachlorocyclopentadiene	ND	ND	
2,4,6-Trichlorophenol	ND	ND	
2,4,5-Trichlorophenol	ND	ND	
1,1'-Biphenyl	ND	ND	
2-Chloronaphthalene	ND	ND	
2-Nitroaniline	ND	ND	
Dimethylphthalate	ND	ND	
2,6-Dinitrotoluene	ND	ND	
Acenaphthylene	ND	ND	
3-Nitroaniline	ND	ND	
Acenaphthene	ND	ND	
2,4-Dinitrophenol	ND	ND	
4-Nitrophenol	ND	ND	
Dibenzofuran	ND	ND	
2,4-Dinitrotoluene	ND	ND	
Diethylphthalate	ND	ND	
Fluorene	ND	ND	
4-Chlorophenyl-phenylether	ND	ND	
4-Nitroaniline	ND	ND	
4,6-Dinitro-2-methylphenol	ND	ND	
N-Nitrosodiphenylamine	ND	ND	
1,2,4,5-Tetrachlorobenzene	ND	ND	
4-Bromophenyl-phenylether	ND	ND	
Hexachlorobenzene	ND	ND	
Atrazine	ND	ND	
Pentachlorophenol	ND	ND	
Phenanthrene	150	280	60.5
Anthracene	ND	ND	
Carbazole	ND	ND	
Di-n-butylphthalate	140	190	30.3

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Fluoranthene	350	600	52.6
Pyrene	230	360	44.1
Butylbenzylphthalate	ND	ND	
3,3'-Dichlorobenzidine	ND	ND	
Benzo(a)anthracene	150	200	28.6
Chrysene	190	250	27.3
Bis(2-ethylhexyl)phthalate	ND	ND	
Di-n-octylphthalate	ND	ND	
Benzo(b)fluoranthene	130	270	70
Benzo(k)fluoranthene	150	210	33.3
Benzo(a)pyrene	150	210	33.3
Indeno(1,2,3-cd)pyrene	110	170	42.9
Dibenzo(a,h)anthracene	ND	ND	
Benzo(g,h,i)perylene	140	190	30.3
2,3,4,6-Tetrachlorophenol	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, were less than 50 percent, with the exceptions of Phenanthrene and Fluoranthene, the RPD values.

7. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Perylene-d_{12} E4SK1, E4SK1RE
Affected compounds: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SK1, E4SK1RE
Affected compounds: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ehtykhexyl)phthalate, Chrysene

8. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

9. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1DL, E4SK2, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8

4-Methylphenol E4SH1
bis (2-Ethylhexyl) phthalate E4SK8, E4SK9, E4SK9MS, E4SK9MSD

Anthracene	E4SK0, E4SK5, E4SK9DL
Pyrene	E4SH1, E4SL6, E4SL8
Dibenzofuran	E4SH3DL, E4SK1DL
Benzo(g,h,i)perylene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK6, E4SL6, E4SL8
Indeno(1,2,3-cd)pyrene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK6, E4SL6, E4SL8
Benzo(b)fluoranthene	E4SG8, E4SG9, E4SH2, E4SK1DL, E4SL6, E4SL8
Fluoranthene	E4SH1
Benzo(k)fluoranthene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK1DL, E4SL6, E4SL8
Acenaphthylene	E4SH3
Chrysene	E4SG9, E4SH2, E4SL6, E4SL8
Benzo(a)pyrene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK1DL, E4SL6, E4SL8
Dibenzo(a,h)anthracene	E4SH3DL, E4SK5, E4SK8, E4SK9DL, E4SL5
Benzo(a)anthracene	E4SG9, E4SH0, E4SH2, E4SL6, E4SL8
Acenaphthene	E4SH3DL, E4SK0, E4SK9DL
Di-n-butylphthalate	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SK0, E4SK2
Phenanthrene	E4SG8, E4SG9, E4SH2, E4SK6, E4SL6, E4SL8
Fluorene	E4SH3DL, E4SK0, E4SK9DL
9H-Carbazole	E4SK9DL
Naphthalene	E4SK0
2-Methylnaphthalene	E4SK9
1,1'-Biphenyl	E4SH3, E4SK9MS

10. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

11. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SH3	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1	Naphthalene, 2-Methylnaphthalene, 1,1’-Biphenyl, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1RE	Naphthalene, 2-Methylnaphthalene, 1,1’-Biphenyl, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene
E4SK9	Phenanthrene, Fluoranthene, Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(g,h,i)perylene

E4SG8DL, E4SG9DL, E4SH0DL, E4SH1DL, E4SH2DL, E4SH3DL, E4SK0DL, E4SK1DL, E4SK4DL, E4SK5DL, E4SK6DL, E4SK8DL, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5DL, E4SL6DL, E4SL8DL, E4SM2DL, E4SM4DL

Pentachlorophenol

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with an initial calibration with average relative response factors (mean RRFs) below the minimum required RRF for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with a % difference between the continuing calibration response factor and the initial calibration that exceeds criteria. The relative response factor (RRF) for Dibenzo(a,h)anthracene was greater in the continuing calibration than in the initial calibration, therefore the automated UJ flag affixed for nondetected Dibenzo(a,h)anthracene was overridden as the compound would have been detected if present.

E4SH3DL, E4SH3RE, E4SH3RX, E4SK0, E4SK0DL, E4SK1, E4SK1DL, E4SK4, E4SK4DL, E4SK5, E4SK5DL, E4SK6, E4SK6DL, E4SK8, E4SK8DL, E4SK9, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4, E4SM4DL, SBLK21

Benzo(g,h,i)perylene	E4SH3DL, E4SK0DL, E4SK1DL, E4SK4DL, E4SK6DL, E4SK8DL, E4SK9DL
Benzo(b)fluoranthene	E4SK5DL, E4SK9MS, E4SK9MSD, E4SM4DL

Benzo(k)fluoranthene	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
Dibenzo(a,h)anthracene	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
Pentachlorophenol	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) below the minimum required RRF for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Fluoranthene-d_{10} E4SH3, E4SH3RE, E4SH3RX
Affected compounds: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

The following diluted semivolatile samples with dilution factors greater than 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

2-Methylnaphthalene-d_{10} E4SM2DL
Affected compounds: 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene, Naphthalene, Pentachlorophenol, Phenanthrene

Fluoranthene-d_{10} E4SH3DL, E4SK1DL, E4SM2DL
Affected compounds: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The semivolatile-SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit for all three spiked compounds. Detected compounds are qualified J. Nondetected compounds are not qualified. Because the spiking level was inappropriately low in comparison to the native levels of Acenaphthene and Pyrene present in the samples, no other samples were qualified based on the MS/MSD failure.

E4SK9, E4SK9MS, E4SK9MSD Acenaphthene, Pentachlorophenol, Pyrene

The relative percent difference (RPD) between the following semivolatile-SIM matrix spike and matrix spike duplicate recoveries is outside criteria for all three spiked compounds. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SK9, E4SK9MS, E4SK9MSD Acenaphthene, Pentachlorophenol, Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following tables, original analyses and diluted analyses. Results for Pentachlorophenol were rejected in one or both samples in this field duplicate pair for reasons detailed elsewhere in this review. Therefore, those values were not used to calculate RPDs. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Naphthalene	ND	12	
2-Methylnaphthalene	ND	4.3	
Acenaphthylene	4.6	ND	
Acenaphthene	10	29	97.4
Fluorene	12	30	85.7
Phenanthrene	170	320	61.2
Anthracene	39	63	47.1
Fluoranthene	490	720	38
Pyrene	370	560	40.9
Benzo(a)anthracene	220	340	42.9
Chrysene	240	350	37.3
Benzo(b)fluoranthene	120	180	40
Benzo(k)fluoranthene	73	110	40.4
Benzo(a)pyrene	100	160	46.2
Indeno(1,2,3-cd)pyrene	78	110	34
Dibenzo(a,h)anthracene	36	52	36.4
Benzo(g,h,i)perylene	84	120	35.3
Pentachlorophenol			

Semivolatile Analyte	E4SG9DL (ug/kg)	E4SH0DL (ug/kg)	%RPD
Naphthalene	ND	ND	
2-Methylnaphthalene	ND	ND	
Acenaphthylene	ND	ND	

Semivolatile Analyte	E4SG9DL (ug/kg)	E4SH0DL (ug/kg)	%RPD
Acenaphthene	ND	ND	
Fluorene	ND	ND	
Phenanthrene	220	400	58.1
Anthracene	70	100	35.3
Fluoranthene	510	720	34.1
Pyrene	370	550	39.1
Benzo(a)anthracene	170	260	41.9
Chrysene	230	320	32.7
Benzo(b)fluoranthene	130	200	42.4
Benzo(k)fluoranthene	130	190	37.5
Benzo(a)pyrene	130	180	32.3
Indeno(1,2,3-cd)pyrene	83	110	28
Dibenzo(a,h)anthracene	53	49	7.8
Benzo(g,h,i)perylene	96	130	30.1
Pentachlorophenol	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples the RPD values were less than 50 percent, with the exception of Acenaphthene, Fluorene and Phenanthrene in the undiluted analysis and Phenanthrene in the diluted analysis.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SH3, E4SH3RE, E4SH3RX, E4SK1, E4SK3, SBLK19

Acenaphthene-d_{10} E4SH3, E4SK1
Affected compounds: Acenaphthylene, Acenaphthene, Fluorene

Perylene-d_{12} E4SH3, E4SH3RE, E4SH3RX, E4SK3
Affected compounds: Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SH3
Affected compounds: Pyrene, Benzo(a)anthracene, Chrysene

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SH2, E4SK3, E4SK4, E4SL6, E4SM2DL, E4SM4, E4SM4DL

Anthracene	E4SK4
Benzo(b)Fluoranthene	E4SM4DL
Benzo(k)fluoranthene	E4SM4DL
Chrysene	E4SM2DL
Dibenzo(a,h)anthracene	E4SK3
Fluorene	E4SM4
Naphthalene	E4SH2
2-Methylnaphthalene	E4SL6

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SG8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SG9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SH0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SH2	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH3	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH3RE	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

E4SH3RX	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK0	Naphthalene, 2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1	Naphthalene, 2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK4	Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4SK5	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK8	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK9	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL5	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM2	Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4SM4	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4SG8DL	Fluoranthene
E4SG9DL	Fluoranthene
E4SH0DL	Fluoranthene, Pyrene
E4SH2DL	Fluoranthene
E4SH3DL	Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene
E4SK0DL	Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Phenanthrene, Pyrene,
E4SK1DL	2-Methylnaphthalene, Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Naphthalene, Phenanthrene, Pyrene
E4SK5DL	Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene
E4SK6DL	Fluoranthene
E4SK8DL	Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Phenanthrene, Pyrene
E4SK9DL	Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene
E4SL5DL	Fluoranthene, Pyrene
E4SL6 DL	Fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SH3 had Tetrachloro-m-xylene surrogate percent recovery on one column equal to the upper limit of 150%. The NFG automated report stated the surrogate as being greater than 150% but less than or equal to 200%. No data was qualified for surrogate recovery.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Pesticide Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
alpha-BHC	ND	ND	
beta-BHC	ND	ND	
delta-BHC	ND	ND	
gamma-BHC (Lindane)	ND	ND	
Heptachlor	ND	ND	
Aldrin	ND	ND	
Heptachlor epoxide	ND	ND	
Endosulfan I	ND	ND	
Dieldrin	ND	ND	

Pesticide Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
4,4'-DDE	ND	ND	
Endrin	ND	ND	
Endosulfan II	ND	ND	
4,4'-DDD	ND	ND	
Endosulfan sulfate	ND	ND	
4,4'-DDT	1.7	0.82	69.8
Methoxychlor	ND	ND	
Endrin ketone	ND	ND	
Endrin aldehyde	ND	ND	
alpha-Chlordane	ND	ND	
gamma-Chlordane	ND	ND	
Toxaphene	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected.

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide sample has percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

alpha-Chlordane E4SL6

11. SYSTEM PERFORMANCE

No problems were found.

12. ADDITIONAL INFORMATION

For reasons that could not be determined, the NFG automated flagging report flagged 4,4-DDE in the following samples U as not detected at the stated concentration. These compounds are present. The NFG flag was overridden in the spreadsheet and superset EDD.

E4SK5, E4SK8

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SK9, E4SK9MS, E4SK9MSD Aroclor-1016

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified. NFG automated flags were overridden for Aroclor-1260 as the spike recovery was equal to, not greater than, the upper limit.

E4SK9, E4SK9MS, E4SK9MSD Aroclor-1260, Aroclor-1016

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Aroclor Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	

Aroclor Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	ND	
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	ND	
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SM4 Aroclor-1248

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4SK1, E4SK5, E4SK6, E4SK8, E4SK8DL, E4SK9MS Aroclor-1248

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4SK0, E4SL5 Aroclor-1248

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4SL5	Aroclor-1254
E4SM4	Aroclor-1248

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

E4SK8, E4SK8DL, E4SK9, E4SK9MS, E4SK9MSD Aroclor-1254

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Sample E4SK8 reported concentration of Aroclor-1248 that exceeded the calibration range of the instrument and was flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Receipt: Twenty (20) sediment samples, labeled E4SH4 – E4SH9, E4SJ0 – E4SJ9, and E4SL0 – E4SL3, were shipped to KAP Technologies, Inc., in The Woodlands, Texas. Samples E4SH4 – E4SH9, and E4SJ0 – E4SJ9 were collected on 4/14/2010 and were received on 4/16/2010. Samples E4SL0 – E4SL3 were collected on 4/15/2010 and were received on 4/16/2010. The cooler temperatures on receipt were 4.2 ºC and at 2.9 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

No QC sample was designated on the traffic reports for this SDG. Sample E4SH9 was used for laboratory QC, i.e., MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SL2 and E4SL3 as a field duplicate pair.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

2,4-Dimethylphenol	E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ4, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL0RE, E4SL1, E4SL1RE, E4SL2, E4SL3
4-Chloro-3-methylphenol	E4SJ9DL, E4SL0DL, E4SL0RE, E4SL1RE
Pentachlorophenol	E4SH4, E4SH5, E4SH6, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3
2-Methylnaphthalene	E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ4, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL0RE, E4SL1, E4SL1RE, E4SL2, E4SL3

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene	E4SJ8, E4SJ9, E4SL2, E4SJ9DL

The following semivolatile sample has a deuterated monitoring compound recovery for 4-Nitrophenol-d_4 below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

2,4-Dinitrophenol, 2-Nitroaniline, 3-Nitroaniline, 4-Nitroaniline, 4-Nitrophenol	E4SH9

Semivolatile sample E4SJ9DL, with a dilution factor less than or equal to five, had a deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4SL2 and E4SL3

Semivolatile compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1	
Bis(2-chloroethyl)ether	ND	1	ND	1	
2-Chlorophenol	ND	1	ND	1	
2-Methylphenol	ND	1	ND	1	
2,2'-Oxybis(1-chloropropane)	ND	1	ND	1	
Acetophenone	ND	1	ND	1	
4-Methylphenol	ND	1	ND	1	
N-Nitroso-di-n-propylamine	ND	1	ND	1	
Hexachloroethane	ND	1	ND	1	
Nitrobenzene	ND	1	ND	1	
Isophorone	ND	1	ND	1	
2-Nitrophenol	ND	1	ND	1	
Bis(2-chloroethoxy)methane	ND	1	ND	1	
2,4-Dichlorophenol	ND	1	ND	1	
Naphthalene	ND	1	ND	1	
4-Chloroaniline	ND	1	ND	1	
2,4-Dimethylphenol	ND	1	ND	1	
Hexachlorobutadiene	ND	1	ND	1	
Caprolactam	ND	1	ND	1	
4-Chloro-3-methylphenol	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Hexachlorocyclopentadiene	ND	1	ND	1	
2,4,6-Trichlorophenol	ND	1	ND	1	
2,4,5-Trichlorophenol	ND	1	ND	1	
1,1'-Biphenyl	ND	1	ND	1	
2-Chloronaphthalene	ND	1	ND	1	
2-Nitroaniline	ND	1	ND	1	
Dimethylphthalate	ND	1	ND	1	

Semivolatile compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
2,6-Dinitrotoluene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
3-Nitroaniline	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
2,4-Dinitrophenol	ND	1	ND	1	
4-Nitrophenol	ND	1	ND	1	
Dibenzofuran	ND	1	ND	1	
2,4-Dinitrotoluene	ND	1	ND	1	
Diethylphthalate	ND	1	ND	1	
Fluorene	ND	1	ND	1	
4-Chlorophenyl-phenylether	ND	1	ND	1	
4-Nitroaniline	ND	1	ND	1	
4,6-Dinitro-2-methylphenol	ND	1	ND	1	
N-Nitrosodiphenylamine	ND	1	ND	1	
1,2,4,5-Tetrachlorobenzene	ND	1	ND	1	
4-Bromophenyl-phenylether	ND	1	ND	1	
Hexachlorobenzene	ND	1	ND	1	
Atrazine	ND	1	ND	1	
Pentachlorophenol	ND	1	ND	1	
Phenanthrene	230	1	190	1	19
Anthracene	ND	1	ND	1	
Carbazole	ND	1	ND	1	
Di-n-butylphthalate	230	1	230	1	0
Fluoranthene	460	1	380	1	19
Pyrene	320	1	270	1	17
Butylbenzylphthalate	ND	1	ND	1	
3,3'-Dichlorobenzidine	ND	1	ND	1	
Benzo(a)anthracene	230	1	170	1	30
Chrysene	250	1	220	1	13
Bis(2-ethylhexyl)phthalate	240	1	97	1	85
Di-n-octylphthalate	ND	1	ND	1	
Benzo(b)fluoranthene	210	1	210	1	0
Benzo(k)fluoranthene	190	1	170	1	11
Benzo(a)pyrene	210	1	200	1	4.9
Indeno(1,2,3-cd)pyrene	140	1	130	1	7.4
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	150	1	150	1	0
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SL2 and E4SL3, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Bis(2-ethylhexyl)phthalate, the RPD values were less than 50 percent.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J for the affected compounds. Nondetected compounds are not qualified.

Perylene-d_{12} E4SL0, E4SL0RE, E4SL1, E4SL1RE

Affected analytes: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SL0, E4SL1

Affected analytes: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ethylhexyl)phthalate, Chrysene

As described above, the original semivolatile analysis for samples E4SL0 and E4SL1 had internal standard area counts for Chrysene-d_{12} and Perylene-d_{12} that were above the upper criteria limit. The samples were subsequently reanalyzed by the laboratory as samples E4SL0RE and E4SL1RE. For both E4SL0 and E4SL1, the reanalysis had area counts above the upper criteria limit only for Perylene-d_{12}. Since the target compound results compare favorably between the original analysis and the reanalysis for both samples, the results from the reanalyses should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Target compound Benzo(a)pyrene had a concentration below the MDL for sample E4SJ0. The sample result is qualified "U" and reported at the CRQL.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

Bis(2-Ethylhexyl)phthalate	E4SH6, E4SH6DL, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ9DL, E4SL0DL, E4SL3
Anthracene	E4SH6DL, E4SJ1, E4SJ2, E4SL0DL
Pyrene	E4SH4, E4SH7, E4SH9, E4SJ0
Dibenzofuran	E4SL0, E4SL0RE
Benzo(g,h,i)perylene	E4SH5, E4SH7, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL0DL, E4SL2, E4SL3
Indeno(1,2,3-cd)pyrene	E4SH5, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL0DL, E4SL2, E4SL3

Benzo(b)fluoranthene	E4SH4, E4SH5, E4SH9MS, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SL3
Fluoranthene	E4SH4, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0
Benzo(k)fluoranthene	E4SH5, E4SH7, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL2, E4SL3
Chrysene	E4SH4, E4SH5, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ3, E4SJ4, E4SJ5
Benzo(a)pyrene	E4SH5, E4SH7, E4SJ3, E4SJ4, E4SJ5, E4SL3
Dibenzo(a,h)anthracene	E4SH6DL, E4SJ1, E4SJ2, E4SJ9DL, E4SL1RE
Benzo(a)anthracene	E4SH5, E4SH7, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SL3
Acenaphthene	E4SH6, E4SH6DL
Di-n-butylphthalate	E4SH4, E4SH5, E4SH6DL, E4SH7, E4SH8, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SL0, E4SL0RE, E4SL1, E4SL1RE
Phenanthrene	E4SJ0, E4SJ3, E4SJ5, E4SJ8, E4SL3
Fluorene	E4SH6DL, E4SL0DL, E4SL1, E4SL1RE
9H-Carbazole	E4SH6, E4SH6DL

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted samples should be used for result validation. Note that for sample E4SL0RE, the results from the dilution of the original analysis should be used for result validation.

Anthracene	E4SJ9
Benzo(a)anthracene	E4SJ9
Phenanthrene	E4SL0, E4SL0RE
Fluoranthene	E4SH6, E4SJ9, E4SL0, E4SL0RE
Chrysene	E4SJ9
Pyrene	E4SJ9

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile-SIM samples are associated with an initial calibration with an average relative response factor (mean RRF) for pentachlorophenol that are below the minimum required RRF. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SH4, E4SH4DL, E4SH5, E4SH5DL, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH7DL, E4SH8, E4SH8DL, E4SH9, E4SH9DL, E4SJ0, E4SJ0DL, E4SJ1, E4SJ1DL, E4SJ2, E4SJ2DL, E4SJ3, E4SJ3DL, E4SJ4, E4SJ4DL, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ8DL, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL1, E4SL1DL, E4SL2, E4SL2DL, E4SL3, E4SL3DL

The following semivolatile-SIM samples are associated with initial calibration percent relative standard deviations (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(g,h,i)perylene	ESH9MS, E4SH9MSD, E4SJ5DL
Chrysene	E4SH4, E4SH5, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5
Pentachlorophenol	E4SH4, E4SH4DL, E4SH5, E4SH5DL, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH7DL, E4SH8, E4SH8DL, E4SH9, E4SH9DL, E4SJ0, E4SJ0DL, E4SJ1, E4SJ1DL, E4SJ2, E4SJ2DL, E4SJ3, E4SJ3DL, E4SJ4, E4SJ4DL, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ8DL, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL1, E4SL1DL, E4SL2, E4SL2DL, E4SL3, E4SL3DL

The following semivolatile-SIM samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene	E4SH4, E4SH6, E4SH8, E4SH9, E4SJ0
Benzo (b) fluoranthene	E4SH5, E4SH6DL, E4SH6RE, E4SH7, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ5DL
Chrysene	E4SH5, E4SH6DL, E4SH6RE, E4SH7, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5

The following semivolatile-SIM samples are associated with a CCV with a relative response factor (RRF50) for pentachlorophenol below the minimum required RRF. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SH4, E4SH5, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL, E4SL3DL, SBLK11

4. BLANKS

For the semivolatile-SIM method blank, SBLK11, the nondetected Pentachlorophenol result was flagged "R" by the NFG automated check procedure due to RRF failures in the associated initial and continuing calibrations. This method blank is also associated with samples E4SH9MS, E4SH9MSD, and E4SJ5DL which are not affected by calibration failures. Therefore, the nondetect result for pentachlorophenol in SBLK11 has not been removed from the "B" or "Z" files and is flagged "U," in order to preserve the nondetect flag.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Diluted semivolatile-SIM sample E4SJ8DL with dilution factors *greater* than 5 had a deuterated monitoring compound recovery for Fluoranthene-d_{10} above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Diluted semivolatile-SIM samples E4SL0DL and E4SL1DLwith dilution factors *less* than or equal to 5 had a deuterated monitoring compound recovery for Fluoranthene-d_{10} above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Affected analytes: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SL2 and E4SL3 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4SL2 and E4SL3

Semivolatile-SIM compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Pentachlorophenol					
Naphthalene	6.4	1	4.3	1	39
2-Methylnaphthalene	4.8	1	ND	1	
Acenaphthylene	16	1	8.1	1	66
Acenaphthene	14	1	17	1	19

Semivolatile-SIM compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Fluorene	26	1	21	1	21
Phenanthrene	220	1	180	1	20
Anthracene	84	1	63	1	28
Fluoranthene	520	1	460	1	12
Pyrene	430	1	390	1	10
Benzo(a)anthracene	340	1	270	1	23
Chrysene	300	1	260	1	14
Benzo(b)fluoranthene	200	1	180	1	11
Benzo(k)fluoranthene	110	1	93	1	17
Benzo(a)pyrene	180	1	160	1	12
Indeno(1,2,3-cd)pyrene	150	1	130	1	14
Dibenzo(a,h)anthracene	79	1	66	1	18
Benzo(g,h,i)perylene	150	1	130	1	14

E4SL2DL and E4SL3DL

Semivolatile-SIM compounds	E4SL2DL µg/kg	DF	E4SL3DL µg/kg	DF	%RPD
Pentachlorophenol					
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	50	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	37	1	ND	1	
Phenanthrene	260	1	220	1	17
Anthracene	120	1	98	1	20
Fluoranthene	620	1	540	1	14
Pyrene	440	1	350	1	23
Benzo(a)anthracene	560	1	350	1	46
Chrysene	560	1	360	1	44
Benzo(b)fluoranthene	440	1	400	1	9.5
Benzo(k)fluoranthene	340	1	220	1	43
Benzo(a)pyrene	470	1	360	1	27
Indeno(1,2,3-cd)pyrene	400	1	280	1	35
Dibenzo(a,h)anthracene	210	1	150	1	33
Benzo(g,h,i)perylene	420	1	290	1	37

For field duplicates E4SL2 and E4SL3, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all RPD values for all compounds except Acenaphthylene were below 50%.

For reasons noted elsewhere in this narrative, the pentachlorophenol results for E4SL2 and E4SL3 have been rejected and the results removed from the “B” and “Z” files.

8. INTERNAL STANDARDS

The following semivolatile-SIM samples have internal standard area counts that are outside the upper criteria limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

Phenanthrene-d_{10} E4SH6, E4SH6RE

Affected analytes: 4,6-Dinitro-2-methylphenol, N-nitrosodiphenylamine, 4-Bromophenyl-phenylether, Hexachlorobenzene, Atrazine, Pentachlorophenol, Phenanthrene, Anthracene, Carbazole, Di-n-butylphthalate, Fluoranthene

Perylene-d_{12} E4SH6, E4SH6RE, E4SJ9DL

Affected analytes: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SH6, E4SH6RE

Affected analytes: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ethylhexyl)phthalate, Chrysene

As described above, the original semivolatile analysis for sample E4SH6 had internal standard area counts for Phenanthrene-d_{10}, Chrysene-d_{12} and Perylene-d_{12} that were above the upper criteria limit. The sample was reanalyzed by the laboratory as sample E4SH6RE. The reanalysis had the same internal standard failures. The results from the original analysis should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SJ0DL
Acenaphthylene	E4SH7, E4SJ3
Fluorene	E4SL2DL
Pentachlorophenol	E4SJ2, E4SJ3DL

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The results from the diluted samples should be used for result validation.

Naphthalene	E4SL0
2-Methylnaphthalene	E4SH6, E4SL0, E4SL1
Acenaphthylene	E4SJ9, E4SL0, E4SL1
Acenaphthene	E4SH6, E4SJ1, E4SJ2, E4SJ9, E4SL0, E4SL1
Fluorene	E4SH6, E4SJ1, E4SJ2, E4SJ9, E4SL0, E4SL1
Phenanthrene	E4SH4 – E4SH6, E4SH7, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Anthracene	E4SH5, E4SH6, E4SJ1, E4SJ2, E4SJ5, E4SJ8, E4SJ9, E4SJ0, E4SL1, E4SL2, E4SL3,
Fluoranthene	E4SH4, E4SH6, E4SH7 – E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(a)anthracene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Chrysene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(b)fluoranthene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(k)fluoranthene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(a)pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Indeno(1,2,3-cd)pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3

Dibenzo(a,h)anthracene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(g,h,i)perylene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3

Semivolatile-SIM sample E4SJ1 reported concentrations for Acenaphthene and Fluorene that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The result from the diluted sample was nondetected for Acenaphthene and Fluorene. The result from the original analysis should be used for result validation.

The following diluted semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". No further dilutions were performed. The results from these diluted samples should be used for result validation.

2-Methylnaphthalene	E4SL0DL
Acenaphthene	E4SL0DL
Fluorene	E4SJ9DL, E4SL0DL
Phenanthrene	E4SH6DL, E4SJ2DL, E4SJ9DL, E4SL0DL, E4SL1DL
Anthracene	E4SH6DL, E4SJ9DL, E4SJ0DL, E4SL1DL
Fluoranthene	E4SH6DL, E4SJ2DL, E4SJ3DL, E4SJ4DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL, E4SL3DL
Pyrene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(a)anthracene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Chrysene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(b)fluoranthene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(k)fluoranthene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(a0pyrene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Indeno(1,2,3-cd)pyrene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Dibenzo(a,h)anthracene	E4SH6DL, E4SJ8DL, E4SJ9DL,E4SL0DL, E4SL1DL, E4SL2DL,
Benzo(g,h,i)perylene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL

Sample E4SH6RE represents a reanalysis performed due to internal standard failure in the original analysis. For this analysis the following compounds had concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. No dilutions were performed for this reanalyses. The results from the dilution of the original analysis should be used for result validation.

Affected analytes: 2-Methylnaphthalene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

No problems were found

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

A surrogate recovery between 150 – 200 % was obtained on only one column for sample E4SL0. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4SL2 and E4SL3

Pesticide compound	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	

Pesticide compound	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	3.8	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	ND	1	5.8	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4SL2 and E4SL3, RPDs were not calculated because one or both results were nondetected.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations reported below the MDL. The affected results are elevated to the quantitation limit and are flagged “U”.

4,4’-DDE	E4SH5, E4SJ5, E4SL1, E4SL2, E4SL3
4,4’-DDD	E4SJ5, E4SJ7
Endosulfan II	E4SJ7
4,4’-DDT	E4SJ7, E4SL2
Methoxychlor	E4SJ7
Endrin ketone	E4SJ7
Endosulfan sulfate	E4SJ7

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4SL1

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDE	E4SJ2

The following pesticide sample had a percent difference between the results on the two GC columns exceeding 50% and the result is below the CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

4,4'-DDT	E4SJ2

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

Results for the following samples were flagged "U" during the NFG automated checking process. It is unclear why this flag was applied, and based on our review findings the results for the following compounds in the samples are valid. Consequently the "U" validator flags have been removed from the "B" and "Z" files.

Dieldrin	E4SJ5, E4SH9MS, E4SH9MSD
Endrin	E4SJ5, E4SH9MS, E4SH9MSD
4,4'-DDT	E4SL0
4,4'-DDE	E4SH9, E4SJ1, E4SJ9, E4SL0, E4SH9MS, E4SH9MSD

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All Aroclor samples in this SDG had acceptable surrogate recoveries on one or both columns for the original analyses. No samples were qualified based on surrogate recovery.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared from sample E4S60, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260, and the RPD exceeded criteria for Aroclor-1260 on one column. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4S60 is affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SL2 and E4SL3

Aroclor compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	200	1	240	1	18
Aroclor-1254					

Aroclor compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Aroclor-1260	21	1	49	1	80
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SL2 and E4SL3, RPD values are not calculated when one or both results are nondetects. Aroclor-1260 had an RPD value above 50 percent.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1248 E4SH4, E4SJ2, E4SL1

Aroclor-1254 E4SH4, E4SH7, E4SJ3, E4SJ4, E4SL1

Aroclor-1260 E4SJ9

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4SJ9DL

Aroclor-1254 E4SH9

Aroclor-1248 E4SH5, E4SH6, E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ9, E4SJ9DL, E4SL0, E4SL3

Aroclor-1016 E4SH9MS, E4SH9MSD

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1254 E4SJ1DL, E4SL0

Aroclor-1248 E4SH9, E4SJ1DL, E4SL2

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4SJ1DL

Aroclor-1254 E4SJ2, E4SJ9DL

Aroclor-1248 E4SH7, E4SJ3, E4SJ4, E4SL1

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1254 E4SH5, E4SH6, E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ9, E4SL2, E4SL3

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where dilutions are provided the results from the diluted sample should be used.

E4SH6, E4SJ1 Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Three coolers containing twenty (20) sediment samples, labeled E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5 through E4SM9 and E4SN0 through E4SN8, were shipped to KAP Technologies, Inc. located in The Woodlands, Texas. The samples were collected on 04/15/2010 and 04/16/2010 and were received at the laboratory on 04/16/2010 and 04/17/2010, intact at 3.3, 1.6, and 1.5°C.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2.Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Three sets of field duplicates are associated with this SDG; E4SM0 and E4SM1, E4SM6 and E4SM7, and E4SN5 and E4SN6. There are no field blanks associated with this SDG. Sample E4SM9 was designated for laboratory QC, i.e. MS/MSD.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Semivolatile method blanks SBLK17 and SBLK19 are associated with an initial calibration in which a surrogate/DMC exceeded percent relative standard deviation (%RSD) criteria. Detected and nondetected compounds are not qualified.

Semivolatile method blanks SBLK17 and SBLK19 are associated with initial calibration percent relative standard deviations (%RSD) for various target analytes were outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SL9, E4SM3, E4SM7 Pentachlorophenol

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Less sensitivity was found in the continuing calibration than was present in the initial calibration. Nondetected compounds are qualified UJ.

E4SM0, E4SM5, E4SM8DL, E4SN4, E4SN6, E4SN7DL 2,4-Dimethylphenol

Semivolatile method blanks SBLK17 and SBLK19 are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Less sensitivity was found in the continuing calibration than was present in the initial calibration. Nondetected compounds are qualified UJ.

Semivolatile method blanks SBLK17 and SBLK19 are associated with a CCV with relative response factors for Pentachlorophenol (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Semivolatile method blanks SBLK17 and SBLK19 are associated with a continuing calibration in which a surrogate/DMC exceeded percent difference (%D) criteria. Detected and nondetected compounds are not qualified.

4. BLANKS

No problems were found other than those mentioned regarding the calibrations with which they are associated.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SL9 Anthracene-d_{10}	Anthracene, Atrazine, Hexachlorobenzene, Phenanthrene
E4SL9 Phenol-d_5	Benzaldehyde, Phenol
E4SM0 Fluorene-d_{10}	4-Bromophenyl-phenylether, 4-Chlorophenyl-phenylether, Carbazole, Dibenzofuran, Fluorene
E4SL9, E4SM0 Acenaphthylene-d_8	2-Chloronaphthalene, 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Naphthalene

Diluted semivolatile sample E4SM8DL with dilution factors less than or equal to 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(a)pyrene-d_{12}	Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene, Indeno(1,2,3-cd)pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Benzaldehyde	ND	ND	
Phenol	ND	ND	
Bis(2-chloroethyl)ether	ND	ND

Benzo(g,h,i)perylene	500	610	19.8
2,3,4,6-Tetrachlorophenol	ND	ND	

With the exception of Bis(2-ethylhexyl)phthalate, all RPD values were less than 50 percent.

7. INTERNAL STANDARDS

No problems were found.

8. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

9. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

4-Methylphenol	E4SL7
Bis(2-Ethylhexyl)phthalate	E4SL4, E4SL7, E4SM0, E4SM8, E4SN3, E4SN8

Anthracene	E4SL4, E4SL7, E4SL9, E4SM5, E4SM9, E4SM9MS, 4SM9MSD, E4SN0, E4SN6, E4SN7DL
Pyrene	E4SM3
Dibenzofuran	E4SN1
Benzo(g,h,i)perylene	E4SL9, E4SM3, E4SM6, E4SM7
Indeno(1,2,3-cd)pyrene	E4SL9, E4SM6, E4SM7
Benzo(b)fluoranthene	E4SM3
Benzo(k)fluoranthene	E4SL9, E4SM3, E4SM6, E4SM7
Chrysene	E4SM3
Benzo(a)pyrene	E4SM3
Dibenzo(a,h)anthracene	E4SL4, E4SL7, E4SM0, E4SM1, E4SM8DL, E4SM9, E4SM9MSD, E4SN2, E4SN3, E4SN4, E4SN7DL, E4SN8
Benzo(a)anthracene	E4SM3, E4SM6
Acenaphthene	E4SN1DL, E4SN7
Di-n-butylphthalate	E4SL7, E4SM1, E4SM3, E4SM7, E4SM9MSD, E4SN0, E4SN1DL, E4SN4, E4SN7
Phenanthrene	E4SM6, E4SM7
Butylbenzylphthalate	E4SN1
Fluorene	E4SL4, E4SM8, E4SN1DL, E4SN5, E4SN6
9H-Carbazole	E4SM8, E4SN1DL, E4SN5, E4SN6, E4SN

10. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

11. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SM8	Fluoranthene
E4SN1	Fluoranthene, Pyrene
E4SN7	Fluoranthene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

All semivolatile SIM samples are associated with an initial calibration percent relative standard deviation for Benzo(g,h,i)perylene (%RSD) outside criteria. Detected Benzo(g,h,i)perylene is qualified J. Nondetected Benzo(g,h,i)perylene is not qualified.

All semivolatile SIM samples are associated with incorrect initial calibration sequences. All compounds listed exhibit a decrease in sensitivity. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo(g,h,i)perylene	E4SM7DL, E4SM8DL, E4SM9DL, E4SN0DL, E4SN1DL, E4SN2DL, E4SN3DL, E4SN4DL, E4SN5DL, E4SN6DL, E4SN7DL, E4SN8DL
Benzo(b)fluoranthene	E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8
Phenanthrene	E4SL4, E4SL4DL, E4SL7, E4SL7DL, E4SL9, E4SL9DL, E4SM0, E4SM0DL, E4SM1, E4SM1DL, E4SM3, E4SM3DL, E4SM5, E4SM5DL, E4SM6, E4SM6DL, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

The following semivolatile samples are associated with a CCV for Pentachlorophenol with relative response factors (RRF50) outside criteria. Detected Pentachlorophenol is qualified J. Nondetected Pentachlorophenol is qualified R.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile samples with dilution factors greater than 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4SN7DL Fluoranthene-d_{10}

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The semivolatile-SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are not qualified. The MS/MSD samples have negative percent recoveries that are greater than the acceptance limit for Pyrene. As the spiking level was inappropriately low in comparison to the native levels of Pyrene present in the sample, no data were qualified based on the Pyrene failure.

E4SK9, E4SK9MS, E4SK9MSD Pentachlorophenol, Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile-SIM.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 and E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Naphthalene	4.5	4.3	4.5
2-Methylnaphthalene	3.7	3.8	2.7
Acenaphthylene	7.3	8.7	17.5
Acenaphthene	21	16	27
Fluorene	26	19	31.1
Phenanthrene	310	310	0
Anthracene	74	40	59.6
Fluoranthene	660	750	12.8
Pyrene	490	570	15.1
Benzo(a)anthracene	310	290	6.7
Chrysene	300	350	15.4
Benzo(b)fluoranthene	330	410	21.6
Benzo(k)fluoranthene	230	290	23.1
Benzo(a)pyrene	270	290	7.1
Indeno(1,2,3-cd)pyrene	120	160	28.6
Dibenzo(a,h)anthracene	60	71	16.8
Benzo(g,h,i)perylene	120	160	28.6
Pentachlorophenol	4.5	ND	

With the exception of Anthracene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SM6 ug/kg	E4SM7 ug/kg	%RPD
Naphthalene	6.2	4.9	23.4

Benzo(a)anthracene	270	480	56
Chrysene	250	390	43.8
Benzo(b)fluoranthene	230	350	41.4
Benzo(k)fluoranthene	180	310	53.1
Benzo(a)pyrene	210	400	62.3
Indeno(1,2,3-cd)pyrene	98	140	35.3
Dibenzo(a,h)anthracene	46	65	34.2
Benzo(g,h,i)perylene	98	140	35.3
Pentachlorophenol	ND	6.5	

With the exception of Acenaphthylene, Pyrene, Benzo(a)anthracene, Benzo(k)fluoranthene, and Benzo(a)pyrene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SM6DL ug/kg	E4SM7DL ug.kg	%RPD
Naphthalene	ND	ND	
2-Methylnaphthalene	ND	ND	
Acenaphthylene	ND	74	
Acenaphthene	ND	ND	
Fluorene	ND	ND	
Phenanthrene	160	210	27
Anthracene	83	96	14.5
Fluoranthene	520	790	41.2
Pyrene	380	790	70.1
Benzo(a)anthracene	210	370	55.2
Chrysene	230	390	51.6
Benzo(b)fluoranthene	99	96	3.1
Benzo(k)fluoranthene	130	120	8
Benzo(a)pyrene	130	150	14.3
Indeno(1,2,3-cd)pyrene	78	58	29.4
Dibenzo(a,h)anthracene	ND	ND	
Benzo(g,h,i)perylene	89	67	28.2
Pentachlorophenol	ND	ND	

With the exception of Pyrene, Benzo(a)anthracene and Chrysene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SN5 ug/kg	E4SN6 ug/kg	%RPD
Naphthalene	12	18	40
2-Methylnaphthalene	12	12	0
Acenaphthylene	41	32	24.7
Acenaphthene	64	58	9.8
Fluorene	92	95	3.2
Phenanthrene	850	820	3.6
Anthracene	230	210	9.1
Fluoranthene	1700	1900	11.1
Pyrene	1400	1300	7.4
Benzo(a)anthracene	950	870	8.8
Chrysene	910	900	1.1
Benzo(b)fluoranthene	740	1200	47.4
Benzo(k)fluoranthene	520	850	48.2
Benzo(a)pyrene	560	900	46.6
Indeno(1,2,3-cd)pyrene	230	400	54
Dibenzo(a,h)anthracene	110	190	53.3
Benzo(g,h,i)perylene	230	400	54
Pentachlorophenol	5.1	ND	

With the exception of Dibenzo(a,h)anthracene, all RPD values were less than 50 percent.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

Anthracene	E4SM3DL
Acenaphthene	E4SL9DL
Pentachlorophenol	E4SM0, E4SM7, E4SM8, E4SN0, E4SN5
2-Methylnaphthalene	E4SL9, E4SM0, E4SM1

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SL4	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL7	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM8	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM9	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM3	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SM5	Acenaphthylene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

E4SM6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SM7	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM8	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM9	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN0	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN1	Naphthalene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN3	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN4	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN5	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN6	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

E4SN7	Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SN8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4SL4DL	Phenanthrene, Fluoranthene, Pyrene
E4SL7DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene
E4SL9DL	Fluoranthene
E4SM0DL	Fluoranthene
E4SM1DL	Fluoranthene, Pyrene
E4SM5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene,
E4SM6DL	Fluoranthene
E4SM7DL	Fluoranthene, Pyrene
E4SM8DL	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM9DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene
E4SN0DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene,
E4SN1DL	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SN2DL	Fluoranthene, Benzo(b)fluoranthene
E4SN3DL	Fluoranthene, Pyrene, Chrysene, Benzo(k)fluoranthene, Benzo(a)Pyrene
E4SN4DL	Fluoranthene, Pyrene

E4SN5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene
E4SN6DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene
E4SN7DL	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SN8DL	Fluoranthene, Pyrene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found in the pesticide method blanks. Several instrument blanks had target compounds present below the CRQL.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The MSD result for Aldrin has percent recovery greater than the upper acceptance limit on one column. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden, unless applied for another reason. Detected and nondetected compounds are not qualified.

E4SM9, E4SM9MSD Aldrin

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Pesticide Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
alpha-BHC	ND	ND	
beta-BHC	ND	ND	
delta-BHC	ND	ND	

Pesticide Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
gamma-BHC (Lindane)	ND	ND	
Heptachlor	ND	ND	
Aldrin	ND	ND	
Heptachlor epoxide	ND	ND	
Endosulfan I	ND	ND	
Dieldrin	ND	ND	
4,4'-DDE	ND	ND	
Endrin	ND	ND	
Endosulfan II	ND	ND	
4,4'-DDD	ND	ND	
Endosulfan sulfate	ND	ND	
4,4'-DDT	ND	ND	
Methoxychlor	ND	ND	
Endrin ketone	ND	ND	
Endrin aldehyde	ND	ND	
alpha-Chlordane	ND	ND	
gamma-Chlordane	ND	ND	
Toxaphene	ND	ND	

All RPD values were less than 50 percent.

Pesticide Analyte	E4SM6 ug/kg	E4SM7 ug/kg	%RPD
alpha-BHC	ND	ND	
beta-BHC	ND	ND	
delta-BHC	ND	ND	
gamma-BHC (Lindane)	ND	ND	
Heptachlor	ND	ND	
Aldrin	ND	ND	
Heptachlor epoxide	ND	ND	
Endosulfan I	ND	ND	
Dieldrin	ND	ND

Aldrin	ND	ND	
Heptachlor epoxide	ND	ND	
Endosulfan I	ND	ND	
Dieldrin	ND	ND	
4,4'-DDE	1.7	ND	
Endrin	ND	ND	
Endosulfan II	ND	ND	
4,4'-DDD	ND	ND	
Endosulfan sulfate	ND	ND	
4,4'-DDT	5.9	ND	
Methoxychlor	ND	ND	
Endrin ketone	ND	ND	
Endrin aldehyde	ND	ND	
alpha-Chlordane	ND	ND	
gamma-Chlordane	ND	ND	
Toxaphene	ND	ND	

8. INTERNAL STANDARDS

Not applicable to pesticides.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples are associated with an instrument blank which has compound concentrations below the MDL. Detected compounds are qualified U and reported at the CRQL if the sample concentration is above the MDL but less than the CRQL. Nondetected compounds are not qualified. Sample results above the CRQL are not qualified.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

Heptachlor epoxide, Endosulfan sulfate, gamma-Chlordane, gamma-BHC (Lindane), Dieldrin, Endrin, 4,4'-DDE

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDT	E4SM5, E4SM7, E4SN1
gamma-BHC (Lindane)	E4SM9MSD
4,4'-DDD	E4SM6
4,4'-DDE	E4SM5, E4SM7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aldrin	E4SM9MSD

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aldrin	E4SM9MS

11. SYSTEM PERFORMANCE

No problems were found.

12. ADDITIONAL INFORMATION

No dilution analyses were required for pesticides.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following Aroclor samples are associated with an opening or closing CCV with % Difference of a surrogate exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

The RT of Aroclor-1248 in the midpoint Aroclor CCV fell outside the RT window established during the initial calibration. Detected and nondetected compounds are not qualified.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4SM8DL, E4SN7DL

Aroclor sample E4SN7 has surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The Aroclor matrix spike and matrix spike duplicate sample have percent recovery of Aroclor-1016 that is greater than the upper acceptance limit on one column. The NFG automated flagging of detected Aroclor-1016 as J in the original sample, MS and MSD has been overridden. No data has been qualified based on MS/MSD results.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Aroclor Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	55	
Aroclor-1254	ND	41	
Aroclor-1260	ND	10	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

Aroclor Analyte	E4SM6 ug/kg	E4SM7 ug/kg	
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	250	310	21.4
Aroclor-1254	220	320	37
Aroclor-1260	ND	76	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

Aroclor Analyte	E4SN5 ug/kg	E4SN6 ug/kg	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	150	ND	
Aroclor-1254	61	ND	
Aroclor-1260	25	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

RPDs were not calculated where one or both results were nondetects. All calculated RPDs were below the 50% criterion.

8. INTERNAL STANDARDS

Not applicable to Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1254	E4SM3, E4SM8DL, E4SN0DL
Aroclor-1248	E4SN2, E4SN4

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4SL9, E4SM1, E4SN1, E4SN5
Aroclor-1254	E4SN7DL
Aroclor-1248	E4SL4, E4SM1, E4SM3, E4SM8DL, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN5

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1254	E4SL4DL, E4SL7, E4SM5, E4SM6, E4SM7, E4SM9, E4SM9MS, E4SM9MSD, E4SN3, E4SN7, E4SN8
Aroclor-1248	E4SL4DL, E4SL7, E4SL9

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SL4DL, E4SM8DL, E4SN0DL
Aroclor-1254	E4SM1, E4SM3, E4SM8DL, E4SN0DL, E4SN2
Aroclor-1248	E4SN4

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1254	E4SL4, E4SL9, E4SM8, E4SN0, E4SN1, E4SN5
Aroclor-1248	E4SN8
Aroclor-1016	E4SM9MS, E4SM9MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SM8	Aroclor-1248
E4SN0	Aroclor-1248
E4SN7	Aroclor-1248, Aroclor-1254

Sample E4SL4 was analyzed at a dilution, although it was not required, because Aroclor-1248 was within the calibrated range in the original analysis.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: Seventeen (17) sediment samples labeled E4SN9, E 4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, and E4SQ5, were shipped to KAP Technologies, Inc., in The Woodlands, Texas. All samples were collected on 4/16/2010 and were received at the laboratory on 4/17/2010 at 1.4 – 1.5 °C.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 . Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOMO01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Samples E4SP6 and E4SP7 failed the acceptance limits for one or more internal standards for SVOA and SVOA-SIM analyses; repeat analyses also failed. Failure was due to the sample matrix.

Sample E4SP6 had target compound concentrations above the calibration range for SVOA analysis and was analyzed using sample dilutions. All samples had target compound concentrations above the calibration range for SVOA-SIMs analysis and were analyzed using sample dilutions.

Sample E4SP6 also had target compound concentrations above the calibration range for Aroclors analysis and was analyzed at dilutions within the calibration range.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

No QC sample was designated on the traffic reports for this SDG. Sample E4SP6 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SP0/E4SP1and E4SP8/E4SP9 as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Pentachlorophenol	E4SP6MS, E4SP6MSD, E4SQ1, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5

The following semivolatile samples are associated with a CCV with a relative response factor (RRF50) for pentachlorophenol below the minimum required RRF. Detected compounds are qualified "J." Nondetected compounds are qualified "R."

E4SP6MS, E4SP6MSD, E4SQ5

The following semivolatile samples are associated with a closing CCV standard that has a percent difference value outside criteria (±50%).

E4SP6MS, E4SP6MSD, E4SQ5

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery for 4-Methylphenol-d_8 above the upper limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are not qualified.

2,4-Dimethylphenol, 2-Methylphenol, 4-Methylphenol	E4SQ1, E4SQ4

The following semivolatile samples have deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene	E4SP2, E4SP5, E4SP6, E4SP6RE, E4SP7, E4SP7RE

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Semivolatile compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1	
Bis(2-chloroethyl)ether	ND	1	ND	1	
2-Chlorophenol	ND	1	ND	1	
2-Methylphenol	ND	1	ND	1	
2,2'-Oxybis(1-chloropropane)	ND	1	ND	1	
Acetophenone	ND	1	ND	1	
4-Methylphenol	ND	1	ND	1	
N-Nitroso-di-n-propylamine	ND	1	ND	1	
Hexachloroethane	ND	1	ND	1	
Nitrobenzene	ND	1	ND	1	
Isophorone	ND	1	ND	1	
2-Nitrophenol	ND	1	ND	1	
Bis(2-chloroethoxy)methane	ND	1	ND	1	
2,4-Dichlorophenol	ND	1	ND	1	
Naphthalene	ND	1	ND	1	
4-Chloroaniline	ND	1	ND	1	
2,4-Dimethylphenol	ND	1	ND	1	
Hexachlorobutadiene	ND	1	ND	1	
Caprolactam	ND	1	ND	1	
4-Chloro-3-methylphenol	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Hexachlorocyclopentadiene	ND	1	ND	1	
2,4,6-Trichlorophenol	ND	1	ND	1	
2,4,5-Trichlorophenol	ND	1	ND	1	
1,1'-Biphenyl	ND	1	ND	1	
2-Chloronaphthalene	ND	1	ND	1	
2-Nitroaniline	ND	1	ND	1	

Semivolatile compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Dimethylphthalate	ND	1	ND	1	
2,6-Dinitrotoluene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
3-Nitroaniline	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
2,4-Dinitrophenol	ND	1	ND	1	
4-Nitrophenol	ND	1	ND	1	
Dibenzofuran	ND	1	ND	1	
2,4-Dinitrotoluene	ND	1	ND	1	
Diethylphthalate	ND	1	ND	1	
Fluorene	ND	1	ND	1	
4-Chlorophenyl-phenylether	ND	1	ND	1	
4-Nitroaniline	ND	1	ND	1	
4,6-Dinitro-2-methylphenol	ND	1	ND	1	
N-Nitrosodiphenylamine	ND	1	ND	1	
1,2,4,5-Tetrachlorobenzene	ND	1	ND	1	
4-Bromophenyl-phenylether	ND	1	ND	1	
Hexachlorobenzene	ND	1	ND	1	
Atrazine	ND	1	ND	1	
Pentachlorophenol	ND	1	ND	1	
Phenanthrene	130	1	200	1	42
Anthracene	ND	1	ND	1	
Carbazole	ND	1	ND	1	
Di-n-butylphthalate	ND	1	ND	1	
Fluoranthene	280	1	500	1	56
Pyrene	250	1	350	1	33
Butylbenzylphthalate	ND	1	ND	1	
3,3'-Dichlorobenzidine	ND	1	ND	1	
Benzo(a)anthracene	160	1	250	1	44
Chrysene	200	1	310	1	43
Bis(2-ethylhexyl)phthalate	ND	1	ND	1	
Di-n-octylphthalate	ND	1	ND	1	
Benzo(b)fluoranthene	150	1	310	1	70
Benzo(k)fluoranthene	140	1	240	1	53
Benzo(a)pyrene	170	1	270	1	46
Indeno(1,2,3-cd)pyrene	130	1	160	1	21
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	140	1	170	1	19
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SP0 and E4SP1, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Fluoranthene, Benzo(b)fluoranthene, and Benzo(k)fluoranthene, the RPD values were less than 50 percent.

E4SP8 and E4SP9

Semivolatile compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1	
Bis(2-chloroethyl)ether	ND	1	ND	1

Di-n-butylphthalate	ND	1	ND	1	
Fluoranthene	1600	1	990	1	47
Pyrene	1300	1	850	1	42
Butylbenzylphthalate	ND	1	ND	1	
3,3'-Dichlorobenzidine	ND	1	ND	1	
Benzo(a)anthracene	790	1	520	1	41
Chrysene	1100	1	750	1	38
Bis(2-ethylhexyl)phthalate	340	1	250	1	31
Di-n-octylphthalate	ND	1	ND	1	
Benzo(b)fluoranthene	1000	1	790	1	24
Benzo(k)fluoranthene	900	1	560	1	47
Benzo(a)pyrene	980	1	670	1	38
Indeno(1,2,3-cd)pyrene	690	1	480	1	36
Dibenzo(a,h)anthracene	320	1	250	1	25
Benzo(g,h,i)perylene	790	1	530	1	39
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Phenanthrene, the RPD values were less than 50 percent.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified "J" for the affected analytes. Nondetected compounds are not qualified.

Perylene-d_{12}	E4SP6, E4SP6RE, E4SP7, E4SP7RE

As noted above, the original analysis for samples E4SLP6 and E4SP7 had internal standard area counts for Perylene-d_{12} that were above the upper criteria limit. The samples were subsequently reanalyzed by the laboratory as samples E4SP6RE and E4SP7RE and again failed due to sample matrix. Since the reanalysis provided no additional useful information, the data from the original analyses should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations reported below the MDL. Detected compounds are qualified "U." and reported at the CRQL. Nondetected compounds are not qualified.

Benzo(a)pyrene	E4SP4

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

4-Chloroaniline	E4SP6MSD
Bis (2-Ethylhexyl) phthalate	E4SP5, E4SP7, E4SP8, E4SP9, E4SQ3, E4SQ4
Anthracene	E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP6RE, E4SP7, E4SP7RE, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4
Pyrene	E4SP4
Benzo(g,h,i)perylene	E4SN9, E4SP0, E4SP1, E4SP2
Indeno(1,2,3-cd)pyrene	E4SN9, E4SP0, E4SP1, E4SP2
Benzo(b)fluoranthene	E4SP0, E4SP4
Fluoranthene	E4SP4
Benzo(k)fluoranthene	E4SN9, E4SP0, E4SP4
Chrysene	E4SP0, E4SP4
Benzo(a)pyrene	E4SP0, E4SP2
Dibenzo(a,h)anthracene	E4SP5, E4SP8, E4SP9, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Benzo(a)anthracene	E4SP0, E4SP2
Acenaphthene	E4SQ1

Di-n-butylphthalate	E4SP1, E4SP4, E4SP8, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Phenanthrene	E4SN9, E4SP0, E4SP1, E4SP2, E4SP4, E4SP9

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SQ1 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene. These results were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) for Pentachlorophenol below the minimum required RRF. Detected compounds are qualified "J." Nondetected compounds are qualified "R."

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP3DL, E4SP4, E4SP4DL, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9DL, E4SQ0DL, E4SQ1DL, E4SQ2DL, E4SQ3DL, E4SQ4DL, E4SQ5DL

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) for Benzo(g,h,i)perylene outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

E4SN9, E4SN9DL, E4SP0, E4SP0DL, E4SP1, E4SP1DL, E4SP2, E4SP2DL, E4SP3, E4SP3DL, E4SP4, E4SP4DL, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile-SIM sample E4SP6 had deuterated monitoring compound recovery for Fluoranthene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries was outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Acenaphthene	E4SP6MS, E4SP6MSD

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Semivolatile-SIM compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Pentachlorophenol	ND	1	ND	1	
Naphthalene	5.5	1	5.1	1	7.5
2-Methylnaphthalene	6.5	1	5.5	1	17
Acenaphthylene	12	1	15	1	22
Acenaphthene	14	1	17	1	19
Fluorene	20	1	24	1	18
Phenanthrene	180	1	290	1	47
Anthracene	49	1	76	1	43
Fluoranthene	450	1	740	1	49
Pyrene	370	1	610	1	49
Benzo(a)anthracene	260	1	430	1	49
Chrysene	270	1	440	1	48
Benzo(b)fluoranthene	350	1	570	1	48
Benzo(k)fluoranthene	280	1	430	1	42
Benzo(a)pyrene	300	1	450	1	40
Indeno(1,2,3-cd)pyrene	130	1	210	1	47
Dibenzo(a,h)anthracene	57	1	98	1	53
Benzo(g,h,i)perylene	130	1	210	1	47

E4SP0DL and E4SP1DL

Semivolatile-SIM compounds	E4SP0DL µg/kg	DF	E4SP1DL µg/kg	DF	%RPD
Pentachlorophenol	ND	10	ND	10	
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	ND	10	ND	10	
Fluorene	ND	10	ND	10	
Phenanthrene	210	10	290	10	32
Anthracene	81	10	93	10	14
Fluoranthene	480	10	710	10	39
Pyrene	330	10	480	10	37

Semivolatile-SIM compounds	E4SP0DL µg/kg	DF	E4SP1DL µg/kg	DF	%RPD
Benzo(a)anthracene	330	10	360	10	8.7
Chrysene	390	10	400	10	2.5
Benzo(b)fluoranthene	420	10	330	10	24
Benzo(k)fluoranthene	320	10	290	10	9.8
Benzo(a)pyrene	400	10	320	10	22
Indeno(1,2,3-cd)pyrene	260	10	210	10	21
Dibenzo(a,h)anthracene	130	10	100	10	26
Benzo(g,h,i)perylene	260	10	210	10	21

For field duplicates E4SP0 and E4SP1, RPDs were not calculated where one or both results were nondetected. Where detected, results were reported for both samples, all RPD values for all compounds except Dibenzo(a,h)anthracene were below 50%.

E4SP8 and E4SP9

Semivolatile-SIM compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Pentachlorophenol	ND	1	ND	1	
Naphthalene	13	1	12	1	8
2-Methylnaphthalene	11	1	8.6	1	25
Acenaphthylene	59	1	47	1	23

Pyrene	2100	1	1200	1	55
Benzo(a)anthracene	1500	1	860	1	54
Chrysene	1600	1	950	1	51
Benzo(b)fluoranthene	1500	1	1200	1	22
Benzo(k)fluoranthene	900	1	740	1	20
Benzo(a)pyrene	1000	1	860	1	15
Indeno(1,2,3-cd)pyrene	540	1	450	1	18
Dibenzo(a,h)anthracene	260	1	220	1	17
Benzo(g,h,i)perylene	550	1	460	1	18

E4SP8DL and E4SP9DL

Semivolatile-SIM compounds	E4SP8DL µg/kg	DF	E4SP9DL µg/kg	DF	%RPD
Pentachlorophenol	ND	5	ND	10	
Naphthalene	ND	5	ND	10	
2-Methylnaphthalene	ND	5	ND	10	
Acenaphthylene	55	5	ND	10	
Acenaphthene	45	5	ND	10	

Semivolatile-SIM compounds	E4SP8DL µg/kg	DF	E4SP9DL µg/kg	DF	%RPD
Fluorene	55	5	ND	10	
Phenanthrene	920	5	510	10	57
Anthracene	300	5	200	10	40
Fluoranthene	2800	5	1600	10	55
Pyrene	1800	5	1100	10	48
Benzo(a)anthracene	1100	5	660	10	50
Chrysene	1400	5	890	10	45
Benzo(b)fluoranthene	1500	5	830	10	58
Benzo(k)fluoranthene	1300	5	900	10	36
Benzo(a)pyrene	1300	5	880	10	39
Indeno(1,2,3-cd)pyrene	660	5	450	10	38
Dibenzo(a,h)anthracene	390	5	270	10	36
Benzo(g,h,i)perylene	700	5	490	10	35

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all RPD values for all compounds were below 50%, except Acenaphthene, Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, and Benzo(b)fluoranthene.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The samples E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, and E4SQ5 had target compound concentrations above the calibration range and were analyzed using a dilution within the calibration range.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Acenaphthylene	E4SQ2DL
Acenaphthene	E4SP8DL, E4SQ4DL
Fluorene	E4SQ4DL
Pentachlorophenol	E4SP2

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where dilutions are provided, the results from the diluted samples should be used for result validation.

Acenaphthene	E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SQ1
Acenaphthylene	E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SQ0, E4SQ1, E4SQ4, E4SQ5

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for Decachlorobiphenyl, Endrin, and Endosulfan I exceeding criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5

4. BLANKS

No problems were found

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Surrogate recovery for Tetrachloro-m-xylene was greater than 150% but less than or equal to 200% on both columns for sample E4SP2. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aldrin	E4SP6MS, E4SP6MSD
4,4'-DDT	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
Endrin	E4SP6MS, E4SP6MSD
Heptachlor	E4SP6MS, E4SP6MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Pesticide compound	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	2.2	1	1.6	1	32
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4Sp0 and E4Sp1, RPDs were not calculated where one or both results were nondetected. All RPD values were less than 50 %.

E4SP8 and E4SP9

Pesticide compound	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	

Pesticide compound	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	9.7	1	16	1	49
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	5	1	8.8	1	55
Toxaphene	ND	1	ND	1	

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. The RPD value for gamma-Chlordane was greater than 50 %.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL for Heptachlor epoxide, Endosulfan sulfate, gamma-Chlordane, gamma-BHC (Lindane), Dieldrin, Endrin, and 4,4'-DDE. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

4,4'-DDT	E4SP6, E4SQ2
alpha-Chlordane	E4SP6MSD
gamma-Chlordane	E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP9
4,4'-DDE	E4SP6
Endrin aldehyde	E4SP7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

alpha-Chlordane	E4SP6MS
gamma-Chlordane	E4SP7, E4SQ0

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4SP7
4,4'-DDT	E4SP8
gamma-Chlordane	E4SP8
Dieldrin	E4SP7

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aldrin	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
Heptachlor	E4SP6MS, E4SP6MSD

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where dilutions are provided, the results from the diluted samples should be used for result validation.

4,4'-DDE	E4SP6, E4SP6MS, E4SP6MSD
4,4'-DDT	E4SP6, E4SP6MS, E4SP6MSD
gamma-Chlordane	E4SP6, E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

Aroclor sample E4SP6DL with a dilution factor greater than 5 had surrogate percent recoveries that were greater than 200% for Decachlorobiphenyl on one column and exceeded 150% but were less than or equal to 200% on the second column. All compounds are affected. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4SP6, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016, and greater than the upper acceptance limit for Aroclor-1260 on one column. In addition, the RPD exceeded criteria on one column for Aroclor-1016 and Aroclor-1260. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4SP6 is affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Aroclor compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	

Aroclor compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Aroclor-1248	210	1	170	1	21
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	22	1	14	1	44
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SP0 and E4SP1, RPD values are not calculated when one or both results are nondetects. All RPD values were less than 50 %.

E4SP8 and E4SP9

Aroclor compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	96	1	520	1	140
Aroclor-1254	96	1	340	1	110
Aroclor-1260	96	1	170	1	56
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SP8 and E4SP9, RPD values are not calculated when one or both results are nondetects. Aroclor 1248, Aroclor 1254, and Aroclor 1260 RPD values greater than 50 %.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aroclor-1248 E4SP7, E4SP8, E4SQ5

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1260 E4SP1

Aroclor-1248	E4SP0, E4SP1, E4SQ3

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1254	E4SP7, E4SP9, E4SQ0, E4SQ3, E4SQ4
Aroclor-1248	E4SP2, E4SP6DL, E4SQ2

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SP8
Aroclor-1254	E4SP8
Aroclor-1248	E4SP7, E4SP8

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1254	E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SQ2
Aroclor-1016	E4SP6MS, E4SP6MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where dilutions are provided the results from the diluted sample should be used.

Aroclor-1016	E4SP6MS, E4SP6MSD
Aroclor-1248	E4SP6, E4SP6MS, E4SP6MSD
Aroclor-1254	E4SP6, E4SP6MS, E4SP6MSD
Aroclor-1260	E4SP6, E4SP6MS, E4SP6MSD

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

DATE: June 24, 2010

SUBJECT: Review of Data
Received for Review on May 8, 2010

FROM: Eric Boring
Senior Chemist

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39668 SDG Number: E4SQ6

Number and Type of Samples: 1 Water Sample (Field QC)

Sample Numbers: E4SQ6

Laboratory: KAP Technologies Inc.

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Receipt: One (1) water sample labeled E4SQ6 and designated as field QC was shipped to KAP Technologies, Inc., in the Woodlands, TX. Sample E4SQ6 was collected on 4/16/2010 and was received on 4/17/2010, intact and at 1.5 ºC.

Sample Analysis and Data Review: The sample was analyzed according to CLP SOW SOM01.2.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Pentachlorophenol	E4SQ6

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Use professional judgment to qualify the data.

2,4-Dimethylphenol	E4SQ6
Hexachlorocyclopentadiene	E4SQ6
Pentachlorophenol	E4SQ6

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SQ6

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

4,6-Dinitro-2-methylphenol	E4SQ6

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

LCS was not required.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

No additional information to report.

SEMIVOLATILES – SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo (g,h,i) perylene	E4SQ6

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Use professional judgment to qualify the data.

Benzo (b) fluoranthene	E4SQ6
Phenanthrene	E4SQ6

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SQ6

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required

6B. LABORATORY CONTROL SAMPLE

LCS was not required

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

No additional information to report.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

No additional information to report.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

No additional information to report.

To: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39668 MRN: 1690.4 SDG Number: E4SQ7

Number and Type of Samples: 1 water for TCLP

Sample Numbers: E4SQ7

Laboratory: KAP Technologies, Inc.

cc: Sara Goehl, EPA
Scott Cieniawski, EPA
Louis Blume, EPA
Theo Von Wallmenich, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Judy Schofield, CSC

Case Number: 39668 SDG Number: E4SQ7
Site Name: Lincoln Park Laboratory: KAP, Technologies, Inc.

SDG Summary

Sample Receipt: One water sample labeled E4SQ7 was shipped to KAP Technologies, Inc., in The Woodlands, Texas. The sample was collected on 4/19/2010 and received at the facility on 4/20/2010, intact, and at 3.3 ºC.

Sample Analysis and Data Review: The water sample was prepared using separatory funnel extraction, and esterification by diazomethane, according to SW-846 Method 8151A, and MA 1690.4. The sample was analyzed for herbicide compounds, 2,4-D and 2,4,5-TP (Silvex), by GC/ECD, according to SW-846 Method 8151A and the specifications in MA 1690.4. The sample was reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program, and according to the specifications in MA 1690.4, SW-846 Method 8151A, and SW-846 Method 1311.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “NJ”, “UJ”, “U”, “J”.

Although specified in MA 1690.4, no MS/MSD was prepared for this SDG. No sample was designated by the samplers to be used for laboratory QC.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicate sets were identified.

HERBICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No MS/MSD was performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

No target herbicide compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

Case Number: 39668 SDG Number: E4SQ7
Site Name: Lincoln Park Laboratory: KAP, Technologies, Inc.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Subject: **Revised Review Narrative Report**
Review of Data
Received for Review on: June 16, 2010

From: Melody Jensen
Senior Scientist, CSC

To: Data User: GLNPO

This data review narrative supersedes the narrative sent on July 13, 2010 for the review of data in SDG E4S89. The change made to this narrative includes a clarification added to the Aroclor Additional Information section of the narrative. The change has been highlighted in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarification. No sample results or review qualifiers have been changed.

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39668 MRN: 1689.5, 1722.1, and 1723.0 SDG Number: E4SQ8

Number and Type of Samples: 2 Sediment Samples

Sample Numbers: E4SQ7, E4SQ8

Laboratory: KAP Technologies

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill

Judy Schofield, CSC

SDG Summary

Sample Receipt: One (1) investigation-derived waste (IDW) sample labeled E4SQ7 and one (1) trip blank labeled E4SQ8 were shipped to KAP Technologies in Woodlands, Texas. Both samples were collected and shipped on 4/19/2010 and were received on 4/20/2010 at 3.3 °C.

Sample Analysis and Data Review: The IDW sample (E4SQ7) was prepared and analyzed for Volatile (VOA), Semivolatile (SVOA), and Pesticide analytes according to CLP SOW SOM01.2, Modification Reference Numbers 1689.5, 1722.1, and 1723.0, and SW-846 TCLP Method 1311, and for Aroclors according to routine CLP SOW SOM01.2. The trip blank (E4SQ8) was prepared and analyzed for Volatiles only. The sample data were reviewed according to the NFG for SOM01.2, the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program, and Modification Reference Numbers 1689.5, 1722.1, and 1723.0.

Sample E4SQ7 is reported on the traffic report as a "waste" sample, requiring TCLP extraction/analysis for the Volatile, Semivolatile and Pesticide fractions. The Aroclor fraction required routine analysis according to CLP SOW SOM01.2. For the Aroclor fraction, sample E4SQ7 was prepared and reported on the Form 1 as a "soil" sample. The percent moisture for this sample was 26%.

According to Modified Analyses 1689.5, 1722.1, and 1723.0, associated with this SDG, the laboratory was required to provide the supporting data for the TCLP procedure (laboratory bench sheets, logs, and notebook pages). This includes the determination of extraction fluid, amount of liquid (if any) extracted from the solid phase, mass of solid material extracted, and volume of extraction fluid used. These items were missing from the data package

Although not requested in the Modified Analysis (MA), the laboratory reported tentatively identified compounds (TICs) for Volatile and Semivolatile analyses.

The MA reference number 1690.4 is reported on the Form 1s for the Aroclor analysis in error. It is not part of the Aroclor analysis that was performed according to the CLP SOW SOM01.2 (without MA).

MS/MSD evaluation: Although specified in MA 1689.5, no MS/MSD was prepared for Pesticide analysis. An MS/MSD was prepared for Aroclor analyses (E4SQ7MS/E4SQ7MSD). No sample results were qualified.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no samples were identified as field duplicate pairs.

This report is ordered by fraction in the following order: Volatiles, Semivolatiles, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

VOLATILES (LOW MEDIUM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The recovery of DMC compound 2-Butanone-d_5 was slightly below criteria. An examination of the raw data was performed, which confirmed that target compounds were not present in the blank.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Semivolatile sample E4SQ7 is associated with an initial calibration in which the surrogate/DMC 2-Butanone-d_5 exceeded percent relative standard deviation (%RSD) criterion. No target compounds were affected. Detected and nondetected compounds are not qualified.

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Although one of the automated reports specified that an MS/MSD should be prepared for semivolatile analysis, no MS/MSD was prepared, nor was one requested in MA 1723.0. No sample results were qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following Aroclor sample is associated with an opening or closing CCV with % Difference exceeding criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Aroclor-1248	E4SQ7DL

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

No problems were found

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SQ7, the Aroclor matrix/matrix spike duplicate samples (E4SQ7MS/E4SQ7MSD) have percent recoveries that are greater than the upper acceptance limit for Aroclor-1016 on both columns due to high spike levels. Recoveries for Aroclor-1260 were acceptable. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Not applicable.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor sample has compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aroclor-1254	E4SQ7DL

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1248	E4SQ7DL, E4SQ7MS, E4SQ7MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1016	E4SQ7MS, E4SQ7MSD

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SQ7DL
Aroclor-1254	E4SQ7DL

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R."

Aroclor-1254	E4SQ7, E4SQ7MS, E4SQ7MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Aroclor sample E4SQ7 reported a concentration for Aroclor-1248 that exceeded the calibration range of the instrument and was flagged "E" by the laboratory. As per the NFG, this result is flagged "J". The result from the dilute analysis should be used for result validation.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

VOLATILES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DMC RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No volatile MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. TRIP BLANK AND FIELD DUPLICATE

Trip blank E4SR0 was included with this SDG. No volatile target compounds were detected in this sample. All associated QC was acceptable. No field duplicate samples were collected for this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No target volatile compounds were detected in the samples included in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DMC RECOVERY

Some deuterated monitoring compound recoveries were below the lower limit of the criteria window. These surrogates were not associated with target compounds for TCLP analysis. No results have been qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No semivolatile MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No target semivolatile compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No pesticide MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

No target pesticide compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No Aroclor MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

In Aroclor sample E4SQ9, Aroclor-1260 had a concentration that was above the MDL and below the CRQL. The result for Aroclor-1260 in this sample is qualified "J."

Aroclor sample E4SQ9 had a percent difference between Aroclor-1248 results in the range of 26-50%. The result for Aroclor-1248 in sample E4SQ9 is qualified "J."

Aroclor sample E4SQ9 had a percent difference between Aroclor-1254 results that exceeded 100%. The result for Aroclor-1254 in sample E4SQ9 is qualified "R." "R" flagged results are removed from the "B" and "Z" files.

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor performance was acceptable.

GLNPO Data Qualifier Sheet

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RS0 - ME4RS9, ME4RT0 - ME4RT6, and ME4RY2 - ME4RY4 were shipped to A4 Scientific, Inc. Samples ME4RS0 - ME4RS9 and ME4RT0-ME4RT6 were collected on 2/25/2010 and samples ME4RY2 - ME4RY4 were collected on 2/24/2010. All twenty sediment samples were received at the facility on 2/27/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4RS1 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4RT5/ME4RT6 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4RS3	Aluminum, Iron
ME4RS4	Aluminum, Iron
ME4RS5	Aluminum, Iron
ME4RS6	Aluminum, Iron
ME4RS7	Aluminum, Iron
ME4RS8	Aluminum, Iron
ME4RS9	Aluminum, Iron
ME4RT0	Aluminum, Iron
ME4RT1	Aluminum, Iron
ME4RT2	Aluminum, Iron
ME4RT3	Aluminum, Iron
ME4RT4	Aluminum, Iron

The following inorganic soil samples are associated with an CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4RS0	Mercury
ME4RS1	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RS0	Barium, Potassium
ME4RS1	Barium, Potassium
ME4RS2	Barium, Potassium
ME4RS3	Barium, Potassium
ME4RS4	Barium, Potassium
ME4RS5	Barium, Potassium
ME4RS6	Barium, Potassium

ME4RS7	Barium, Potassium
ME4RS8	Barium, Potassium
ME4RS9	Barium, Potassium
ME4RT0	Barium, Potassium
ME4RT1	Barium, Potassium
ME4RT2	Barium, Potassium
ME4RT3	Barium, Potassium
ME4RT4	Barium, Potassium
ME4RT5	Barium, Potassium
ME4RT6	Barium, Potassium
ME4RY2	Barium, Potassium
ME4RY3	Barium, Potassium
ME4RY4	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

Metal Analytes	ME4RT5 (mg/kg)	ME4RT6 (Field DUP) (mg/kg)	Both Results >5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	3530	4000	Y	12.5	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	3.7	3.6	N	-	0.1	≤2xCRQL
Barium	91.7	94.5	N	-	2.8	≤2xCRQL
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	1.9	1.3	N	-	0.6	≤2xCRQL
Calcium	76900	89900	Y	15.6	-	-
Chromium	58.4	34.5	Y	51.5	-	-
Cobalt	5	5.4	NA	NA	NA	NA

Manganese	404	402	Y	0.5	-	-
Mercury	0.2	0.12	N	-	0.08	≤2xCRQL
Nickel	18.6	12.6	N	-	6	≤2xCRQL
Potassium	443	509	NA	NA	NA	NA
Selenium	ND	ND	NA	NA	NA	NA
Silver	0.88	ND	N	-	0.34	≤2xCRQL
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	10.3	12.1	N	-	1.8	≤2xCRQL
Zinc	175	143	Y	20.1	-	-

6. ICP ANALYSIS

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RS3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RS7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RS8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RT3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RT4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

ME4RS0	Calcium
ME4RS1	Calcium
ME4RS3	Calcium
ME4RS4	Calcium
ME4RS5	Calcium

ME4RS6	Calcium
ME4RS7	Calcium
ME4RS8	Calcium
ME4RS9	Calcium
ME4RT0	Calcium
ME4RT1	Calcium
ME4RT3	Calcium
ME4RT4	Calcium
ME4RT5	Calcium
ME4RT6	Calcium
ME4RY2	Calcium
ME4RY3	Calcium
ME4RY4	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL).

All results below the CRQL are qualified "J".

ME4RS0	Arsenic, Cadmium, Cobalt, Potassium
ME4RS1	Cobalt, Mercury, Potassium
ME$RS2	Cobalt, Mercury, Potassium
ME4RS4	Arsenic, Cadmium, Cobalt, Potassium
ME4RS5	Arsenic, Cobalt, Mercury, Potassium, Silver
ME4RS6	Cobalt, Potassium
ME4RS7	Cobalt, Mercury, Potassium
ME4RS8	Potassium
ME4RS9	Arsenic, Cadmium, Cobalt, Mercury, Potassium
ME4RT0	Cobalt, Mercury, Potassium
ME4RT1	Cobalt, Mercury, Potassium, Silver
ME4RT2	Cobalt, Potassium, Silver
ME4RT3	Beryllium
ME4RT4	Arsenic, Cadmium, Cobalt, Nickel, Potassium
ME4RT5	Cobalt, Potassium, Silver
ME4RT6	Cobalt, Mercury, Potassium

ME4RY2	Arsenic, Cobalt, Mercury, Potassium
ME4RY3	Beryllium, Cobalt, Potassium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RT7-ME4RT 9, ME4RW0-ME4RW 9, ME4RX0-ME4RX 6 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 2/25/2010, and were received at the facility on 2/27/2010, intact and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4RT8 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4RT9/ME4RW0, MERW1/MERW2, and MERW3/MERW4 as field duplicate sets. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to also perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RT7	Barium, Potassium
ME4RT8	Barium, Potassium
ME4RT9	Barium, Potassium
ME4RW0	Barium, Potassium
ME4RW1	Barium, Potassium
ME4RW2	Barium, Potassium
ME4RW3	Barium, Potassium

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4RT9/ME4RW0 Copper, Zinc

ME4RW1/ME4RW2 Copper

ME4RW3/ME4RW4 Copper

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4RT8 Potassium

ME4RW1 Potassium

ME4RW2 Potassium

ME4RW3 Potassium

ME4RW5 Potassium

ME4RW6 Potassium

ME4RW7 Potassium

ME4RW8 Potassium

ME4RW9 Potassium

ME4RX4 Potassium

ME4RX5 Potassium

ME4RX6 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RT8 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RW1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RW2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX6 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4RT7 Calcium, Manganese

ME4RT8 Calcium, Manganese

ME4RT9 Calcium, Manganese

ME4RW6 Calcium, Manganese

ME4RW7 Calcium, Manganese

ME4RW8 Calcium, Manganese

ME4RW9 Calcium, Manganese

ME4RX0 Calcium, Manganese

ME4RX1 Calcium, Manganese

ME4RX2 Calcium, Manganese

ME4RX3 Calcium, Manganese

ME4RX4 Calcium, Manganese

ME4RX5 Calcium, Manganese

ME4RX6 Calcium, Manganese

7. SAMPLE RESULTS

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because

calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4RT7	Calcium
ME4RT8	Calcium
ME4RT9	Calcium
ME4RW0	Calcium
ME4RW1	Calcium
ME4RW2	Calcium
ME4RW3	Calcium
ME4RW4	Calcium
ME4RW5	Calcium
ME4RW6	Calcium
ME4RW7	Calcium
ME4RW8	Calcium
ME4RW9	Calcium
ME4RX0	Calcium
ME4RX1	Calcium
ME4RX2	Calcium
ME4RX3	Calcium
ME4RX4	Calcium
ME4RX5	Calcium
ME4RX6	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4RT7	Cadmium, Mercury
ME4RT8	Beryllium, Mercury
ME4RT9	Cobalt, Mercury, Potassium
ME4RW0	Cadmium, Cobalt, Mercury, Potassium
ME4RW1	Beryllium, Mercury
ME4RW2	Beryllium, Mercury
ME4RW3	Beryllium, Cadmium, Mercury

Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

DATE: 6/2/2010

SUBJECT: Review of Data
Received for Review on: 3/24/2010

FROM: Melody Jensen
Senior Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39494 SDG Number: ME4RX7

Number and Type of Samples: 5 Sediment Samples (Metals)

Sample Numbers: ME4RX7, ME4RX8, ME4RX9, ME4RY0, ME4RY1

Laboratory: A4 Scientific

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Five (5) sediment samples labeled ME4RX7, ME4RX8, ME4RX9 ME4RY0, and ME4RY were shipped to A4 Scientific, Inc. All five (5) samples were collected on February 25, 2010,and were received at the facility at 4°C on February 27, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4RX8 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicates were identified.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that samples ME4RX7 and ME4RY1 had more than 20 mL of free standing liquid on top. EPA directed the laboratory to decant the standing water and proceed with the analysis of the samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

Laboratory blanks for mercury had a negative concentration greater or equal to the MDL, but less than or equal to the CRQL. Samples reported as detected (ME4X8, ME4X9, ME4Y1), may have a negative bias and were therefore flagged as “J-”. The sample reported as not found (ME4RY0) may possibly be a false negative, but this cannot be determined from the data.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects found.

3. BLANKS

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL), but less than or equal to the CRQL. Detects may have a negative bias and are qualified as "J-".

ME4RX8 Mercury

ME4RX9 Mercury

ME4RY0 Mercury

ME4RY1 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic sediment samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RX7 Barium, Potassium

ME4RX8 Barium, Potassium

ME4RX9 Barium, Potassium

ME4RY0 Barium, Potassium

ME4RY1 Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) primary criteria. All associated sample results ≥ MDL but < 5× CRQL, and with an absolute difference between sample and duplicate > 2 × CRQL, are qualified "J". Non-detects are qualified "UJ".

ME4RX7 Chromium, Lead, Zinc

ME4RX8 Chromium, Lead, Zinc

ME4RX9 Chromium, Lead, Zinc

ME4RY0 Chromium, Lead, Zinc

ME4RY1 Chromium, Lead, Zinc

6. ICP ANALYSIS

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RX7 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX8 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX9 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RY0 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RY1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

No defects were found due to ICP serial dilution.

7. SAMPLE RESULTS

The following inorganic sample has analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4RY0 Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but

on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

ME4RX7	Arsenic, Cadmium, Cobalt, Mercury, Potassium
ME4RX8	Cobalt, Potassium
ME4RX9	Cobalt, Mercury, Potassium

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RY5 - ME4S05 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 2/26/2010 and were received on 3/2/2010, intact at the facility at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4RZ1 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4RZ3 and ME4RZ4 as field duplicates.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No issues were identified.

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

SDG Summary

Sample Completeness and Receipt: Five (5) sediment samples labeled ME4S06, ME4S07, ME4S08 ME4S09, and ME4S10 were shipped to A4 Scientific, Inc. All five (5) samples were collected on February 26, 2010, and were received at the facility at 4 °C on March 2, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4S07 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S07/ME4S08 as a field duplicate set.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that sample ME4S06 contained < 50% solids. EPA directed the laboratory to proceed with the analysis of the sample and report the results on a dry-weight basis using the percent solids determination.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is also less than or equal to the CRQL. Detects are qualified "U" and the sample result was raised to the CRQL.

ME4S06 Mercury

ME4S10 Mercury

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. The sample result is greater than the CRQL. No sample results are qualified based on this issue.

ME4S06 Aluminum, Iron

ME4S07 Aluminum, Iron, Mercury

ME4S08 Aluminum, Iron, Mercury

ME4S09 Aluminum, Iron, Mercury

ME4S10 Aluminum, Iron

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic sediment samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S06 Barium, Potassium

ME4S07 Barium, Potassium

ME4S08 Barium, Potassium

ME4S09 Barium, Potassium

ME4S10 Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found with the laboratory duplicate analysis.

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4S11- ME4S24, ME4S41-ME4S44, ME4S46, and ME4S48 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 03/01/2010, and were received at the facility on 03/03/2010, intact, and at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S20 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4S14 and ME4S15 as field duplicates. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgement, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No issues were identified.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S11	Barium, Potassium
ME4S12	Barium, Potassium
ME4S13	Barium, Potassium
ME4S14	Barium, Potassium
ME4S15	Barium, Potassium

Vanadium	11.5	11.4	N	-	0.1	≤2xCRQL
Zinc	51.5	47.1	Y	8.9	-	-

6. ICP ANALYSIS

No issues were found with the serial dilution samples.

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher

than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest in this project, the laboratory was instructed to report the initial analyses for calcium. All results which exceed the linear range are qualified "J".

ME4S11	Calcium
ME4S12	Calcium
ME4S13	Calcium
ME4S14	Calcium
ME4S15	Calcium
ME4S16	Calcium
ME4S17	Calcium
ME4S18	Calcium
ME4S19	Calcium
ME4S20	Calcium
ME4S20D	Calcium
ME4S21	Calcium
ME4S22	Calcium
ME4S23	Calcium
ME4S24	Calcium
ME4S41	Calcium
ME4S42	Calcium
ME4S43	Calcium
ME4S44	Calcium
ME4S46	Calcium
ME4S48	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4S11	Arsenic, Cadmium, Cobalt, Mercury, Potassium
ME4S12	Cobalt, Mercury, Potassium
ME4S13	Cobalt, Mercury, Potassium, Silver
ME4S14	Cadmium, Cobalt, Mercury, Potassium

ME4S44	Cobalt, Mercury, Potassium
ME4S46	Arsenic, Cobalt, Mercury, Nickel, Vanadium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Completeness and Receipt: Sixteen (16) sediment samples labeled ME4S25-ME4S27, ME4S29-ME4S36, ME4S38-ME4S40, ME4S49, and ME4S50 were shipped to A4 Scientific, Inc. All sixteen samples were collected on 03/01/2010 and were received at the facility on 03/03/2010, intact and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4S35 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4S39/ME4S40 as a field duplicate set. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples."

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No problems were found

2. CALIBRATION

No problems were found

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. Because sample results are significantly greater than the CRQL no sample results were qualified based on this issue.

ME4S27	Aluminum
ME4S29	Aluminum
ME4S30	Aluminum
ME4S31	Aluminum
ME4S32	Aluminum
ME4S33	Aluminum
ME4S34	Aluminum
ME4S36	Aluminum
ME4S38	Aluminum
ME4S39	Aluminum
ME4S40	Aluminum
ME4S49	Aluminum
ME4S50	Aluminum

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No Defects were found for matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S25	Barium, Potassium
ME4S26	Barium, Potassium
ME4S27	Barium, Potassium
ME4S29	Barium, Potassium
ME4S30	Barium, Potassium
ME4S31	Barium, Potassium
ME4S32	Barium, Potassium
ME4S33	Barium, Potassium
ME4S34	Barium, Potassium
ME4S35	Barium, Potassium
ME4S36	Barium, Potassium
ME4S38	Barium, Potassium
ME4S39	Barium, Potassium
ME4S40	Barium, Potassium

ME4S49 Barium
ME4S50 Barium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

The following table contains data for a sample/field duplicate pair in this SDG.

Analyte	ME4S39 (mg/kg)	ME4S40 (mg/kg)	Both Results> 5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	3360	2770	Y	19.2	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	3.1	2.6	N	-	0.5	≤2xCRQL
Barium	32.5	31.8	N	-	0.7	≤2xCRQL
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	0.29	0.41	NA	NA	NA	NA
Calcium	105000	83500	Y	22.8	-	-
Chromium	8	7.7	Y	3.8	-	-
Cobalt	7.7	5.4	N	-	2.3	≤2xCRQL
Copper	13.7	11	N	-	2.7	≤2xCRQL
Iron	9240	6960	Y	28.1	-	-
Lead	12.9	19.8	Y	42.2	-	-
Magnesium	54300	41600	Y	26.5	-	-
Manganese	606	444	Y	30.9	-	-
Mercury	0.042	ND	N	-	0.01	≤2xCRQL
Nickel	13.2	9.4	N	-	3.8	≤2xCRQL
Potassium	580	416	NA	NA	NA	NA
Selenium	ND	ND	NA	NA	NA	NA
Silver	ND	ND	NA	NA	NA	NA
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	13.9	10.5	N	-	3.4	≤2xCRQL
Zinc	43.6	50.5	Y	14.7	-	-

The following inorganic sample/field duplicate results are > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4S39/ME4S40 Lead

6. ICP ANALYSIS

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S33	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S34	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S38	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S39	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S40	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S49	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S50	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4S25	Calcium
ME4S26	Calcium
ME4S27	Calcium
ME4S29	Calcium
ME4S30	Calcium
ME4S31	Calcium
ME4S32	Calcium
ME4S33	Calcium
ME4S35	Calcium
ME4S36	Calcium
ME4S38	Calcium
ME4S39	Calcium
ME4S40	Calcium
ME4S49	Calcium
ME4S50	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4S25	Cadmium, Cobalt, Mercury, Potassium
ME4S26	Cadmium, Cobalt, Mercury, Potassium
ME4S30	Cadmium, Cobalt, Mercury, Potassium
ME4S29	Potassium
ME4S31	Cobalt, Mercury, Potassium
ME4S32	Cobalt, Mercury, Potassium
ME4S38	Cobalt, Mercury, Potassium
ME4S33	Cadmium, Potassium
ME4S34	Arsenic, Cobalt, Mercury, Potassium
ME4S35	Cobalt, Mercury, Potassium, Silver
ME4S36	Cobalt, Mercury, Potassium, Silver
ME4S39	Cadmium, Mercury, Potassium
ME4S40	Cadmium, Cobalt, Potassium
ME4S49	Arsenic, Barium, Copper, Nickel, Vanadium
ME4S50	Arsenic, Barium, Nickel

SDG SUMMARY

Sample Completeness and Receipt: Sixteen (16) sediment samples labeled ME4S51-ME4S66 were shipped to A4 Scientific, Inc. All Sixteen (16) samples were collected on 3/2/2010, and were received at the facility on 3/4/2010, intact at 4° C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S60 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S56/ME4S57, and ME4S65/ME4S66 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic soil samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4S51	Mercury
ME4S52	Mercury
ME4S53	Mercury
ME4S54	Mercury
ME4S55	Mercury

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4S62 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S51	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S52	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S54	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S55	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S65	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S66	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

ME4S51	Calcium
ME4S52	Calcium
ME4S53	Calcium
ME4S54	Calcium
ME4S55	Calcium
ME4S56	Calcium
ME4S57	Calcium
ME4S58	Calcium
ME4S59	Calcium
ME4S60	Calcium
ME4S61	Calcium
ME4S62	Calcium
ME4S63	Calcium
ME4S64	Calcium
ME4S65	Calcium
ME4S66	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4S51	Cobalt, Potassium
ME4S52	Barium, Potassium
ME4S53	Arsenic, Cobalt, Mercury, Potassium

ME4S54	Cobalt, Mercury, Potassium
ME4S55	Beryllium
ME4S56	Barium, Cobalt, Nickel
ME4S57	Arsenic, Barium, Cobalt, Copper, Nickel
ME4S59	Arsenic, Cadmium, Cobalt, Nickel, Potassium
ME4S60	Cobalt, Mercury, Potassium
ME4S61	Arsenic, Barium, Cobalt, Potassium
ME4S63	Barium, Cobalt, Nickel
ME4S64	Barium, Cadmium, Cobalt
ME4S66	Cobalt

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Thirteen (13) sediment samples labeled ME4S67-ME4S79 were shipped to A4 Scientific, Inc. All thirteen (13) samples were collected on 3/2/2010 and were received intact at the facility on 3/4/2010, at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4S67 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4S78 and ME4S79 as field duplicates.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. The following samples were qualified "UJ".

ME4S67	Mercury
ME4S68	Mercury
ME4S69	Mercury
ME4S70	Mercury
ME4S71	Mercury
ME4S72	Mercury
ME4S73	Mercury
ME4S74	Mercury
ME4S75	Mercury
ME4S76	Mercury
ME4S77	Mercury
ME4S78	Mercury
ME4S79	Mercury

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. The following samples were qualified "UJ"

ME4S67	Mercury
ME4S68	Mercury
ME4S69	Mercury
ME4S70	Mercury
ME4S71	Mercury
ME4S72	Mercury
ME4S73	Mercury
ME4S74	Mercury
ME4S75	Mercury
ME4S76	Mercury
ME4S77	Mercury
ME4S78	Mercury
ME4S79	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S67 Barium, Sodium

ME4S68 Barium, Potassium

ME4S69 Barium , Potassium

ME4S70 Barium

ME4S71 Barium

ME4S72 Barium, Potassium

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4S80-ME4S81, ME4S83-ME4S99, and ME4SA0 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 3/3/2010, and were received at the facility on 3/05/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S95 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S88/ME4S89 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S80	Barium
ME4S81	Barium
ME4S83	Barium, Potassium
ME4S84	Barium, Potassium
ME4S85	Barium, Potassium
ME4S86	Barium, Potassium
ME4S87	Barium, Potassium
ME4S88	Barium, Potassium
ME4S89	Barium, Potassium
ME4S90	Barium, Potassium
ME4S91	Barium, Potassium
ME4S92	Barium, Potassium
ME4S93	Barium, Potassium
ME4S94	Barium, Potassium
ME4S95	Barium, Potassium

Silver	ND	ND	NA	NA	NA	NA
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	13.5	14.7	N	-	1.2	≤2xCRQL
Zinc	119	143	Y	18.3	-	-

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue

ME4S97 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S81 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S83 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S84	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S85	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S86	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S90	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S91	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S95	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S96	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S97	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

ME4S80	Calcium
ME4S81	Calcium
ME4S83	Calcium

ME4S84	Calcium
ME4S85	Calcium
ME4S86	Calcium
ME4S87	Calcium
ME4S88	Calcium
ME4S89	Calcium
ME4S90	Calcium
ME4S91	Calcium
ME4S93	Calcium
ME4S94	Calcium
ME4S95	Calcium
ME4S96	Calcium
ME4S97	Calcium
ME4S99	Calcium
ME4SA0	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL).

All results below the CRQL are qualified "J".

ME4S80	Arsenic, Barium, Copper, Nickel
ME4S81	Barium, Cobalt, Nickel
ME4S83	Arsenic, Cadmium, Cobalt, Potassium
ME4S84	Cadmium, Cobalt, Mercury, Potassium
ME4S85	Cobalt, Potassium
ME4S86	Barium, Cobalt, Potassium
ME4S87	Cobalt, Mercury, Potassium
ME4S88	Cobalt, Mercury, Potassium
ME4S89	Cobalt, Potassium
ME4S90	Cadmium, Cobalt, Mercury, Potassium
ME4S91	Beryllium
ME4S92	Cobalt, Mercury, Potassium
ME4S93	Cobalt, Mercury, Potassium

ME4S95	Beryllium, Cadmium, Cobalt, Mercury

ME4S96	Cobalt, Potassium
ME4S97	Beryllium
ME4S98	Beryllium, Cobalt, Mercury, Potassium
ME4S99	Cobalt, Potassium
ME4SA0	Beryllium, Cobalt, Potassium, Silver

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Eighteen (18) sediment samples labeled ME4SA1-ME4SB8 were shipped to A4 Scientific, Inc. All eighteen (18) samples were collected on 3/3/2010 and were received intact at the facility on 3/5/2010, at 4° C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4SB6 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4SA3 and ME4SA6 as field duplicates, and ME4SB2 and ME4SB4 as a field duplicates.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is also less than or equal to the CRQL. Hits are qualified "U". Sample result is raised to the CRQL.

ME4SA8	Mercury
ME4SB0	Mercury
ME4SB1	Mercury
ME4SB2	Mercury
ME4SB3	Mercury
ME4SB4	Mercury
ME4SB5	Mercury
ME4SB6	Mercury
ME4SB7	Mercury
ME4SB8	Mercury

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than CRQL. No samples were qualified based on this issue.

ME4SA1	Aluminum, Iron
ME4SA2	Aluminum, Iron
ME4SA3	Aluminum, Iron
ME4SA4	Aluminum, Iron
ME4SA5	Aluminum, Iron
ME4SA6	Aluminum, Iron
ME4SA7	Aluminum, Iron
ME4SA8	Aluminum, Iron
ME4SB6	Aluminum, Iron
ME4SA9	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic samples are associated with a matrix spike recovery which is outside expanded low criteria. However, post-digest spike percent recovery was more than or equal to the low limit. Results greater than the MDL are flagged "J". Results less than the MDL are flagged "UJ".

ME4SA1	Selenium
ME4SA2	Selenium
ME4SA3	Selenium
ME4SA4	Selenium

ME4SA5	Selenium
ME4SA6	Selenium
ME4SA7	Selenium
ME4SA8	Selenium
ME4SA9	Selenium
ME4SB0	Selenium
ME4SB1	Selenium
ME4SB2	Selenium
ME4SB3	Selenium
ME4SB4	Selenium
ME4SB5	Selenium
ME4SB6	Selenium
ME4SB7	Selenium
ME4SB8	Selenium

The following inorganic samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SA1	Barium, Potassium
ME4SA2	Barium, Potassium
ME4SA3	Barium, Potassium
ME4SA4	Barium, Potassium
ME4SA5	Barium, Potassium
ME4SA6	Barium, Potassium
ME4SA8	Barium, Potassium
ME4SA9	Barium, Potassium
ME4SB0	Barium, Potassium
ME4SB1	Barium, Potassium
ME4SB2	Barium, Potassium
ME4SB3	Barium, Potassium
ME4SB4	Barium, Potassium
ME4SB5	Barium, Potassium
ME4SB6	Barium, Potassium
ME4SB7	Barium, Potassium
ME4SB8	Barium, Potassium

ME4SA7	Barium

6. ICP ANALYSIS

The following inorganic samples have one or more interferents present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SA1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SA9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SB2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SB8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4SA1	Calcium
ME4SA2	Calcium
ME4SA3	Calcium
ME4SA4	Calcium
ME4SA5	Calcium
ME4SA6	Calcium

ME4SB6	Barium, Mercury, Nickel, Potassium
ME4SB7	Arsenic, Barium, Copper, Lead, Mercury, Nickel, Potassium
ME4SB8	Antimony, Beryllium, Mercury

Case Number: 39494 SDG Number: ME4SA1
Site Name: Lincoln Park Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SB9, ME4SC0, ME4SC2, ME4SC3, ME4SC4, ME4SC5, ME4SC6, ME4SC7, ME4SC8, ME4SC9, ME4SD0, ME4SD2, ME4SD3, ME4SD4, ME4SD5, ME4SD6, ME4SD7, ME4SD9, ME4SE0, and ME4SE1 were shipped to A4 Scientific, Inc. All twenty samples were collected on March 4, 2010, and were received at the facility at 4 °C on March 5, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SD2 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution). The relative percent difference (RPD) for aluminum and manganese exceeded the QC limits. In addition, the percent difference for aluminum exceeded the QC limits in the serial dilution. Interferences are suspected.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SC5/ME4SC6 as a field duplicate pair.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

Although the automated NFG reports noted that sample ME4SD6 was associated with ICV and CCV standards that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. No defects were found.

3. BLANKS

Although the automated NFG reports noted that sample ME4SD6 was associated with initial or continuing calibration blanks that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. No defects were found.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

For the matrix spike, the RPD for aluminum and manganese exceeded the QC limits. Interferences are suspected.

Although the automated NFG reports noted that sample ME4SD6 was associated with matrix spikes and other laboratory control samples (LCS) that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. Detects and non-detects are not flagged.

The following inorganic soil samples are associated with a solid LCS with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SB9	Barium, Potassium
ME4SC0	Barium, Potassium
ME4SC2	Barium, Potassium
ME4SC3	Barium, Potassium
ME4SC4	Barium, Potassium
ME4SC5	Barium, Potassium
ME4SC6	Barium, Potassium
ME4SC7	Barium, Potassium
ME4SC8	Barium, Potassium
ME4SC9	Barium, Potassium
ME4SD0	Barium, Potassium
ME4SD2	Barium, Potassium
ME4SD3	Barium, Potassium
ME4SD4	Barium, Potassium
ME4SD5	Barium, Potassium
ME4SD6	Barium, Potassium
ME4SD7	Barium, Potassium
ME4SD9	Barium, Potassium
ME4SE0	Barium, Potassium
ME4SE1	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

For the laboratory duplicate, the RPD for aluminum and manganese exceeded the quality control QC limits. Interferences are suspected.

Metal analytes	ME4SC5 mg/kg	ME4SC6 mg/kg	Both Results >5xCR	%RPD	Abs. Diff	Abs Diff Range

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

6. ICP ANALYSIS

The percent difference for aluminum exceeded the QC limits in the serial dilution. Interferences are suspected.

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SC3 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SB9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE0 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic sample has analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4SB9	Calcium
ME4SC0	Calcium
ME4SC2	Calcium
ME4SC3	Calcium
ME4SC4	Calcium

ME4SE1	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD. The following inorganic samples have analyte concentrations reported below the CRQL and are qualified "J".

ME4SB9	Antimony, Cadmium, Cobalt, Mercury, Potassium,
ME4SC0	Cadmium, Cobalt, Mercury, Potassium
ME4SC2	Cobalt, Mercury, Potassium
ME4SC3	Antimony, Beryllium, Cadmium, Mercury, Selenium
ME4SC4	Cobalt, Mercury, Potassium, Selenium
ME4SC5	Beryllium, Cobalt, Selenium, Silver

ME4SC6	Beryllium, Cobalt, Selenium
ME4SC7	Antimony, Beryllium, Cobalt, Selenium, Silver

ME4SE0	Beryllium, Cobalt, Selenium, Silver
ME4SE1	Beryllium, Cobalt, Selenium, Silver

Case Number: 39494 SDG Number: ME4SB9
Site Name: Lincoln Park Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SUBJECT: Review of Data
Received for Review on: 3/30/2010

FROM: Melody Jensen
Senior Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39494 SDG Number: ME4SC1

Number and Type of Samples: 7 Sediment Samples (Metals)

Sample Numbers: ME4SC1, ME4SG0, ME4SG1, ME4SG2, ME4SG3, ME4SG4, ME4SG7

Laboratory: A4 Scientific

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Seven (7) sediment samples labeled ME4RX7, ME4RX8, ME4RX9 ME4RY0, and ME4RY were shipped to A4 Scientific, Inc. All seven samples were collected on March 5, 2010, and were received at the facility at 4 °C on March 6, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SC1 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SG1/ME4SG4 as a field duplicate pair.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

No defects were found.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SC1	Barium, Potassium
ME4SG0	Barium, Potassium
ME4SG1	Barium, Potassium
ME4SG2	Barium, Potassium
ME4SG3	Barium, Potassium
ME4SG4	Barium, Potassium
ME4SG7	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found with the laboratory duplicate analysis.

Metal analytes	ME4SG1 mg/kg	ME4SG4 mg/kg	Both Results >5xCR	%RPD	Abs. Diff	Abs Diff Range

SDG SUMMARY

Sample Completeness and Receipt: Seventeen (17) sediment samples labeled ME4SE2 - ME4SE9 and ME4SF0 - ME4SF8 were shipped to A4 Scientific, Inc. Thirteen of the seventeen samples were collected on 3/4/2010 and the remaining four samples were collected on 3/5/2010. All seventeen (17) samples were received on 3/6/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SE2 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SE1/ME4SE2 as a field duplicate pair. Sample ME4SE1, the field duplicate for ME4SE2, was analyzed in SDG ME4SB9 and is qualified based on any QC failures in that SDG (as detailed in the data review report for SDG ME4SB9). Sample ME4SE2 was analyzed in the SDG reported here. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample.

The laboratory noted that the chain-of-custody only specified analysis of “total metals.” EPA directed that the laboratory also perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, ‘J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SE2	Barium, Potassium
ME4SE3	Barium, Potassium
ME4SE4	Barium, Potassium
ME4SE5	Barium, Potassium
ME4SE6	Barium, Potassium
ME4SE7	Barium
ME4SE8	Barium
ME4SE9	Barium
ME4SF0	Barium, Potassium
ME4SF1	Barium, Potassium
ME4SF2	Barium, Potassium
ME4SF3	Barium, Potassium
ME4SF4	Barium, Potassium
ME4SF5	Barium, Potassium
ME4SF6	Barium, Potassium
ME4SF7	Barium, Potassium
ME4SF8	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

Sample ME4SE1, field duplicate for ME4SE2, was analyzed in SDG ME4SB9 and is qualified based on any QC failures in that SDG (as detailed in the data review report for SDG ME4SB9).

The following table contains data for a sample/field duplicate pair in this SDG.

Metal Analytes	ME4SE1 (mg/kg)	ME4SE2 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	7300	6090	Y	18.1	-	-
Antimony	ND	ND	NA	NA	NA	NA

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SUBJECT: Review of Data
Received for Review on: 3/30/2010

FROM: Ted Derheimer
Environmental Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39494 MRN: NA SDG Number: ME4SG5

Number and Type of Samples: 2 Water Samples (Metals)

Sample Numbers: ME4SG5, ME4SG6

Laboratory: A4 Scientific, Inc.:

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Two (2) water samples labeled ME4SG5, and ME4SG6 were shipped to A4 Scientific, Inc. Both water samples were collected on 3/5/2010, and were received at the facility on 3/6/2010, intact, and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As per the scheduling notification lab QC (i.e., matrix spike, duplicate, and serial dilution) was not required for these two water samples. Because these samples are equipment blanks, no samples were designated to be used for laboratory QC.

No field duplicates were collected for this SDG.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-“. In the special case where a result is affected by a “J+” and a “J-“ flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is ≥ MDL, but ≤ CRQL. The detected sample results are also ≥ MDL, but ≤ CRQL and are qualified "U" and the sample results are raised to the CRQL.

ME4SG5 Mercury
ME4SG6 Mercury

The following inorganic samples are associated with an CCB concentration which is ≥ MDL, but ≤ CRQL. The detected sample results are also ≥ MDL, but ≤ CRQL and are qualified "U" and the sample results are raised to the CRQL.

ME4SG5 Mercury
ME4SG6 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic samples were found in the SMO NFG report to have aqueous laboratory control sample percent recoveries above the upper limit of the expanded criteria. We were unable to confirm that the recoveries were above the upper limit of the expanded criteria and therefore no sample results are qualified based on this issue.

ME4SG5 Mercury
ME4SG6 Mercury

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

6. ICP ANALYSIS

No defects were found for the ICP analysis.

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".
ME4SG5 Mercury
ME4SG6 Mercury

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SG8-ME4SG9, ME4SH0-ME4SH9, and ME4SJ0-ME4SJ7 were shipped to Bonner Analytical Testing Company. All twenty sediment samples were collected on 4/14/2010. Samples ME4SG80-ME4SG9 and ME4SH0-ME4SH3 were received at the facility on 4/15/2010, intact at 4 °C, and samples ME4SH4-ME4SH9 and ME4SJ0-ME4SJ7 were received at the facility on 4/16/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SH9 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SG9/ME4SH0, ME4SH2/ME4SH3, and ME4SJ3/ME4SH4 as a field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SG8	Sodium
ME4SG9	Sodium
ME4SH0	Sodium
ME4SH2	Sodium
ME4SJ2	Sodium
ME4SJ5	Sodium

ME4SH1	Potassium, Sodium
ME4SH3	Potassium, Sodium
ME4SH4	Potassium, Sodium
ME4SH5	Potassium, Sodium
ME4SH6	Potassium, Sodium
ME4SH7	Potassium, Sodium
ME4SH8	Potassium, Sodium
ME4SH9	Potassium, Sodium
ME4SJ0	Potassium, Sodium
ME4SJ1	Potassium, Sodium
ME4SJ3	Potassium, Sodium
ME4SJ4	Potassium, Sodium
ME4SJ6	Potassium, Sodium
ME4SJ7	Potassium, Sodium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SG8	Potassium
ME4SG9	Potassium
ME4SH0	Potassium
ME4SH2	Potassium
ME4SJ2	Potassium
ME4SJ5	Potassium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SG8	Cadmium
ME4SG9	Cadmium
ME4SH0	Cadmium
ME4SH2	Cadmium
ME4SH7	Cadmium
ME4SH8	Cadmium
ME4SH9	Cadmium
ME4SJ5	Cadmium
ME4SJ6	Cadmium
ME4SJ7	Cadmium

ME4SH1	Barium, Cadmium, Nickel, Potassium
ME4SH3	Barium, Cadmium, Nickel, Potassium
ME4SH4	Barium, Cadmium, Nickel, Potassium

ME4SH5	Barium, Cadmium, Potassium

ME4SJ0	Barium, Cadmium
ME4SJ3	Barium, Cadmium
ME4SJ4	Barium, Cadmium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SG8	Barium, Nickel, Potassium, Zinc
ME4SG9	Barium, Nickel, Potassium, Zinc
ME4SH0	Barium, Nickel, Potassium, Zinc
ME4SH2	Barium, Nickel, Potassium, Zinc

ME4SH1	Zinc
ME4SH3	Zinc
ME4SH4	Zinc

ME4SH5	Nickel, Zinc

ME4SH6	Cadmium

ME4SJ1	Barium, Cadmium
ME4SJ2	Barium, Cadmium

ME4SJ5	Barium
ME4SJ6	Barium
ME4SJ7	Barium

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a matrix spike recovery which is outside primary low criteria. Sample results < MDL are flagged “UJ”.

ME4SG8	Antimony

ME4SG9	Antimony
ME4SH0	Antimony
ME4SH1	Antimony
ME4SH2	Antimony
ME4SH3	Antimony
ME4SH4	Antimony
ME4SH5	Antimony
ME4SH6	Antimony
ME4SH7	Antimony
ME4SH8	Antimony
ME4SH9	Antimony
ME4SJ0	Antimony
ME4SJ1	Antimony
ME4SJ2	Antimony
ME4SJ3	Antimony
ME4SJ4	Antimony
ME4SJ5	Antimony
ME4SJ6	Antimony
ME4SJ7	Antimony

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) of ≤ 35%. Associated sample results ≥ CRQL are flagged "J".

ME4SG8	Chromium
ME4SG9	Chromium
ME4SH0	Chromium
ME4SH1	Chromium
ME4SH2	Chromium
ME4SH3	Chromium
ME4SH4	Chromium
ME4SH5	Chromium
ME4SH6	Chromium
ME4SH7	Chromium
ME4SH8	Chromium
ME4SH9	Chromium
ME4SJ0	Chromium
ME4SJ1	Chromium
ME4SJ2	Chromium
ME4SJ3	Chromium
ME4SJ4	Chromium
ME4SJ5	Chromium
ME4SJ6	Chromium
ME4SJ7	Chromium

Samples ME4SG9/ME4SH0, ME4SH2/ME4SH3, and ME4SJ3/ME4SH4 were identified as field duplicates**.** Results are summarized in the following tables.

ME4SG9 and ME4SH0

Metal Analytes	ME4SG9 (mg/kg)	ME4SH0 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range

Vanadium	12.5	14.5	N	-	2	≤2xCRQL
Zinc	52.7	49	Y	7.3	-	-

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4SH2/ME4SH3 Aluminum, Copper, Lead, Zinc

ME4SJ3/ME4SJ4 Aluminum, Chromium, Lead

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SG8 Potassium
ME4SG9 Potassium
ME4SH0 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SG8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SG9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SJ1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SG8	Beryllium, Cadmium, Selenium, Sodium
ME4SG9	Cadmium, Cobalt, Selenium, Sodium
ME4SH0	Beryllium, Cadmium, Cobalt, Selenium, Sodium
ME4SH1	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH2	Cadmium, Cobalt, Selenium, Sodium
ME4SH3	Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH4	Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH5	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SH6	Cobalt, Potassium, Selenium, Sodium
ME4SH7	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SH8	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium

ME4SH9	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ0	Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Selenium, Sodium
ME4SJ1	Cobalt, Potassium, Selenium, Sodium
ME4SJ2	Beryllium, Cobalt, Selenium, Sodium
ME4SJ3	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ4	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ5	Cadmium, Cobalt, Selenium, Sodium
ME4SJ6	Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ7	Cadmium, Cobalt, Potassium, Selenium, Sodium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SJ8, ME4SJ9, ME4SK0 - ME4SK9, ME4SK9D, ME4SK9S, and ME4SL0 - ME4SL8 were shipped to Bonner Analytical Testing Company. The samples were collected on April 14, 2010 and April 15, 2010, and were received at the facility on April 16, 2010, intact, and at 4 °C

Sample Analysis and Data Review: The sample was analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SK9 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SL2/ME4L3 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1 and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SJ8	Potassium
ME4SJ9	Potassium
ME4SK0	Potassium
ME4SK2	Potassium
ME4SK3	Potassium
ME4SK4	Potassium
ME4SK5	Potassium
ME4SK6	Potassium
ME4SK8	Potassium
ME4SK9	Potassium
ME4SL0	Potassium
ME4SL2	Potassium
ME4SL3	Potassium
ME4SL4	Potassium
ME4SL5	Potassium
ME4SL6	Potassium
ME4SL7	Potassium
ME4SL8	Potassium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SK1	Potassium
ME4SL1	Potassium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SK6	Barium
ME4SK8	Barium
ME4SL2	Barium, Cadmium
ME4SL3	Barium, Cadmium
ME4SL4	Barium, Cadmium
ME4SL5	Barium, Cadmium
ME4SL7	Barium, Cadmium

ME4SL6 Cadmium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SK9 Barium
ME4SL0 Barium, Cadmium
ME4SL1 Barium, Cadmium
ME4SL6 Barium
ME4SL8 Barium, Cadmium

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4SJ8 Mercury
ME4SJ9 Mercury
ME4SK0 Mercury
ME4SK1 Mercury
ME4SK2 Mercury
ME4SK3 Mercury
ME4SK4 Mercury
ME4SK5 Mercury
ME4SK6 Mercury
ME4SK8 Mercury
ME4SK9 Mercury
ME4SL0 Mercury
ME4SL1 Mercury
ME4SL2 Mercury
ME4SL3 Mercury
ME4SL4 Mercury
ME4SL5 Mercury
ME4SL6 Mercury
ME4SL7 Mercury
ME4SL8 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

The following inorganic samples are associated with a matrix spike recovery which is outside of the expanded low criteria. Sample results > MDL are flagged "J", and sample results ≤ MDL are flagged "UJ".

ME4SJ8 Antimony
ME4SJ9 Antimony
ME4SK0 Antimony
ME4SK1 Antimony
ME4SK2 Antimony
ME4SK3 Antimony
ME4SK4 Antimony
ME4SK5 Antimony

ME4SK6	Antimony
ME4SK8	Antimony
ME4SK9	Antimony
ME4SL0	Antimony
ME4SL1	Antimony
ME4SL2	Antimony
ME4SL3	Antimony
ME4SL4	Antimony
ME4SL5	Antimony
ME4SL6	Antimony
ME4SL7	Antimony
ME4SL8	Antimony

The following inorganic samples are associated with a matrix spike recovery which is outside of the primary low criteria. However, post-digest spike recovery was more than or equal to the low limit. Sample results > MDL are flagged "J".

ME4SJ8	Chromium, Zinc
ME4SJ9	Chromium, Zinc
ME4SK0	Chromium, Zinc
ME4SK1	Chromium, Zinc
ME4SK2	Chromium, Zinc
ME4SK3	Chromium, Zinc
ME4SK4	Chromium, Zinc
ME4SK5	Chromium, Zinc
ME4SK6	Chromium, Zinc
ME4SK8	Chromium, Zinc
ME4SK9	Chromium, Zinc
ME4SL0	Chromium, Zinc
ME4SL1	Chromium, Zinc
ME4SL2	Chromium, Zinc
ME4SL3	Chromium, Zinc
ME4SL4	Chromium, Zinc
ME4SL5	Chromium, Zinc
ME4SL6	Chromium, Zinc
ME4SL7	Chromium, Zinc
ME4SL8	Chromium, Zinc

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) of ≤ 35%. Associated sample results ≥ CRQL are flagged "J".

ME4SJ8	Lead, Zinc
ME4SJ9	Lead, Zinc
ME4SK0	Lead, Zinc
ME4SK1	Lead, Zinc
ME4SK2	Lead, Zinc
ME4SK3	Lead, Zinc

ME4SK4	Lead, Zinc
ME4SK5	Lead, Zinc
ME4SK6	Lead, Zinc
ME4SK8	Lead, Zinc
ME4SK9	Lead, Zinc
ME4SL0	Lead, Zinc
ME4SL1	Lead, Zinc
ME4SL2	Lead, Zinc
ME4SL3	Lead, Zinc
ME4SL4	Lead, Zinc
ME4SL5	Lead, Zinc
ME4SL6	Lead, Zinc
ME4SL7	Lead, Zinc
ME4SL8	Lead, Zinc

Samples ME4SL2/ME4SL3 were identified as a field duplicate pair. Results are summarized in the following table:

ME4SL2 and ME4SL3

Metal	ME4SL2 (mg/kg)	ME4SL3 (mg/kg)	Both Results >5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	1610	1240	Y	26	-	-
Antimony	ND	ND	N	-	0	≤2xCRQL
Arsenic	0.89	1	NA	NA	NA	NA
Barium	23.6	23.8	N	-	0.2	≤2xCRQL
Beryllium	0.057	0.065	NA	NA	NA	NA
Cadmium	0.59	0.59	N	-	0	≤2xCRQL
Calcium	75700	82000	Y	8	-	-
Chromium	8.1	7.6	Y	6.4	-	-
Cobalt	2.4	2.3	NA	NA	NA	NA
Copper	4.8	4.6	N	-	0.2	≤2xCRQL
Iron	4020	3560	Y	12.1	-	-
Lead	10.8	15.9	Y	38.2	-	-
Magnesium	34500	34900	Y	1.2	-	-
Manganese	272	227	Y	18	-	-
Mercury	ND	0.058	N	-	0.01	≤2xCRQL
Nickel	4	3.3	NA	NA	NA	NA
Potassium	590	594	N	-	4	≤2xCRQL
Selenium	ND	ND	NA	NA	NA	NA
Silver	ND	ND	NA	NA	NA	NA
Sodium	134	147	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	5.4	5.5	NA	NA	NA	NA
Zinc	30.4	23.3	N	-	7.1	≤2xCRQL

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4SL2/ME4SL3 Lead

6. ICP ANALYSIS

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4SJ8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SJ9	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK0	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK1	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK2	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK3	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK4	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK5	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK6	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK9	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL0	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL1	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL2	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL3	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL4	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL5	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL6	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL7	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SJ8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SL1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SJ8	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SJ9	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK0	Beryllium, Cobalt, Mercury, Sodium
ME4SK1	Beryllium, Cobalt, Silver, Sodium
ME4SK2	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK3	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK4	Arsenic, Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK5	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK6	Arsenic, Beryllium, Cadmium, Cobalt, Nickel, Sodium
ME4SK8	Beryllium, Cadmium, Cobalt, Mercury, Sodium, Vanadium
ME4SK9	Beryllium, Cobalt, Mercury, Sodium
ME4SK9D	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SL0	Beryllium, Cobalt, Mercury, Sodium
ME4SL1	Beryllium, Cobalt, Sodium

ME4SL2	Arsenic, Beryllium, Cobalt, Nickel, Sodium, Vanadium
ME4SL3	Arsenic, Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL4	Arsenic, Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL5	Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL6	Beryllium, Cobalt, Mercury, Sodium
ME4SL7	Arsenic, Beryllium, Cobalt, Nickel, Sodium, Vanadium
ME4SL8	Beryllium, Cobalt, Mercury, Sodium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SL, ME4SM0-ME4SM9, and ME4SN0-ME4SN8 were shipped to Bonner Analytical Testing Co. Six (6) samples labeled ME4SL, ME4SM0-ME4SM4 were collected on 04/15/2010 and were received at the facility on 04/16/2010, intact and at 4 °C. Fourteen (14) samples labeled ME4SM5-ME4SM9 and ME4SN0-ME4SN8 were collected on 04/15/2010 and were received at the facility on 04/17/2010, intact and at 4 °C

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4SM9 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SM0/ME4SM, ME4SM6/ME4SM71 and ME4SN5/ME4SN6 as field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1a and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. Samples > CRQL are qualified "J-". Samples < MDL are qualified "UJ-".

ME4SL9	Mercury
ME4SM0	Mercury
ME4SM1	Mercury
ME4SM2	Mercury
ME4SM3	Mercury
ME4SM4	Mercury
ME4SM5	Mercury

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

The following inorganic sample/field duplicate pairs have a result > 5xCRQL and an absolute difference ≥ 4xCRQL. These results are qualified “R”.

ME4SM0/ ME4SM1 Zinc

ME4SN5/ ME4SN6 Copper

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results were qualified based on this issue.

ME4SM4	Potassium
ME4SN7	Sodium

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥MDL for all analytes (except mercury) are qualified "J+". Results <MDL are not qualified.

ME4SL9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SM8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SL9	Barium, Beryllium, Cadmium, Cobalt, Sodium
ME4SM3	Barium, Beryllium, Cadmium, Cobalt, Sodium

ME4SM0	Arsenic, Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Sodium, Vanadium
ME4SM1	Arsenic, Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Sodium
ME4SN5	Arsenic, Cadmium, Cobalt, Mercury, Nickel, Potassium, Sodium
ME4SM2	Beryllium, Cadmium, Cobalt, Sodium
ME4SM4	Beryllium, Cobalt, Mercury, Sodium
ME4SM5	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SM6	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SN2	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SM7	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SM8	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN0	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN1	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN8	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SM9	Beryllium, Cobalt, Potassium, Silver, Sodium
ME4SN3	Beryllium, Cobalt, Potassium, Sodium
ME4SN4	Beryllium, Cobalt, Potassium, Sodium
ME4SN6	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SN7	Beryllium, Cobalt

8. Serial Dilution

The following inorganic samples are associated with an ICP serial dilution percent difference which is not in criteria. The detected serial dilution result is less than the initial sample result. Hits are qualified "J" and non-detects are qualified "UJ".

ME4SL9	Arsenic
ME4SM0	Arsenic
ME4SM1	Arsenic
ME4SM2	Arsenic
ME4SM3	Arsenic
ME4SM4	Arsenic
ME4SM5	Arsenic
ME4SM6	Arsenic
ME4SM7	Arsenic
ME4SM8	Arsenic
ME4SM9	Arsenic
ME4SN0	Arsenic
ME4SN1	Arsenic
ME4SN2	Arsenic
ME4SN3	Arsenic
ME4SN4	Arsenic

ME4SN5	Arsenic
ME4SN6	Arsenic
ME4SN7	Arsenic
ME4SN8	Arsenic

The following inorganic samples are associated with an ICP serial dilution percent difference which is not in criteria. The serial dilution result is greater than the sample result, indicating a potential negative interference. Hits are qualified "J-" and non-detects are qualified "UJ-".

ME4SL9	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM0	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM1	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM2	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM3	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM4	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM5	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM6	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM7	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM8	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM9	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN0	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN1	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN2	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN3	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN4	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN5	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN6	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN7	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN8	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

DATE: 6/14/2010

SUBJECT: Review of Data
Received for Review on: 5/11/2010

FROM: Ted Derheimer
Environmental Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39668 MRN: NA SDG Number: ME4SN9

Number and Type of Samples: 17 Sediment Samples (Metals)

Sample Numbers: ME4SN9, ME4SP0, ME4SP1, ME4SP2, ME4SP3, ME4SP4, ME4SP5, ME4SP6, ME4SP7. ME4SP8, ME4SP9, ME4SQ0, ME4SQ1, ME4SQ2, ME4SQ3, ME4SQ4, ME4SQ5

Laboratory: Bonner Analytical Testing Company.

SDG SUMMARY

Sample Completeness and Receipt: Seventeen (17) sediment samples labeled ME4SN9, ME4SP0-ME4SP9, and ME4SQ0-ME4SQ5 were shipped to Bonner Analytical Testing Company. All seventeen sediment samples were collected on 4/16/2010 and were received at the facility on 4/17/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SP6 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SP0/ME4SP1 and ME4SP8/ME4SP9 as a field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SN9	Potassium, Sodium
ME4SP0	Potassium, Sodium
ME4SP1	Potassium, Sodium
ME4SP2	Potassium, Sodium
ME4SP3	Potassium, Sodium
ME4SP4	Potassium, Sodium
ME4SP5	Potassium, Sodium
ME4SQ2	Potassium, Sodium
ME4SP6	Antimony, Sodium
ME4SQ1	Potassium
ME4SP7	Sodium
ME4SP8	Sodium
ME4SP9	Sodium
ME4SQ0	Sodium
ME4SQ3	Sodium
ME4SQ4	Sodium
ME4SQ5	Sodium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SP6	Potassium
ME4SP7	Potassium
ME4SP8	Potassium
ME4SP9	Potassium
ME4SQ0	Potassium
ME4SQ3	Potassium
ME4SQ4	Potassium
ME4SQ5	Potassium
ME4SQ1	Sodium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SN9	Barium, Potassium

ME4SP0	Barium, Potassium
ME4SP1	Barium, Potassium
ME4SP3	Barium, Potassium
ME4SP4	Barium, Potassium
ME4SP2	Potassium
ME4SP5	Potassium
ME4SP6	Antimony

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SN9	Iron
ME4SP0	Iron
ME4SP1	Iron
ME4SP3	Iron
ME4SP4	Iron
ME4SP2	Barium, Iron
ME4SP5	Barium, Iron
ME4SP6	Barium, Iron, Potassium
ME4SP7	Barium
ME4SP8	Barium
ME4SP9	Barium
ME4SQ0	Barium

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a matrix spike recovery which is outside of the expanded low criteria. Sample results > MDL are flagged "J", and sample results ≤ MDL are flagged "UJ".

ME4SN9	Antimony
ME4SP0	Antimony
ME4SP1	Antimony
ME4SP2	Antimony
ME4SP3	Antimony
ME4SP4	Antimony
ME4SP5	Antimony
ME4SP7	Antimony
ME4SP8	Antimony
ME4SP9	Antimony
ME4SQ0	Antimony
ME4SQ1	Antimony
ME4SQ2	Antimony
ME4SQ3	Antimony
ME4SQ4	Antimony
ME4SQ5	Antimony

The following inorganic sample results are associated with a matrix spike recovery which is below low criteria. However, the sample result is also associated with a blank contamination, for

which it has been qualified "U" and its result raised to the CRQL. Therefore, the result for this sample was not further qualified for the matrix spike recovery.

ME4SP6 Antimony

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results that have an absolute difference (AD) of greater than 2X the CRQL between the sample and duplicate values. Associated sample results ≥ MDL and < 5X CRQL are flagged "J" and samples < MDL are flagged "UJ".

ME4SN9 Mercury
ME4SP0 Mercury
ME4SP1 Mercury
ME4SP2 Mercury
ME4SP3 Mercury
ME4SP4 Mercury
ME4SP5 Mercury
ME4SP6 Mercury
ME4SP7 Mercury
ME4SP8 Mercury
ME4SP9 Mercury
ME4SQ0 Mercury
ME4SQ1 Mercury
ME4SQ2 Mercury
ME4SQ3 Mercury
ME4SQ4 Mercury
ME4SQ5 Mercury

Samples ME4SP0/ME4SP1 and ME4SP8/ME4SP9 were identified as field duplicates**.** Results are summarized in the following tables.

ME4SP0/ME4SP1

Metal Analytes	ME4SP0 (mg/kg)	ME4SP1 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	1380	1400	Y	1.4	-	-
Antimony	ND	ND	N	-	0.2	≤2xCRQL
Arsenic	1.2	1.1	NA	NA	NA	NA
Barium	15.8	13	NA	NA	NA	NA
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	0.18	0.19	NA	NA	NA	NA
Calcium	71600	79000	Y	9.8	-	-
Chromium	8.9	8.3	Y	7	-	-
Cobalt	2.6	3.8	NA	NA	NA	NA
Copper	3.8	4	N	-	0.2	≤2xCRQL
Iron	4090	4190	Y	2.4	-	-
Lead	35.1	138	Y	118.9	-	-

Metal Analytes	ME4SP0 (mg/kg)	ME4SP1 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Manganese	208	241	Y	14.7	-	-
Mercury	ND	0.063	N	-	0.07	≤2xCRQL
Nickel	3.8	3.9	NA	NA	NA	NA

Zinc	286	315	Y	9.7	-	-

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SP6	Potassium
ME4SQ5	Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SN9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SQ5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4SN9	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP0	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP1	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP2	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP3	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP4	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP5	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP6	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP7	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP8	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP9	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ0	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ1	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ2	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ3	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ4	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ5	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SN9	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SP0	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SP1	Arsenic, Barium, Cadmium, Cobalt, Mercury, Nickel, Potassium, Sodium, Vanadium
ME4SP2	Cadmium, Cobalt, Mercury, Potassium, Selenium, Sodium
ME4SP3	Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Selenium, Sodium
ME4SP4	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium
ME4SP5	Cobalt, Potassium, Selenium, Sodium
ME4SP6	Antimony, Beryllium, Selenium, Sodium, Thallium
ME4SP7	Beryllium, Mercury, Selenium, Silver, Sodium
ME4SP8	Beryllium, Cobalt, Selenium, Sodium

ME4SP9	Beryllium, Cobalt, Selenium, Sodium
ME4SQ0	Beryllium, Selenium, Sodium
ME4SQ1	Cobalt, Potassium, Selenium
ME4SQ2	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SQ3	Beryllium, Cobalt, Selenium, Silver, Sodium
ME4SQ4	Beryllium, Selenium, Sodium
ME4SQ5	Beryllium, Selenium, Silver, Sodium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Case Number: 39668 SDG Number: ME4SQ6
Site Name: Lincoln Park Laboratory: Bonner

SDG Summary

Sample Completeness and Receipt: One (1) sediment sample labeled ME4SQ6 was shipped to Bonner Analytical Testing Company. The sample was collected on April 16, 2010, and was received at the facility on April 17, 2010, intact, and at 4 °C

Sample Analysis and Data Review: The sample was analyzed for metals according to CLP SOW ILM05.4. Mercury analysis was performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no field duplicate sets were identified.

As per the scheduling notification, laboratory QC (i.e., matrix spike, duplicate, and serial dilution) was not required for the water sample. The laboratory did analyze a laboratory control sample (LCS), per the CLP SOW, and its recoveries were well within the acceptance limits, indicating that laboratory performance was under control. No results were flagged due to the lack of MS or DUP analysis.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment sample was reviewed for holding time violations using criteria developed for water samples. Data on sample pH was not available. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

The sample is associated with an ICB concentration which is less than or equal to the CRQL. The detected sample results was also less than or equal to the CRQL. Detects are qualified "U." Sample results are raised to the CRQL.

ME4SQ6 Sodium

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

Laboratory QC (i.e., matrix spike) was not required for the water sample. No defects were found with the laboratory control sample (LCS).

5. LABORATORY AND FIELD DUPLICATE

Laboratory QC (i.e., duplicate) was not required for the water sample.

6. ICP ANALYSIS

No defects were found.

7. SAMPLE RESULTS

The sample in this SDG was analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD. The following inorganic samples have analyte concentrations reported below the CRQL and are qualified "J".

ME4SQ6 Sodium, Zinc

Case Number: 39668 SDG Number: ME4SQ6
Site Name: Lincoln Park Laboratory: Bonner

Case Number: 39668 SDG Number: ME4SQ7
Site Name: Lincoln Park Laboratory: Bonner

SDG SUMMARY

Sample Completeness and Receipt: One (1) Sediment sample labeled ME4SQ7 was shipped to Bonner Analytical Testing Company. The sediment sample was collected on 4/19/2010, and was received at the facility on 4/20/2010, intact, and at 4.5 °C.

Sample Analysis and Data Review: The sample was prepared using the Toxicity Characteristic Leaching Procedure (TCLP) according to MA1705.0 and analyzed for the 8 "TC" metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure. Because the sample was subjected to TCLP, and the aqueous leachate was analyzed, the results were reported in weight/volume (w/v) units, as required by the TCLP.

Sample ME4SQ7 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicate sets were identified.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

Case Number: 39668 SDG Number: ME4SQ7

Case Number: 39668 SDG Number: ME4SQ9
Site Name: Lincoln Park Laboratory: Bonner

SDG SUMMARY

Sample Completeness and Receipt: One (1) water sample labeled ME4SQ9 was shipped to Bonner Analytical Testing Company. The water sample was collected on 4/23/2010, and was received at the facility on 4/24/2010, intact, and at 6.7 °C.

Sample Analysis and Data Review: The sample was prepared using the Toxicity Characteristic Leaching Procedure (TCLP) according to MA1705.0 and analyzed for the 8 "TC" metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure. Because the sample was subjected to TCLP, and the aqueous leachate was analyzed, the results were reported in weight/volume (w/v) units, as required by the TCLP.

Although MA1705.0 specified that a matrix spike sample be prepared and analyzed, the laboratory did not provide matrix spike results, noting in the data package narrative that "As per scheduling no MS and DUP are required." CSC has not located any scheduling information that confirms the laboratory's assertion about the MS and DUP, but we have not flagged the results due to the lack of an MS or DUP analysis. The laboratory did analyze a laboratory control sample (LCS), per the CLP SOW, and its recoveries were within the acceptance limits, indicating that laboratory performance was under control.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no field duplicate sets were identified.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

Data Usability Evaluation — Lincoln Park/Milwaukee River Channel Sediments Site — Phase 2 Remedial Investigation

2010 Data Quality Evaluation
Lincoln Park/Milwaukee River Channel Sediments Site—Milwaukee, Wisconsin
WA No. 064-RICO-2508 / Contract No. EP-S5-06-01

PREPARED FOR: Brenda Jones /USEPA, GLNPO
Louis Blume/USEPA, GLNPO

PREPARED BY: Heather Hodach/CH2M HILL

COPIES TO: Dan Plomb/CH2M HILL
Huck Raddemann/CH2M HILL
Adrienne Korpela/CH2M HILL

DATE: August 27, 2010

Introduction

The objective of the Data Quality Evaluation memorandum is to assess the data quality of analytical results for samples collected at the Lincoln Park/Milwaukee River Channel Sediment site, during February, March, and April 2010. Samples were collected and analyzed with the objective to verify existing data, fill identified data gaps, and collect site-specific information to support the evaluation of remedial alternatives and the subsequent development of a remedial design. Individual method requirements and guidelines from the *Quality Assurance Project Plan* (CH2M HILL, 2010), *Contract Laboratory Program National Functional Guidelines for Superfund Organic Methods Data Review* (USEPA, 2008), and *Contract Laboratory Program National Functional Guidelines for Inorganic Data Review* (USEPA, 2004) were used in this assessment.

This report is intended as a general data quality assessment designed to summarize data issues.

Analytical Data

The following are the analytical laboratory analyses for samples collected:

- 267 sediment samples from 88 locations (exclusive of field quality control [QC] samples) were analyzed for one or more of the following: polychlorinated biphenyl (PCB) Aroclors, pesticides, semivolatile organic compounds (SVOCs), metals, total organic carbon (TOC), and grain size.
- 27 field duplicate samples were collected at 25 locations for the same analyses as the sediment sample at the given location.

- 29 sediment samples from 23 locations were selected for PCB congener analysis. The congener data were sent for analysis in August 2010 and will be evaluated separately at a later date.
- Three equipment blanks were collected during the sampling events to evaluate field sampling and decontamination procedures.
- Waste characterization analysis (toxicity characteristic leaching procedure [TCLP]) samples were collected from each of the two 55-gallon waste drums. One sediment and one aqueous sample were collected.

The PCB Aroclor, PCB congener, metals, pesticide, and SVOC data were analyzed by the USEPA Contract Laboratory Program (CLP) and subsequently reviewed by CSC. Appendix A contains the case narratives prepared by CSC during data reviews. The findings of the reviews are summarized in the following paragraphs.

The TOC and grain size data were analyzed by the USEPA Central Regional Laboratory (CRL) and reviewed by CH2M HILL. See Appendix B for the TOC and grain size data summary.

Samples were collected and shipped by overnight carrier to the laboratories for analysis. Selected samples were analyzed for one or more of the analytes/methods in Table 1.

TABLE 1
Analytical Parameters

Parameter	Method	Laboratory
PCB Aroclors	SOM01.2 Modified	CLP
PCB Congeners	CBC01.2	CLP
SVOCs	SOM01.2 Modified	CLP
Pesticides	SOM01.2 Modified	CLP
Target Analyte List Metals	ILM05.4	CLP
Total Organic Carbon	SOP – AIG009 Rev#5.1	CRL
Grain Size	SOP – AIG038A Rev#00&Rev#02	CRL
Waste Characterization		
Total PCB Aroclors	SOM01.2 Modified	CLP
TCLP Volatile Organic Compounds	SOM01.2 Modified	CLP
TCLP SVOC	SOM01.2 Modified	CLP
TCLP Pesticides	SOM01.2 Modified	CLP
TCLP Metals	ILM05.4 Modified	CLP

The assessment of data included a review of the following:

- Chain-of-custody documentation

- Holding-time compliance
- Required QC samples at the specified frequencies
- Flagging for method blanks
- Laboratory control spiking samples
- Surrogate spike recoveries for organic analyses
- Analytical spike data
- Matrix spike/matrix spike duplicate samples on a site/location basis
- Equipment blank samples
- Field duplicate samples
- Trip blank samples

Findings

The following sections summarize the data validation findings and usability of the final reportable results. The sample numbers and locations do not include quality assurance/QC samples.

PCB Aroclor and PCB Congener Data

PCB Aroclor data were assessed for nine Aroclors from 267 sediment samples collected at 88 locations, resulting in 2,403 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the PCB Aroclor data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the method detection limit (MDL) and the reporting limit (RL).

Thirty eight of the PCB Aroclor results (1.6%) from 29 samples were rejected, which consisted of one or more of the following nine analytes: Aroclor 1016, Aroclor 1221, Aroclor 1232, Aroclor 1242, Aroclor 1248, Aroclor 1254, Aroclor 1260, Aroclor 1262, and Aroclor 1268, and should not be used to make project decisions. Most of the data were rejected due to a percent difference (>100%) between the primary and confirmation columns. With a variation of >100%, the concentration could not be reliably established. Some parameters that were nondetects were rejected due to extremely low surrogate recoveries, which could result in the data being biased very low.

The PCB congener data were sent to the laboratory for analysis at the beginning of August 2010. The analytical results will be reviewed and reported at a later date.

Pesticide Data

Pesticide data were assessed for 21analytes from 267 sediment samples collected at 88 locations, resulting in 5,607 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the pesticide data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

Three-hundred and fifty-one of the pesticide results (6.3%) from 127 samples were rejected, which consisted of one or more of the following 17 analytes: 4,4'-DDD, 4,4'-DDT, 4,4'-DDE, alpha-BHC, alpha-chlordane, beta-BHC, beta-chlordane, delta-BHC, dieldrin, endosulfan I, endosulfan II, endosulfan sulfate, endrin, endrin aldehyde, endrin ketone, gamma-BHC, heptachlor, heptachlor epoxide, and methoxychlor, and should not be used to make project decisions. Most of the data were rejected due to a percent difference (>100%) between the primary and confirmation columns. With a variation of >100%, the concentration could not be reliably established.

Semivolatile Data

Polycyclic aromatic hydrocarbon data were assessed for 17 analytes from 267 sediment samples collected at 88 locations resulting in 4,539 results. In addition, 68 of the samples from 44 locations were assessed for 50 semivolatile analytes resulting in 3,400 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the semivolatile data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

None of the reported SVOC results were rejected. One hundred percent of the SVOC data, as qualified, can be used to make project decisions.

Metals Data

Metals data were assessed for 23 analytes from 267 sediment samples collected at 88 locations, resulting in 6,141 results. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

In summary of the metals data, J or UJ qualifiers were applied to sample results that were potentially affected by QC deficiencies. J qualifiers were also applied to sample results that were reported between the MDL and the RL.

Nineteen of the metals results (0.3%) from 17 samples were rejected, which consisted of one or more of the following analytes: antimony, copper, and zinc, and should not be used to make project decisions. Most of the data were rejected due to a matrix spike recovery outside the expanded low criteria and/or a post-digestion spike less than the low limit, which could result in the data being biased very low. The copper and zinc results were rejected due to a sample in a field duplicate pair having >5 times the contract-required quantification limit and an absolute difference of >4 times the contract-required quantification limit, which could result in the data being biased very high.

TCLP Data

One sample was collected from each of the two 55-gallon waste drums: one sediment, one aqueous. The data were analyzed through the CLP and reviewed by the USEPA contractor, CSC.

Both sample results for PCB Aroclor 1254 were rejected and should not be used to make project decisions. The data were rejected due to a percent difference >100 percent between the primary and confirmation columns. With a variation of >100 percent, the

concentration could not be reliably established. Some parameters that were nondetects were rejected due to extremely low surrogate recoveries, which could result in the data being biased very low

Overall Assessment

The final activity in the data quality evaluation is an assessment of whether the data meets the data quality objectives. The goal of the assessment was to demonstrate that a sufficient number of representative samples were collected, and the resulting analytical data can be used to support the decision making process. The following summary highlights the data evaluation findings for the above-defined events:

1. The completeness objective of 90 percent was met for all method/analyte combinations.
2. The precision and accuracy of the data, as measured by field and laboratory QC indicators, indicate that the data quality objectives were met.

COMPUTER SCIENCES CORPORATION
GREAT LAKES NATIONAL PROGRAM OFFICE

DATE: June 4, 2010

SUBJECT: Review of Data
Received for Review on: 7 April 2010

FROM: Caryn Wojtowicz
Senior Chemist

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1886.0, 1887.0, 1888.0

SDG Number: E4RS0

Number and Type of Samples: Sixteen (16) sediment samples

Sample Numbers: E4RS0 - E4RS2, E4RS4-E4RS9, E4RT2 - E4RT6, E4RX0 and E4RX1

Laboratory: ALS Laboratory Group (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Sixteen (16) sediment samples, labeled E4RS0 through E4RS2, E4RS4 through E4RS9, E4RT2 through E4RT6, E4RX0 and E4RX1, were shipped to ALS Laboratory Group (DataChem) located in Salt Lake City, Utah. All samples were collected on 2/25/2010 and were received intact on 2/27/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 8 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Sample results were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 data validation SOPs.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually sediment samples.

Some samples in this SDG were originally reported with some sample results below the sample specific MDLs with a "J" flag. The EDD, Form 1s and other data summary forms for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s

There is a slight difference between the CRQL values reported on the Form 1s and the values reported in the EDD for several samples, due to rounding errors. In addition, the Forms 1, 3 and 10 for some samples report compound concentrations below the MDL. The EDD contains the correct values. Specific instances are detailed in the Additional Information section of this review narrative.

GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data based on these discrepancies.

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples E4RT5 and E4RT6 as field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction as follows: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "NJ", "UJ", "U", "J".

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

All semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for Benzo(b)fluoranthene and Benzo(k)fluoranthene. Detected Benzo(b)fluoranthene and Benzo(k)fluoranthene are qualified J. Nondetected Benzo(b)fluoranthene and Benzo(k) remain unchanged.

E4RS0, E4RS1, E4RS1MS, E4RS1MSD, E4RS2, E4RS4, E4RS5, E4RS6, E4RS7, E4RS8, E4RS9, E4RT2, E4RT3, E4RT4, E4RT5, E4RT6, E4RT6DL, E4RX0, E4RX1

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria for the compound Benzo(b)fluoranthene. Detected Benzo(b)fluoranthene are qualified J. Nondetected Benzo(b)fluoranthene are qualified UJ.

E4RS7, E4RT5, E4RT6, E4RT6DL, E4RX1

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table:

Semivolatile analytes	E4RT5 µg/Kg	E4RT6 µg/Kg	%RPDs
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	130	150	14
Fluorene	200	260	26
Phenanthrene	1100	1600	37
Anthracene	240	290	19
Fluoranthene	1500	1900	24
Pyrene	1400	2600	60
Benzo(a)anthracene	900	1200	29
Chrysene	850	1200	34
Benzo(b)fluoranthene	1100	1600	37
Benzo(k)fluoranthene	290	490	51
Benzo(a)pyrene	800	1000	22
Indeno(1,2,3-cd)pyrene	390	420	7.4
Dibenzo(a,h)anthracene	120	120	0
Benzo(g,h,i)perylene	420	510	19

Benzo (k) fluoranthene has a % RPD exceeding 50%. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds remain unchanged.

E4RS1 Benzo(k)fluoranthene
E4RS1MS Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS1MSD Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene
E4RS2 Fluorene, Anthracene
E4RS4 Anthracene, Benzo(k)fluoranthene
E4RS5 Phenanthrene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo (g,h,i)perylene
E4RS6 Anthracene
E4RS7 Acenaphthene, Fluorene, Anthracene, Benzo(k)fluoranthene
E4RS8 Fluoranthene

E4RS9 Phenanthrene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT2 Acenaphthene, Dibenzo(a,h)anthracene
E4RT4 Anthracene, Benzo(k)fluoranthene
E4RT5 Acenaphthene, Dibenzo(a,h)anthracene
E4RT6 Acenaphthene, Dibenzo(a,h)anthracene
E4RT6DL Acenaphthene, Fluorene, Anthracene
E4RX0 Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1 Anthracene, Benzo(k)fluoranthene

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS4, E4RS5, ER4S7, E4RT6DL, E4RX1, E4RS1MS, E4RS1MSD

The following original semivolatile sample reported a concentration that exceeded the calibration range of the instrument and was flagged “E” by the laboratory. As per the NFG, the result was flagged “J”. A diluted sample analysis was performed as required. The results from the diluted sample should be used for result validation.

E4RT6 Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile SIM sample has an analyte concentration reported less than the CRQL. The associated method blank concentration is less than the CRQL. The detected compound is qualified U at the CRQL.

E4RT3 Benzo(k)fluoranthene

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

The semivolatile SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Sample levels were greater than10 times the spiking level; detected compounds are qualified J.

E4RS1, E4RS1MS, E4RS1MSD Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are field duplicates according to the field sampling plan**.** Results are summarized in the following tables:

Semivolatile SIM analytes	**E4RT5** µg/Kg	**E4RT6** µg/Kg	**%RPDs**
Naphthalene	10	22	75
2-Methylnaphthalene	24	37J	43

Semivolatile SIM analytes	E4RT5 µg/Kg	E4RT6 µg/Kg	%RPDs
Acenaphthylene	5.7	6.3	10
Acenaphthene	50J	70J	33
Fluorene	73J	98J	29
Phenanthrene	320J	590J	59
Anthracene	73J	130J	56
Fluoranthene	400J	710J	56
Pyrene	860J	1200J	33
Benzo(a)anthracene	500J	650J	26
Chrysene	490J	600J	20
Benzo(b)fluoranthene	690J	1000J	37
Benzo(k)fluoranthene	190J	260J	31
Benzo(a)pyrene	500J	700J	33
Indeno(1,2,3-cd)pyrene	360J	580J	47
Dibenzo(a,h)anthracene	82J	130J	45
Benzo(g,h,i)perylene	290J	460J	45

Semivolatile SIM analytes	E4RT5DL µg/Kg	E4RT6DL µg/Kg	%RPDs
Naphthalene	ND	ND	NA
2-Methylnaphthalene	23J	33	36
Acenaphthylene	9.9J	10J	1.0
Acenaphthene	76	110	37
Fluorene	120	160	29
Phenanthrene	820J	1100J	29
Anthracene	160	210	27
Fluoranthene	1100J	1500J	31
Pyrene	1300J	1700J	27
Benzo(a)anthracene	690J	930J	30
Chrysene	700J	890J	24
Benzo(b)fluoranthene	870J	1100J	23
Benzo(k)fluoranthene	250	330J	28
Benzo(a)pyrene	630J	770J	20
Indeno(1,2,3-cd)pyrene	400J	490J	20
Dibenzo(a,h)anthracene	81	97	18
Benzo(g,h,i)perylene	350J	410J	16

Phenanthrene, Anthracene, and Fluoranthene had a % RPD exceeding 50% in the original analysis. All % RPDs are less than 50% in the diluted analyses. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile SIM sample has a compound concentration below the MDL reported on the Form 1. Detected compounds are qualified U and sample results reported at the CRQL. The EDD is correct.

E4RS1DL	Naphthalene, 2-Methylnaphthalene

The following semivolatile SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds remain unchanged.

E4RS0	Acenaphthylene
E4RS0DL	Acenaphthene, Fluorene
E4RS1	2-Methylnaphthalene, Acenaphthylene
E4RS1DL	Acenaphthene, Fluorene
E4RS1MS	Naphthalene, 2-Methylnaphthalene, Acenaphthylene
E4RS1MSD	Naphthalene, 2-Methylnaphthalene, Acenaphthylene
E4RS4	2-Methylnaphthalene, Acenaphthylene
E4RS4DL	Acenaphthene, Fluorene
E4RS5	2-Methylnaphthalene, Acenaphthylene
E4RS5DL	Anthracene Dibenzo(a,h)anthracene
E4RS6DL	Acenaphthylene
E4RS7DL	Acenaphthylene
E4RS8	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RS8DL	Anthracene, Dibenzo(a,h)anthracene
E4RS9	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Acenaphthene, Fluorene
E4RS9DL	Anthracene
E4RT2DL	Acenaphthylene
E4RT3	Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene
E4RT4DL	Acenaphthylene
E4RT5DL	2-Methylnaphthalene, Acenaphthylene
E4RT6DL	Acenaphthylene
E4RX0	Naphthalene, 2-Methylnaphthalene, Acenaphthylene
E4RX0DL	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RX1	2-Methylnaphthalene, Acenaphthylene
E4RX1DL	Acenaphthene

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS1DL, E4RS8, E4RS8DL, E4RX0DL, E4RX1DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RS0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS4	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS5	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS7	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RS8	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RS9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT2	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT4	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT5	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT6	2-Methylnaphthalene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RX0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed.

E4RS0DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS4DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS5DL	Fluoranthene

E4RS6DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RS7DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT4DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT6DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene,

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference exceeding criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Despite the CCV issue, the Decachlorobiphenyl recoveries in the associated samples met the acceptance criteria.

E4RT6, E4RX1DL

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL.

E4RS8	Endrin aldehyde
E4RT3	Endrin aldehyde
E4RT5DL	4,4'-DDD, Endrin aldehyde
E4RX0	Endrin aldehyde
E4RX1	Endrin aldehyde
E4RX1DL	Endrin, 4,4'-DDD, 4,4'-DDE

6. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

In all cases, samples had acceptable surrogate recoveries on one or both columns. No data were qualified based on surrogate recovery.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

The pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit on one column. Detected compounds reported from that column are qualified J. Nondetected compounds remain unchanged.

E4RS6, E4RS6DL, E4RT2, E4RT2DL, E4RT3, E4RT6, E4RT6DL gamma-BHC (Lindane)

E4RS1, E4RS8, E4RX1 Heptachlor

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are field duplicates according to the field sampling plan**.** Results are summarized in the following table:

Pesticide analytes	**E4RT5** µg/Kg	**E4RT6** µg/Kg	**%RPDs**
alpha-BHC	ND	ND	NA
beta-BHC	ND	ND	NA
delta-BHC	ND	ND	NA
gamma-BHC (Lindane)	13	12	8
Heptachlor	34	24	34
Aldrin	ND	ND	
Heptachlor epoxide	5.6	4.7	17
Endosulfan I	4.3	ND	NA
Dieldrin	ND	ND	NA
4,4'-DDE	19	19	0
Endrin	3.2	3.3	3.1
Endosulfan II	3.2	3.3	3.1
4,4'-DDD	20	23	14
Endosulfan sulfate	ND	ND	NA
4,4'-DDT	18	19	5.4
Methoxychlor	16	4.2	120
Endrin ketone	ND	ND	NA
Endrin aldehyde	3.2	3.3	3.1
alpha-Chlordane	ND	1.6	NA
gamma-Chlordane	ND	ND	NA
Toxaphene	ND	ND	NA

Methoxychlor has a %RPD greater than 50%. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RS0	gamma-BHC (Lindane), Dieldrin, 4,4'-DDD
E4RS1	Endosulfan I
E4RS4	Endosulfan I, Dieldrin
E4RS6DL	Aldrin
E4RS7DL	alpha-BHC, beta-BHC, Dieldrin, Endrin ketone
E4RS8	beta-BHC, delta-BHC, gamma-BHC (Lindane), Dieldrin, Endosulfan II, Endrin aldehyde
E4RS9	gamma-BHC (Lindane), Endosulfan I, Dieldrin, alpha-Chlordane
E4RT2DL	alpha-BHC, beta-BHC, Aldrin
E4RT3	beta-BHC, Dieldrin, Endosulfan sulfate, Endrin aldehyde
E4RT4	beta-BHC
E4RT5	Aldrin, Endrin ketone
E4RT6DL	Aldrin
E4RX0	gamma-BHC (Lindane), Endosulfan I, Endosulfan II, Endrin ketone Endrin aldehyde
E4RX1	gamma-BHC (Lindane), Aldrin, Endosulfan I, Endrin ketone, Endrin aldehyde
E4RX1DL	Dieldrin

The following pesticide samples have percent differences between analyte results on the two GC columns in the range of 26-50%. Detected compounds are qualified J.

E4RS1	4,4'-DDE, Endrin aldehyde
E4RS1MSD	4,4'-DDE, gamma-Chlordane
E4RS2	Dieldrin, 4,4'-DDD
E4RS4	4,4'-DDE, 4,4'-DDT, Methoxychlor
E4RS5	4,4'-DDE, gamma-Chlordane
E4RS6	Endosulfan I, Dieldrin, 4,4'-DDD
E4RS6DL	4,4'-DDD
E4RS7	Methoxychlor
E4RS9	gamma-Chlordane
E4RT2	Endosulfan I, Methoxychlor, alpha-Chlordane
E4RT2DL	4,4'-DDE
E4RT3	4,4'-DDT
E4RT4	Dieldrin, 4,4'-DDE
E4RT5	Endosulfan I, 4,4'-DDE, 4,4'-DDD
E4RX0	Dieldrin, 4,4'-DDD, 4,4'-DDT
E4RX1	Heptachlor, Heptachlor epoxide
E4RX1DL	Heptachlor epoxide

The following pesticide samples have percent differences between analyte results on the two GC columns in the range of 51-100%. Detected compounds are qualified NJ.

E4RS0	gamma-Chlordane
E4RS1	Heptachlor epoxide, alpha-Chlordane, gamma-Chlordane
E4RS1MS	Heptachlor, Aldrin, alpha-Chlordane, gamma-Chlordane

E4RS1MSD	gamma-BHC (Lindane), Heptachlor, Aldrin, Methoxychlor, alpha-Chlordane
E4RS2	Endosulfan I, Methoxychlor
E4RS4	gamma-Chlordane
E4RS5	4,4'-DDT, Methoxychlor
E4RS6	gamma-BHC (Lindane), 4,4'-DDE
E4RS6DL	gamma-BHC (Lindane), 4,4'-DDE
E4RS7	4,4'-DDE
E4RS8	Heptachlor epoxide
E4RS9	Heptachlor epoxide, 4,4'-DDE, 4,4'-DDT
E4RT4	4,4'-DDD, gamma-Chlordane
E4RT5	Heptachlor
E4RT5DL	Heptachlor
E4RT6	Dieldrin, 4,4'-DDE, 4,4'-DDD, Endrin ketone, alpha-Chlordane
E4RT6DL	4,4'-DDD
E4RX0	Heptachlor epoxide
E4RX1	4,4'-DDD

The following pesticide samples have percent differences between analyte results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified U, and reported as not detected at the CRQL. Nondetected compounds remain unchanged.

E4RS0	Endrin, Endosulfan II, Methoxychlor
E4RS1MS	Endosulfan II
E4RS1MSD	alpha-BHC, Endosulfan II
E4RS2	Endosulfan II, Endrin aldehyde, alpha-Chlordane
E4RS4	Endrin, alpha-Chlordane
E4RS5	Heptachlor, Endrin
E4RS6	Endosulfan II
E4RS6DL	Endosulfan II, Methoxychlor, Endrin ketone, Endrin aldehyde, alpha-Chlordane
E4RS7	Endosulfan II
E4RS7DL	Endosulfan I, Endrin Endosulfan II, Methoxychlor
E4RS8	4,4'-DDE, Endrin, Methoxychlor
E4RS9	Endrin, Endosulfan II, Methoxychlor
E4RT2	Endosulfan II, Endrin aldehyde
E4RT2DL	Endosulfan II, Methoxychlor, Endrin ketone, Endrin aldehyde
E4RT3	gamma-BHC (Lindane), Endosulfan I, 4,4'-DDE, Endrin, Endosulfan II, Endrin ketone
E4RT4	Endrin Endosulfan II
E4RT5	Endrin Endosulfan II, Methoxychlor, Endrin aldehyde
E4RT5DL	Heptachlor epoxide, 4,4'-DDD
E4RT6	Endosulfan II, Endrin aldehyde
E4RT6DL	Endrin, Endosulfan II, Endrin aldehyde, alpha-Chlordane
E4RX0	Endrin, Methoxychlor, alpha-Chlordane
E4RX1	Endrin, Methoxychlor, alpha-Chlordane
E4RX1DL	Heptachlor, Endrin

The following pesticide samples have percent differences between analyte results on the two GC columns exceeding 100%. Detected compounds are qualified R.

E4RS0	4,4'-DDE, 4,4'-DDT

E4RS1	Endrin, 4,4'-DDD, 4,4'-DDT, Methoxychlor
E4RS1MS	alpha-BHC, gamma-BHC (Lindane), Heptachlor epoxide, 4,4'-DDD, Methoxychlor
E4RS1MSD	Heptachlor epoxide, 4,4'-DDD
E4RS2	Heptachlor, Heptachlor epoxide, 4,4'-DDE, Endrin, 4,4'-DDT, gamma-Chlordane
E4RS4	Heptachlor, Heptachlor epoxide
E4RS5	Heptachlor epoxide, 4,4'-DDD
E4RS6	Heptachlor, Endrin, Endrin aldehyde
E4RS6DL	Endosulfan I, Endrin
E4RS7	beta-BHC, Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDD, 4,4'-DDT
E4RS7DL	Heptachlor, Heptachlor epoxide, 4,4'-DDD, 4,4'-DDT
E4RT2	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, Endrin, Endosulfan II, 4,4'-DDD
E4RT2DL	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDD
E4RT3	Heptachlor, Heptachlor epoxide, 4,4'-DDD
E4RT4	Heptachlor, Heptachlor epoxide, Methoxychlor, Endrin ketone
E4RT5	gamma-BHC (Lindane), Heptachlor epoxide
E4RT6	gamma-BHC (Lindane), Heptachlor epoxide, Endosulfan I, Endrin, Methoxychlor
E4RT6DL	gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide
E4RX0	beta-BHC

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS0, E4RS2, E4RS4, E4RS5, E4RS7, E4RS7DL, E4RS9, E4RT4, E4RT6, E4RT6DL, E4RX1, E4RX1DL

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. A diluted sample analysis was performed for all these samples, placing the concentrations within the calibration range. The results from the diluted sample should be used for result validation.

E4RS6 gamma-BHC (Lindane), Heptachlor, 4,4'-DDE, 4,4'-DDD, 4,4'-DDT
E4RS7 4,4'-DDD
E4RT2 gamma-BHC (Lindane), Heptachlor, 4,4'-DDE, 4,4'-DDT
E4RT5 Heptachlor
E4RT6 gamma-BHC (Lindane), 4,4'-DDE, 4,4'-DDD, 4,4'-DDT
E4RX1 Heptachlor epoxide

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

In all cases, undiluted samples had acceptable surrogate recoveries on one or both columns. No data were qualified based on surrogate recovery.

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. All target Aroclors are affected. Detected and nondetected compounds remain unchanged.

E4RS2DL, E4RS6DL, E4RT2DL, E4RT6DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

As designated by the samplers, Sample E4RS1 was used for laboratory QC, i.e., MS/MSD.

The relative percent difference (RPD) of Aroclor-1260 between the matrix spike and matrix spike duplicate recoveries of Aroclor-1260 is outside criteria. Detected compounds are qualified J. Nondetected compounds remain unchanged.

The Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column. All sample results for the compounds listed below reported from this column are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

E4RS9 Aroclor-1016
E4RS1MSD, E4RS4, E4RS5, E4RS9, E4RX1 Aroclor-1260

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT5 and E4RT6 are field duplicates according to the field sampling plan**.** Results are summarized in the following table:

Aroclor Analytes	**E4RT5DL** µg/Kg	**E4RT6DL** µg/Kg	**%RPDs**
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	2400	2100	13
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results on the two GC columns in the range of 26-50%. Detected compounds are qualified J.

E4RS1 Aroclor-1260
E4RT2DL, E4RT5, E4RT5DL, E4RT6DL Aroclor-1248

The following Aroclor samples have percent differences between analyte results on the two GC columns in the range of 51-100%. Detected compounds are qualified NJ.

E4RS9 Aroclor-1260
E4RS1, E4RS5 Aroclor-1248

The following Aroclor samples have percent differences between analyte results on the two GC columns exceeding 100%. Detected compounds are qualified R.

E4RS4 Aroclor-1260
E4RS1MS, E4RS1MSD, E4RS4 Aroclor-1016

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples, due to rounding errors which do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS1, E4RS8, E4RS9, E4RT5, E4RT6, E4RX0, E4RX1

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". A diluted sample analysis was performed for all these samples, placing the concentrations within the calibration range. The results from the diluted sample should be used for result validation.

E4RS2 Aroclor-1248
E4RS6 Aroclor-1248
E4RS7 Aroclor-1248
E4RT2 Aroclor-1248
E4RT5 Aroclor-1248
E4RT6 Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: Sixteen (16) sediment samples labeled E4RS3, E4RT0, E4RT1, E4RT7 - E4RT9, E4RW0 – E4RW9 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All sixteen (16) samples were collected on 2/25/2010 and were received on 2/27/2010, intact. Samples exceeded the proper shipping temperature of 2 - 6 ºC, and were received at the facility at 8 ºC. No data have been qualified based on temperature. For samples E4RW1 – E4RW7, the recipient signature is missing from the traffic report; no sample results were qualified for this non-compliance.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4RT8 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a

particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified "J". Nondetected compounds are not qualified.

E4RS3, E4RT0, E4RT1, E4RT7, E4RT8, E4RT9, E4RW0, E4RW0DL, E4RW1, E4RW2, E4RW3, E4RW4, E4RW5, E4RW6, E4RW7, E4RW8, E4RW9
Benzo(b)fluoranthene
Benzo(k)fluoranthene

The following semivolatile samples are associated with an opening continuing calibration percent difference (%D) outside criteria. Detected compounds are qualified "J". Nondetected compounds are qualified "UJ"

E4RT8, E4RW0, E4RW2, E4RW7, E4RW8, E4RW9
2-Methylnaphthalene

Benzo(g,h,i)perylene in sample E4RW1 was flagged "J" during the automated flagging process for a %D in the closing calibration. Examination of the data showed that the %D was within the criteria. The "J" flag has been removed from the "B" and "Z" files.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with a dilution factor greater than 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4RW0DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4RT9 and E4RW0

Semivolatile compounds	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Naphthalene	ND	1	440	10	
2-Methylnaphthalene	ND	1	550	10	
Acenaphthylene	ND	1	ND	10	
Acenaphthene	ND	1	3000	10	
Fluorene	ND	1	2800	10	
Phenanthrene	520	1	17000	10	190
Anthracene	120	1	5000	10	190
Fluoranthene	1100	1	22000	10	180
Pyrene	660	1	16000	10	180
Benzo(a)anthracene	480	1	10000	10	180
Chrysene	470	1	9300	10	180
Benzo(b)fluoranthene	590	1	13000	10	180
Benzo(k)fluoranthene	190	1	5500	10	190
Benzo(a)pyrene	380	1	11000	10	190
Indeno(1,2,3-cd)pyrene	190	1	4600	10	180
Dibenzo(a,h)anthracene	ND	1	1000	10	
Benzo(g,h,i)perylene	210	1	4800	10	180

For field duplicates E4RT9 and E4RW0, all detected compounds had RPD values above 50%. Note that the original analysis of E4RW0 was analyzed using a ten-fold dilution.

E4RW1 and E4RW2

Semivolatile compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	160	1	52	1	100
Anthracene	51	1	ND	1	
Fluoranthene	280	1	110	1	90
Pyrene	220	1	69	1	100
Benzo(a)anthracene	150	1	ND	1	
Chrysene	150	1	ND	1	
Benzo(b)fluoranthene	260	1	64	1	120

Semivolatile compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Benzo(k)fluoranthene	120	1	ND	1	
Benzo(a)pyrene	230	1	ND	1	
Indeno(1,2,3-cd)pyrene	170	1	ND	1	
Dibenzo(a,h)anthracene	110	1	ND	1	
Benzo(g,h,i)perylene	190	1	ND	1	

For field duplicate samples E4RW1 And E4RW2, compounds Phenanthrene, Fluoranthene, Pyrene, and Benzo(b)fluoranthene have RPD values above 50%.

E4RW3 and E4RW4

Semivolatile compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	240	1	320	1	30
Anthracene	62	1	85	1	30
Fluoranthene	510	1	430	1	20
Pyrene	350	1	330	1	6
Benzo(a)anthracene	210	1	200	1	5
Chrysene	220	1	180	1	20
Benzo(b)fluoranthene	360	1	210	1	50
Benzo(k)fluoranthene	95	1	90	1	5
Benzo(a)pyrene	210	1	160	1	30
Indeno(1,2,3-cd)pyrene	110	1	67	1	50
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	130	1	72	1	60

For field duplicate samples E4RW3 and E4RW4, Benzo(g,h,i)perylene had an RPD value above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified “J”.

E4RS3	Anthracene, Benzo(a)anthracene, Chrysene, Benzo(k)fluoranthene, Benzo(a)pyrene, Benzo(g,h,i)perylene
E4RT1	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene,
E4RT7	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RT9	Anthracene
E4RW0	Naphthalene, 2-Methylnaphthalene, Dibenzo(a,h)anthracene
E4RW1	Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene
E4RW2	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RW3	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW4	Anthracene, Benzo(k)fluoranthene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW6	Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW7	Fluoranthene, Pyrene, Benzo(b)fluoranthene

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile sample reported a concentration that exceeded the calibrated range of the instrument and was flagged “E” by the laboratory. As per the NFG, this result is flagged “J”. The result from the diluted sample should be used for result validation.

E4RW0	Fluoranthene

The nondetected results reported at the CRQL level for the following compounds in the samples below are incorrect in the EDD. These results were reported correctly on the Form 1s. The EDD has been updated to include the nondetected results at the correct CRQLs.

E4RT0	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Acenaphthene, Fluorene, Anthracene, Dibenzo(a,h)anthracene
E4RW0DL	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Dibenzo(a,h)anthracene
E4RW5	Naphthalene, 2-Methylnaphthalene, Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The original analysis of the following semivolatiles-SIM sample has a dilution factor greater than 5 and a deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4RW0

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4RT9 and E4RW0

Semivolatiles-SIM compounds	E4RT9DL µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Naphthalene	ND	10	350	10	
2-Methylnaphthalene	ND	10	430	10	
Acenaphthylene	7.1	10	9	10	23
Acenaphthene	29	10	1800	10	190
Fluorene	34	10	1800	10	190
Phenanthrene	360	10	7600	10	180
Anthracene	94	10	3000	10	190

Semivolatiles-SIM compounds	E4RT9DL µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Fluoranthene	720	10	9200	10	170
Pyrene	580	10	8600	10	170
Benzo(a)anthracene	390	10	7300	10	180
Chrysene	340	10	5000	10	170
Benzo(b)fluoranthene	620	10	5600	10	160
Benzo(k)fluoranthene	170	10	1900	10	170
Benzo(a)pyrene	400	10	4200	10	170
Indeno(1,2,3-cd)pyrene	290	10	2900	10	160
Dibenzo(a,h)anthracene	50	10	560	10	170
Benzo(g,h,i)perylene	220	10	2200	10	160

For field duplicate pair E4RT9 and E4RW0, all detected compounds except Acenaphthylene had RPD values above 50%. Note that sample E4RW0 was originally analyzed using a ten-fold dilution and that most of the detected analyte results exceeded the calibrated instrument range. No further semivolatiles-SIM dilution analysis was performed for sample E4RW0.

E4RW1 and E4RW2

Semivolatiles-SIM compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Naphthalene	5.7	1	4.5	1	24
2-Methylnaphthalene	2.7	1	1.6	1	51
Acenaphthylene	1	1	0.8	1	28
Acenaphthene	8	1	2.1	1	120
Fluorene	9.6	1	2.7	1	110
Phenanthrene	97	1	34	1	96
Anthracene	32	1	11	1	98
Fluoranthene	170	1	82	1	70
Pyrene	140	1	63	1	76
Benzo(a)anthracene	110	1	50	1	75
Chrysene	84	1	42	1	67
Benzo(b)fluoranthene	140	1	60	1	80
Benzo(k)fluoranthene	32	1	15	1	72
Benzo(a)pyrene	93	1	41	1	78
Indeno(1,2,3-cd)pyrene	91	1	35	1	89
Dibenzo(a,h)anthracene	14	1	5.5	1	87
Benzo(g,h,i)perylene	52	1	20	1	89

E4RW1DL and E4RW2DL

Semivolatiles-SIM compounds	E4RW1DL µg/kg	DF	E4RW2DL µg/kg	DF	%RPD
Naphthalene	ND	10	ND	5	
2-Methylnaphthalene	ND	10	ND	5	
Acenaphthylene	ND	10	ND	5	

Semivolatiles-SIM compounds	E4RW1DL µg/kg	DF	E4RW2DL µg/kg	DF	%RPD
Acenaphthene	10	10	ND	5	
Fluorene	12	10	ND	5	
Phenanthrene	110	10	35	5	100
Anthracene	31	10	11	5	95
Fluoranthene	190	10	81	5	80
Pyrene	160	10	66	5	83
Benzo(a)anthracene	98	10	43	5	78
Chrysene	85	10	42	5	68
Benzo(b)fluoranthene	120	10	61	5	65
Benzo(k)fluoranthene	48	10	19	5	87
Benzo(a)pyrene	89	10	43	5	70
Indeno(1,2,3-cd)pyrene	59	10	26	5	78
Dibenzo(a,h)anthracene	10	10	4.7	5	72
Benzo(g,h,i)perylene	46	10	22	5	71

For field duplicate pair E4RW1 and E4RW2, all compounds except Naphthalene and Acenaphthylene had RPD values above 50%. Note that most detected results in the neat analyses for these samples exceeded the calibrated instrument range. Diluted analyses were performed. The RPDs are also above than 50% for all detected compounds in the diluted analyses.

E4RW3 and E4RW4

Semivolatiles-SIM compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Naphthalene	6.1	1	6.6	1	7.9

Dibenzo(a,h)anthracene	17	10	13	10	27
Benzo(g,h,i)perylene	77	10	53	10	37

For field samples E4RW3 and E4RW4, compounds 2-Methylnaphthalene, Fluorene, and Anthracene had RPD values that exceeded 50%. All RPDs are less than 50% in the diluted analyses.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that the semivolatiles-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatiles-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

E4RS3DL	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RT0	Acenaphthylene
E4RT0DL	Acenaphthene, Fluorene, Anthracene
E4RT1DL E4RT7DL	Acenaphthylene
E4RT8	2-Methylnaphthalene, Anthracene, Benzo(k)fluoranthene

E4RT9DL	Acenaphthylene, Acenaphthene,
E4RW0 E4RW1	Acenaphthylene
E4RW1DL	Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW2	2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene,
ER4W2DL	Anthracene, Dibenzo(a,h)anthracene
E4RW3	2-Methylnaphthylene
E4RW3DL	Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW4DL	Acenaphthylene, Acenaphthene, Fluorene, Dibenzo(a,h)anthracene
E4RW5	2-Methylnaphthylene
E4RW5DL	Acenaphthene, Fluorene
E4RW6	Acenaphthylene
E4RW6DL	Acenaphthene, Fluorene, Anthracene, Dibenzo(a,h)anthracene
E4RW7	2-Methylnaphthylene, Acenaphthene, Fluorene
E4RW7DL	Acenaphthene, Anthracene, Dibenzo(a,h)anthracene
E4RW8	2-Methylnaphthalene, Anthracene, Benzo(k)fluoranthene, Dibenzo(a,h) anthracene
E4RW9	Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatiles-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

E4RS3	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT1	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT7	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RT9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RW1	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW2	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RW3, E4RW4	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW5	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene.
E4RW6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RW7	Fluoranthene, Pyrene, Benzo(a)anthracene, Benzo(b)fluoranthene

The following semivolatiles-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed.

E4RT0DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4RT1DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RT7DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4RT9DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4RW0	Naphthalene, 2-Methylnaphthalene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RW3DL E4RW4DL	Fluoranthene
E4RW5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene

The following semivolatile SIM samples have compound concentrations below the MDL reported on the Form 1s. Detected compounds were qualified U and reported at the CRQL. The results are reported correctly in the EDD.

E4RT1DL E4RT7DL E4RW4DL	Naphthalene, 2-Methylnaphthalene
E4RS3DL	Naphthalene, 2-Methylnaphthalene, Acenaphthylene
E4RT0DL E4RT9DL E4RW1DL E4RW3DL E4RW6DL	Naphthalene
E4RW2DL	Naphthalene, Acenaphthene, Fluorene
E4RW5DL	Naphthalene, Acenaphthylene
E4RW7DL	Naphthalene, Fluorene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the CRQL. Detected compounds are qualified "U". Nondetected compounds remain unchanged. Reported sample concentrations have been elevated to the CRQL.

E4RT8, E4RW1, E4RW7, E4RW8, E4RW9	4,4'-DDT
E4RS3, E4RT1DL, E4RT8, E4RW1, E4RW5, E4RW7, E4RW8, E4RW9	Methoxychlor
E4RT1DL, E4RT8, E4RT9, E4RW0, E4RW7	Endrin aldehyde

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the CRQL. Detected compounds are qualified "U" and the sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RT8, E4RW1, E4RW8, E4RW9	beta-BHC
E4RT8, E4RW1, E4RW7, E4RW8, E4RW9	4,4'-DDT
E4RW5, E4RW6	alpha-Chlordane
E4RS3, E4RT1, E4RT1DL, E4RT7, E4RT8, E4RW1, E4RW4 - E4RW8	Methoxychlor
E4RW9	4,4'-DDD
E4RT1DL, E4RW3 E4RW4, E4RW5	Endrin aldehyde
E4RT0, E4RT8, E4RW0 – E4RW6, E4RW8	Heptachlor

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Samples E4RS3, E4RT0, E4RT1, E4RT7, E4RT8, E4RT9, E4RW0, E4RW1, E4RW2, E4RW3, E4RW4, E4RW6, E4RW7, E4RW8, and E4RW9 had acceptable surrogate recoveries on one or both columns. No data for these samples was qualified based on surrogate recovery.

However, a high surrogate recovery was obtained on one column for samples E4RT0, E4RW3, and E4RW6. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, for samples E4RT0, E4RW3, and E4RW6, the "J" flags applied during the automated check process have been removed for the affected compounds.

E4RT0	alpha-chlordane, Dieldrin
E4RW3	4,4'-DDE, Endrin ketone
E4RW6	4,4'-DDD, 4,4'-DDE

Pesticide sample E4RW5 had surrogate recoveries greater than the 200% on both columns. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4RT8, the pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column. All sample results for the following compounds which were reported from the RTXCLP2 column are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds remain unchanged

gamma-BHC, Heptachlor, Aldrin, Dieldrin

For sample E4RT8, the pesticide MSD had a percent recovery for Endrin that was greater than the upper acceptance limit on both columns. All samples results for Endrin are affected. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

For sample E4RT8, the pesticide MSD had a percent recovery for 4,4'-DDT that was greater than the upper acceptance limit on the RTXCLP column. All samples results for 4,4'-DDT which were reported from the RTXCLP column are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds remain unchanged.

In addition, the relative percent difference (RPD) between the MS and MSD is outside criteria for Heptachlor and Endrin. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4RT9 and E4RW0

Pesticide compound	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	0.14	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.27	1	0.14	1	63
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	0.25	1	
4,4'-DDE	1.1	1	1.6	1	37
Endrin		1	0.27	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	1	1	1.2	1	18
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.77	1	1.2	1	44
Methoxychlor		1		1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane		1	0.66	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RT9 and E4RW0, Heptachlor epoxide had an RPD value greater than 50%. The Endrin, Methoxychlor, and gamma-chlordane results for sample E4RT9; and the Methoxychlor result for sample E4RW0 were associated with an “R” flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW1 and E4RW2

Pesticide compound	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.12	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	0.12	1	0.15	1	22
Aldrin	ND	1	ND	1	

Pesticide compound	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Heptachlor epoxide		1		1	
Endosulfan I	ND	1	ND	1	
Dieldrin	0.1	1	ND	1	
4,4'-DDE	0.5	1		1	
Endrin	0.24	1	2	1	160
Endosulfan II	0.24	1	ND	1	
4,4'-DDD	0.76	1	1.1	1	37
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.24	1		1	
Methoxychlor	1.2	1		1	
Endrin ketone	0.24	1	0.3	1	22
Endrin aldehyde	ND	1	0.45	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	1.3	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RW1 and E4RW2, Endrin, 4,4'-DDT, and Methoxychlor had RPD values greater than 50%. Results for Heptachlor epoxide in sample E4RW1; and for Heptachlor epoxide, 4,4'-DDE, 4,4'-DDT, and Methoxychlor in sample E4RW2 were associated with an "R" flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW3 and E4RW4

Pesticide compound	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	0.15	1	0.13	1	14
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1	0.39	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	0.36	1	0.26	1	32
4,4'-DDE	1.6	1	1.2	1	29
Endrin	ND	1		1	
Endosulfan II	0.3	1	0.26	1	14
4,4'-DDD	3	1	2.2	1	31
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.64	1	0.27	1	82
Methoxychlor		1	1.3	1	
Endrin ketone	0.42	1	ND	1	

Pesticide compound	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Endrin aldehyde	0.3	1	0.26	1	14
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	1.3	1	0.17	1	150
Toxaphene	ND	1	ND	1	

For field duplicate samples E4RW3 and E4RW4, 4,4'-DDT and gamma-Chlordane had RPD values that were greater than 50%. Results for Heptachlor epoxide and Methoxychlor in sample E4RW3; and for Endrin in sample E4RW4 were associated with an "R" flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

E4RT8	Heptachlor epoxide
E4RW7	4,4'-DDE
E4RW0, E4RW1	Dieldrin
E4RW9	Dieldrin, 4,4'-DDE

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J".

E4RS3	4,4'-DDT, 4,4'-DDE
E4RT1	Heptachlor, Dieldrin, 4,4'-DDE
E4RT1DL	Dieldrin
E4RT7	Endrin, 4,4'-DDT
E4RT8	Heptachlor, Heptachlor epoxide
E4RT9	Heptachlor epoxide, 4,4'-DDE
E4RW2	gamma-chlordane

E4RW3	4,4'-DDD
E4RW8	4,4'-DDD, 4,4'-DDE, Methoxychlor

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ".

E4RS3	Endrin
E4RT0	4,4'-DDE, 4,4'-DDT
E4RT7	Heptachlor, 4,4'-DDE
E4RT9	4,4'-DDD
E4RW0	gamma-Chlordane
E4RW2	Endrin, 4,4'-DDD, Endrin aldehyde
E4RW3	Dieldrin, gamma-Chlordane, 4,4'-DDT
E4RW4	Heptachlor epoxide, 4,4'-DDT
E4RW5	Gamma-chlordane
E4RW6	Dieldrin, gamma-Chlordane
E4RW7	Heptachlor epoxide

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

E4RS3	Heptachlor epoxide, Endosulfan II, Methoxychlor,
E4RT0	Heptachlor
E4RT1	Endosulfan II, Methoxychlor
E4RT1DL	Heptachlor epoxide, Endrin, Endrin aldehyde, Methoxychlor
E4RT7	Endosulfan II, Methoxychlor, Endrin aldehyde
E4RT8	Alpha-BHC, beta-BHC, 4,4'-DDT, Endrin ketone, Methoxychlor
E4RW0	Heptachlor, Heptachlor epoxide, Endrin
E4RW1	beta-BHC, Heptachlor, Endrin, Endosulfan II, Methoxychlor, Endrin ketone
E4RW2	Heptachlor, Endrin ketone

E4RW3	Heptachlor, Endosulfan II, Endrin aldehyde
E4RW4	Heptachlor, Dieldrin, Endosulfan II, Methoxychlor, Endrin aldehyde
E4RW5	Heptachlor, Endosulfan II, Methoxychlor, Endrin aldehyde, alpha-Chlordane
E4RW6	Heptachlor, Endrin, Endosulfan II, Methoxychlor, Endrin ketone, alpha-Chlordane,
E4RW7	4,4'-DDT, Dieldrin, Methoxychlor, Endrin ketone
E4RW8	beta-BHC, Heptachlor epoxide, Endrin, Endrin ketone, gamma-Chlordane
E4RW9	beta-BHC, Heptachlor epoxide, 4,4'-DDD, 4,4'-DDT, gamma-Chlordane

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R".

E4RS3	Heptachlor
E4RT0	Heptachlor epoxide, Endrin, 4,4'-DDD, Methoxychlor
E4RT1	Heptachlor epoxide, Endrin, Endrin aldehyde
E4RT1DL	4,4'-DDD
E4RT7	Alpha-BHC, Heptachlor epoxide
E4RT9	Endrin, Methoxychlor, gamma-Chlordane
E4RW0	Methoxychlor
E4RW1	Heptachlor epoxide
E4RW2	4,4'-DDE, 4,4'-DDT, Heptachlor epoxide, Methoxychlor
E4RW3	Heptachlor epoxide, Methoxychlor
E4RW4	Endrin, gamma-Chlordane
E4RW5	Dieldrin, Endosulfan sulfate, Endrin ketone, Heptachlor epoxide
E4RW6	Heptachlor epoxide

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide sample had reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The result from the diluted sample should be used for result validation.

E4RT1 4,4'-DDE

The reported CRQLs listed on laboratory Form Is are incorrect for the following samples due to rounding errors, and do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

Alpha-chlordane and dieldrin in sample E4RW9 was reported as a detected result at the CRQL in the original "Z" file. Examination of the raw data showed that the value was a nondetected result. The "U" flag was added to the sample result.

E4RS3, E4RT0, E4RT1, E4RT1DL, E4RW2, E4RW6, E4RW7, ER4W9

The following pesticide samples were assigned the unique qualifier flags "U" and "J" during the automated check process. Based on review findings, the flag was adjusted to "U" in the "B" and "Z" files.

E4RT0, E4RT8, E4RW3, E4RW5, E4RW6	Heptachlor
E4RT1DL, E4RW0, E4RW1, E4RW6, E4RW8	Endrin
E4RT8, E4RW1, E4RW7 – E4RW9	4,4'-DDT
E4RT8MS	4,4'-DDE
E4RT8MSD	beta-BHC
E4RW3, E4RW5, E4RW6,	Endosulfan II
E4RW3, E4RW5	Endrin aldehyde
E4RW5, E4RW6	alpha-chlordane
E4RW6	Endrin ketone
E4RW5, E4RW6, E4RW8	Methoxychlor

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

Samples E4RS3, E4RT0, E4RT1, E4RT1DL, E4RT7, E4RT8, E4RT9, E4RW0, E4RW1, E4RW2, E4RW3, E4RW4, E4RW5, E4RW6, E4RW7, E4RW8, and E4RW9 had acceptable surrogate recoveries on one or both columns. No data for these samples was qualified based on surrogate recovery.

However, a high surrogate recovery was obtained on one column for samples E4RT0, E4RT1, E4RT9, E4RW0, E4RW2 - E4RW5. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, the "J" flags applied during the automated check process have been removed for the following compounds.

E4RT0, E4RT9 , E4RW4, E4RW5	Aroclor-1260
E4RW5	Aroclor-1016

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RT9 and E4RW0, E4RW1 and E4RW2, and E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4RT9 AND E4RW0

Aroclor compounds	E4RT9 µg/kg	DF	E4RW0 µg/kg	DF	%RPD
Aroclor-1016	5.7	1	5.3	1	7.3
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	5.7	1	5.7	1	0
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4RW1 and E4RW2

Aroclor compounds	E4RW1 µg/kg	DF	E4RW2 µg/kg	DF	%RPD
Aroclor-1016	2.7	1	7.6	1	95.1
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	2.1	1		1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For field duplicates E4RW1 and E4RW2, Aroclor-1016 had an RPD value above 50%. The result for Aroclor-1260 in sample E4RW2 was associated with an “R” flag applied for other reasons, and were removed from the EDD. Therefore, those results were not evaluated for field duplicate precision.

E4RW3 and E4RW4

Aroclor compounds	E4RW3 µg/kg	DF	E4RW4 µg/kg	DF	%RPD
Aroclor-1016	9.9	1	8.7	1	12.9
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	6.4	1	5.9	1	8.1
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

E4RT8, E4RW1, E4RW7, E4RW8, E4RW9 Aroclor-1260

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

E4RT8, E4RW3 Aroclor-1260

E4RS3, E4RW1 Aroclor-1016

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

E4RW0, E4RW6 Aroclor-1260

E4RT9, E4RW0, E4RW2, E4RW3, E4RW4 Aroclor-1016

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below the CRQL. Detected compounds are qualified "U". Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4RT8, E4RW7, E4RW8, E4RW9 Aroclor-1016

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R".

E4RW2 Aroclor-1260
E4RW6 Aroclor-1016

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RT7	Aroclor-1016
E4RT1	Aroclor-1016, Aroclor-1260

The reported CRQLs listed on laboratory Form 1s are incorrect for the following samples, due to rounding errors, and do not match the EDD (Superset spreadsheet). Manual calculation of the data verified that the EDD has the correct values.

E4RS3, ER4T0, ER4T1, ER4T1DL, E4RW2, E4RW6, E4RW7, E4RW9

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SUBJECT: **Revised Review Narrative Report**
Review of Data
Received for Review on: 16 April 2010

FROM: Caryn Wojtowicz
Senior Chemist

TO: Data User: GLNPO

This data review narrative supersedes the narrative sent on June 14, 2010 for the review of data in SDG E4RX2. The changes made to this narrative include clarifications added to the Semivolatile-SIM and Pesticide sections of this narrative. The changes are highlighted in bold face type. The "reportable results" field in the 'Z" file has been updated to reflect the sample dilutions and reanalyses detailed in this narrative.

We have reviewed the data for the following case:

SITE Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1886.0, 1887.0, 1888.0

SDG Number: E4RX2

Number and Type of Samples: Thirteen (13) soil samples

Sample Numbers: E4RX2 - E4RX9, and E4RY0-E4RY4

Laboratory: ALS Laboratory Group

cc: Sara Goehl, EPA
Brenda Jones, EPA

Judy Schofield, CSC

SDG Summary

Introduction: Thirteen (13) sediment samples, labeled E4RX2 through E4RX9, and E4RY0-through E4RY4 were shipped to ALS Laboratory Group located in Salt Lake City, Utah. All samples were collected on 2/24/2010 and 2/25/2010. All samples were received on 2/27/2010 intact. Samples exceeded the proper shipping temperature range of 2 – 6 ºC. Samples were received at the facility at 8 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

No sample was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses. The laboratory chose E4RY4 as the QC sample.

Using the field dup identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples that no samples from this SDG are field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RY0, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD

Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

The following semivolatile samples have reported analyte concentrations less than the CRQL. The associated method blank concentration of the analyte is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Indeno(1,2,3-cd)pyrene:	E4RX2, E4RX3, E4RX4, E4RX6, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Benzo(b)fluoranthene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RY0, E4RY4MS, E4RY4MSD
Benzo(k)fluoranthene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RX9, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Benzo(a)pyrene:	E4RX2, E4RX3, E4RX4, E4RX7, E4RY0, E4RY4, E4RY4MS, E4RY4MSD
Dibenzo(a,h)anthracene:	E4RX2, E4RX3, E4RX4, E4RX6, E4RX7, E4RX8, E4RX9, E4RY0, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile sample has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY1 Anthracene-d_{10} (affected compounds Anthracene, Phenanthrene)

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

All semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

The CRQLs specified in Modification Reference Number: 1888.0 were not achieved for sample E4RX7, due to limited sample volume. The CRQL is two times greater than requested, because 25 grams rather than 50 grams of sample was extracted.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RX8, E4RX9, E4RY3 - Anthracene
E4RX7, E4RY0 - Pyrene
E4RX7, E4RY4 - Benzo(g,h,i)perylene
E4RX7, E4RY0 - Benzo(b)fluoranthene
E4RX7, E4RY0 - Fluoranthene
E4RX9 - Benzo (k) fluoranthene
E4RY4 - Chrysene
E4RX7, E4RY4 - Benzo(a)pyrene
E4RY3 - Dibenzo(a,h)anthracene
E4RY4 - Benzo(a)anthracene
E4RY4 - Phenanthrene
E4RY3 - Fluorene

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

No dilutions for semivolatiles are associated with this SDG. Due to suspected rounding differences, the reported CRQLs listed on laboratory Form 1s do not agree with the B-file Spreadsheet results.
E4RX7, E4RX9, E4RY0, E4RY2

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene:	E4RX4, E4RX5, E4RX6
Indeno(1,2,3-cd)pyrene:	E4RX4, E4RX5, E4RX6
Benzo(b)fluoranthene:	E4RX5, E4RX6
Benzo(a)pyrene:	E4RX5, E4RX6

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Acenaphthene spike recoveries and %RPD met criteria. Pyrene in the matrix/matrix spike duplicate samples had negative percent recovery because spiking levels of this compound were significantly lower than the levels of pyrene found in the unspiked sample. Results were not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1888.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 25 grams rather than 50 grams of sample was extracted.

The following semivolatile samples have compound concentrations below the MDL on the originally submitted Form 1s. Refer to the resubmitted corrected Form 1s when evaluating data. The EDD is correct.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX7DL, E4RX8DL, E4RX9DL, E4RY0, E4RY0DL, E4RY1DL, E4RY2DL, E4RY3DL, E4RY4DL, E4RY4MS, E4RY4MSD

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX7DL, E4RX8DL, E4RX9DL, E4RY0, E4RY0DL, E4RY1, E4RY1DL, E4RY3DL, E4RY4, E4RY4DL, E4RY4MS, E4RY4MSD

Anthracene:	E4RX2, E4RX3, E4RX7, E4RY0DL, E4RY1DL, E4RY4DL, E4RY4MS, E4RY4MSD
Pyrene;	E4RX5, E4RX6
Benzo(g,h,i)perylene:	E4RX4, E4RX5, E4RX6
Indeno(1,2,3-cd)pyrene:	E4RX4, E4RX5, E4RX6
Benzo(b)fluoranthene:	E4RX5, E4RX6
Fluoranthene:	E4RX5, E4RX6
Benzo(k)fluoranthene:	E4RX4
Acenaphthylene:	E4RY1, E4RY3DL, E4RY4
Chrysene:	E4RX5, E4RX6
Benzo(a)pyrene:	E4RX5, E4RX6
Dibenzo(a,h)anthracene:	E4RX2, E4RX3, E4RX7DL, E4RY0DL, E4RY4DL, E4RY4MS, E4RY4MSD
Benzo(a)anthracene:	E4RX4, E4RX5, E4RX6
Acenaphthene:	E4RX8DL, E4RX9DL, E4RY0, E4RY1DL, E4RY4
Phenanthrene:	E4RX5, E4RX6
Fluorene:	E4RX2, E4RX3, E4RX7, E4RX9DL, E4RY0DL, E4RY1DL
2-Methylnaphthalene:	E4RY4

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RX4, E4RX7DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4RX7	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RX8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RX9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY0	Phenanthrene, Fluoranthene, Pyrene, Benzo(b)fluoranthene,
E4RY1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY3	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4RY4	**Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene**

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. **Results for the following samples provide qualified, but usable data, and should be used in result validation.**

E4RX8DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4RX9DL	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4RY1DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RY2DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene

E4RY3DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for Decachlorobiphenyl exceeding criteria. All detected compounds are qualified J. All nondetected compounds are qualified UJ.

E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

4. BLANKS

The following pesticide samples have Endrin aldehyde concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4, E4RY4MS, E4RY4MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Reported sample concentrations have been elevated to the CRQL. Nondetected compounds are not qualified.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide:	E4RY3DL
Endosulfan sulfate:	E4RX4
Endosulfan II:	E4RX8, E4RX9, E4RX9DL, E4RY0
Dieldrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1
4,4'-DDD:	E4RY4MS
4,4'-DDE:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7,
Endrin aldehyde:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY1, E4RY4, E4RY4MS, E4RY4MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide:	E4RX2, E4RX5, E4RX6, E4RY3DL,
Endosulfan sulfate:	E4RX4,
Endosulfan II:	E4RX8, E4RX9, E4RX9DL, E4RY0
4,4'-DDT:	E4RY4
gamma-Chlordane:	E4RX2, E4RX3, E4RX4,
Dieldrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1
Endrin:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4
Methoxychlor:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
4,4'-DDD:	E4RY0, E4RY4MS
4,4'-DDE:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
Endrin aldehyde:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY1, E4RY4, E4RY4MS, E4RY4MSD
Heptachlor:	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7
Endosulfan I:	E4RX7

6. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

In all cases, undiluted samples had acceptable surrogate recoveries on one or both columns. No data was qualified based on high surrogate recovery on one column.

The following pesticide samples have surrogate percent recoveries that are greater than 200%. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flags applied to samples E4RY2 and E4RY3 during the automated check process would have been removed for all detected compounds, but the J flags have been retained for other reasons detailed in this report.

E4RY2 and E4RY3

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4RX9DL, E4RY3DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flags applied to samples E4RX8 and E4RX9 during the automated check process would have been removed for all detected compounds, but the J flags have been retained for other reasons detailed in this report.

E4RX8, E4RX9

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1886.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 30 grams rather than 50 grams of sample was extracted.

The following pesticide samples have compound concentrations below the MDL on the originally submitted Form 1. Refer to the resubmitted corrected Form 1 for data evaluation. The EDD is correct.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX9DL, E4RY3DL

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4RX2, E4RX5, E4RX6, E4RX7, E4RX9DL, E4RY0, E4RY1

beta-BHC	E4RX5, E4RX6
4,4’-DDD	E4RX5, E4RX6
4,4’-DDT	E4RX2, E4RX7
Aldrin	E4RY0
alpha-Chlordane	E4RX9DL

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Aldrin	E4RY0, E4RY4MSD
beta-BHC	E4RX6
Endosulfan II	E4RX2

4,4'-DDT	E4RX7, E4RY1, E4RY4MSD
alpha-Chlordane	E4RX8
gamma-Chlordane	E4RX4, E4RY0, E4RY1
Endrin ketone	E4RX4, E4RX6, E4RY2
Dieldrin	E4RX6, E4RX8, E4RY2, E4RY4MS, E4RY4MSD
Endrin	E4RX8, E4RY1, E4RY3, E4RY4MS, E4RY4MSD
4,4'-DDD	E4RX5, E4RX6, E4RX8, E4RX9DL, E4RY4, E4RY4MS, E4RY4MSD
4,4'-DDE	E4RX8, E4RY3, E4RY4MSD
Endosulfan I	E4RX9

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4RX3, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY2, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX3, E4RX9, E4RX9DL, E4RY0
delta-BHC	E4RX7
4,4'-DDT	E4RY4MS
gamma-BHC (Lindane)	E4RX8, E4RY2, E4RY4MS, E4RY4MSD
4,4'-DDD	E4RX9, E4RY2
4,4'-DDE	E4RY3DL, E4RY4

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Reported sample concentrations have been elevated to the CRQL. Detected compounds are qualified U.

E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX2, E4RX5, E4RX6, E4RY3DL
Endosulfan sulfate	E4RY0
Aldrin	E4RX2, E4RX3, E4RX5, E4RY4
alpha-BHC	E4RX9, E4RY1, E4RY4, E4RY4MS
beta-BHC	E4RX3, E4RY0, E4RY1
delta-BHC	E4RX2
Endosulfan II	E4RX3, E4RX5, E4RX8, E4RX9, E4RY0, E4RY2, E4RY3, E4RY4, E4RY4MSD
4,4'-DDT	E4RX4, E4RX5
alpha-Chlordane	E4RY3DL
gamma-Chlordane	E4RX2, E4RX3
Endrin ketone	E4RX2, E4RX3, E4RX5, E4RX8, E4RY0, E4RY1, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD
gamma-BHC (Lindane)	E4RX2, E4RY0, E4RY1, E4RY4
Dieldrin	E4RX2, E4RX4, E4RX5, E4RX7, E4RX9DL, E4RY1, E4RY3DL, E4RY4
Endrin	E4RX7, E4RX9
Methoxychlor	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

4,4'-DDD	E4RX2, E4RX3, E4RX4, E4RY0
4,4'-DDE	E4RX2, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4MS
Endrin aldehyde	E4RX2, E4RX3, E4RX4, E4RX5, E4RX6, E4RX7, E4RY4, E4RY4MS, E4RY4MSD
Heptachlor	E4RX7, E4RX9, E4RY1
Endosulfan I	E4RY3DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

E4RX4, E4RX7, E4RX8, E4RX9, E4RX9DL, E4RY0, E4RY1, E4RY2, E4RY3, E4RY3DL, E4RY4, E4RY4MS, E4RY4MSD

Heptachlor epoxide	E4RX4, E4RX7, E4RX8, E4RY1, E4RY2, E4RY3, E4RY4, E4RY4MS, E4RY4MSD
4,4'-DDT	E4RX8, E4RX9, E4RX9DL, E4RY2, E4RY3, E4RY3DL
alpha-Chlordane	E4RX9, E4RY2, E4RY3
gamma-Chlordane	E4RX7, E4RX9, E4RY2, E4RY3, E4RY4, E4RY4MSD
Dieldrin	E4RY3
4,4'-DDD	E4RX7, E4RY1, E4RY3, E4RY3DL
4,4'-DDE	E4RX9, E4RX9DL, E4RY1
Endrin aldehyde	E4RY0
Heptachlor	E4RX8, E4RY2
Endosulfan I	E4RX8, E4RY2, E4RY3

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RX7, E4RX8, E4RX9, E4RY0, E4RY1

Pesticide sample E4RX9 reported a concentration for 4,4'-DDD that exceeded the calibrated range of the instrument. The result was flagged "E" by the laboratory and, as per the NFG, is flagged estimated, "J". The result from diluted sample E4RX9DL should be used for result validation.

Pesticide sample E4RY3 had an R-flagged result for 4,4'-DDD and 4,4'-DDT in both the neat analysis and the dilution. Consequently, no results are available for 4,4'-DDD or 4,4'-DDT for this sample. The "reportable results" in the "Z" file remain the results from the neat analysis.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200%. The high surrogate recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected compounds are not qualified.

E4RX9RE, E4RY2, E4RY2RE, E4RY3RE

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4RY2REDL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected compounds are not qualified

E4RX9, E4RY1, E4RY3

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RX9REDL, E4RY3REDL

The following undiluted Aroclor samples have surrogate percent recoveries less than 10%. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4RY1

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) of Aroclor-1016 between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified. Only the unspiked sample, MS and MSD are affected.

E4RY4, E4RY4MS, E4RY4MSD

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries of Aroclor-1016 that are greater than the upper acceptance. The high spike recovery was obtained on only one column for these samples. The high recovery likely indicates a coelution or matrix interference on that column at the retention times for that Aroclor. Since the spike recovery was acceptable on the other column, the extraction procedure is not suspect. Detected and nondetected Aroclor-1016 results are not qualified for high recovery, but are qualified for %RPD.

E4RY4, E4RY4MS, E4RY4MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field blanks or field duplicates associated with this SDG**.**

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The CRQLs specified in Modification Reference Number: 1887.0 were not achieved for sample E4RX7 due to limited sample volume. The CRQL is two times greater than requested as 30 grams rather than 50 grams of sample was extracted.

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4RX2, E4RX8RE, E4RY2RE, E4RY2REDL, E4RY4MS, E4RY4MSD

Aroclor-1260	E4RX2
Aroclor-1248	E4RX8RE, E4RY2RE, E4RY2REDL
Aroclor-1016	E4RY4MS, E4RY4MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4RX7, E4RX9, E4RY3RE, E4RY3REDL

Aroclor-1260 E4RX7
Aroclor-1254 E4RX9
Aroclor-1248 E4RY3RE, E4RY3REDL

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1254 E4RX9RE, E4RX9REDL, E4RY2RE, E4RY2REDL, E4RY3RE, E4RY3REDL

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4RX4, E4RX5, E4RX6, E4RX9, E4RY0, E4RY1

Samples E4RX8, E4RX9, E4RY2 and E4RY3 were analyzed and reported twice as undiluted analyses. During the first analysis, the laboratory determined the presence of an Aroclor for which a valid calibration was not in place. As a result, the “S” flag was applied by the laboratory and the sample was reanalyzed with a valid calibration. This analysis has a “RE” suffix. The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample (suffix DL) should be used for result validation.

E4RX8, E4RX8RE, E4RX9, E4RX9RE, E4RY2, E4RY2RE, E4RY3, E4RY3RE

However, in the case of Aroclor-1254, Samples E4RX9RE, E4RX9REDL, E4RY2RE, E4RY2REDL, E4RY3RE, and E4RY3REDL have all been flagged “R” (rejected, unusable) as the percent differences between column results exceeds 100%. Results for Aroclor-1254 from the original analysis of E4RX9, E4RY2 and E4RY3 provide qualified, but usable data.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction Twenty (20) sediment samples, labeled E4RY5 through E4RY7, E4RZ7 through E4RZ9, E4RS0 through E4S03, E4S05, E4S07, E4S08, E4SB9, E4SC0, E4SC1, E4SC3, E4SC8, E4SD9 and E4SE0 were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The SDG consisted of two shipments of samples. The first shipment of samples was collected on 2/26/2010 and was received at the laboratory on 03/02/2010, intact at 9 ºC. The second shipment was collected on 03/04/2010 and received on 03/06/2010 intact at 5 ºC. Samples received 03/02/2010 exceeded the proper shipping temperature range of 2 – 6 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually ”sediment” samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the “J” flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of “J” if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator “J” flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the “result value” in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file “quantitation limit” are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The “U” values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the “J” flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S07 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

Using the field dup identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples that Samples E4S07 and E4S08 are field duplicates. No field blanks are associated with this SDG.

This report is ordered by fraction in the following order Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08
Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table

Semivolatile analytes	**E4S07** µg/Kg	**E4S08** µg/Kg	**%RPD**
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	ND	ND	NA
Fluorene	ND	ND	NA
Phenanthrene	190	ND	#

Semivolatile analytes	E4S07 µg/Kg	E4S08 µg/Kg	%RPD
Anthracene	ND	ND	NA
Fluoranthene	480	100	131
Pyrene	530	94	140
Benzo(a)anthracene	240	ND	#
Chrysene	250	ND	#
Benzo(b)fluoranthene	360	72	133
Benzo(k)fluoranthene	160	ND	#
Benzo(a)pyrene	270	ND	#
Indeno(1,2,3-cd)pyrene	180	ND	#
Dibenzo(a,h)anthracene	ND	ND	NA
Benzo(g,h,i)perylene	110	ND	#

ND= Not Detected, NA= Not Applicable, #= Not Calculable

Fluoranthene, Pyrene and Benzo(b)fluoranthene have RPDs exceeding 50%. For several other compounds, RPDs cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY5, E4S03, E4S07MS, E4SC8, E4SE0
Pyrene	E4S05, E4S08
Benzo(g,h,i)perylene	E4RY5, E4RY6, E4RZ7, E4RZ8, E4RZ9, E4S03, E4S07, E4S07MS, E4S07MSD
Indeno(1,2,3-cd)pyrene	E4RY5, E4RY6, E4RZ7, E4S03, E4S07, E4S07MSD
Benzo(b)fluoranthene	E4RZ8, E4S05, E4S08
Fluoranthene	E4S05, E4S08
Benzo(k)fluoranthene	E4RY5, E4RY6, E4S03, E4S07, E4S07MSD
Chrysene	E4RY6, E4RZ7, E4RZ8, E4RZ9
Benzo(a)pyrene	E4RZ7, E4RZ8, E4RZ9
Dibenzo(a,h)anthracene	E4SB9, E4SE0
Benzo(a)anthracene	E4RY6, E4RZ7, E4RZ8, E4RZ9
Acenaphthene	E4S02
Phenanthrene	E4RZ7, E4RZ8, E4RZ9, E4S07
Fluorene	E4S02
2-Methylnaphthalene	E4SC8

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RZ8, E4S02, E4S07MS, E4SE0

No dilutions for semivolatiles are associated with this SDG.

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile SIM samples are associated with a method blank (SBLK99) in which Indeno(1,2,3-cd)pyrene was at levels greater than the MDL but less than the CRQL. For samples in which Indeno(1,2,3-cd)pyrene is detected above the MDL but below the CRQL, reported sample concentrations have been elevated to the CRQL and qualified U. For samples in which Indeno(1,2,3-cd)pyrene is detected above the CRQL results are not qualified.

E4SB9, E4SC0, E4SC0DL, E4SC1, E4SC3, E4SC8, E4SC8DL, E4SD9, E4SD9DL, E4SE0, E4SE0DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Samples E4RZ7DL and E4S08DL with dilution factors less than or equal to 5 have deuterated monitoring compound 2-Methylnaphthalene-d_{10} recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Affected compounds are

2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene, Naphthalene, Phenanthrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The RPD between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S07, E4S07MS, E4S07MSD Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table

Semivolatile analytes	E4S07 µg/Kg	E4S08 µg/Kg	%RPD
Naphthalene	ND	ND	NA
2-Methylnaphthalene	ND	ND	NA
Acenaphthylene	ND	ND	NA
Acenaphthene	12	ND	#
Fluorene	12	ND	#
Phenanthrene	150	26	141
Anthracene	29	5	141
Fluoranthene	410	79	135
Pyrene	340	66	135
Benzo(a)anthracene	190	37	135
Chrysene	190	41	129
Benzo(b)fluoranthene	280	60	129
Benzo(k)fluoranthene	70	16	126
Benzo(a)pyrene	180	41	126
Indeno(1,2,3-cd)pyrene	150	38	119
Dibenzo(a,h)anthracene	28	7.2	118
Benzo(g,h,i)perylene	91	26	111

ND= Not Detected, NA= Not Applicable, #= Not Calculable

With the exception of Naphthalene, 2-Methylnaphthalene and Acenaphthylene, all RPDs either exceed 50%, or cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY6DL, E4RY7, E4RZ8DL, E4S05DL, E4S08DL, E4SC0DL, E4SC1, E4SC3, E4SD9DL
Pyrene	E4S01
Benzo(g,h,i)perylene	E4RY7, E4S01
Indeno(1,2,3-cd)pyrene	E4S00, E4S01
Benzo(b)fluoranthene	E4S01
Fluoranthene;	E4S01
Benzo(k)fluoranthene	E4RY7, E4S00, E4S05DL, E4S08DL

Acenaphthylene	E4RY5, E4RY5DL, E4RY6, E4RZ8, E4RZ9, E4S02, E4S02DL, E4S03, E4S03DL, E4S07, E4S07MSD, E4SC0DL, E4SC8DL, E4SD9, E4SE0DL
Chrysene	E4S01
Benzo(a)pyrene	E4S00, E4S01
Dibenzo(a,h)anthracene	E4RY6DL, E4RY7, E4RZ7DL, E4RZ8DL, E4S05DL, E4S08DL, E4SC1, E4SC3
Benzo(a)anthracene	E4S00, E4S01
Acenaphthene	E4RY5DL, E4RY6DL, E4RZ7, E4RZ9DL, E4S05, E4S07DL, E4S08, E4SB9, E4SC8DL, E4SD9DL, E4SE0DL
Phenanthrene	E4S00, E4S01
Fluorene	E4RY6DL, E4RY7, E4RZ7, E4RZ9DL, E4S05, E4S05DL, E4S07DL, E4S08, E4SB9, E4SC0DL, E4SC1, E4SC8DL, E4SD9DL, E4SE0DL
Naphthalene	E4RZ9, E4SC3, E4SC8DL
2-Methylnaphthalene	E4RY7, E4RZ9, E4S02DL, E4S03, E4SC1, E4SC3, E4SC8DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RY5, E4S00, E4S05DL, E4S07, E4S08DL, E4SB9, E4SD9DL, E4SE0DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4RY5	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RY6	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RZ7	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4RZ8	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4RZ9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S02	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S03	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S05	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4S07	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S08	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene,
E4SB9	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SC0	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SC8	Naphthalene, 2-Methylnaphthalene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SC9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SE0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4RY5DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4RY6DL	Fluoranthene
E4RZ9DL	Fluoranthene, Pyrene

E4S02DL	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S03DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4S07DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene
E4SC0DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4SC8DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene
E4SC9DL	Fluoranthene, Pyrene, Benzo(b)fluoranthene, Indeno(1,2,3-cd)pyrene
E4SE0DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected as Decachlorobiphenyl (surrogate) was one of the compounds failing to meet criteria.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0DL, E4SD9, E4SE0

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4SC0DL
Endosulfan II	E4RY7, E4RZ7, E4S05

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4SC0DL
Endosulfan II	E4RY6, E4RY7, E4RZ7, E4S05, E4S07, E4SB9, E4SC0, E4SC1, E4SC3, E4SE0
4,4'-DDT	E4RY7, E4RZ7, E4RZ9, E4S05

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SC3 has one surrogate percent recovery greater than 150%, but less than or equal to 200%, on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The “J” flags applied to samples E4SC3 during the automated check process have been removed for all detected compounds, unless the flag has been applied for another reason.

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10% on one or both columns. All target analytes are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Automated flags have been

overridden if a compound has been reported from the GC column having acceptable recovery, unless the flag has been applied for another reason.

E4RY7, E4RZ8, E4S07, E4SC0, E4SC3, E4SC8, E4SE0

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The RPD between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

Aldrin	E4S07MS, E4S07MSD
4,4'-DDT	E4S07MS, E4S07MSD

The RPD between pesticide analyte results is less than the lower acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

gamma-BHC (Lindane)	E4S07MS, E4S07MSD

The RPD between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Dieldrin	E4S07MS, E4S07MSD
Endrin	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than or equal to the lower expanded criteria limit but less than the lower primary criteria limit Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Heptachlor	E4S07MS

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are less than the lower expanded criteria limit Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4S07MS, E4S07MSD
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Heptachlor	E4S07MS, E4S07MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table.

Pesticide analytes	**E4S07** µg/Kg	**E4S08** µg/Kg	**%RPD**
alpha-BHC	ND	ND	NA
beta-BHC	0.19	0.2	5.1
delta-BHC	ND	ND	NA
gamma-BHC(Lindane)		ND	
Heptachlor	1.6	0.78	68.9
Aldrin	ND	ND	NA
Heptachlor epoxide			
Endosulfan I	ND	ND	NA
Dieldrin	1.6	1.3	20.7
4,4'-DDE	3.5	2.5	33.3
Endrin	0.96	0.79	19.4
Endosulfan II	0.38	ND	#
4,4'-DDD	ND	ND	NA
Endosulfan sulfate	ND	ND	NA
4,4'-DDT	ND		
Methoxychlor	1.9	2	5.1
Endrin ketone	0.38	ND	#
Endrin aldehyde	ND	ND	NA
alpha-Chlordane	ND	0.33	#
gamma-Chlordane	ND	ND	NA
Toxaphene	ND	ND	NA

ND = Not Detected, NA = Not Applicable, # = Not Calculable

Results for gamma-BHC(Lindane), Heptachlor epoxide, and 4,4'-DDT were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

RPD exceeded 50% for Heptachlor. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aldrin E4S07MS, E4S07MSD

alpha-BHC	E4SC3
alpha-Chlordane	E4S07MS, E4S07MSD
Endrin ketone	E4SC0DL
Dieldrin	E4S07
4,4'-DDD	E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ9, E4S02, E4S03, E4SC0, E4SC1
4,4'-DDE	E4S02, E4S07, E4SB9, E4SD9, PLCSS3
Endrin aldehyde	E4RZ8, E4S07MS, E4S07MSD
Heptachlor	E4SC1
Endosulfan I	E4SC0

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

4,4'-DDT	E4S07MSD, E4SC0, E4SC0DL
alpha-Chlordane	E4S08
gamma-Chlordane	E4SC0
gamma-BHC (Lindane)	E4S07MS, E4S07MSD
Endrin	E4S03, E4S07, E4S08, E4SC0, E4SE0
4,4'-DDE	E4RY5, E4RY6, E4RZ9, E4S03, E4S03DL, E4SC8
Endrin aldehyde	E4RZ9
Heptachlor	E4S07, E4S07MS

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4RY7, E4S00, E4S01, E4S05, E4SC1, E4SC3, E4SC8
alpha-BHC	E4SC1
beta-BHC	E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0DL, E4SC3
Endosulfan II	E4RY6, E4S03, E4S07, E4SB9, E4SC0, E4SE0
4,4'-DDT	E4RZ7, E4RZ9, E4SC1
alpha-Chlordane	E4RZ8, E4SC0DL
Endrin ketone	E4S07, E4SB9, E4SE0
Dieldrin	E4SC0DL, E4SC1, E4SC3
Endrin	E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S03DL, E4S05, E4SD9
Methoxychlor	E4RY6, E4RZ7, E4RZ9, E4S02, E4S03, E4S07, E4S08, E4SB9, E4SC0, E4SC8, E4SD9, E4SE0
4,4'-DDD	E4S03DL
4,4'-DDE	E4RY7, E4S05, E4SC1, E4SC3
Endrin aldehyde	E4S00, E4S01, E4S05, E4SE0
Heptachlor	E4RZ7, E4SC0DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4RY5, E4RY6, E4RZ7, E4RZ8, E4RZ9, E4S02, E4S03, E4S03DL, E4S07, E4S07MS, E4S07MSD, E4S08, E4SC0, E4SC0DL, E4SD9, E4SE0
beta-BHC	E4S02, E4S03

4,4'-DDT	E4RY5, E4RY6, E4RZ8, E4S08, E4SB9, E4SD9, E4SE0
gamma-BHC (Lindane)	E4RZ8, E4S03, E4S03DL, E4S07
Dieldrin	E4SC0
Endrin	E4S02, E4SB9, E4SC8
4,4'-DDD	E4SE0
4,4'-DDE	E4RZ7, E4SC0DL
Heptachlor	E4RY5, E4RY6, E4RZ8, E4RZ9, E4S02, E4S03, E4S03DL, E4S07MSD, E4S08, E4SB9, E4SC0, E4SD9, E4SE0
Endosulfan I	E4SB9

11. SYSTEM PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected.

E4RY5, E4RY6, E4RY7, E4RZ7, E4RZ8, E4RZ9, E4S00, E4S01, E4S02, E4S03, E4S03DL, E4S05, E4S07, E4S07MS, E4S07MSD, E4S08, E4SB9, E4SC0, E4SC0DL, E4SC1, E4SC3, E4SC8, E4SD9, E4SE0

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S03	Heptachlor
E4SC0	4,4’-DDD

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4RZ7, E4RZ8, E4S00, E4S01, E4S02, E4SB9, E4SD9, E4SE0

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following Aroclor samples have no associated sulfur cleanup blank. Detected and nondetected compounds are not qualified.

E4RZ8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor sample has surrogate percent recoveries that are greater than 200% on both columns. Detected compounds are qualified J. Nondetected compounds are not qualified. All target compounds are affected.

E4S07MS

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S02DL, E4S03DL, E4SC0, E4SC0DL, E4SE0

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The “J” flags applied to samples these samples during the automated check process have been removed for all detected compounds, unless the flag has been applied for another reason.

E4S02, E4S03, E4S07MSD, E4S08, E4SD9

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RZ8DL, E4S02DL, E4SB9

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1260 E4S07MS, E4S07MSD
Aroclor-1016 E4S07MS, E4S07MSD

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified. Although not reported as present, Aroclor-1248 is present in the MS/MSD samples in addition to the spiking compounds (Aroclor-1016 and Aroclor-1260) and may have attributed to the high recovery of the spike compounds.

Aroclor-1260 E4S07MS, E4S07MSD
Aroclor-1016 E4S07MS, E4S07MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S07 and E4S08 are identified as field duplicates in the field sampling plan**.** Results are summarized in the following table.

Aroclor Analytes	**E4S07DL** µg/Kg	**E4S08DL** µg/Kg	**%RPD**
Aroclor-1016	ND	ND	NA
Aroclor-1221	ND	ND	NA
Aroclor-1232	ND	ND	NA
Aroclor-1242	ND	ND	NA
Aroclor-1248	190	110	53.3
Aroclor-1254	ND	ND	NA
Aroclor-1260	80	ND	#
Aroclor-1262	ND	ND	NA
Aroclor-1268	ND	ND	NA

ND= Not Detected, NA= Not Applicable, #= Not Calculable

The RPD for Aroclor-1248 exceeds 50%. The RPD for Aroclor-1260 cannot be calculated because the compound was present in the MS, but not detected in the MSD. Results are not qualified based upon the results of the field duplicates.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Samples E4SB9 and E4SE0 are only reported as ten-fold dilutions, which place the detected Aroclor-1248 results within the calibration range. Analyses of a ten-times more concentrated aliquot of these samples were not performed because the laboratory was granted a waiver from this requirement by SMO.

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4S08
Aroclor-1248	E4RY6DL
Aroclor-1016	E4S07MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260	E4RZ7
Aroclor-1248	E4RY6

The following Aroclor sample has percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1248	E4S05

The following Aroclor sample has percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1248	E4RZ7

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S00, E4SB9, E4SD9

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample analysis should be used for result validation.

E4RY6, E4RZ8, E4S02, E4S03, E4S07, E4S08, E4SC0

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

COMPUTER SCIENCES CORPORATION
GREAT LAKES NATIONAL PROGRAM OFFICE

Date: June 18, 2010

Subject: Review of Data
Received for Review on: April 14, 2010

From: Julie Rest
Environmental Chemist

To: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4RY8

Number and Type of Samples: 20 Sediment Samples

Sample Numbers: E4RY8, E4RY9, E4RZ0, E4RZ1 – E4RZ6, E4S06, E4S09, E4S10, E4S49 – E4S52, E4S59, E4S77 – E4S79

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

Sample Receipt: Twenty (20) sediment samples labeled E4RY8, E4RY9, E4RZ0 – E4RZ6, E4S06, E4S09, E4S10, E4S49 – E4S52, E4S59, E4S77, and E4S79 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. Samples E4RY8, E4RY9, E4RZ0 –E4RZ6, E4S06, E4S09, and E4S10 were collected on 2/26/2010 and were received on 3/2/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 8 ºC. Samples E4S49 – E4S52, E4S59, E4S77, E4S78 and E4S79 were collected on 3/2/2010 and were received on 3/4/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 7 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4RZ1 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4RZ3 and E4RZ4, and E4S78 and E4S79, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10, E4S49, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79

The following semivolatile samples are associated with an opening CCV percent difference (%D) outside criteria for 2-Methylnaphthalene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4RY8, E4RZ1, E4RZ1MSD, E4RZ5DL

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Sample E4RZ3 has a deuterated monitoring compound recovery above the upper limit of the criteria window. Affected compounds Anthracene and Phenanthrene are qualified “J” in sample E4RZ3.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4RZ3 and E4RZ4

Semivolatile compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	61	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	650	1	350	1	60
Anthracene	210	1	100	1	71
Fluoranthene	1500	1	860	1	54
Pyrene	1300	1	1100	1	17
Benzo(a)anthracene	530	1	600	1	12
Chrysene	820	1	630	1	26
Benzo(b)fluoranthene	700	1	720	1	2.8
Benzo(k)fluoranthene	300	1	250	1	18
Benzo(a)pyrene	580	1	620	1	6.7
Indeno(1,2,3-cd)pyrene	290	1	290	1	0
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	170	1	180	1	5.7

For field duplicates E4RZ3 and E4RZ4, RPD values for Phenanthrene, Anthracene, and Fluoranthene were above 50%.

E4S78 and E4S79

Semivolatile compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicate samples E4S78 and E4S79, RPDs could not be calculated because both sets of results were nondetects.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4RY8, E4RZ4, E4S09
Pyrene	E4S50
Benzo (g,h,i) perylene	E4RZ0, E4RZ2, E4RZ3, E4RZ5DL, E4S06, E4S09, E4S59
Indeno (1,2,3-cd) pyrene	E4RZ2, E4RZ5DL, E4S06, E4S59
Benzo (b) fluoranthene	E4RZ0, E4S49, E4S50
Fluoranthene	E4S50
Benzo (k) fluoranthene	E4RZ2, E4RZ5DL, E4S06, E4S09, E4S59
Acenaphthylene	E4RZ5DL
Chrysene	E4RZ0, E4S49, E4S59
Benzo (a) pyrene	E4RZ0, E4S49, E4S50, E4S59
Dibenzo (a,h) anthracene	E4RY9, E4RZ5
Benzo (a) anthracene	E4RZ0, E4S06, E4S49, E4S59
Acenaphthene	E4RY9, E4RZ3, E4RZ5DL
Phenanthrene	E4RZ0, E4S06, E4S49, E4S59

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4RZ5 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene, Phenanthrene, and Pyrene, and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(b)fluoranthene E4S79

Indeno(1,2,3-cd)pyrene E4S78, E4S79

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the MS and MSD prepared for semivolatile-SIM sample E4RZ1 were above criteria for Acenaphthene and Pyrene. All sample results for Acenaphthene and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4RZ3 and E4RZ4

Semivolatile-SIM compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Naphthalene	12	1	5.4	1	76
2-Methylnaphthalene	6.8	1	3.8	1	57
Acenaphthylene	3.8	1	3.8	1	0

Semivolatile-SIM compounds	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
Acenaphthene	32	1	12	1	91
Fluorene	33	1	13	1	87
Phenanthrene	330	1	220	1	40
Anthracene	75	1	59	1	24
Fluoranthene	590	1	470	1	23
Pyrene	930	1	700	1	28
Benzo(a)anthracene	460	1	440	1	4.4
Chrysene	460	1	390	1	17
Benzo(b)fluoranthene	590	1	520	1	13
Benzo(k)fluoranthene	140	1	120	1	15
Benzo(a)pyrene	380	1	360	1	5.4
Indeno(1,2,3-cd)pyrene	330	1	280	1	16
Dibenzo(a,h)anthracene	65	1	60	1	8
Benzo(g,h,i)perylene	130	1	120	1	8

For field duplicate pair E4RZ3 and E4RZ4, Naphthalene, 2-Methylnaphthalene, Acenaphthene, and Fluorene had RPD values above 50%.

E4RZ3DL and E4RZ4DL

Semivolatile-SIM compounds	E4RZ3DL µg/kg	DF	E4RZ4DL µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	42	10	3.6	10	95
Fluorene	43	10	4.5	10	82
Phenanthrene	420	10	49	10	47
Anthracene	82	10	9.1	10	20
Fluoranthene	940	10	80	10	28
Pyrene	810	10	66	10	25
Benzo(a)anthracene	450	10	38	10	2.2
Chrysene	460	10	40	10	14
Benzo(b)fluoranthene	600	10	59	10	12
Benzo(k)fluoranthene	150	10	17	10	6.9
Benzo(a)pyrene	420	10	39	10	4.9
Indeno(1,2,3-cd)pyrene	340	10	27	10	9.2
Dibenzo(a,h)anthracene	66	10	5.8	10	3.1
Benzo(g,h,i)perylene	150	10	22	10	0

For the dilute analysis of field duplicate pair E4RZ3DL and E4RZ4DL, Acenaphthene and Fluorene had RPD values above 50%.

E4S78 and E4S79

Semivolatile-SIM compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	1.8	1	0.72	1	86
Anthracene	ND	1	ND	1	
Fluoranthene	3.2	1	0.81	1	120
Pyrene	3.6	1	1.4	1	88
Benzo(a)anthracene	1.6	1	ND	1	
Chrysene	2.1	1	0.88	1	82
Benzo(b)fluoranthene	2.8	1	2.2	1	24
Benzo(k)fluoranthene	0.84	1	ND	1	
Benzo(a)pyrene	2	1	0.61	1	110
Indeno(1,2,3-cd)pyrene	2.3	1	2.2	1	4.4
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	1.7	1	1.1	1	43

For field duplicate pair E4S78 and E4S79, the RPD calculated for Phenanthrene, Fluoranthene, Chrysene, Pyrene, and benzo(a)pyrene were above 50% .

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified “J”. Nondetected compounds are not qualified.

Anthracene	E4RZ0DL, E4RZ1, E4RZ2DL, E4RZ6, E4S06DL, E4S10, E4S49DL, E4S50DL, E4S59DL
Pyrene	E4S79
Benzo (g,h,i) perylene	E4RZ1MS, E4RZ1MSD, E4S50DL, E4S78, E4S79
Indeno (1,2,3-cd) pyrene	E4RZ1, E4RZ1MS, E4RZ1MSD, SBLK09
Benzo (b) fluoranthene	E4RZ1MSD

Fluoranthene	E4S52, E4S79
Benzo (k) fluoranthene	E4RZ0DL, E4RZ1, E4RZ1MS, E4RZ6, E4S50DL, E4S51, E4S52, E4S77, E4S78
Acenaphthylene	E4RY8, E4RY9DL, E4RZ0, E4RZ2, E4RZ3, E4S06, E4S49, E4S50, E4S59
Chrysene	E4RZ1MS, E4RZ1MSD, E4S51, E4S77, E4S78, E4S79
Benzo (a) pyrene	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S78, E4S79
Dibenzo (a,h) anthracene	E4RZ0DL, E4RZ1MSD, E4RZ2DL, E4RZ6, E4S06DL, E4S10, E4S49DL, E4S50DL, E4S52, E4S59DL, E4S77
Benzo (a) anthracene	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S51, E4S52, E4S77, E4S78
Acenaphthene	E4RY8DL, E4RZ0DL, E4RZ2DL, E4RZ4DL, E4S09DL, E4S10, E4S50, E4S59
Phenanthrene	E4RZ1MSD, E4S51, E4S52, E4S77, E4S78, E4S79
Fluorene	E4RY8DL, E4RZ0DL, E4RZ2DL, E4RZ4DL, E4RZ6, E4S10, E4S50, E4S59
Naphthalene	E4RZ2
2-Methylnaphthalene	E4RZ2

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

Acenaphthene	E4RY9, E4RZ5
Acenaphthylene	E4RZ5
Anthracene	E4RY8, E4RY9, E4RZ3, E4RZ4, E4RZ5, E4S09
Benzo(a)anthracene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(a)pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59

Benzo(b)fluoranthene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(g,h,i)perylene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Benzo(k)fluoranthene	E4RY8, E4RY9, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Chrysene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Dibenzo(a,h)anthracene	E4RY8, E4RY9, E4RZ3, E4RZ4, E4RZ5, E4S09
Fluoranthene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Fluorene	E4RY9, E4RY25
Indeno(1,2,3-cd)pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Naphthalene	E4RZ5
Phenanthrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59
Pyrene	E4RY8, E4RY9, E4RZ0, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4S06, E4S09, E4S49, E4S50, E4S59

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Anthracene	E4RZ5DL
Benzo(a)anthracene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Benzo(a)pyrene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Benzo(b)fluoranthene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL, E4S09DL
Benzo(g,h,i)perylene	E4RY9DL
Benzo(k)fluoranthene	E4RZ5DL
Chrysene	E4RY8DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Fluoranthene	E4RY8DL, E4RY9DL, E4RZ2DL, E4RZ3DL, E4RZ4DL, E4RZ5DL, E4S09DL

Fluorene	E4RZ5DL
Indeno(1,2,3-cd)pyrene	E4RY8DL, E4RY9DL, E4RZ5DL
Naphthalene	E4RZ5DL
Phenanthrene	E4RY85DL, E4RY9DL, E4RZ3DL, E4RZ4DL, E4RZ5DL
Pyrene	E4RY8DL, E4RY9DL, E4RZ2DL, E4RZ3DL, E4RZ4DL, E4RZ5DL E4S09DL

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. . Detected compounds are qualified J. Nondetected compounds are qualified UJ. Despite the CCV issue, the Decachlorobiphenyl recoveries in the associated samples, except for diluted E4RZ5, met the acceptance criteria.

E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ3, E4RZ4, E4RZ5, E4RZ6, E4S06, E4S09, E4S10, E4S49, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4RZ5DL
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10
alpha-Chlordane	E4S49, E4S52
Endrin ketone	E4RY8DL, E4RZ5DL
gamma-BHC (Lindane)	E4RZ1, E4RZ2, E4RZ6, E4S06, E4S10
Dieldrin	E4S52, E4S59
Endrin	E4RY8DL, E4RZ1, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S50, E4S51
Methoxychlor	E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S06, E4S10
4,4'-DDD	E4RY8DL, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
4,4'-DDE	E4RY8DL, E4S51

Endrin aldehyde	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ5DL, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
Endosulfan I	E4RY8DL, E4RZ5DL, E4S49, E4S50, E4S59

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S49, E4S51, E4S52, E4S77, E4S78, E4S79
beta-BHC	E4RZ5DL, E4S77, E4S78, E4S79
delta-BHC	E4S51, E4S52, E4S77, E4S78, E4S79
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S09, E4S10, E4S51, E4S52, E4S79
4,4'-DDT	E4S49, E4S50, E4S51, E4S52, E4S77, E4S78, E4S79
alpha-Chlordane	E4S49, E4S52
Endrin ketone	E4RY8DL, E4RZ5DL, E4S51, E4S52, E4S59, E4S77, E4S79
gamma-BHC (Lindane)	E4RZ1, E4RZ2, E4RZ6, E4S06, E4S10
Dieldrin	E4S52, E4S59
Endrin	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ2, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S49, E4S50, E4S51, E4S59
Methoxychlor	E4RY8, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ4, E4RZ6, E4S06, E4S09, E4S10
4,4'-DDD	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
4,4'-DDE	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ6, E4S06, E4S10, E4S51
Endrin aldehyde	E4RY8, E4RY8DL, E4RZ0, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ5DL, E4RZ6, E4S10, E4S50, E4S51, E4S52, E4S59, E4S77, E4S78, E4S79
Endosulfan I	E4RY8DL, E4RZ2, E4RZ5DL, E4S06, E4S49, E4S50, E4S59

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery.

However, diluted pesticide sample E4RZ5DL with a dilution factor greater than 5 had surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4RZ3 and E4RZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4RZ3 and E4RZ4

Pesticide compound	E4RZ3 µg/kg	DF	E4RZ4 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	1.1	1		1	
Heptachlor	ND	1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1	ND	1	
Endosulfan I	0.68	1		1	
Dieldrin	3	1	2.2	1	31
4,4'-DDE	4	1	2.2	1	58
Endrin		1	0.6	1	
Endosulfan II	0.39	1	0.33	1	17
4,4'-DDD		1	3.8	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	6	1	3.3	1	58
Methoxychlor		1	1.7	1	
Endrin ketone	0.39	1	ND	1	
Endrin aldehyde		1	1.9	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

Results for gamma-BHC(Lindane), Heptachlor, Heptachlor epoxide, Endosulfan I, Endrin, Methoxychlor, and Endrin aldehyde were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

For field duplicate samples E4RZ3 and E4RZ4, where calculated, RPD values were less than 50 %, with the exception of 4,4'-DDT and 4,4'-DDE.

E4S78 and E4S79

Pesticide compound	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.12	1	0.11	1	8.7
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	0.02	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.24	1	ND	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S78 and E4S79, beta-BHC had an RPD value less than 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following compounds were reported at a concentration below the MDL in the samples listed below. The results are qualified "U" and elevated to the CRQL. The results are considered to be nondetects at the CRQL.

4,4'-DDT	E4S10
Endosulfan sulfate	E4S10
Heptachlor epoxide	E4S77.E4S78

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

beta-BHC	E4S10
Heptachlor	E4S59
Heptachlor epoxide	E4S79

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J".

Heptachlor epoxide	E4S77, E4S79
beta-BHC	E4RZ1MS, E4S51
Endosulfan II	E4RZ1
4,4'-DDT	E4S78
Endrin ketone	E4RZ1MSD
gamma-BHC (Lindane)	E4RY9, E4RZ1MS, E4RZ1MSD, E4RZ3
Dieldrin	E4S59
Methoxychlor	E4RY9
4,4'-DDD	E4RY9, E4RZ4, E4RZ6, E4S10, E4S49
4,4'-DDE	E4RZ1MSD, E4RZ3, E4S09, E4S49
Endrin aldehyde	E4RZ1MSD, E4RZ6
Heptachlor	E4RZ1MSD, E4S59
Endosulfan I	E4RZ3, E4RZ5

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

4,4'-DDT	E4RY9, E4RZ2, E4RZ4, E4RZ5DL, E4S06, E4S59
Endrin	E4RZ4

4,4'-DDD	E4RZ0, E4RZ5, E4RZ5DL
4,4'-DDE	E4RY9, E4RZ2, E4RZ4, E4RZ5, E4RZ5DL, E4S50, E4S59
Endrin aldehyde	E4RZ5, E4S06
Endosulfan I	E4S09

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4RY8DL, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ5DL, E4RZ6, E4S06, E4S10, E4S50, E4S51, E4S52
Endosulfan sulfate	E4RZ1
alpha-BHC	E4S59
beta-BHC	E4RZ1MSD, E4RZ5DL, E4RZ6, E4S77, E4S78, E4S79
Endosulfan II	E4RY8, E4RY9, E4RZ0, E4RZ1MSD, E4RZ3, E4RZ4, E4RZ5, E4RZ6, E4S06, E4S09, E4S51
4,4'-DDT	E4RZ1, E4RZ6, E4S50
alpha-Chlordane	E4S52
Endrin ketone	E4RY9, E4RZ3, E4S09, E4S59
gamma-BHC (Lindane)	E4RZ1, E4RZ6, E4S06, E4S52
Dieldrin	E4S52
Endrin	E4RY8, E4RY8DL, E4RZ0, E4RZ2, E4RZ5, E4RZ5DL, E4RZ6, E4S06, E4S49, E4S50, E4S59
Methoxychlor	E4RY8, E4RZ1, E4RZ1MS, E4RZ1MSD, E4RZ2, E4RZ4, E4RZ5DL, E4S06, E4S09, E4S49, E4S50, E4S52, E4S59
4,4'-DDD	E4RZ1, E4RZ1MS, E4RZ1MSD, E4S50, E4S51
4,4'-DDE	E4RZ1MS, E4S06, E4S10, E4S51
Endrin aldehyde	E4RY8, E4RZ0, E4RZ1, E4RZ1MS
Heptachlor	E4RZ6, E4S10, E4S51

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4RY8, E4RZ0, E4RZ3, E4RZ5, E4S09
beta-BHC	E4RZ2
delta-BHC	E4S06, E4S49
4,4'-DDT	E4RZ0, E4RZ5
gamma-BHC (Lindane)	E4RZ4, E4S09
Endrin	E4RY9, E4RZ3, E4S09
Methoxychlor	E4RZ3, E4RZ5
4,4'-DDD	E4RY8, E4RZ3, E4S09
4,4'-DDE	E4RY8, E4RZ0
Endrin aldehyde	E4RY9, E4RZ2, E4RZ3, E4S09
Heptachlor	E4RZ4, E4RZ5, E4RZ5DL, E4S09
Endosulfan I	E4RZ0, E4RZ4

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of diluted sample E4RY9DL. No sample results were qualified based on surrogate recovery. However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4RY8, E4RY9, E4RZ3, E4RZ4, and E4S49. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4RY9DL, E4RZ3DL, E4RZ4DL, E4S09DL

Diluted Aroclor sample E4RY9DL, with a dilution factor greater than 5, has surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4RZ1, the Aroclor MS and MSD sample has a percent recovery greater than the upper acceptance limit on RTX-CLP2 column for Aroclor-1016. In addition, the relative percent difference (RPD) between the MS and MSD for Aroclor-1016 was above criteria on both columns. All samples are affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SZ3 and E4SZ4, and E4S78 and E4S79 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SZ3 and E4SZ4

Aroclor compounds	E4SZ3 µg/kg	DF	E4SZ4 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	240	1	180	1	29
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4SZ3DL and E4SZ4DL

Aroclor compounds	E4SZ3DL µg/kg	DF	E4SZ4DL µg/kg	DF	%RPD
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	290	10	240	10	19
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	
Aroclor-1268	ND	10	ND	10	

For the neat and diluted analysis of field duplicate samples E4SZ3 and E4SZ4, RPD values were not calculated when both values were nondetects. The RPD for Aroclor-1248 was below 50%.

E4S78 and E4S79

Aroclor compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Aroclor-1016	ND		ND		
Aroclor-1221	ND		ND		
Aroclor-1232	ND		ND		
Aroclor-1242	ND		ND		
Aroclor-1248	ND		ND		
Aroclor-1254	ND		ND		
Aroclor-1260	ND		ND		

Aroclor compounds	E4S78 µg/kg	DF	E4S79 µg/kg	DF	%RPD
Aroclor-1262	ND		ND		
Aroclor-1268	ND		ND		

For field duplicate samples E4S78 and E4S79, RPD values were not calculated because both results were nondetects.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1260 E4RZ6, E4S10, E4S51

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4RZ2, E4RZ6, E4S51

Aroclor-1248 E4RY8, E4S09DL

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S59

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S52

For the MS and MSD prepared for sample E4RZ1, Aroclor-1016 had a percent difference between the results on the two GC columns exceeding 100%. Detected Aroclor-1016 results in the MS and MSD are qualified "R".

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4RY9, E4RZ0, E4RZ3 – E4RZ5, E4S09	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

GREAT LAKES NATIONAL PROGRAM OFFICE

Date: June 11, 2010

Subject: Review of Data
Received for Review on: April 14, 2010

From: Julie Rest
Environmental Chemist

To: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4S11

Number and Type of Samples: 19 Sediment Samples

Sample Numbers: E4RS11 – E4S18, E4S25 – E4S27, E4S34 – E4S36, E4S38 – E4S42

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

Sample Receipt: Nineteen (19) sediment samples labeled E4S11 – E4S18, E4S25 – E4S27, E4S34 – E4S36, and E4S38 – E4S42 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All nineteen samples were collected on 3/1/2010 and were received on 3/3/2010, intact, at 6 ºC. No data have been qualified based on temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4S35 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4S14 and E4S15, and E4S39 and E4S40, as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S11, E4S12, E4S13, E4S14, E4S15, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S35MS, E4S35MSD, E4S36, E4S38, E4S39, E4S40, E4S41, E4S42

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria for benzo(b)fluoranthene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S11, E4S14, E4S15, E4S16, E4S18, E4S25, E4S26, E4S27, E4S34, E4S38, E4S39, E4S40, E4S41, E4S42

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Sample E4S41 has a deuterated monitoring compound recovery slightly above the upper limit of the criteria window. Since affected compounds, Anthracene and Phenanthrene were not detected in sample E4S41, the data are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene had low recoveries in the MS/MSD prepared for sample E4S35 and the relative percent difference (RPD) between the MS and MSD exceeded criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4S14 and E4S15

Semivolatile compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	53	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicates E4S14 and E4S15, the RPD values were not calculated because either one or both of the values was zero.

E4S39 and E4S40

Semivolatile compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	99	1	78	1	24
Anthracene	ND	1	ND	1	
Fluoranthene	160	1	120	1	29
Pyrene	120	1	97	1	21
Benzo(a)anthracene	52	1	54	1	3.8
Chrysene	74	1	ND	1	
Benzo(b)fluoranthene	82	1	81	1	1.2
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	55	1	49	1	12
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	

Semivolatile compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicate samples E4S39 and E4S40, where the RPD could be calculated, the values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S12, E4S17, E4S36
Pyrene	E4S18, E4S25, E4S27, E4S39, E4S40
Benzo(g,h,i)perylene	E4S11, E4S16, E4S18, E4S25, E4S26, E4S34, E4S35MS, E4S35MSD, E4S38
Indeno(1,2,3-cd)pyrene	E4S11, E4S16, E4S26, E4S34, E4S35MS
Benzo(b)fluoranthene	E4S25, E4S35MSD, E4S39, E4S40
Fluoranthene	E4S14, E4S25, E4S27, E4S35MSD, E4S40
Benzo(k)fluoranthene	E4S36
Chrysene	E4S18, E4S26, E4S34, E4S35MS, E4S39
Benzo(a)pyrene	E4S16, E4S18, E4S25, E4S34, E4S35MSD, E4S38, E4S39, E4S40
Dibenzo(a,h)anthracene	E4S12, E4S13, E4S17, E4S35
Benzo(a)anthracene	E4S11, E4S16, E4S18, E4S25, E4S34, E4S35MSD, E4S38, E4S39, E4S40
Acenaphthene	E4S13, E4S36
Phenanthrene	E4S11, E4S16, E4S18, E4S26, E4S27, E4S34, E4S35MSD, E4S39, E4S40
Fluorene	E4S13, E4S36

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(g,h,i)perylene E4S14DL, E4S27DL, E4S42

Indeno(1,2,3-cd)pyrene E4S27DL, E4S42

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

An MS/MSD was prepared for sample E4S35. The results for spiking compounds acenaphthene and pyrene reported in the MS/MSD were approximately ten times lower than the amount detected for these compounds in the unspiked sample, resulting is negative recoveries, which have no physical meaning. The differences may have resulted from matrix interference, high levels of the compounds in the unspiked sample, or variable sediment consistency. Both compounds required dilution in the unspiked sample. No dilutions were performed for the MS/MSD. No other samples are qualified based on the MS/MSD. Results for acenaphthene and pyrene in Sample E4S35 are reported from the sample dilution.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4S14 and E4S15

Semivolatile-SIM compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	1.5	1	ND	1	
Fluorene	1.7	1	0.63	1	92
Phenanthrene	19	1	6.6	1	97
Anthracene	4	1	1.3	1	100
Fluoranthene	33	1	13	1	87
Pyrene	26	1	11	1	81
Benzo(a)anthracene	14	1	5.8	1	83
Chrysene	15	1	6.1	1	84
Benzo(b)fluoranthene	21	1	9.2	1	78
Benzo(k)fluoranthene	6.3	1	2.7	1	80
Benzo(a)pyrene	14	1	6.5	1	73
Indeno(1,2,3-cd)pyrene	9.5	1	5	1	62
Dibenzo(a,h)anthracene	2	1	1	1	67
Benzo(g,h,i)perylene	7.5	1	4.1	1	59

For field duplicate pair E4S14 and E4S15, all detected compounds had RPD values above 50%.

E4S39 and E4S40

Semivolatile-SIM compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1

Benzo(b)fluoranthene	55	5	51	5	7.5
Benzo(k)fluoranthene	17	5	15	5	13
Benzo(a)pyrene	39	5	37	5	5.3
Indeno(1,2,3-cd)pyrene	30	5	29	5	3.4
Dibenzo(a,h)anthracene	5.8	5	5.6	5	3.5
Benzo(g,h,i)perylene	26	5	25	5	3.9

For field duplicate pair E4S39DL and E4S40DL, all calculated RPD values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4S14DL, E4S15, E4S18DL, E4S25DL, E4S26DL, E4S34DL, E4S39DL, E4S40DL, E4S41
Benzo(g,h,i)perylene	E4S14DL, E4S27DL, E4S42
Indeno(1,2,3-cd)pyrene	E4S27DL, E4S42, SBLK41
Benzo(b)fluoranthene	SBLK41
Fluoranthene	E4S42

Benzo(k)fluoranthene	E4S14DL, E4S27DL, E4S41, E4S42
Acenaphthylene	E4S11, E4S17DL, E4S18, E4S26, E4S35, E4S36, E4S38, E4S39
Benzo(a)pyrene	E4S42
Dibenzo(a,h)anthracene	E4S14, E4S14DL, E4S15, E4S18DL, E4S25DL, E4S26DL, E4S27, E4S36DL, E4S38DL, E4S39DL, E4S40DL, E4S41
Benzo (a) anthracene	E4S42
Acenaphthene	E4S11DL, E4S12DL, E4S14, E4S16, E4S17DL, E4S18, E4S25, E4S26DL, E4S27DL, E4S34, E4S38DL, E4S39DL, E4S40DL
Phenanthrene	E4S42
Fluorene	E4S11DL, E4S12DL, E4S14, E4S15, E4S16DL, E4S18DL, E4S25, E4S26DL, E4S27DL, E4S34DL, E4S35MS, E4S35MSD, E4S39DL, E4S40DL, E4S41
Naphthalene	E4S11, E4S27
2-Methylnaphthalene	E4S27, E4S35DL, E4S36

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

Acenaphthene	E4S13, E4S35
Anthracene	E4S12, E4S13, E4S17, E4S35, E4S36
Benzo(a)anthracene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(a)pyrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(b)fluoranthene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Benzo(g,h,i)perylene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38

Benzo(k)fluoranthene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S26, E4S34, E4S35, E4S36, E4S38
Chrysene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Dibenzo(a,h)anthracene	E4S12, E4S13, E4S17, E4S35, E4S36,
Fluoranthene	E4S11, E4S12, E4S13, E4S14, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Fluorene	E4S13, E4S35
Indeno(1,2,3-cd)pyrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Naphthalene	E4S35
Phenanthrene	E4S11, E4S12, E4S13, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40
Pyrene	E4S11, E4S12, E4S13, E4S14, E4S16, E4S17, E4S18, E4S25, E4S26, E4S27, E4S34, E4S35, E4S36, E4S38, E4S39, E4S40

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Anthracene	E4S35DL
Benzo(a)anthracene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Benzo(a)pyrene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Benzo(b)fluoranthene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL
Benzo(g,h,i)perylene	E4S12DL, E4S17DL, E4S35DL
Chrysene	E4S11DL, E4S12DL, E4S13DL, E4S17DL, E4S35DL
Fluoranthene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S18DL, E4S26DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL
Indeno(1,2,3-cd)pyrene	E4S12DL, E4S13DL, E4S17DL, E4S35DL
Phenanthrene	E4S12DL, E4S13DL, E4S17DL, E4S36DL
Pyrene	E4S11DL, E4S12DL, E4S13DL, E4S16DL, E4S17DL, E4S34DL, E4S35DL, E4S36DL, E4S38DL

For the MS/MSD prepared for sample E4S35, the following compounds reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated. “J”. No further dilution analysis was performed

Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Chrysene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4S34, E4S35, E4S40, E4S41, E4S42
Endrin	E4S14, E4S15, E4S16, E4S25, E4S38, E4S39, E4S40, E4S41
Endrin aldehyde	E4S15, E4S16, E4S38, PLCSS1

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4S17, E4S27, E4S34, E4S35, E4S40, E4S41, E4S42
4,4'-DDT	E4S34, E4S41, E4S42
Endrin	E4S12, E4S14, E4S15, E4S16, E4S17, E4S25, E4S26, E4S35, E4S38, E4S39, E4S40, E4S41
4,4'-DDD	E4S34, E4S41, E4S42
Endrin aldehyde	E4S15, E4S16, E4S25, E4S26, E4S27, E4S34, E4S38, E4S41

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a high surrogate recovery was obtained on one column for samples E4S13 and E4S17. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. As a result, for samples E4S13

and E4S17, the "J" flags applied during the automated check process have been removed for the following compounds.

E4S13 4,4'-DDE, Endrin, 4,4'-DDD

E4S17 4,4'-DDD

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S35, the pesticide MS and/or MSD samples have percent recoveries that are greater than the upper acceptance limit on the RTXCLP2 column for gamma-BHC and Heptachlor. All samples in the SDG are affected. However, since the results for gamma-BHC and Heptachlor were reported from the RTXCLP column for all samples in this SDG, the data are not qualified.

On the other column, RTX-CLP, the relative percent difference (RPD) between the MS and MSD is outside of criteria for 4,4'-DDT. All samples are affected. Detected compounds are qualified "J".

E4S11 – E4S18, E4S25 – E4S27, E4S34, E4S35, E4S36, E4S38 – E4S42

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4SRW1 and E4RW2, E4RW3 and E4RW4 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4S14 and E4S15

Pesticide compound	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	0.12	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	0.21	1	0.16	1	27
Endrin	0.24	1	0.23	1	4.3
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.21	1	0.14	1	40
Endosulfan sulfate	0.24	1	ND	1	
4,4'-DDT	0.24	1	0.23	1	4.3
Methoxychlor	1.2	1	ND	1	

Pesticide compound	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	0.12	1	0.17	1	35
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S14 AND E4S15, where calculated, RPD values were less than 50%.

E4S39 and E4S40

Pesticide compound	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.17	1	0.24	1	34
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	0.11	1	
4,4'-DDE	0.68	1	1	1	38
Endrin	0.26	1	ND	1	
Endosulfan II	ND	1	0.24	1	
4,4'-DDD	0.66	1	1	1	41
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.29	1	0.44	1	41
Methoxychlor	1.3	1	0.2	1	150
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	0.28	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4S39 and E4S40, one compound, Methoxychlor, had an RPD value greater than 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Methoxychlor was reported at a concentration below the MDL in sample E4S15. This result is qualified "U" and elevated to the CRQL. The result for Methoxychlor in sample E4S15 is considered a nondetect at the level of the CRQL. The following compounds were flagged "UJ" during the automated check process. These compounds were affected by blank contamination and/or percent difference between the two columns outside of criteria, resulting in the "U" flag. The flags for these compounds have been adjusted to "U" in the "B" and "Z" data files.

4,4'-DDT	E4S42
Endrin	E4S17, E4S35
Endosulfan II	E4S17
Endrin ketone	E4S17

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

4,4'-DDD	E4S14, E4S41
4,4'-DDE	E4S14, E4S15
4,4'-DDT	E4S16
alpha-chlordane	E4S35MS, E4S35MSD
Heptachlor	E4S25

The following pesticide samples have percent differences between the results on the two GC columns in the range of 26-50%. Detected compounds are qualified "J".

Heptachlor epoxide	E4S12, E4S39, E4S40
Aldrin	E4S35MS
4,4'-DDT	E4S12, E4S17, E4S35MS, E4S38, E4S39
alpha-Chlordane	E4S18
gamma-BHC (Lindane)	E4S35MSD
Dieldrin	E4S13, E4S17, E4S40
Endrin	E4S27
Methoxychlor	E4S15, E4S18, E4S35, E4S40
4,4'-DDD	E4S15, E4S18, E4S38, E4S39, E4S42

4,4'-DDE	E4S12, E4S25, E4S26, E4S27, E4S34, E4S35MS, E4S35MSD, E4S38, E4S40, E4S41
Heptachlor	E4S12, E4S35MS

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Heptachlor epoxide	E4S25
4,4'-DDT	E4S35
alpha-Chlordane	E4S17
gamma-Chlordane	E4S13
gamma-BHC (Lindane)	E4S35MS
Endrin	E4S11
4,4'-DDD	E4S35
4,4'-DDE	E4S17
Endrin aldehyde	E4S17
Heptachlor	E4S13

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S15, E4S16, E4S27, E4S34, E4S41
Endosulfan sulfate	E4S11
alpha-BHC	E4S16
beta-BHC	E4S41, E4S42
Endosulfan II	E4S17, E4S35, E4S40, E4S42
4,4'-DDT	E4S14, E4S15, E4S25, E4S34, E4S41, E4S42
alpha-Chlordane	E4S11
gamma-Chlordane	E4S14
Endrin ketone	E4S12, E4S17, E4S27, E4S35, E4S35MSD, PLCSS1
gamma-BHC (Lindane)	E4S41, E4S42

Dieldrin	E4S18
Endrin	E4S12, E4S14, E4S15, E4S16, E4S17, E4S25, E4S26, E4S35, E4S38, PLCSS1
Methoxychlor	E4S11, E4S12, E4S14, E4S16, E4S25, E4S26, E4S27, E4S34, E4S35MS, E4S35MSD, E4S38, E4S39, E4S41
4,4'-DDD	E4S41, E4S42
4,4'-DDE	E4S16
Endrin aldehyde	E4S16, E4S25, E4S26, E4S27, E4S34, E4S38, E4S41, PLCSS1
Heptachlor	E4S18

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4S13, E4S17, E4S18, E4S26, E4S35, E4S35MS, E4S35MSD, E4S36, E4S38
delta-BHC	E4S25
4,4'-DDT	E4S26, E4S36
alpha-Chlordane	E4S13
gamma-Chlordane	E4S16, E4S17, E4S18, E4S27
gamma-BHC (Lindane)	E4S13
Endrin	E4S34, E4S36
Methoxychlor	E4S13, E4S17, E4S36
4,4'-DDD	E4S26, E4S36, E4S40
Endrin aldehyde	E4S36
Heptachlor	E4S17, E4S36

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4S12, E4S13 and E4S17. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted Aroclor sample E4S13DL, with a dilution factor greater than 5, has surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Diluted Aroclor samples E4S13DL and E4S17DL, with dilution factors greater than 5, have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S35, the Aroclor MSD sample has a percent recovery greater than the upper acceptance limit on the RTX-CLP2 column for Aroclor-1016. All samples are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

For the same MS/MSD, Aroclor-1260 had a percent recovery less than the lower acceptance limit on both columns in the MS. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified “UJ”.

The relative percent difference (RPD) between the MS and MSD recoveries of Aroclor-1016 and Aroclor-1260 are also outside of criteria for MS/MSD E4S35. All samples are affected. Detected compounds are qualified J. Nondetected compounds remain unchanged.

Since neither spiking compound met the recovery criteria on at least one column, and both had RPD values that exceeded criteria, all Aroclor compounds were qualified “J” based on MS/MSD recoveries and RPD as follows:

Aroclor-1248 E4S11, E4S34, E4S36, E4S36DL

Aroclor-1260 E4S11, E4S18, E4S26, E4S40

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S14 and E4S15, and E4S39 and E4S40 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4S14 and E4S15

Aroclor compounds	E4S14 µg/kg	DF	E4S15 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4S39 and E4S40

Aroclor compounds	E4S39 µg/kg	DF	E4S40 µg/kg	DF	%RPD
Aroclor-1016	ND		ND		
Aroclor-1221	ND		ND		
Aroclor-1232	ND		ND		
Aroclor-1242	ND		ND		
Aroclor-1248	ND		4.6		
Aroclor-1254	ND		ND		
Aroclor-1260	3.8		3.3		14
Aroclor-1262	ND		ND		
Aroclor-1268	ND		ND		

For field duplicate samples E4S14 and E4S15, and E4S39 and E4S40, RPD values were not calculated when both results were nondetects. The RPD value calculated for Aroclor-1260 was acceptable.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1248 E4S41

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4S17DL, E4S34, E4S35, E4S35MS, E4S36, E4S38, E4S39

Aroclor-1248 E4S13DL, E4S38, E4S40

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S12, E4S13, E4S13DL, E4S35MSD

Aroclor-1248 E4S13

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S16, E4S25

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4S13	Aroclor-1248, Aroclor-1260
E4S17	Aroclor-1260
E4S36	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Seventeen (17) sediment samples, labeled E4S19-E4S24, E4S29-E4S33, E4S43, E4S44, E4S46, E4S48, E4SA0, and E4SB2, were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The samples were collected from 03/01/2010 through 03/03/2010 and were received at the laboratory on 03/03/2010 and 03/06/2010 intact at 5 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S20 was designated by the samplers to be used for laboratory QC, i.e., MS/MSD analyses.

There are no field duplicates or field blanks associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S33, E4S43, E4S44, E4S46, E4S48

Benzo(b)fluoranthene
Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10} E4S20MS, E4S21

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S20, E4S33, E4S43, E4S44, E4SB2
Benzo(g,h,i)perylene	E4S20, E4S30, E4S33
Indeno(1,2,3-cd pyrene	E4S30, E4S33
Benzo(b)fluoranthene	E4S20MS, E4S20MSD
Fluoranthene	E4S20MS, E4S20MSD, E4S46
Benzo(k)fluoranthene	E4S30, E4S33
Dibenzo(a,h)anthracene	E4S31, E4S32, E4SA0
Benzo(a)anthracene	E4S30
Acenaphthene	E4S32, E4S33
Phenanthrene	E4S20MSD, E4S30
Fluorene	E4S32, E4S33, E4SB2
Naphthalene	E4SA0DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S31, E4S43, E4SA0DL, E4SB2

The following semivolatile sample reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SA0 Phenanthrene, Fluoranthene, Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S30, E4S31: Indeno(1,2,3-cd)pyrene

4. BLANKS

The following semivolatile SIM samples are associated with a method blank (SBLK99) in which Indeno(1,2,3-cd)pyrene was at levels greater than the MDL but less than the CRQL. For samples in which Indeno(1,2,3-cd)pyrene is detected above the MDL but below the CRQL, reported sample concentrations have been elevated to the CRQL and qualified U. For samples in which Indeno(1,2,3-cd)pyrene is detected above the CRQL results are not qualified.

E4SA0, E4SB2, E4SB2DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with dilution factors greater than 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4SA0 Fluoranthene-d_{10}

Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S20, E4S20MS, E4S20MSD Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S19, E4S20, E4S20DL, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S30DL, E4S31DL, E4S32DL, E4S33, E4S33DL, E4S43DL, E4S44DL, E4S46, E4S46DL, E4S48, E4SA0, E4SB2DL

Anthracene	E4S20MS, E4S20MSD, E4S30DL, E4S31DL, E4S46DL, E4S48
Pyrene	E4S22, E4S24
Benzo(g,h,i)perylene	E4S19, E4S21, E4S24
Indeno(1,2,3-cd)pyrene	E4S19, E4S21, E4S24
Benzo(b)fluoranthene	E4S19, E4S22, E4S24
Fluoranthene;	E4S22, E4S24
Benzo(k)fluoranthene	E4S19, E4S21, E4S29, E4S46DL, E4S48
Acenaphthylene	E4S30, E4S32DL, E4S33, E4S43DL, E4S44DL, E4SA0
Chrysene	E4S19, E4S21, E4S22, E4S23
Benzo(a)pyrene	E4S19, E4S21, E4S24
Dibenzo(a,h)anthracene	E4S20MS, E4S20MSD, E4S29, E4S30DL, E4S33DL, E4S46, E4S46DL, E4S48
Benzo(a)anthracene	E4S19, E4S21, E4S24, E4S48
Acenaphthene	E4S20DL, E4S29, E4S30, E4S31DL, E4S33DL, E4S43DL, E4S44DL, E4S46, E4SB2DL
Phenanthrene	E4S20DL, E4S29, E4S30, E4S31DL, E4S33DL, E4S43DL, E4S44DL, E4S46, E4SB2DL
Fluorene	E4S20DL, E4S20MS, E4S20MSD, E4S29, E4S31DL, E4S44DL, E4S46, E4S46DL
Naphthalene	E4S29, E4S46
2-Methylnaphthalene	E4S20, E4S29, E4S30, E4S46, E4SB2DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S19, E4S20MS, E4S23, E4S43DL, E4S44DL, E4S46DL, E4S48, E4SB2DL

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S20	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S30	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S31	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S32	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S33	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S43	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S44	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S46	Fluoranthene, Pyrene
E4SA0	2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SB2	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4S20DL	Fluoranthene, Pyrene
E4S31DL	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S32DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S33DL	Phenanthrene, Fluoranthene, Pyrene
E4S43DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4S44DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene
E4SB2DL	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

The laboratory reported that the samples were "dirty," resulting in failure of some compounds to achieve continuing calibration criteria. Elevated baselines were observed in several samples.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected as Decachlorobiphenyl (surrogate) was one of the compounds failing to meet criteria.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S32DL, E4S33, E4S33DL, E4S43, E4S44, E4S46, E4S48, E4SA0

4. BLANKS

The following pesticide samples have 4,4'-DDT analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration of 4,4'-DDT is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4S19, E4S21, E4S22, E4S24, E4S29

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

beta-BHC	E4S19, E4S20MS, E4S21, E4S22, E4S23, E4S29, E4S32DL, E4S48
4,4'-DDT	E4S19, E4S21, E4S22, E4S24, E4S29, E4S33DL, E4S46

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4SA0, E4SA0DL

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S32DL, E4S33DL, E4SA0DL

The following diluted pesticide samples have surrogate percent recoveries of less than 10%. The diluted samples exceeded dilution factor of 5. Detected and nondetected compounds are not qualified.

E4SA0

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10%. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S20, E4S24, E4S29, E4S33, E4S44, E4S46, E4S48, E4SB2

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S20, E4S20MS, E4S20MSD

Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, Heptachlor

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not applicable to Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Pesticide compounds were properly identified with the exception of target compound hits exceeding the calibrated range in the undiluted sample which upon dilution proved not to be present in the samples.

E4S32	gamma-BHC (Lindane), 4,4'-DDD
E4SA0	Heptachlor

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S20, E4S21, E4S44
Aldrin	E4S20MSD
alpha-BHC	E4S46
beta-BHC	E4S20MS, E4S20MSD, E4S22, E4S29
4,4'-DDT	E4S44, E4S46

alpha-Chlordane	E4S32, E4SB2
gamma-BHC (Lindane)	E4S20MSD, E4S32
Dieldrin	E4S20MS, E4SB2
Endrin	E4S31, E4S32, E4S32DL
4,4'-DDD	E4S20MSD, E4S33, E4S33DL, E4S43
4,4'-DDE	E4S30, E4S32, E4S32DL, E4S33
Heptachlor	E4S20MS, E4S20MSD
Endosulfan I	E4SA0DL

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Heptachlor epoxide	E4S23, E4S31, E4S43
Aldrin	E4S33, E4S33DL, E4SA0, E4SA0DL
4,4'-DDT	E4S20, E4S43
alpha-Chlordane	E4S33, E4S43
gamma-Chlordane	E4S44, E4SB2
gamma-BHC (Lindane)	E4S20MS, E4SA0
Dieldrin	E4S20
Endrin	E4S43, E4SA0, E4SB2
Methoxychlor	E4S43
4,4'-DDE	E4S33DL, E4SA0, E4SB2
Heptachlor	E4S46, E4SA0

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4S22, E4S29, E4S48, E4SA0DL
Endosulfan sulfate	E4SA0DL
Aldrin	E4S22
beta-BHC	E4S19, E4S21, E4S23, E4S32DL
Endosulfan II	E4S32, E4S32DL, E4SA0
4,4'-DDT	E4S21, E4S24, E4S33DL
alpha-Chlordane	E4S20MS, E4S20MSD, E4S32DL
gamma-Chlordane	E4S29
Endrin ketone	E4S31, E4S32, E4S46, E4SB2
gamma-BHC (Lindane)	E4S21, E4S46
Dieldrin	E4S19, E4S24, E4S29
Endrin	E4S20, E4S21, E4S29, E4S30, E4S46, E4SA0DL
Methoxychlor	E4S20, E4S20MS, E4S20MSD, E4S30, E4S31, E4S44, E4SB2
4,4'-DDD	E4S19, E4S21, E4S24
4,4'-DDE	E4S21, E4S46, E4S48, E4SA0DL
Endrin aldehyde	E4S21, E4S43, E4SA0
Heptachlor	E4S33DL
Endosulfan I	E4S33DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4S20MS, E4S20MSD, E4S24, E4S32, E4S32DL, E4S33, E4SB2
beta-BHC	E4S20, E4S43, E4S46

delta-BHC	E4S30
4,4'-DDT	E4S30, E4S31, E4S33, E4SB2
gamma-Chlordane	E4S20
gamma-BHC (Lindane)	E4SA0DL
Endrin	E4S33, E4S44
4,4'-DDD	E4S32
Endrin aldehyde	E4S32DL, E4S33
Heptachlor:	E4S31, E4S32, E4S32DL, E4S33, E4S44, E4SB2

11. SYSTEM PERFORMANCE

All the pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. As Decachlorobiphenyl was one of the compounds failing to meet criteria, all compounds are affected.

E4S19, E4S20, E4S20MS, E4S20MSD, E4S21, E4S22, E4S23, E4S24, E4S29, E4S30, E4S31, E4S32, E4S32DL, E4S33, E4S33DL, E4S43, E4S44, E4S46, E4S48, E4SA0, E4SA0DL, E4SB2

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S32	Heptachlor, Dieldrin, 4,4’-DDE, 4,4’-DDD
E4S33	4,4’-DDD
E4SA0	Heptachlor

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S19, E4S20MS, E4S20MSD, E4S22, E4S29, E4S30, E4S44, E4SA0, E4SA0DL, E4SB2

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200% All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S43, E4S44

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S31DL, E4S32DL, E4SA0, E4SA0DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries that are greater than 200%. All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S43DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. All compounds are affected. Detected compounds are qualified J. Nondetected compounds are not qualified. In the case of sample E4S32, the “J” flag applied in the automated check process was overridden for Aroclor-1248 as that result was reported from the column having acceptable surrogate recovery.

E4S30, E4S31, E4S32

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S32DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S33DL

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries less than 10%. Detected and nondetected compounds are not qualified.

E4SA0DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1016 E4S20MS, E4S20MSD

The Aroclor matrix/matrix spike duplicate samples (E4S20MS, E4S20MSD) have percent recoveries and relative percent difference between analyte results that are less than the lower expanded criteria limit for Aroclor-1260. In this instance the matrix spike recoveries are negative; these negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. No sample results have been qualified due to negative recoveries or RPDs.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260 E4S31, E4S32, E4S43DL
Aroclor-1016 E4S20MS, E4S20MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260 E4S20, E4S30, E4S33DL, E4S43

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260 E4S33

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S30, E4S44, E4SA0, E4SAODL, E4SB2

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample analysis should be used for result validation.

E4S31, E4S32, E4S33, E4S43, E4SA0

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Twenty (20) sediment samples, labeled E4S53-E4S56, E4S62, E4S73 – E4S76, E4S80, E4S81, E4S83 – E4S8º8, E4S91, E4S98, and E4S99, were shipped to ALS Laboratory Group located in Salt Lake City, Utah. The samples were collected on 03/02/2010 and 03/03/2010. They were received at the laboratory on 03/04/2010 and 03/06/2010 intact at 7 ºC and 5 ºC, respectively.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The "U" values in the Superset EDD and B-file have not been changed.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4S75 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

Two samples, E4S80 and E4S81 had elevated pH, greater than 9. The laboratory was instructed to proceed with analysis following pH adjustment to the appropriate range. No notation indicating any pH adjustments were made was noted in the data package.

There are no field duplicates or field blanks associated with this SDG.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (% RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S53, E4S54, E4S55, E4S56, E4S62, E4S73, E4S74, E4S75, E4S75MS, E4S75MSD, E4S76

Benzo(b)fluoranthene and Benzo(k)fluoranthene

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile sample E4S87 has two deuterated monitoring compound recoveries above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo (a) pyrene-d_{12}, affected compounds; Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene, Indeno(1,2,3-cd)pyrene

Fluorene-d_{10}, affected compounds: Carbazole, Dibenzofuran, Fluorene

Semivolatile sample E4S99DL with dilution factors less than or equal to 5 has one deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Acenaphthylene-d_8, affected compounds: 2-Chloronaphthalene, 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Naphthalene

Semivolatile sample E4S56L has deuterated one monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10}, affected compounds: Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

As the percent recoveries for Acenaphthene were acceptable in both the MS and MSD, and the % RPD was just slightly above the criteria, only the original, MS and MSD samples are affected.

E4S75, E4S75MS, E4S75MSD: Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S80, E4S87, E4S88DL, E4S99DL
Pyrene	E4S74
Benzo(g,h,i)perylene	E4S53, E4S55, E4S73, E4S80, E4S81, E4S83, E4S84, E4S85, E4S91
Indeno(1,2,3-cd)pyrene	E4S73, E4S80, E4S81, E4S83, E4S85
Benzo(b)fluoranthene	E4S55, E4S74, E4S91
Fluoranthene	E4S55, E4S74, E4S91
Benzo(k)fluoranthene	E4S53, E4S80, E4S81, E4S83, E4S84, E4S85
Chrysene	E4S80, E4S81, E4S83, E4S85
Benzo(a)pyrene	E4S74, E4S80, E4S81, E4S85
Dibenzo(a,h)anthracene	E4S88DL, E4S99DL
Benzo(a)anthracene	E4S73, E4S74, E4S80, E4S81, E4S85
Acenaphthene	E4S87, E4S88DL, E4S98, E4S99DL
Phenanthrene	E4S73, E4S83, E4S84, E4S85
Fluorene	E4S54, E4S87, E4S88DL, E4S98, E4S99DL

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form 1s for the following samples do not agree with the B-file Spreadsheet results.

E4S53, E4S73, E4S75MSD, E4S86, E4S88DL, E4S99DL

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S88 Fluoranthene, Pyrene, Benzo(b)fluoranthene
E4S99 Fluoranthene, Pyrene, Benzo(b)fluoranthene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Indeno(1,2,3-cd)pyrene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Benzo(a)pyrene	E4S56DL, E4S75, E4S75MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile sample with dilution factors greater than 5 has deuterated monitoring compound recovery below the lower limit of the criteria window. Detected and nondetected compounds are not qualified.

E4S73DL, E4S84DL	2-Methylnaphthalene-d_{10}, affected compounds: Naphthalene, 2-Methyl naphthalene, Acenaphthene, Acenaphthylene, Fluorene, Phenanthrene, Anthracene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile-SIM.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4S53DL, E4S55DL, E4S56DL, E4S62, E4S73DL, E4S76, E4S84DL, E4S86
Pyrene	E4S75
Benzo(g,h,i)perylene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Indeno(1,2,3-cd)pyrene	E4S56DL, E4S75, E4S75MS, E4S75MSD
Benzo(b)fluoranthene	E4S75, E4S75MS, E4S75MSD
Fluoranthene	E4S75, E4S75MS, E4S75MSD
Benzo(k)fluoranthene	E4S56DL, E4S86, E4S91DL
Acenaphthylene	E4S53, E4S54DL, E4S55, E4S56, E4S73, E4S80, E4S81, E4S83, E4S84, E4S85, E4S87, E4S88, E4S98, E4S99
Chrysene	E4S56DL, E4S75, E4S75MS
Benzo(a)pyrene	E4S56DL, E4S75, E4S75MSD, E4S91DL
Dibenzo(a,h)anthracene	E4S53DL, E4S55DL, E4S56, E4S62, E4S73DL, E4S74DL, E4S76, E4S80DL, E4S81DL, E4S83DL, E4S84DL, E4S85DL, E4S86, E4S91DL
Benzo(a)anthracene	E4S56DL, E4S75, E4S91DL
Acenaphthene	E4S54DL, E4S55, E4S56, E4S62, E4S74, E4S76, E4S80DL, E4S83, E4S84DL, E4S85DL, E4S91
Phenanthrene	E4S75
Fluorene	E4S55, E4S56DL, E4S62, E4S74, E4S76, E4S80DL, E4S81DL, E4S85DL, E4S86, E4S91DL
Naphthalene	E4S53, E4S99
2-Methylnaphthalene	E4S55, E4S56, E4S73, E4S81, E4S83, E4S84, E4S99

Several semivolatile samples had at least one compound concentration reported below the MDL on the originally submitted Form 1s. The laboratory resubmitted corrected Form 1s. Refer to the resubmitted Forms for data evaluation. The EDD is correct.

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results for the following samples:

E4S53, E4S53DL, E4S55DL, E4S75MSD, E4S86, E4S87

Dilution analysis was not required for the following SIM samples because the levels of target compounds were greater than the CRQL for the full-scan semivolatile analysis: E4S87, E4S88, E4S98, E4S99

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4S53	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S54	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4S55	Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene
E4S56	Phenanthrene, Fluoranthene,
E4S73	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S74	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene,
E4S81	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S83	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S84	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S85	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S85	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S86	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S91	Phenanthrene, Fluoranthene, Pyrene, Chrysene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene

E4S98	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S99	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4S54DL	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4S84DL	Fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

The laboratory reported that the samples were "dirty," resulting in failure of some compounds to achieve continuing calibration criteria. Elevated baselines were observed in several samples.

3. CALIBRATION

The following pesticide samples are associated with CCVs for several compounds with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected because Decachlorobiphenyl (a surrogate) was one of the compounds failing to meet criteria.

E4S85DL, E4S88DL, E4S99

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S56, E4S75, E4S75MS, E4S75MSD
beta-BHC	E4S55, E4S75, E4S75MSD, E4S88DL
Endrin aldehyde	E4S56, E4S62
Endosulfan I	E4S53, E4S55, E4S74, E4S75MS, E4S75MSD

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated continuing instrument blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan sulfate	E4S56, E4S75, E4S75MS, E4S75MSD
beta-BHC	E4S55, E4S75, E4S75MSD, E4S76, E4S88DL
Endosulfan II	E4S84, E4S85, E4S86, E4S87, E4S88, E4S91, E4S98
4,4'-DDT	E4S85DL
4,4'-DDE	E4S85DL
Endrin aldehyde	E4S56, E4S62
Endosulfan I	E4S53, E4S55, E4S74, E4S75MS, E4S75MSD

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4S91 has a surrogate percent recovery that is greater than 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S85DL, E4S88DL, E4S99DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S85, E4S88, E4S98, E4S99

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S88DL, E4S99DL

The following pesticide samples have surrogate percent recoveries outside the lower limit of the criteria window, but greater than 10%. Detected compounds are qualified J. Nondetected compounds are qualified UJ. All compounds are affected.

E4S87, E4S88

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S75, E4S75MS, E4S75MSD
Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, Heptachlor

The result for beta-BHC was rejected in sample E4S75MSD for reasons detailed later in this review. Therefore, that value was not used to calculate an RPD.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S56
Aldrin	E4S75MSD
beta-BHC	E4S75, E4S75MSD, E4S81
4,4'-DDT	E4S91, E4S99DL
alpha-Chlordane	E4S54, E4S87
gamma-Chlordane	E4S81, E4S83, E4S84
gamma-BHC (Lindane)	E4S75MS, E4S75MSD, E4S99, E4S99DL
Dieldrin	E4S55, E4S74, E4S75MSD, E4S83
Endrin	E4S84
4,4'-DDD	E4S53, E4S62, E4S74, E4S75MSD, E4S81, E4S86
4,4'-DDE	E4S62, E4S83, E4S84, E4S88, E4S88DL, E4S91
Heptachlor:	E4S55, E4S75MS, E4S75MSD

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Heptachlor epoxide	E4S83, E4S87
delta-BHC	E4S53
Endosulfan II	E4S73
4,4'-DDT	E4S53, E4S54, E4S73, E4S88, E4S88DL
alpha-Chlordane	E4S73, E4S88, E4S99, E4S99DL
gamma-Chlordane	E4S80, E4S85, E4S88
Dieldrin	E4S54, E4S80, E4S81
Endrin	E4S83, E4S88, E4S99
4,4'-DDE	E4S53, E4S85, E4S87
Heptachlor	E4S99
Endosulfan I	E4S98

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4S55, E4S62, E4S75MSD, E4S76, E4S80, E4S81, E4S85DL, E4S86
beta-BHC	E4S55, E4S76, E4S88DL, E4S91
Endosulfan II	E4S74, E4S75MSD, E4S84, E4S85, E4S87, E4S88, E4S98, E4S99
4,4'-DDT	E4S62, E4S76, E4S81, E4S85DL, E4S86
alpha-Chlordane	E4S55, E4S74, E4S75MS, E4S75MSD
Endrin ketone	E4S73, E4S75MSD, E4S76, E4S83, E4S84, E4S85, E4S87, E4S88, E4S98
Dieldrin	E4S76

Endrin	E4S53, E4S55, E4S74, E4S80, E4S81, E4S85DL, E4S86, E4S88DL, E4S91, E4S99DL
Methoxychlor	E4S53, E4S55, E4S80, E4S81, E4S83, E4S84, E4S85, E4S87, E4S98, E4S99, E4S99DL
4,4'-DDD	E4S75MS
4,4'-DDE	E4S75MS, E4S75MSD, E4S85DL, E4S86

4,4'-DDE	E4S73, E4S99DL
Heptachlor	E4S73, E4S74, E4S84, E4S85, E4S88, E4S98, E4S99DL
Endosulfan I	E4S99DL

11. SYSTEM PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a PEM compounds is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Because Decachlorobiphenyl, a surrogate, was one of the compounds failing to meet criteria, all compounds are affected.

E4S80, E4S81, E4S83, E4S84, E4S85, E4S85DL, E4S86, E4S87, E4S88, E4S88DL, E4S91, E4S98, E4S99, E4S99DL

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4S85	4,4’-DDD
E4S88	4,4’-DDE, 4,4’-DDD, gamma-Chlordane
E4S99	4,4’-DDE, Heptachlor

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file spreadsheet results.

E4S53, E4S55, E4S62, E4S75, E4S83, E4S86, E4S91

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following Aroclor samples have surrogate percent recoveries that are greater than 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S54, E4S91

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4S54DL, E4S84, E4S85, E4S88, E4S99, E4S99DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200% on one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The "J" flag applied in the automated check process was overridden unless applied for another reason. Detected compounds are nondetected compounds are not qualified.

E4S53, E4S86, E4S87

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

E4S88, E4S98, E4S99DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The automated report incorrectly calculated percent recoveries of Aroclor-1016 and Aroclor-1260. Spike compound Aroclor-1016 recovery in Sample E4S75MSD slightly exceeds the upper acceptance limit on

one column. All other spike recoveries and % RPD are within criteria. The "J" flag applied in the automated check process was overridden unless applied for another reason.

E4S75, E4S75MS, E4S75MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

There are no field duplicates or field blanks associated with this SDG.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260 E4S53, E4S54DL

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1260 E4S55
Aroclor-1016 E4S75MS, E4S75MSD

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260 E4S80, E4S81, E4S87

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Due to suspected rounding differences, the reported CRQLs listed on laboratory Form Is do not agree with the B-file Spreadsheet results.

E4S53, E4S87

Several samples were initially analyzed at a ten-fold dilution. Mistakenly, the laboratory analyzed Sample E4S99 at an additional dilution, when in fact its original 10X analysis yielded results near, but not

exceeding the upper calibrated range. The dilution analysis of this sample was not required. Allowance was granted by SMO not to analyze a ten-fold more concentrated sample.

The following Aroclor sample reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample analysis should be used for result validation.

E4S54	Aroclor-1260

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: Nineteen (19) sediment samples labeled E4S57, E4S58, E4S60, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE3, E4SE5, E4SE7, and E4SE8 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. Samples E4S57, E4S58, E4S60, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, and E4S72 were collected on 3/2/2010 and were received on 3/4/2010. Samples E4SE1, E4SE3, E4SE5, E4SE7, and E4SE8 were collected on 3/4/2010 and were received on 3/6/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 9 ºC. No data have been qualified based on receipt temperature. Sample E4S57 had a pH of 9.16, outside of the allowable limits. GLNPO staff instructed the laboratory to adjust the pH and proceed with the analysis of the sample.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag in the EDD. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4S60 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4S65 and E4S66 as the field duplicate pair.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for benzo(b)fluoranthene and benzo(k)fluoranthene. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene	E4S63, E4S68, E4S70, E4S71, E4S72, E4SE5, E4SE7
Benzo(g,h,i)perylene	E4S63, E4S68, E4S70, E4S71, E4S72
Indeno(1,2,3-cd)pyrene	E4S63, E4S68, E4S70, E4S71, E4S72

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile sample E4SE1, with a dilution factor less than or equal to 5, had a deuterated monitoring compound recovery for Anthracene-d_{10} that was above the upper limit of the criteria window. Sample results for Anthracene and Phenanthrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

Semivolatile sample E4S57 had a deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4S65 and E4S66

Semivolatile compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

For field duplicates E4S65 and E4S66, RPDs were not calculated because all target compound results were nondetects.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original semivolatile analysis for sample E4SE1 was performed using a 5-fold dilution. No neat analysis was performed for this sample. The quantitation limits reflect the dilution factor.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene E4S60MS, E4S64, E4SE1, E4SE3, E4SE7

Pyrene	E4S61, E4S63
Benzo(g,h,i)perylene	E4S60, E4S60MS, E4S60MSD, E4S63, E4S64, E4S67, E4S68, E4S70, E4S71
Indeno(1,2,3-cd)pyrene	E4S60MS, E4S60MSD, E4S64, E4S70
Benzo(b)fluoranthene	E4S61, E4S63, E4S67, E4S68, E4S69, E4S71
Fluoranthene	E4S63, E4S69
Benzo(k)fluoranthene	E4S60, E4S60MS, E4S60MSD, E4S64, E4S70, E4SE3
Chrysene	E4S60, E4S63, E4S67, E4S68, E4S69
Benzo(a)pyrene	E4S61, E4S63, E4S67, E4S68, E4S69, E4S71
Dibenzo(a,h)anthracene	E4SE1, E4SE7
Benzo(a)anthracene	E4S61, E4S63, E4S67, E4S68, E4S70, E4S71
Acenaphthene	E4SE1, E4SE5DL, E4SE7
Phenanthrene	E4S61, E4S63, E4S67, E4S69, E4S71
Fluorene	E4SE1, E4SE5, E4SE5DL, E4SE7

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SE5 reported concentrations that exceeded the calibrated range of the instrument for Pyrene. These results were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The original analysis of semivolatile-SIM sample E4SE1, with a dilution factor greater than or equal to 5, had a deuterated monitoring compound recovery for Fluoranthene-d_{10}, above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Semivolatile-SIM samples E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S67, and E4S68, with a dilution factor greater than or equal to 5, had a deuterated monitoring compound recovery for 2-Methylnaphthalene-d_{10}, below the lower limit of the criteria window. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene was recovered in the MS/MSD prepared for sample E4S60 at levels above the upper acceptance limit. The problem seems to be limited to the MS/MSD and may be due to the high amounts of Pyrene in the unspiked sample. No MS/MSD failures were reported in the SVOA full scan analyses. Therefore, only sample E4S60 is affected. The result for Pyrene in sample E4S60 is qualified "J".

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4S65 and E4S66 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4S65 and E4S66

Semivolatile-SIM compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	

Semivolatile-SIM compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Acenaphthene	ND	1	ND	1	
Fluorene	0.56	1	ND	1	
Phenanthrene	4	1	4.1	1	2.5
Anthracene	1.2	1	1.2	1	0
Fluoranthene	7.1	1	10	1	34
Pyrene	8	1	14	1	55
Benzo(a)anthracene	3.7	1	6.5	1	55
Chrysene	3.5	1	6.8	1	64
Benzo(b)fluoranthene	2.3	1	7.4	1	110
Benzo(k)fluoranthene	0.76	1	1.8	1	81
Benzo(a)pyrene	2.2	1	7.1	1	110
Indeno(1,2,3-cd)pyrene	1.6	1	4.1	1	88
Dibenzo(a,h)anthracene	ND	1	0.75	1	
Benzo(g,h,i)perylene	2.1	1	5.4	1	88

For field duplicates E4S65 and E4S66, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, and Benzo(g,h,i)perylene had RPD values above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original semivolatile-SIM analysis for samples E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S67-E4S71, E4SE1, E4SE3, E4SE5, E4SE7 was performed using a 10-fold dilution. No neat analyses were performed for these samples. The quantitation limits reflect the dilution factor.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4S58, E4S61, E4S63, E4S65–E4S71, E4SE8
Acenaphthene	E4S60, E4S64, E4S69, E4SE3, E4SE8
Acenaphthylene	E4SE1, E4SE5, E4SE7
Benzo(a)anthracene	E4S57, E4S72

Indeno(1,2,3-cd)pyrene	E4S57, E4S65, E4S69, E4S72
Benzo(k)fluoranthene	E4S58, E4S61, E4S63, E4S65, E4S66 – E4S69
Dibenzo(a,h)anthracene	E4S58, ES460, ES460MS, E4S60MSD, E4S61, E4S63, E4S64, E4S66, E4S67, E4S68, E4S70, E4S71, E4SE3, E4SE8
Fluorene	E4S60, E4S64, E4S65, E4S70, E4S71, E4SE3, E4SE8
Chrysene	E4SE57, E4S72
Fluoranthene	E4S57, E4S72
Benzo(a)pyrene	E4S57, E4S65, E4S69, E4S72
Benzo(b)fluoranthene	E4S57, E4S65, E4S72
Benzo(g,h,i)perylene	E4S57, E4S65, E4S69
Naphthalene	E4SE8
Phenanthrene	E4S57, E4S72
Pyrene	E4S72

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. Although the original analysis for some of these samples may have included a dilution, no further dilutions were performed.

Anthracene	E4SE1
Benzo(a)anthracene	E4SE1, E4SE5, E4SE7
Indeno(1,2,3-cd)pyrene	E4SE1, E4SE5, E4SE7
Benzo(k)fluoranthene	E4SE1, E4SE5
Chrysene	E4SE1, E4SE5, E4SE7
Fluoranthene	E4S60MS, E4S60MSD, E4S64, E4S70, E4SE1, E4SE3, E4SE5, E4SE7
Benzo(a)pyrene	E4SE1, E4SE5, E4SE7

Benzo(b)fluoranthene	E4SE1, E4SE5, E4SE7
Benzo(g,h,i)perylene	E4SE1, E4SE5, E4SE7
Phenanthrene	E4S60MS, E4SE1, E4SE5
Pyrene	E4S60MS, E4S60MSD, E4S64, E4SE1, E4SE5, E4SE7

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for surrogate compound Decachlorobiphenyl is outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for surrogate compound Decachlorobiphenyl, and for several target compounds that exceeded criteria in one or more CCVs. All samples are affected. Detected target compounds are qualified J. Nondetected compounds are qualified UJ.

E4S57, E4S58, E4S60, E4S60MS, E4S60MSD, E4S61, E4S63, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S71, E4S72, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is also less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endrin aldehyde	E4S57, E4S58, E4S60, E4S64, E4S65, E4S66, E4S67, E4S68, E4S69, E4S70, E4S72

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank and continuing instrument blank concentrations are also less than the CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

gamma-Chlordane	E4S57, E4S58, E4S65, E4S72
4,4'-DDE	E4S65, E4S69, E4S71, E4S72, E4SE1DL, E4SE8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SE7 had a surrogate percent recovery that was outside the lower limit of the criteria window, but greater than 10% on the RTXCLP column. All target analytes are affected. Detected compounds reported from this column are qualified "J". Nondetected compounds are qualified "UJ". .

Surrogate recoveries between 150 – 200 %, and greater than 200% were obtained on only one column for sample E4SE1. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted pesticide sample E4SE1DL and E4SE7DL, with a dilution factor greater than 5 had all surrogate percent recoveries greater than 150% and some greater than 200%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The Pesticide MS prepared for sample E4S60 had a percent recovery below the acceptance criteria for Endrin on both columns. All samples are affected. Sample results for Endrin are qualified "J". Nondetected results are qualified "UJ".

The Pesticide MS prepared for sample E4S60 had a percent recovery below the acceptance criteria for 4,4'-DDT and the MSD was recovered above the acceptance criteria for 4,4'-DDT on the RTXCLP2 column. However the Heptachlor results in the MS/MSD were rejected for reasons noted elsewhere in this narrative and, therefore, no 4,4'-DDT results have been qualified for MS/MSD recovery.

Pesticide MS/MSD E4S60 had RPD values outside of criteria for Dieldrin, and Endrin on both columns. All samples are affected. Sample results for Dieldrin, and Endrin are qualified "J". Nondetected results are not qualified.

Pesticide MS/MSD E4S60 had RPD values outside of criteria for Heptachlor on both columns. However the Heptachlor results in the MS/MSD were rejected for reasons noted elsewhere in this narrative and therefore, no Heptachlor results have been qualified for MS/MSD recovery.

The Pesticide MS/MSD prepared for sample E4S60 had percent recoveries above the acceptance criteria for gamma-BHC (Lindane), and RPD values outside of criteria for Aldrin on the RTXCLP2 column. All samples are affected. Sample results for Aldrin, and gamma-BHC (Lindane) that are reported from this column are qualified "J". Nondetected results are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

The result for beta-BHC was rejected in sample E4S66 for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs

E4S65 and E4S66

Pesticide compound	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	0.11	1		1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)	ND	1	ND	1	
Heptachlor	0.12	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.12	1	0.14	1	15
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	0.23	1	ND	1	
Endrin	ND	1	0.23	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.23	1	0.23	1	0
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.23	1	ND	1	
Methoxychlor	ND	1	1.6	1	
Endrin ketone	ND	1	0.23	1	
Endrin aldehyde	0.23	1	0.23	1	0
alpha-Chlordane	ND	1	0.14	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4S65 and E4S66, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples RPD values were less than 50 %.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original pesticide analysis for sample E4SE1 was performed using a 10-fold dilution. No neat pesticide analysis was performed for this sample. The reported quantitation limits reflect the dilution factor.

The following non-detected sample results were reported correctly on Form 1s, but were either reported below the reporting detection limit or were flagged incorrectly in the EDD. The results have been elevated to the quantitation limit and are flagged “U”, unless affected by another qualifier.

E4S58 4,4’-DDD, beta-BHC, Endosulfan II, Heptachlor epoxide

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

alpha-BHC	E4S68, E4S69
alpha-Chlordane	E4SE7DL
Aldrin	E4S68
beta-BHC	E4S57, E4S58, E4S60, E4S63 - E4S65, E4S72, E4SE8
delta-BHC	E4S69, E4S72
Dieldrin	E4S57, E4S61, E4S63, E4S68, E4S71
Endrin	E4S63, E4S64, E4S66, E4S67, E4S71, E4SE1DL, E4SE3, E4SE7
Endrin aldehyde	E4S57, E4S58, E4S60, E4S64 - E4S70, E4S72, E4SE7
Endrin ketone	E4S63, E4S66, E4S70, E4SE5, E4SE7
gamma-BHC (Lindane)	E4SE8
gamma-Chlordane	E4S57, E4S58
4,4'-DDD	E4S65 – E4S69, E4S71, E4SE8
4,4'-DDE	E4S65, E4S69, E4S71, E4SE8
4,4'-DDT	E4S65 – E4S69, E4S71, E4SE8
Heptachlor	E4S57, E4S64, E4S65, E4S67 – E4S69, E4S71, E4S72
Endosulfan I	E4S68, E4SE8
Endosulfan II	E4S60, E4S60MS, E4S60MSD, E4S68, E4SE1, E4SE3, E4SE5, E4SE7, E4SE8
Heptachlor epoxide	E4S57, E4S63 – E4S65, E4S67, E4S68, E4S70 – E4S72, E4SE8
Methoxychlor	E4S63, E4S64, E4SE3, E4SE5, E4SE7, E4SE7DL

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4S61
beta-BHC	E4S65, E4S69, E4S71
delta-BHC	E4S69

4,4'-DDT	E4S61
alpha-Chlordane	E4S60, E4SE7
gamma-Chlordane	E4S58
Dieldrin	E4S61, E4S67, E4S68
Endrin	E4S60MS, E4S60MSD
Methoxychlor	E4S66
4,4'-DDD	E4S63, E4S70, E4SE7, E4SE8
4,4'-DDE	E4S60, E4S60MS, E4S60MSD, E4S71, E4SE1
Endrin aldehyde	E4S72, E4SE3
Heptachlor	E4S72

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Aldrin	E4S60MS, E4S60MSD
4,4'-DDT	E4S70
Alpha-Chlordane	E4S66
gamma-BHC (Lindane)	E4S60MS, E4S60MSD
Endrin	E4S60, E4S70
4,4'-DDD	E4S61, E4S74
4,4'-DDE	E4S64, E4S70, E4SE5

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S63, E4S64, E4S65, E4S67, E4S68, E4S70, E4S71, E4S72, E4SE1DL, E4SE8
Aldrin	E4S68
alpha-BHC	E4S69
beta-BHC	E4S57, E4S60, E4S63, E4S64, E4S72, E4SE7DL, E4SE8

Endosulfan II	E4S60, E4S60MS, E4S60MSD, E4S68, E4S70, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8
4,4'-DDT	E4S65, E4S67, E4S68, E4S69, E4S71, E4SE8
alpha-Chlordane	E4SE7DL
Endrin ketone	E4S60, E4S60MS, E4S60MSD, E4S63, E4S66, E4S70, E4SE5, E4SE7
gamma-BHC (Lindane)	E4SE7DL, E4SE8
Dieldrin	E4S57, E4S63, E4S71, E4SE7DL
Endrin	E4S63, E4S64, E4S66, E4S67, E4S71, E4S72, E4SE1DL, E4SE3, E4SE7
Methoxychlor	E4S61, E4S63, E4S64, E4SE3, E4SE5, E4SE7, E4SE7DL, E4SE8
4,4'-DDD	E4S65, E4S66, E4S67, E4S68, E4S69, E4S71
4,4'-DDE	E4SE1DL
Endrin aldehyde	E4S58, E4S60, E4S64, E4S66, E4S68, E4S69, E4S70, E4SE7
Heptachlor	E4S57, E4S64, E4S65, E4S67, E4S68, E4S69, E4S71
Endosulfan I	E4S58, E4SE8

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified “R”.

Heptachlor epoxide	E4S60, E4S60MS, E4S60MSD, E4SE1, E4SE3, E4SE7, E4SE7DL
beta-BHC	E4S60MS, E4S60MSD, E4S61, E4S66, E4S67, E4S68, E4S70, E4SE3, E4SE7
4,4'-DDT	E4S60MS, E4S60MSD, E4S64, E4SE7
gamma-BHC (Lindane)	E4SE1, E4SE1DL, E4SE3, E4SE7
Dieldrin	E4SE7
Endrin	E4SE1, E4SE5
4,4'-DDE	E4SE3, E4SE7, E4SE7DL
Endrin aldehyde	E4S60MS, E4S60MSD, E4SE8
Heptachlor	E4S60, E4S60MS, E4S60MSD, E4SE1, E4SE1DL, E4SE3, E4SE5, E4SE7, E4SE7DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. For sample E4SE7, the 4,4’-DDD result from dilute sample be used for result validation. For sample E4SE1, the Heptachlor results for both the original sample analysis and the diluted analysis have been rejected for reasons mention elsewhere in this narrative.

4,4'-DDD	E4SE7
Heptachlor	E4SE1

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All Aroclor samples in this SDG had acceptable surrogate recoveries on one or both columns for the original analyses. No samples were qualified based on surrogate recovery.

However, diluted Aroclor samples E4SE1DL, E4SE5DL, and E4SE7DL, with dilution factors greater than five, had percent recoveries that are between 150 - 200%, and some that exceeded 200%. The diluted samples are not qualified based on surrogate recovery.

Aroclor sample E4SE1DL with dilution factors greater than 5 also had surrogate percent recoveries less than 10%. Detected and nondetected compounds are not qualified.

A surrogate recovery between 150 – 200 % was obtained on only one column for Aroclor sample E4S60, E4S60DL, E4S66, E4S3DL, E4SE1, E4SE5, E4SE7, and E4S60MS and E4S60MSD. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4S60, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260, and the RPD exceeded criteria for Aroclor-1260 on one column. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4S60 is affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4S65 and E4S66 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4S65 and E4S66

Aroclor compounds	E4S65 µg/kg	DF	E4S66 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	ND	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4S65 and E4S66, RPD values were not calculated because both values were nondetects for all compounds.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1248 E4S71, E4S72

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified “J”.

Aroclor-1248 E4S72

Aroclor-1260 E4S70

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified “NJ”.

Aroclor-1248 E4S61

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1248 E4S71

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1248 E4S70, E4SE1

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted samples should be used for result validation.

Aroclor-1248 E4S60, E4SE1, E4SE3, E4SE5, E4SE7

Aroclor-1260 ES460

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Subject: R**evised Review Narrative Report**
Review of Data
Received for Review on: April 14, 2010

From: Melody Jensen
Senior Scientist, CSC

To: Data User: GLNPO

This narrative review supersedes the narrative sent on June 24, 2010 for the review of data in SDG E4S89. The changes made to this narrative include clarifications added to the Semivolatile and Pesticide Additional Information sections of the narrative. The changes have been highlighted in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarifications. No sample results or review qualifiers have been changed based on these changes.

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4S89

Number and Type of Samples: 14 Sediment Samples

Sample Numbers: E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB7, E4SG5, E4SG6

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA

Judy Schofield, CSC

SDG Summary

Sample Receipt: Fourteen (14) sediment samples labeled E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB7, E4SG5, and E4SG6 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All except E4SG5 and E4SG6 were collected on 3/3/2010 and were received on 3/5/2010 at 2 °C. Samples E4SG5 and E4SG6 (equipment blanks) were collected on 3/5/2010 and were received on 3/6/2010 at 7 °C. These samples exceeded the proper shipping temperature range of 2 - 6 ºC; no data have been qualified based on receipt temperature. Two of the three containers for sample E4SA3 were received broken. Because the box for each container was intact, the laboratory did not believe that cross contamination occurred. In accordance with direction from EPA, samples were transferred to new containers and used for analyses. Samples E4S89 and E4SB7 were received at pH 9.1, which is outside the allowable limits. In accordance with direction from EPA, the pH was adjusted and the analyses conducted. No data were qualified based on the broken containers or sample pH.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as “soil” on Form1s and in the EDD for the samples in this SDG. The samples are actually “sediment” samples.

Sample E4S92 contained less than 50% solids. Results were reported on a dry-weight basis using the percent solids (45.3%) determined by the laboratory.

As designated by the samplers, Sample E4SB6 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SA3 and E4SA6 as field duplicate pairs.

Per the laboratory narrative, manual edits were made in the semivolatiles calibration standards for a variety of miscalled peaks. Every manual integration is noted by an “m” footnote on the quantitation report.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening CCV percent Difference (%D) outside criteria for Pyrene. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4S89, E4S92, E4SA6, E4SG6

The following semivolatile sample is associated with an opening CCV percent Difference (%D) outside criteria for Benzo (g,h,i) perylene and Indeno (1,2,3-cd) pyrene. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4SG6

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile samples with dilution factors less than or equal to 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Pyrene-d_{10}	E4S89DL
Anthracene-d_{10}	E4S89DL, E4SA4
Benzo (a) pyrene-d_{12}	E4SA4
Fluorene-d_{10}	E4S89DL
Acenaphthylene-d_8	E4S89DL, E4SA4

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates. In addition to undiluted analyses of E4SA3, a 1:2 dilution of this sample was also analyzed (E4SA3DL). Results are summarized in the

following tables. Note that results are not qualified based upon the results of the field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Semivolatile compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	100	1	ND	1	
Acenaphthene	69	1	77	1	11
Fluorene	110	1	94	1	16
Phenanthrene	880	1	710	1	21
Anthracene	300	1	220	1	31
Fluoranthene	1400	1	1300	1	7.4
Pyrene	2100	1	1600	1	27
Benzo(a)anthracene	1300	1	860	1	41
Chrysene	1000	1	910	1	9.4
Benzo(b)fluoranthene	1400	1	1200	1	15
Benzo(k)fluoranthene	380	1	310	1	20
Benzo(a)pyrene	1000	1	820	1	20
Indeno(1,2,3-cd)pyrene	1000	1	770	1	26
Dibenzo(a,h)anthracene	190	1	150	1	24
Benzo(g,h,i)perylene	830	1	640	1	26

For field duplicates E4SA3 and E4SA6, where detects were reported for both samples, all RPD values were 50% or less.

E4SA3DL and E4SA6

Semivolatile compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	2	ND	1	
2-Methylnaphthalene	ND	2	ND	1	
Acenaphthylene	120	2	ND	1	
Acenaphthene	78	2	77	1	1.3
Fluorene	120	2	94	1	24
Phenanthrene	1100	2	710	1	43
Anthracene	370	2	220	1	51
Fluoranthene	2000	2	1300	1	42
Pyrene	2200	2	1600	1	32
Benzo(a)anthracene	1400	2	860	1	48
Chrysene	1200	2	910	1	28
Benzo(b)fluoranthene	1600	2	1200	1	29
Benzo(k)fluoranthene	490	2	310	1	45
Benzo(a)pyrene	1300	2	820	1	45
Indeno(1,2,3-cd)pyrene	1200	2	770	1	44
Dibenzo(a,h)anthracene	260	2	150	1	54

Semivolatile compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Benzo(g,h,i)perylene	1100	2	640	1	53

For field duplicates E4SA3DL and E4SA6, where detects were reported for both samples, all RPD values were less than 50% except for Anthracene, Dibenzo(a,h)anthracene, and Benzo(g,h,i)perylene.

Equipment Blanks E4SG5 and E4SG6

Semivolatile compounds	E4SG5 µg/L	E4SG6 µg/L
Naphthalene	ND	ND
2-Methylnaphthalene	ND	ND
Acenaphthylene	ND	ND
Acenaphthene	ND	ND
Fluorene	ND	ND
Phenanthrene	ND	ND
Anthracene	ND	ND
Fluoranthene	ND	ND
Pyrene	ND	ND
Benzo(a)anthracene	ND	ND
Chrysene	ND	ND
Benzo(b)fluoranthene	ND	2.6
Benzo(k)fluoranthene	ND	ND
Benzo(a)pyrene	ND	2.7
Indeno(1,2,3-cd)pyrene	ND	ND
Dibenzo(a,h)anthracene	ND	ND
Benzo(g,h,i)perylene	ND	ND

No target compounds were detected in equipment blanks E4SG5. In equipment blank E4SG6, target compounds Benzo(b)fluoranthene and Benzo(a)pyrene were detected at levels below the CRQL.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene E4S90, E4S92, E4SB4

Pyrene E4SB0, E4SB6

Benzo (b) fluoranthene	E4SB6, E4SB6MS, E4SB6MSD, E4SG6
Fluoranthene	E4SB0, E4SB6, E4SB6MS, E4SB6MSD
Benzo (k) fluoranthene	E4SB4
Acenaphthylene	E4SA3, E4SA3DL
Benzo (a) pyrene	E4SG6
Dibenzo (a,h) anthracene	E4S89DL, E4SA2, E4SA4, E4SA9DL
Acenaphthene	E4S89DL, E4S92, E4SA2, E4SA3, E4SA3DL, E4SA4, E4SA6, E4SA9DL
Phenanthrene	E4SB6MS
Fluorene	E4S89DL, E4S92, E4SA2, E4SA3, E4SA3DL, E4SA6, E4SA9, E4SA9DL
Naphthalene	E4S89, E4SA9
2-Methylnaphthalene	E4S89

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4S89 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene, Chrysene, Benzo(b)fluoranthene, and Pyrene; and samples E4SA3 and E4SA9 had concentrations for Pyrene that exceeded the instrument calibration range. These results were flagged "E" by the laboratory and, as per the NFG, are flagged estimated, "J". The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike (E4SB6MS) and matrix spike duplicate (E4SB6MSD) recoveries is outside criteria for Acenaphthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

The matrix spike (E4SB6MS) and matrix spike duplicate (E4SB6MSD) have percent recoveries that are greater than the upper acceptance limit for Pyrene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 are identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. Semivolatile, but not Semivolatile-SIM, analyses were conducted for the equipment blanks E4SG5 and E4SG6. Results for the equipment blanks are reported in the Semivolatiles Section 7.0 above.

E4SA3 and E4SA6

Semivolatile-SIM compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	54	10	7.9	10	150
Acenaphthene	35	10	41	10	15.8

Semivolatile-SIM compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Fluorene	59	10	52	10	12.6
Phenanthrene	630	10	470	10	29.1
Anthracene	190	10	130	10	37.5
Fluoranthene	1700	10	1300	10	26.7
Pyrene	1200	10	910	10	27.5
Benzo(a)anthracene	800	10	560	10	35.3
Chrysene	630	10	550	10	13.6
Benzo(b)fluoranthene	990	10	760	10	26.3
Benzo(k)fluoranthene	300	10	230	10	26.4
Benzo(a)pyrene	730	10	510	10	35.5
Indeno(1,2,3-cd)pyrene	460	10	380	10	19
Dibenzo(a,h)anthracene	93	10	75	10	21.4
Benzo(g,h,i)perylene	370	10	300	10	20.9

For field duplicate pair E4SC5 and E4SC6, all compounds detected in both samples had RPD values less than 50%, except for Acenaphthylene (150%).

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, and E4SB4 were performed using 10-fold dilutions. The original analysis for samples E4SB0 and E4SB6 were performed using 2-fold and 5-fold dilutions, respectively.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SB0DL, E4SB6DL
Indeno (1,2,3-cd) pyrene	E4SB7
Benzo (b) fluoranthene	E4SB7
Fluoranthene	E4SB7
Benzo (k) fluoranthene	E4SB6DL
Acenaphthylene	E4S89, E4SA4, E4SA6, E4SA9, E4SB6, E4SB6MS

Chrysene	E4SB7
Benzo (a) pyrene	E4SB7
Dibenzo (a,h) anthracene	E4SB0, E4SB0DL, E4SB6DL
Benzo (a) anthracene	E4SB7
Acenaphthene	E4S90, E4S92, E4SB0, E4SB0DL, E4SB4, E4SB6
Phenanthrene	E4SB7
Fluorene	E4S90, E4SB0, E4SB0DL, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Naphthalene	E4SB6MSD
2-Methylnaphthalene	E4SA9, E4SB6, E4SB6MSD

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where diluted results are provided, these should be used for result validation.

Anthracene	E4S89, E4SA4
Benzo(a)anthracene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(a)pyrene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(b)fluoranthene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB4, E4SB6, E4SB6MSD
Benzo(g,h,i)perylene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Benzo(k)fluoranthene	E4S89, E4SA3, E4SA4, E4SA9
Chrysene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Fluoranthene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB0, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Fluorene	E4SA4
Indeno(1,2,3-cd)pyrene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9

Phenanthrene	E4S89, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9
Pyrene	E4S89, E4S90, E4S92, E4SA2, E4SA3, E4SA4, E4SA6, E4SA9, E4SB4, E4SB6, E4SB6MS, E4SB6MSD

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4S89, E4S89DL, E4S90, E4S90DL, E4S92, E4SA2, E4SA3, E4SA4, E4SA4DL, E4SA6, E4SA9, E4SA9DL, E4SB0, E4SB4, E4SB6, E4SB6MS, E4SB6MSD, E4SB7

All pesticide samples are associated with a CCV with % Difference that exceeded criteria for the target compounds Endosulfan I, Endosulfan II, 4,4'-DDT, Endrin ketone, Endrin, Methoxychlor, beta-BHC, delta-BHC, alpha-Chlordane, gamma-BHC (Lindane), and Endrin aldehyde. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated initial instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDE	E4SB0, E4SB6MS
Endrin aldehyde	E4SG5, E4SG6

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

gamma-Chlordane	E4SB7
4,4'-DDE	E4SB0, E4SB6MS
Endrin aldehyde	E4SG5, E4SG6

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following pesticide samples have surrogate percent recoveries that are greater than 200%. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4, E4SA6
Tetrachloro-m-xylene	E4SA9

The following pesticide samples have surrogate percent recoveries that are greater than 200%. All target pesticide compounds are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4DL, E4SA9DL
Tetrachloro-m-xylene	E4SA4DL, E4SA9DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected results for Heptachlor compounds are qualified "J." Nondetected compounds are not qualified.

Heptachlor	E4SB6MS, E4SB6MSD

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates**.** Results are summarized in the following table. Results for gamma-BHC (Lindane), Heptachlor, Heptachlor epoxide, 4,4'-DDT, Methoxychlor, and Endrin aldehyde were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs. Sample results are not qualified based on the results of field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Pesticide compound	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)		1	ND	1	
Heptachlor		1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1		1	
Endosulfan I	0.46	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	2.5	1	3.1	1	21
Endrin	0.25	1	0.26	1	3.9
Endosulfan II	0.25	1	0.26	1	3.9
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT		1		1	

Pesticide compound	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Methoxychlor	1.3	1		1	
Endrin ketone	0.25	1		1	
Endrin aldehyde		1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	2.6	1	
Toxaphene	ND	1	ND	1	

For field duplicate samples E4SA3 and E4SA6, where calculated, RPD values were less than 50%.

Equipment Blanks E4SG5 and E4SG6

Pesticide compound	E4SG5 µg/L	E4SG6 µg/L
alpha-BHC	ND	ND
beta-BHC	ND	ND
delta-BHC	ND	ND
gamma-BHC (Lindane)	ND	ND
Heptachlor	ND	ND
Aldrin	ND	ND
Heptachlor epoxide	ND	ND
Endosulfan I	ND	ND
Dieldrin	ND	ND
4,4'-DDE	ND	ND
Endrin	ND	ND
Endosulfan II	ND	ND
4,4'-DDD	ND	ND
Endosulfan sulfate	ND	ND
4,4'-DDT	ND	ND
Methoxychlor	ND	ND
Endrin ketone	ND	ND
Endrin aldehyde	ND	ND
alpha-Chlordane	ND	ND
gamma-Chlordane	ND	ND
Toxaphene	ND	ND

No target compounds were detected in equipment blanks E4SG5 or E4SG6.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

alpha-BHC	E4SB7
Methoxychlor	E4SA4DL
Heptachlor epoxide	E4SG6

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds remain unchanged.

Endosulfan sulfate	E4S90DL, E4SB0
Aldrin	E4S92, E4SA3, E4SB4
alpha-BHC	E4S90DL
beta-BHC	E4SB0
delta-BHC	E4S90DL, E4SB7
Endosulfan II	E4SB6
alpha-Chlordane	E4S90DL, E4SB6
gamma-Chlordane	E4SB7, E4SG5
Endrin ketone	E4S89DL, E4S90
gamma-BHC (Lindane)	E4S89, E4S90, E4SB7
Dieldrin	E4SB0, E4SB6
Endrin	E4S90DL, E4SB0, E4SB7
Methoxychlor	E4SB7
Endrin aldehyde	E4SG5
Endosulfan I	E4S89DL, E4S90, E4S90DL, E4S92, E4SB0, E4SB7

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Heptachlor epoxide	E4S90DL
alpha-BHC	E4SA4DL

beta-BHC	E4S90, E4SB7, E4SG5
4,4'-DDT	E4S90, E4SA4
alpha-Chlordane	E4S89
gamma-BHC (Lindane)	E4SA4DL, E4SB6MSD
Dieldrin	E4S89, E4S90, E4S92, E4SB4, E4SB6MS
Endrin	E4SB6MS, E4SB6MSD
4,4'-DDD	E4S90DL, E4SA4DL, E4SG5
4,4'-DDE	E4S89DL, E4S92, E4SA2, E4SA3, E4SA9DL, E4SB4
Endrin aldehyde	E4SB0, E4SB7
Heptachlor	E4SB6MS, E4SB6MSD
Endosulfan I	E4SA3, E4SA4

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified “NJ”.

Heptachlor epoxide	E4S90
alpha-BHC	E4SA9, E4SA9DL
4,4'-DDT	E4S89DL, E4SA2, E4SA9DL
gamma-Chlordane	E4S90, E4SA6
Dieldrin	E4SA9, E4SB6MSD
Methoxychlor	E4S89
4,4'-DDD	E4S89DL
4,4'-DDE	E4S89, E4S90, E4S90DL, E4SA4DL
Endrin aldehyde	E4S90, E4S92, E4SA2
Heptachlor	E4S90, E4SA9, E4SB6

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified “U” and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4SA2, E4SA9DL, E4SB0, E4SB6, E4SB6MS, E4SB6MSD, E4SB7, E4SG5

Endosulfan sulfate	E4SB6MS, E4SB7
alpha-BHC	E4SB0
beta-BHC	E4S89DL, E4S90DL
delta-BHC	E4SG5
Endosulfan II	E4S89, E4S89DL, E4S90, E4S90DL, E4S92, E4SA3, E4SA4, E4SA4DL, E4SA6, E4SA9, E4SA9DL, E4SB4, E4SB7
4,4'-DDT	E4SB7
alpha-Chlordane	E4SA4DL, E4SB0
Endrin ketone	E4S89, E4S92, E4SA3, E4SA4, E4SA9, E4SB4
Endrin	E4S89DL, E4SA3, E4SA4DL, E4SA6
Methoxychlor	E4S90DL, E4S92, E4SA2, E4SA3, E4SA9DL, E4SB0, E4SB4, E4SB6
4,4'-DDD	E4SB0, E4SB6, E4SB6MS, E4SB6MSD, E4SB7
4,4'-DDE	E4SB0
Endrin aldehyde	E4S90DL
Heptachlor	E4S89DL, E4S90DL, E4SB0
Endosulfan I	E4SA4DL

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified “R”.

Heptachlor epoxide	E4S89, E4S89DL, E4S92, E4SA3, E4SA6, E4SA9, E4SB4
Endosulfan sulfate	E4S90, E4SA9
beta-BHC	E4S89, E4SA2, E4SB6
4,4'-DDT	E4S89, E4S92, E4SA3, E4SA6, E4SA9, E4SB4
gamma-Chlordane	E4S89
Endrin ketone	E4SA6
gamma-BHC (Lindane)	E4SA3
Endrin	E4S89, E4S92, E4SA4, E4SB4
Methoxychlor	E4S90, E4SA4, E4SA6, E4SA9

4,4'-DDD	E4S92
4,4'-DDE	E4SA9
Endrin aldehyde	E4SA3, E4SA9, E4SB4, E4SB6, E4SB6MS, E4SB6MSD
Heptachlor	E4S89, E4SA3, E4SA4DL, E4SA6, E4SA9DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, the results are flagged "J". The results from the diluted samples should be used for result validation.

4,4'-DDD	**E4S89, E4S90, E4SA9**
4,4'-DDE	**E4S89**
gamma-BHC (Lindane)	**E4SA4**

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of diluted sample E4S89DL. No sample results were qualified based on surrogate recovery. However, a surrogate recovery greater than 150% was obtained on only one column for samples E4S89, E4S90, E4S92, E4SSA3, E4SA6, and E4SA9. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following Aroclor samples have surrogate percent recoveries that are greater than 200% Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S89, E4S90, E4S92, E4SA3, E4SA6
Tetrachloro-m-xylene	E4SA9

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4S89DL, E4S92DL, E4SA3DL, E4SA4DL, E4SA6DL, E4SA9DL, E4SB4DL
Tetrachloro-m-xylene	E4SA3DL, E4SA4DL, E4SA6DL, E4SA9DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA4, E4SA9, E4SB4
Tetrachloro-m-xylene	E4SA3, E4SA6

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Tetrachloro-m-xylene E4S89DL, E4SA9DL, E4SB4DL

The following Aroclor sample has surrogate percent recoveries less than 30% but greater than 10%. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Decachlorobiphenyl E4SA2

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SB6, the Aroclor MS and MSD sample has a percent recovery greater than the upper acceptance limit on both the RTX-CLP and RTX-CLP2 columns for Aroclor-1260. In addition, the relative percent difference (RPD) between the MS and MSD for Aroclor-1260 was above criteria on column RTX-CLP. For column RTX-CLP2, the MS for Arochlor-1016 had a RPD greater than the upper acceptance limit. All samples are affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Samples E4SA3 and E4SA6 were identified as field duplicates. In addition to undiluted analyses of each sample, a dilution was also analyzed (E4SA3DL, E4SA6DL). Results are summarized in the following two tables. Note that results are not qualified based upon the results of the field duplicates. Two equipment blanks were collected for this SDG.

E4SA3 and E4SA6

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	260	1	290	1	11
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

E4SA3 and E4SC6DL

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	50	
Aroclor-1221	ND	1	ND	50	

Aroclor compounds	E4SA3 µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1232	ND	1	ND	50	
Aroclor-1242	ND	1	ND	50	
Aroclor-1248	260	1	450	50	54
Aroclor-1254	ND	1	ND	50	
Aroclor-1260	ND	1	ND	50	
Aroclor-1262	ND	1	ND	50	
Aroclor-1268	ND	1	ND	50	

E4SA3DL and E4SC6

Aroclor compounds	E4SA3DL µg/kg	DF	E4SA6 µg/kg	DF	%RPD
Aroclor-1016	ND	50	ND	1	
Aroclor-1221	ND	50	ND	1	
Aroclor-1232	ND	50	ND	1	
Aroclor-1242	ND	50	ND	1	
Aroclor-1248	390	50	290	1	29
Aroclor-1254	ND	50	ND	1	
Aroclor-1260	ND	50	ND	1	
Aroclor-1262	ND	50	ND	1	
Aroclor-1268	ND	50	ND	1	

E4SA3DL and E4SC6DL

Aroclor compounds	E4SA3DL µg/kg	DF	E4SA6DL µg/kg	DF	%RPD
Aroclor-1016	ND	50	ND	50	
Aroclor-1221	ND	50	ND	50	
Aroclor-1232	ND	50	ND	50	
Aroclor-1242	ND	50	ND	50	
Aroclor-1248	390	50	450	50	14
Aroclor-1254	ND	50	ND	50	
Aroclor-1260	ND	50	ND	50	
Aroclor-1262	ND	50	ND	50	
Aroclor-1268	ND	50	ND	50	

For the neat and diluted analysis of field duplicate samples E4SA3 and E4SA6, RPD values were not calculated when both values were nondetects. The RPDs for Aroclor-1248 were below 50% except for RPDs for E4SA3 and E4SC6DL.

Equipment Blanks E4SG5 and E4SG6

Aroclor compounds	E4SG5 µg/L	E4SG6 µg/L
Aroclor-1016	ND	ND
Aroclor-1221	ND	ND
Aroclor-1232	ND	ND

Aroclor compounds	E4SG5 µg/L	E4SG6 µg/L
Aroclor-1242	ND	ND
Aroclor-1248	ND	ND
Aroclor-1254	ND	ND
Aroclor-1260	ND	ND
Aroclor-1262	ND	ND
Aroclor-1268	ND	ND

No target compounds were detected in equipment blanks E4SG5 or E4SG6.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J".

Aroclor-1260 E4RZ6, E4S10, E4S51

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4RZ2, E4RZ6, E4S51

Aroclor-1248 E4RY8, E4S09DL

The following Aroclor samples have percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1260 E4S59

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4S52

For the MS and MSD prepared for sample E4RZ1, Aroclor-1016 had a percent difference between the results on the two GC columns exceeding 100%. Detected Aroclor-1016 results in the MS and MSD are qualified "R".

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

Aroclor-1248 E4SA3, E4SA4, E4SA6, E4SA9

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "NJ". The results from the diluted sample should be used.

Aroclor-1260 E4S92, E4SB4

The following Aroclor sample reported concentrations that exceeded the calibrated range of the instrument and was flagged "E" by the laboratory. As per the NFG, this results is flagged "J" as the percent difference was between 26 and 50%. Where provided, the results from the diluted sample should be used.

Aroclor-1260 E4S89

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Receipt: Thirteen (13) sediment samples labeled E4S93, E4S94, E4S95, E4S96, E4S97, E4SA1, E4SA5, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5, and E4SB8 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All samples were collected on 3/3/2010 and shipped on 3/4/2010. All samples were received on 3/6/2010 at 5 °C. One of the three containers for sample E4SB3 was received broken; however, the remaining two containers had sufficient sample for analyses. In accordance with direction from EPA, analyses proceeded. Sample E4SB3 was received at pH 9.05, which is outside the allowable limits. In accordance with direction from EPA, the pH was adjusted and the analyses conducted. No data were qualified based on the late delivery, the broken container, or sample pH.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

Samples E4S92 and E4SB1 contained less than 50% solids (45.3066% and 44.4634%, respectively). Results were reported on a dry-weight basis using the percent solids determined by the laboratory. As designated by the samplers, Sample E4S95 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no samples were identified as field duplicate pairs.

Per the laboratory narrative, manual edits were made in the semivolatiles calibration standards for a variety of miscalled peaks. Every manual integration is noted by an "m" footnote on the quantitation report.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile compounds and samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(g,h,i)perylene	E4S93
Benzo(b)fluoranthene	E4S93

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for Benzo(b)fluoranthene and Benzo(k)fluoranthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4S97, E4SA1, E4SA5, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5, E4SB8

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile samples E4S95 and E4S95MS have deuterated monitoring compound recovery below the lower limit of the criteria window for Pyrene-d_{10}. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene	E4S94
Pyrene	E4S96
Benzo(g,h,i)perylene	E4S95, E4S95MSD, E4SA8
Indeno(1,2,3-cd)pyrene	E4S95, E4SA7, E4SA8
Benzo(b)fluoranthene	E4S95MS, E4S95MSD, E4S96
Fluoranthene	E4S95MS
Benzo(k)fluoranthene	E4S95, E4SA7, E4SB5
Chrysene	E4S95MSD
Benzo(a)pyrene	E4S95MSD, E4S96
Dibenzo(a,h)anthracene	E4S93
Benzo(a)anthracene	E4S96
Phenanthrene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA8
Fluorene	E4S93

The following semivolatile samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Anthracene	E4S95, E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB3, E4SB5
Pyrene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(g,h,i)perylene	E4S95MS, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Indeno(1,2,3-cd)pyrene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SB3
Benzo(b)fluoranthene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Fluoranthene	E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(k)fluoranthene	E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA8, E4SB3
Acenaphthylene	E4S93, E4S94, E4SA7, E4SA8, E4SB1
Chrysene	E4S95MS, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Benzo(a)pyrene	E4S95MS, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Dibenzo(a,h)anthracene	E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(a)anthracene	E4S95MS, E4S95MSD, E4S97, E4SA1, E4SA5, E4SB3, E4SB8
Acenaphthene	E4S93, E4S94, E4S95, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Phenanthrene	E4S97, E4SA5, E4SB3, E4SB8
Fluorene	E4S94, E4S95, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5

Naphthalene	E4S93, E4S94, E4S95, E4SA1, E4SA8, E4SB1
2-Methylnaphthalene	E4S94, E4S95MSD, E4SA1

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

SEMIVOLATILES-SIM

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following semivolatile samples and compounds have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Benzo(k)fluoranthene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SB3, E4SB8
Benzo(a)pyrene	E4SA5, E4SB8
Dibenzo(a,h)anthracene	E4S96DL, E4S97, E4SA1, E4SA1DL, E4SA5, E4SB3, E4SB8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike (E4S95MS) and matrix spike duplicate (E4S95MSD) recoveries is outside criteria for Acenaphthene. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4S93, E4S94, E4S92, E4S95 E4S96, E4SA7, E4SA8, E4SB1, and E4SB4 were performed using 10-fold dilutions. The original analysis for sample E4SA1 was performed using 3-fold dilution.

The following semivolatile samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Acenaphthylene	E4S96, E4SA8DL
Acenaphthene	E4S96DL, E4S97, E4SA5, E4SA7DL
Fluorene	E4S96DL, E4S97, E4SA5
Naphthalene	E4S93DL, E4S94DL, E4S95DL, E4S95MS, E4S97, E4SA1DL, E4SA5, E4SA8DL, E4SB1DL, E4SB3, E4SB8
2-Methylnaphthalene	E4S93DL, E4S94DL, E4S95MS, E4S96, E4S97, E4SA5, E4SB5DL, E4SB8

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Anthracene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SA8DL, E4SB1DL, E4SB8
Benzo(k)fluoranthene	E4S96DL, E4S97, E4SA1DL, E4SA5, E4SB3, E4SB8
Acenaphthylene	E4S93DL, E4S94DL, E4S95, E4S95MS, E4S95MSD, E4SB1, E4SB5
Benzo(a)pyrene	E4SA5, E4SB8
Dibenzo(a,h)anthracene	E4S96DL, E4S97, E4SA1, E4SA1DL, E4SA5, E4SB3, E4SB8
Acenaphthene	E4S94DL, E4S95DL, E4SA8DL, E4SB1DL, E4SB3, E4SB5DL
Fluorene	E4S95DL, E4S95MS, E4SA7DL, E4SA8DL, E4SB1DL, E4SB3, E4SB5DL
Naphthalene	E4S96
2-Methylnaphthalene	E4S95, E4SA7, E4SB3

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are qualified "J".

Acenaphthene	E4S93
Anthracene	E4S93, E4S94, E4S95, E4SA7, E4SB5

Benzo(a)anthracene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(a)pyrene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(b)fluoranthene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(g,h,i)perylene	E4S93, E4S94, E4S95, E4S95MSD, E4SA7, E4SA8, E4SB1, E4SB5
Benzo(k)fluoranthene	E4S93, E4S94, E4S95, E4S95MSD, E4SA7, E4SA8, E4SB1, E4SB5
Chrysene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5
Dibenzo(a,h)anthracene	E4S93, E4S94, E4SA7, E4SB1
Fluoranthene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Fluorene	E4S93
Indeno(1,2,3-cd)pyrene	E4S93, E4S94, E4S95, E4S95MSD, E4S96, E4SA1, E4SA7, E4SA8, E4SB1, E4SB5
Pyrene	E4S93, E4S94, E4S95, E4S95MS, E4S95MSD, E4S96, E4SA7, E4SA8, E4SB1, E4SB5

The following *diluted* semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are qualified "J".

Benzo(a)anthracene	E4S93DL, E4S94DL
Benzo(a)pyrene	E4S93DL, E4S94DL
Benzo(b)fluoranthene	E4S93DL, E4S94DL
Benzo(g,h,i)perylene	E4S93DL
Benzo(k)fluoranthene	E4S93DL
Chrysene	E4S93DL, E4S94DL
Fluoranthene	E4S93DL, E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Indeno(1,2,3-cd)pyrene	E4S93DL, E4S94DL
Phenanthrene	E4S93DL, E4S94DL
Pyrene	E4S93DL, E4S94DL, E4SB5DL

The following *diluted* semivolatile-SIM samples reported concentrations that *did not* exceed the calibrated range of the instrument and were *not* flagged "E" by the laboratory.

Acenaphthene	E4S93DL
Anthracene	E4S93DL, E4S94DL, E4S95DL, E4SA7DL, E4SB5DL
Benzo(a)anthracene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(a)pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(b)fluoranthene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(g,h,i)perylene	E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Benzo(k)fluoranthene	E4S94DL, E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Chrysene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Dibenzo(a,h)anthracene	E4S93DL, E4S94DL, E4SA7DL, E4SB1DL
Fluorene	E4S93DL
Indeno(1,2,3-cd)pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL

Phenanthrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL
Pyrene	E4S95DL, E4SA7DL, E4SB1DL, E4SB5DL

PESTICIDES

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *method* blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDT	E4S94DL, E4S96, E4SA1, E4SA5, E4SB3

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *initial* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endrin aldehyde	E4S97, E4SA5, E4SB3, E4SB8

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated *continuing* instrument blank concentration is less than the concentration criteria. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

4,4'-DDE	E4S97, E4SA1, E4SA5, E4SB3
Endrin aldehyde	E4S93DL, E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB8

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. All pesticide compounds are affected. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL

The following pesticide samples have surrogate percent recoveries greater than 150% but less than or equal to 200%. Detected compounds are qualified "J." All pesticide compounds are affected. Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93

The following diluted pesticide samples with dilution factors greater than 5 have surrogate percent recoveries greater than 150% but less than or equal to 200%. All pesticide compounds are affected. Detected and nondetected compounds are not qualified.

Tetrachloro-m-xylene	E4S93DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following pesticide matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Heptachlor	E4S95MS, E4S95MSD

For the pesticide matrix/matrix spike pair E4S95/MS/E4S95MSD, percent recoveries are greater than the upper acceptance limit for Aldrin, 4,4'-DDT, gamma-BHC (Lindane), Dieldrin, Endrin, and Heptachlor. All samples are affected. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

Aldrin	E4SB5
4,4'-DDT	E4SB8
alpha-Chlordane	E4SB8
Endrin ketone	E4SA1, E4SB3, E4SB8
gamma-BHC (Lindane)	E4S93DL, E4S95, E4S96, E4SA5, E4SB1, E4SB3, E4SB5, E4SB8
Dieldrin	E4SA5

Endrin	E4SB8
4,4'-DDD	E4SB8

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Endosulfan sulfate	E4SA1
Aldrin	E4S96, E4SA8
alpha-BHC	E4S93DL, E4SA1, E4SA5
beta-BHC	E4S95, E4S96, E4SA5, E4SA8, E4SB8
delta-BHC	E4S93DL, E4S95
Endosulfan II	E4SA1, E4SB3
alpha-Chlordane	E4S96, E4S97, E4SA1, E4SA5, E4SB3, E4SB5
Endrin ketone	E4S93DL, E4SB1, E4SB5
gamma-BHC (Lindane)	E4S93, E4S97, E4SA1, E4SA7
Dieldrin	E4S96, E4SA1, E4SB3, E4SB5
Endrin	E4SA1, E4SA5, E4SB3
Methoxychlor	E4SA5, E4SB8
4,4'-DDE	E4S97
Endrin aldehyde	E4SB5
Heptachlor	E4S97, E4SB3, E4SB8
Endosulfan I	E4S93DL, E4S94, E4S95, E4SA7, E4SB1, E4SB5

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Heptachlor epoxide	E4S95, E4S95MSD
Aldrin	E4S95MS, E4S95MSD
alpha-BHC	E4SB8
4,4'-DDT	E4S94DL, E4SA8
alpha-Chlordane	E4S93, E4S93DL, E4S94, E4SB1
gamma-Chlordane	E4SB3, E4SB5
gamma-BHC (Lindane)	E4SA8
Endrin	E4S95MS, E4S95MSD
4,4'-DDD	E4S93DL, E4S95MS
4,4'-DDE	E4SA7, E4SB3, E4SB5
Endrin aldehyde	E4S95MS, E4SB1, E4SB3
Heptachlor	E4S95MS
Endosulfan I	E4SA8

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Heptachlor epoxide	E4S93DL, E4S95MS
4,4'-DDT	E4S93, E4S93DL, E4S94, E4S95, E4SA7, E4SB1, E4SB5
gamma-Chlordane	E4S93, E4S95, E4S95MS, E4S95MSD, E4SB1
gamma-BHC (Lindane)	E4S95MS, E4S95MSD
Dieldrin	E4S93, E4S93DL, E4S95MS, E4S95MSD, E4SA8
Methoxychlor	E4S93
4,4'-DDD	E4SA7
4,4'-DDE	E4S94, E4S94DL, E4SB1

Endrin aldehyde	E4S95, E4S95MSD, E4SA7, E4SA8
Heptachlor	E4S95MSD

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below the CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4S96, E4S97, E4SA1, E4SA5, E4SB5, E4SB8
Endosulfan sulfate	E4SB3
Aldrin	E4SA1
alpha-BHC	E4S97, E4SA7
beta-BHC	E4S93DL, E4S97, E4SA1, E4SB5
delta-BHC	E4SB3
Endosulfan II	E4S93, E4S93DL, E4S94, E4S94DL, E4SA8
4,4'-DDT	E4S96, E4SA5, E4SB3
gamma-Chlordane	E4S97, E4SA5, E4SB8
Endrin ketone	E4S95, E4S95MS, E4S95MSD, E4SA7, E4SA8
Dieldrin	E4S94, E4S94DL, E4S95, E4SB8
Endrin	E4S93DL, E4S97, E4SA8, E4SB1
Methoxychlor	E4S93DL, E4S94DL, E4S95, E4S95MS, E4S95MSD, E4S96, E4S97, E4SA1, E4SA8, E4SB3, E4SB5
4,4'-DDD	E4SA1, E4SA5, E4SB3
4,4'-DDE	E4SA1, E4SA5
Endrin aldehyde	E4S93DL, E4S96, E4S97, E4SA1, E4SA5, E4SB8
Heptachlor	E4S94, E4S95, E4S96, E4SA1, E4SA5, E4SB5

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4S93, E4SA7, E4SA8
Endosulfan sulfate	E4S94, E4SA7
delta-BHC	E4S96, E4SB1
gamma-Chlordane	E4S94, E4S96
Endrin	E4S93, E4SA7
Methoxychlor	E4S94, E4SA7, E4SB1
4,4'-DDE	E4SA8
Endrin aldehyde	E4S93
Heptachlor	E4SA7, E4SA8

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

Samples were shipped 3/4/2010 and received on 3/6/2010; holding time requirements were not exceeded. In accordance with direction from EPA, analyses were conducted on these samples and no data was qualified based on the late sample delivery.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery. However, a surrogate recovery greater than 150% was obtained on only one column for samples E4S93, E4S94, E4SA7, E4SSA8, and E4S95MS. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries that are greater than 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL, E4SA7DL

The following Aroclor samples have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93, E4S94, E4SA7, E4SA8
Tetrachloro-m-xylene	E4S94, E4S95MS

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Decachlorobiphenyl	E4SA8DL

The following diluted Aroclor samples with dilution factors less than or equal to 5 have surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Decachlorobiphenyl	E4S93DL, E4SA7DL
Tetrachloro-m-xylene	E4SA7DL

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4S95, the Aroclor MS and MSD samples have a percent recovery greater than the upper acceptance limit on the RTX-CLP and RTX-CLP2 columns for Aroclor-1016 and on the RTX-CLP column for Aroclor-1260. The results for Aroclor-1016 and Aroclor-1260 were rejected in sample E4S95MSD for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs. All samples are affected.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Not applicable.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1260	E4S93DL, E4SB5

The following Aroclor sample has percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1248	E4SB5

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R."

Aroclor-1260	E4S95MSD
Aroclor-1016	E4S95MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where provided, the results from the diluted sample should be used.

Aroclor-1016	E4S95MS
Aroclor-1248	E4SA7, E4SA8
Aroclor-1260	E4S93

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG SUMMARY

Sample Receipt: Twenty (20) sediment samples labeled E4SC2, E4SD4 – E4SD7, E4SE2, E4SF0, E4SF2 - E4SF8, E4SG0 – E4SG4 and E4SG7 were shipped to DataChem Laboratories, Inc., in Salt Lake City, Utah. Samples E4SC2, E4SD4 – E4SD7, E4SE2, and E4SG7 were collected on 3/4/2010 and were received on 3/6/2010, intact and at 4 ºC. Sample E4SF0, E4SF2 – E4SF4 were collected on 3/4/2010 and received on 3/6/2010, intact and at 6 ºC. Samples E4SF5 - E4SF7 were collected on 3/5/2010 and were received on 3/6/2010, intact and at 6 ºC. Samples E4SG0 – E4SG4 were collected on 3/5/2010 and received, intact and at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, ***with the following exception***. The laboratory requested permission to deviate from these MAs and extract the samples using ultrasonic extraction rather than Soxhlet extraction. GLNPO and the CLP Project Manager approved the request. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Some samples in this SDG were originally reported with results below the sample-specific MDLs and qualifier by the laboratory with a "J" flag. The EDD, Form 1s and other data summary forms for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s.

Several of the Form 1s reported target compound results less than the MDL for the semivolatile, Semivolatiles-SIM, and pesticide analyses. The forms were revised and resubmitted by the laboratory and should be used when viewing the data package. For the Semivolatiles-SIM analysis, however, some corrected Form 1s were not provided and are noted in the appropriate section of this report. For these samples, the EDD provides the sample results at the appropriate levels.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed. GLNPO may wish to obtain revised copies of the summary forms packages from the laboratory if there is a problem identifying the appropriate data based on the noted discrepancies.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples

Sample E4SF0 was designated by the samplers to be used for laboratory QC, i.e. MS/MSD analyses.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Samples E4SC1/E4SC2, E4SE1/E4SE2, and E4SG1/E4SG4 were identified as field duplicates. Field Duplicate pairs E4SC1/E4SC2 and E4SE1/E4SE2 had high RPDs (> 50%) for many target compounds. In addition, it should be noted that E4SE1 was analyzed at a dilution factor of 10, while its duplicate, E4SE2 was analyzed at a dilution factor of 1. *Note: Samples E4SC1, E4SE1, and E4SE1DL were not part of this SDG. Sample E4SC1 is part of SDG E4RY5 and sample E4SE1 is part of SDG E4S57. Data from these three samples were added to the field duplicate tables in the narrative in order to calculate RPDs.*

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo (g,h,i) perylene	E4SF4, E4SF7, E4SG0, E4SG2
Indeno (1,2,3-cd) pyrene	E4SF4, E4SF7, E4SG0, E4SG2
Benzo (b) fluoranthene	E4SF4, E4SF7, E4SG0, E4SG2

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The original analysis of the following semivolatile sample E4SG0 has a dilution factor greater than 5 and a deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene, Anthracene, Phenanthrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Pyrene, Acenaphthene E4SF0, E4SF0MS, E4SF0MSD

6B. LABORATORY CONTROL SAMPLE

An LCS was not required.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2 and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Semivolatile Compounds	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	ND	1	ND	1	
Phenanthrene	ND	1	ND	1	
Anthracene	ND	1	ND	1	
Fluoranthene	ND	1	ND	1	
Pyrene	ND	1	ND	1	
Benzo(a)anthracene	ND	1	ND	1	
Chrysene	ND	1	ND	1	
Benzo(b)fluoranthene	ND	1	ND	1	
Benzo(k)fluoranthene	ND	1	ND	1	
Benzo(a)pyrene	ND	1	ND	1	
Indeno(1,2,3-cd)pyrene	ND	1	ND	1	
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	ND	1	ND	1	

E4SE1 and E4SE2

Semivolatile Compounds	E4SE1 µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Naphthalene	ND	5	ND	1	
2-Methylnaphthalene	ND	5	ND	1	
Acenaphthylene	ND	5	ND	1	
Acenaphthene	410	5	130	1	100
Fluorene	340	5	120	1	96
Phenanthrene	2600	5	880	1	99
Anthracene	660	5	200	1	110
Fluoranthene	6700	5	1700	1	120
Pyrene	7600	5	2400	1	100
Benzo(a)anthracene	3400	5	1100	1	100
Chrysene	4200	5	1300	1	110
Benzo(b)fluoranthene	5800	5	1700	1	110
Benzo(k)fluoranthene	1400	5	510	1	93
Benzo(a)pyrene	3600	5	1200	1	100
Indeno(1,2,3-cd)pyrene	4000	5	1100	1	110
Dibenzo(a,h)anthracene	790	5	250	1	100
Benzo(g,h,i)perylene	3400	5	1000	1	110

E4SG1 and E4SG4

Semivolatile Compounds	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	2	
2-Methylnaphthalene	ND	1	ND	2	
Acenaphthylene	ND	1	ND	2	
Acenaphthene	74	1	ND	2	
Fluorene	99	1	110	2	11
Phenanthrene	1100	1	1300	2	17
Anthracene	270	1	290	2	7.1
Fluoranthene	1700	1	2100	2	21
Pyrene	2300	1	2300	2	0
Benzo(a)anthracene	1300	1	1300	2	0
Chrysene	1400	1	1400	2	0
Benzo(b)fluoranthene	1700	1	1700	2	0
Benzo(k)fluoranthene	550	1	550	2	0
Benzo(a)pyrene	1300	1	1300	2	0
Indeno(1,2,3-cd)pyrene	1200	1	1000	2	18
Dibenzo(a,h)anthracene	260	1	210	2	21
Benzo(g,h,i)perylene	1000	1	890	2	12

For field duplicates E4SC1 and E4SC2, the RPD values could not be calculated because either one or both of the values was zero. For field duplicates E4SE1 and E4SE2 the RPDs are near 100% or higher for most of the detected analytes.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SD4, E4SD5, E4SF2, E4SF3, E4SG0, E4SG1DL, E4SG4
Pyrene	E4SD6
Benzo (g,h,i) perylene	E4SD4, E4SD5, E4SF0, E4SF0MS, E4SF0MSD, E4SF3, E4SF4, E4SF6, E4SF7, E4SG0, E4SG2
Indeno (1,2,3-cd) pyrene	E4SD4, E4SD5, E4SF3, E4SF6, E4SG0, E4SG2
Benzo (b) fluoranthene	E4SD6

Fluoranthene	E4SD6
Benzo (k) fluoranthene	E4SD4, E4SD5, E4SF0, E4SF0MS, E4SF2, E4SF3, E4SF6, E4SF7, E4SG0, E4SG2
Chrysene	E4SF0, E4SF0MS, E4SF7
Benzo (a) pyrene	E4SD6, E4SF0, E4SF0MS, E4SF6
Dibenzo (a,h) anthracene	E4SG1DL, E4SG4
Benzo (a) anthracene	E4SF0, E4SF0MS, E4SF6, E4SF7
Acenaphthene	E4SE2, E4SF3, E4SF4, E4SF5, E4SG1
Phenanthrene	E4SD6, E4SF0, E4SF0MS, E4SF6, E4SF7
Fluorene	E4SE2, E4SF0MSD, E4SF3, E4SF5, E4SG1, E4SG4

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile samples have reported concentrations that exceeded the calibration range. These results were flagged “E” by the laboratory and are estimated “J”. The results from the diluted sample analyses were within the calibration range.

Pyrene	E4SG1

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

The following semivolatile samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Indeno (1,2,3-cd) pyrene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3
Dibenzo (a,h) anthracene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Diluted semivolatile-SIM sample E4SG0, with a dilution factor greater than 5, had a deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. All samples are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

Acenaphthene	E4SF0, E4SF0MS, E4SF0MSD

6B. LABORATORY CONTROL SAMPLE

An LCS was not required

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2 and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Semivolatiles-SIM Compounds	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Naphthalene	2.7	1	2	1	30
2-Methylnaphthalene	1.9	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	0.88	1	ND	1	
Phenanthrene	8.1	1	3.7	1	75
Anthracene	1.6	1	0.69	1	80
Fluoranthene	18	1	5.5	1	110
Pyrene	23	1	7.9	1	98
Benzo(a)anthracene	8.6	1	2.2	1	120
Chrysene	12	1	3.6	1	110
Benzo(b)fluoranthene	16	1	4.2	1	120
Benzo(k)fluoranthene	3.8	1	1.2	1	100
Benzo(a)pyrene	12	1	2.7	1	130
Indeno(1,2,3-cd)pyrene	10	1	2.9	1	110
Dibenzo(a,h)anthracene	2	1	2.4	1	18
Benzo(g,h,i)perylene	11	1	3.3	1	110

E4SE1 and E4SE2

Semivolatiles-SIM Compounds	E4SE1 µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Naphthalene	40	10	13	1	100
2-Methylnaphthalene	42	10	11	1	120
Acenaphthylene	32	10	7	1	130
Acenaphthene	200	10	45	1	130
Fluorene	170	10	42	1	120
Phenanthrene	1600	10	570	1	95
Anthracene	390	10	130	1	100
Fluoranthene	6000	10	1700	1	110
Pyrene	3600	10	1200	1	100
Benzo(a)anthracene	1900	10	650	1	98
Chrysene	2100	10	640	1	110
Benzo(b)fluoranthene	4000	10	1600	1	86
Benzo(k)fluoranthene	1000	10	480	1	70
Benzo(a)pyrene	2200	10	1100	1	67
Indeno(1,2,3-cd)pyrene	1700	10	740	1	79
Dibenzo(a,h)anthracene	320	10	160	1	67
Benzo(g,h,i)perylene	1400	10	610	1	79

E4SG1 and E4SG4

Semivolatile Compounds	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
Naphthalene	22	1	21	1	4.7
2-Methylnaphthalene	14	1	14	1	0
Acenaphthylene	17	1	19	1	11
Acenaphthene	29	1	34	1	16
Fluorene	36	1	45	1	22
Phenanthrene	650	1	940	1	37
Anthracene	140	1	200	1	35
Fluoranthene	1500	1	2100	1	33
Pyrene	1500	1	1800	1	18
Benzo(a)anthracene	950	1	1100	1	15
Chrysene	830	1	1000	1	19
Benzo(b)fluoranthene	1600	1	1800	1	12
Benzo(k)fluoranthene	370	1	470	1	24
Benzo(a)pyrene	990	1	1100	1	11
Indeno(1,2,3-cd)pyrene	660	1	740	1	11
Dibenzo(a,h)anthracene	140	1	160	1	13
Benzo(g,h,i)perylene	520	1	560	1	7.4

For field duplicates E4SC1 and E4SC2, the RPD values could not be calculated where one or both of the values was zero. Of those that could be calculated, only Naphthalene and Dibenzo(ah)anthracene had an RPD value below 50%. For field duplicates E4SE1 and E4SE2 the RPDs are near 100% or higher for all of the detected analytes. For field duplicates E4SG1 and E4SG4 all RPD values were below 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SC2, E4SD6DL, E4SF0DL, E4SF6DL, E4SF7DL, E4SF8, E4SG3
Indeno (1,2,3-cd) pyrene	E4SD7, E4SG7
Benzo (b) fluoranthene	E4SD7, E4SG7
Fluoranthene	E4SD7, E4SG7

Benzo (k) fluoranthene	E4SC2, E4SD6DL, E4SD7, E4SF8
Acenaphthylene	E4SD4, E4SD5, E4SE2DL, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5DL, E4SF6, E4SF7DL, E4SG1DL, E4SG2, E4SG4DL
Chrysene	E4SD7, E4SG7
Benzo (a) pyrene	E4SD7, E4SG7
Dibenzo (a,h) anthracene	E4SC2, E4SD4DL, E4SD6DL, E4SD7, E4SF0DL, E4SF2DL, E4SF3DL, E4SF6DL, E4SF7DL, E4SF8, E4SG2DL, E4SG3
Benzo (a) anthracene	E4SC2, E4SD7, E4SG7
Acenaphthene	E4SD4DL, E4SD5DL, E4SD6, E4SF0, E4SF2DL, E4SF3DL, E4SF6, E4SF7, E4SF8, E4SG2DL, E4SG3
Phenanthrene	E4SD7, E4SG7
Fluorene	E4SD4DL, E4SD5DL, E4SD6, E4SF0MSD, E4SF2DL, E4SF6, E4SF8, E4SG2DL, E4SG3
Naphthalene	E4SC2, E4SF0, E4SF0MS, E4SF0MSD, E4SG7
2-Methylnaphthalene	E4SD5, E4SD6, E4SF0, E4SF0MS, E4SF0MSD, E4SF6

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following Semivolatiles-SIM samples have reported concentrations that exceeded the calibration range. These results were flagged “E” by the laboratory and are estimated “J”. The results from the diluted sample analyses were within the calibration range.

Phenanthrene	E4SD4, E4SD5, E4SE2, E4SF0, E4SF0MS, E4SF0MS, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, E4SG0, E4SG1, E4SG2, E4SG4
Anthracene	E4SD4, E4SD5, E4SE2, E4SF2, E4SF3, E4SF4, E4SF5, E4SG0, E4SG1, E4SG2, E4SG4
Fluoranthene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4

Benzo(a)anthracene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Chrysene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(b)fluoranthene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(k)fluoranthene	E4SD4, E4SD5, E4SE2, E4SF0, E4SF0MS, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(a)pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Indeno(1,2,3-cd)pyrene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Benzo(g,h,i)perylene	E4SD4, E4SD5, E4SD6, E4SE2, E4SF0, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF4, E4SF5, E4SF6, E4SF7, EFSG0, E4SG1, E4SG2, E4SG4
Dibenzo(a,h)anthracene	E4SD4, E4SF0MS, E4SF0MSD, E4SF5, E4SG0, E4SG1, E4SG4
Acenaphthene	E4SE2, E4SF4, E4SF5, E4SG0, E4SG1, E4SG4
Fluorene	E4SE2, E4SF4, E4SF5, E4SG0, E4SG1, E4SG4

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated “J”. No further dilution analysis was performed and these diluted results should be used in the result validation.

Fluoranthene	E4SD5DL, E4SF4DL
Phenanthrene	E4SF4DL
Pyrene	E4SF4DL
Benzo(b)fluoranthene	E4SF4DL

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

beta-BHC	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endosulfan II	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
alpha-Chlordane	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin ketone	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Dieldrin	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Methoxychlor	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
4,4'-DDD	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endrin aldehyde	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4
Endosulfan I	E4SC2, E4SD4, E4SD6, E4SD7, E4SE2, E4SF0, E4SF4, E4SF5, E4SG1, E4SG4

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SF5 had surrogate percent recoveries greater than 150% but less than or equal to 200%. Pesticide sample E4SF5 also had surrogate percent recoveries that are greater than 200% (the same surrogate was out on both columns). Detected compounds are qualified J. Nondetected compounds are not qualified.

Diluted pesticide sample E4SF5DL, with a dilution factor greater than 5 has surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

A high surrogate recovery was obtained on only one column for samples E4SE2DL, E4SF4, E4SF4DL, E4SG1, E4SG4, E4SG4DL, and E4SF2. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SF4, E4SG1, E4SG4, and E4SF2, the "J" flags applied during the automated check process for surrogate recovery have been removed for detected compounds.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

According to the modified analysis, the laboratory was required to spike MS/MSD analytes at levels different than the SOW. For samples E4SF0, E4SF0MS, E4SF0MSD, all analytes were within acceptance limits based on the modified analysis procedures; therefore, the "J" flags applied during the automated check process have been removed for the following compounds.

Aldrin, 4,4'DDT, Gamma-BHC (Lindane), Dieldrin, Endrin, and Heptachlor

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1/E4SE2DL and E4SG1/E4SG4 were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Pesticide compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
alpha-BHC	0.13	1	ND	1	
beta-BHC	ND	1	0.12	1	
delta-BHC	ND	1	0.12	1	
gamma-BHC (Lindane)	ND	1	ND	1	
Heptachlor	0.14	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	0.13	1	0.12	1	8
Endosulfan I	ND	1	ND	1	
Dieldrin	0.25	1	ND	1	

Pesticide compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
4,4'-DDE	0.25	1	0.24	1	4.1
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	0.083	1	0.24	1	97
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	0.25	1	ND	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	0.1	1	
Toxaphene	ND	1	ND	1	

E4SE1 and E4SE2DL

Pesticide compound	E4SE1 µg/kg	DF	E4SE2DL µg/kg	DF	%RPD
alpha-BHC	ND	10	ND	10	
beta-BHC	ND	10	ND	10	
delta-BHC	ND	10	ND	10	
gamma-BHC (Lindane)	25	10		10	
Heptachlor	38	10	ND	10	
Aldrin	ND	10	ND	10	
Heptachlor epoxide	8.5	10		10	
Endosulfan I	ND	10	3.9	10	
Dieldrin	ND	10	7.6	10	
4,4'-DDE	25	10	11	10	78
Endrin	6.3	10	4.5	10	33
Endosulfan II	3.4	10	ND	10	
4,4'-DDD	ND	10	7.5	10	
Endosulfan sulfate	ND	10	3.3	10	
4,4'-DDT	ND	10	32	10	
Methoxychlor	ND	10	17	10	
Endrin ketone	ND	10	ND	10	
Endrin aldehyde	ND	10	3.3	10	
alpha-Chlordane	ND	10	3.3	10	
gamma-Chlordane	ND	10	ND	10	
Toxaphene	ND	10	ND	10	

E4SG1 and E4SG4

Pesticide compound	E4SG1 µg/kg	DF	E4SG4 µg/kg	DF	%RPD
alpha-BHC	0.14	1	ND	1	
beta-BHC		1		1	
delta-BHC	ND	1	ND	1	
gamma-BHC (Lindane)		1		1	
Heptachlor		1		1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide		1		1	
Endosulfan I	ND	1	ND	1	
Dieldrin	1.3	1	1.2	1	8
4,4'-DDE	3.4	1	3.4	1	0
Endrin		1	0.3	1	
Endosulfan II	0.28	1	0.3	1	6.9
4,4'-DDD	9.5	1	9.3	1	2.1
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	2.5	1		1	
Methoxychlor	1.4	1	1.5	1	6.9
Endrin ketone	ND	1	ND	1	
Endrin aldehyde		1		1	
alpha-Chlordane	0.83	1	0.89	1	7
gamma-Chlordane		1		1	
Toxaphene	ND	1	ND	1	

Results for beta-BHC, gamma-BHC(Lindane), Heptachlor, Heptachlor epoxide, Endrin, 4,4'-DDT, Endrin aldehyde, and gamma-Chlordane were rejected in one or both samples in field duplicate pairs E4SE1 and E4SE2DL and E4SG1 and E4SG4 for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs.

RPD values could not be calculated where one or both of the values was zero. For field duplicates E4SC1 and E4SC2, 4,4"-DDD had an RPD value above 50%. For field duplicates E4SE1 and E4SE2DL, gamma-BHC (Lindane) and 4,4'-DDE had RPD values above 50% . For field duplicates E4SG1 and E4SG4 all RPD values were below 50%.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Heptachlor epoxide	E4SF0, E4SF0MS
Aldrin	E4SF0MS
beta-BHC	E4SD7
4,4'-DDT	E4SE2, E4SF0MS, E4SF0MSD, E4SG1, E4SG2
alpha-Chlordane	E4SE2, E4SE2DL, E4SF5, E4SG1
gamma-Chlordane	E4SC2, E4SD4, E4SE2, E4SF0, E4SF2
Gamma-BHC (Lindane)	E4SF0MS, E4SF0MSD, E4SF6
Dieldrin	E4SF2
Endrin	E4SD4, E4SD5, E4SF2
4,4'-DDD	E4SE2DL, E4SF2, E4SF5, E4SG0
4,4'-DDE	E4SD5, E4SF6, E4SG0, E4SG1
Heptachlor	E4SF7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

alpha-Chlordane	E4SG0
Endrin ketone	E4SF5DL
Dieldrin	E4SE2, E4SE2DL, E4SF3, E4SG1, E4SG4
Endrin	E4SE2DL
4,4'-DDD	E4SD5, E4SE2, E4SF3
4,4'-DDE	E4SE2, E4SE2DL, E4SG4
Endrin aldehyde	E4SF4
Heptachlor	E4SF5
Endosulfan I	E4SE2, E4SE2DL

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

alpha-BHC	E4SE2, E4SG1, E4SG2
beta-BHC	E4SC2, E4SF2, E4SF6, E4SF7, E4SF8, E4SG0, E4SG7
delta-BHC	E4SC2, E4SG2, E4SG3
Endosulfan II	E4SD4, E4SF0MS, E4SF0MSD, E4SF2, E4SF3, E4SF6, E4SG0, E4SG1, E4SG4, E4SG4DL
4,4'-DDT	E4SF0, E4SF7, E4SG3
alpha-Chlordane	E4SD4
Endrin ketone	E4SD4, E4SF2, E4SF3
Gamma-BHC (Lindane)	E4SD4, E4SG1DL, E4SG4DL
Dieldrin	E4SG1DL, E4SG4DL
Endrin	E4SF0, E4SF4DL, E4SF6, E4SG1DL, E4SG4, E4SG4DL
Methoxychlor	E4SD4, E4SE2DL, E4SF2, E4SF4DL, E4SF5DL, E4SG0, E4SG1, E4SG4
4,4'-DDD	E4SC2, E4SD5DL, E4SD6
4,4'-DDE	E4SC2, E4SF7, E4SF8, E4SG3, E4SG7
Endrin aldehyde	E4SD4, E4SD5, E4SD6, E4SE2DL, E4SF0MS, E4SF0MSD, E4SF4DL, E4SF7, E4SG2, E4SG4DL, E4SG7
Heptachlor	E4SG1DL, E4SG3, E4SG4DL
Endosulfan I	E4SD4, E4SG1DL

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Heptachlor epoxide	E4SD4, E4SE2DL, E4SF2, E4SF3, E4SF5DL, E4SF6, E4SG0, E4SG1, E4SG1DL, E4SG4, E4SG4DL
beta-BHC	E4SF3, E4SF4, E4SG1, E4SG4
Endosulfan II	E4SF4, E4SF5
4,4'-DDT	E4SD4, E4SF2, E4SF3, E4SF5, E4SG0, E4SG1DL, E4SG4, E4SG4DL

gamma-Chlordane	E4SF5, E4SG1, E4SG4
Endrin ketone	E4SF5
Gamma-BHC (Lindane)	E4SE2DL, E4SF3, E4SF4, E4SF4DL, E4SF5, E4SF5DL, E4SG0, E4SG1, E4SG4
Endrin	E4SG1
Methoxychlor	E4SE2, E4SF4, E4SF5
4,4'-DDD	E4SF0
4,4'-DDE	E4SG1DL, E4SG2
Endrin aldehyde	E4SE2, E4SF3, E4SF6, E4SG0, E4SG1, E4SG4
Heptachlor	E4SF4, E4SF4DL, E4SF6, E4SG1, E4SG4
Endosulfan I	E4SF5, E4SF5DL

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples had reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The result from the diluted sample should be used for result validation.

E4SD5	4,4’-DDT
E4SE2	4,4’-DDT, gamma-chlordane
E4SF4, ES4F5	Heptachlor, 4,4’-DDE, 4,4’-DDD
E4SG1, E4SG4	4,4’-DDD

The following pesticide samples had reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. However, the analyte was undetected in the diluted reanalysis and flagged “U” by the laboratory. The dilution factor should have been less than 10 for this analyte; however, the other analyte in this sample with an “E” flag was diluted within the calibration range.

E4SE2	gamma-Chlordane

For gamma-chlordane, the result from the original analysis, E4SE2, should be used.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

A high surrogate recovery, greater than 200%, was obtained on only one column for samples E4SD4, E4SF0, E4SF0MSD, and E4SG4. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SD4, E4SF0, E4SF0MSD, E4SG4, the "J" flags applied during the automated check process have been removed for detected compounds.

A high surrogate recovery, which exceed 150% but are less than or equal to 200%, was obtained on only one column for samples E4SF0, E4SF0MS and E4SF2. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SF0, E4SF0MS and E4SF2, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor samples E4SE2, E4SF4, E4SF5, E4SG2, with dilution factors greater than 5 had surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

Aroclor samples E4SG1 and E4SG4DL, with dilution factors greater than five, had high surrogate recoveries, greater than 200%, on only one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For samples E4SG1 and E4SG4DL, detected and non-detected compounds are not qualified.

Aroclor samples E4SE2, E4SF4, E4SF5, E4SG0, with dilution factors greater than 5 had surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected and nondetected compounds are not qualified.

Aroclor sample E4SF3, with a dilution factor greater than five had a high surrogate recovery, which exceed 150% but was less than or equal to 200% on only one column. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the

surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. For sample E4SF3, detected and non-detected compounds are not qualified.

Aroclor sample E4SD5, with a dilution factor less than or equal to 5 had surrogate percent recoveries which exceed 150% but are less than or equal to 200%, and a surrogate recovery greater than 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SF0, the Aroclor MS and/or MSD samples have percent recoveries that are greater than the upper acceptance limit for Aroclor 1016 and less than the lower acceptance limit for Aroclor 1260 on the RTXCLP2 column. However, since the results of Aroclor 1016 and 1260 were reported from the RTXCLP column for all samples in this SDG, the data are not qualified. For samples E4SF0, E4SF0MS and E4SF90MSD, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor 1016 and 1260

On the other column, RTX-CLP, the relative percent difference (RPD) between the MS and MSD, recalculated using concentrations instead of recoveries in the RPD calculation, is within the acceptance limits for both Aroclor 1016 and 1260. For samples E4SF0, E4SF0MS and E4SF90MSD, the "J" flags applied during the automated check process have been removed for the following compounds.

Aroclor 1016 and 1260

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC1/E4SC2 and E4SE1DL/E4SE2 and E4SG1/E4SG4DL were identified as field duplicates. Results are summarized in the following Tables. Note that results are not qualified based upon the results of the field duplicates. No field blank was collected for this SDG.

E4SC1 and E4SC2

Aroclor compound	E4SC1 µg/kg	DF	E4SC2 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	4.4	1	ND	1	
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	ND	1	ND	1	
Aroclor-1262	ND	1	ND	1	

E4SE1DL and E4SE2

Aroclor compound	E4SE1DL µg/kg	DF	E4SE2 µg/kg	DF	%RPD
Aroclor-1016	ND	1000	ND	100	
Aroclor-1221	ND	1000	ND	100	
Aroclor-1232	ND	1000	ND	100	
Aroclor-1242	ND	1000	ND	100	
Aroclor-1248	7100	1000	2200	100	110
Aroclor-1254	ND	1000	ND	100	
Aroclor-1260	ND	1000	ND	100	
Aroclor-1262	ND	1000	ND	100	

E4SG1 and E4SG4DL

Aroclor compound	E4SG1 µg/kg	DF	E4SG4DL µg/kg	DF	%RPD
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	130	10	190	10	38
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	

RPD values could not be calculated where one or both of the values were zero. For field duplicates E4SC1 and E4SC2, no RPD values were calculated. For field duplicates E4SE1 and E4SE2DL, Aroclor-1248 had an RPD value above 50%. For field duplicates E4SG1 and E4SG4 the RPD value calculated for Aroclor-1248 was below 50%.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4SF0MS
Aroclor-1248	E4SD6, E4SF3, E4SF7, E4SF8, E4SG7

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1016	E4SF0MS

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1260	E4SD4, E4SF0
Aroclor-1016	E4SF0MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following sample reported concentration that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SG4	Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Subject: **Revised Narrative Report**
Review of Data
Received for Review on: April 13, 2010

From: Julie Rest
Environmental Chemist, CSC

To: Data User: GLNPO

This data review narrative supersedes the narrative sent to you on June 24, 2010 for the review of data in SDG E4SC4. The changes made to the narrative include clarifications added to the Pesticide Additional Information section. These appear in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarifications. No sample results or review qualifiers have been changed based on these corrections.

We have reviewed the data for the following case:

Site Name: Lincoln Park (WI)

Case Number: 39494 MRN: 1888.0, 1887.0, and 1886.0 SDG Number: E4SC4

Number and Type of Samples: 12 Sediment Samples

Sample Numbers: E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2 – E4SD4, E4SE6, E4SE9, E4SF1

Laboratory: ALS Laboratories (DATAC)

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill

Judy Schofield, CSC

SDG Summary

Sample Receipt: Twelve (12) sediment samples labeled E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2 – E4SD4, E4SE6, E4SE9, and E4SF1 were shipped to ALS Laboratory Group (DataChem), in Salt Lake City, Utah. All were collected on 3/4/2010 and were received on 3/6/2010. Samples exceeded the proper shipping temperature range of 2 - 6 ºC and were received at the facility at 7 ºC. No data have been qualified based on receipt temperature.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 and Modification Reference Numbers 1886.0, 1887.0, and 1888.0, with the following exception. Both ultrasonic and PFE extraction were pre-approved by EPA as modifications to the MA(s). The laboratory chose to use ultrasonic extraction. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. The laboratory revised the EDD and many of the associated Form 1s, and resubmitted them to SMO. This review was based on the revised EDD, the original hard copy data package, the original data summary forms, and any revised Form 1s. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

Several inconsistencies have been noted between the hardcopy data, the B-file spreadsheet, and the Z-file superset EDD in some samples with compounds reported as nondetects (U values). In most instances, the "result value" in the B-file and the Z-file appear to be correct, while the Form 1 and Z-file "quantitation limit" are incorrect. Although the differences appear to be small (e.g., 110 vs. 120), the cause of this anomaly has not been determined. The values in the Superset EDD have not been changed.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

As designated by the samplers, Sample E4SD2 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SC5and E4SC6 as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES (PAH)

1. HOLDING TIME

For semivolatile sample E4SF1, the fourteen-day extraction holding time was exceeded by five days, due to poor deuterated monitoring compound (DMC) recoveries in the original analysis. All detected compounds are flagged "J". Nondetected compounds are flagged "UJ".

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening CCV percent difference (%D) outside criteria for fluoranthene. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC5 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD2MS, E4SD2MSD, E4SD3, E4SE4, E4SE6, E4SE9

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4SC5 and E4SC6

Semivolatile compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
Acenaphthene	160	1	ND	1	
Fluorene	260	1	ND	1	

Semivolatile compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Phenanthrene	2100	1	500	1	120
Anthracene	690	1	90	1	150
Fluoranthene	3600	1	1600	1	77
Pyrene	3000	1	1300	1	79
Benzo(a)anthracene	1800	1	740	1	84
Chrysene	1400	1	790	1	56
Benzo(b)fluoranthene	2200	1	1200	1	59
Benzo(k)fluoranthene	650	1	440	1	39
Benzo(a)pyrene	1700	1	830	1	69
Indeno(1,2,3-cd)pyrene	950	1	550	1	53
Dibenzo(a,h)anthracene	200	1	120	1	50
Benzo(g,h,i)perylene	730	1	440	1	50

For field duplicates E4SC5 and E4SC6, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of benzo(k)fluoranthene, the RPD values were 50% or greater.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Anthracene	E4SC6, E4SC7
Pyrene	E4SF1
Benzo(g,h,i)perylene	E4SC4, E4SD2, E4SE9
Indeno(1,2,3-cd)pyrene	E4SE9
Benzo(b)fluoranthene	E4SD2, E4SD2MS, E4SD2MSD, E4SF1
Fluoranthene	E4SD2MS, E4SD2MSD, E4SF1
Benzo(k)fluoranthene	E4SC4, E4SE9
Chrysene	E4SD2, E4SE9

Benzo(a)pyrene	E4SD2, E4SD2MS, E4SE9
Dibenzo (a,h) anthracene	E4SC5DL, E4SC6, E4SC7, E4SD0, E4SE6DL
Benzo (a) anthracene	E4SD2, E4SE9
Acenaphthene	E4SC5, E4SC5DL, E4SC7, E4SD0
Phenanthrene	E4SC4, E4SE9, E4SF1
Fluorene	E4SC5DL, E4SD0
Naphthalene	E4SE6
2-Methylnaphthalene	E4SE6

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SC5 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene and Pyrene; and sample E4SE6 reported concentrations that exceeded the calibrated range of the instrument for Benzo(b)fluoranthene, Fluoranthene, Phenanthrene and Pyrene. These results were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted samples E4SC5 and E4SE6 should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

For semivolatile-SIM sample E4SF1, the fourteen-day extraction holding time was exceeded by five days, due to poor deuterated monitoring compound (DMC) recoveries in the original analysis. All detected compounds are flagged "J". Nondetected compounds are flagged "UJ".

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pyrene was not recovered in the MSD prepared for sample E4SD2 and was recovered below criteria in the MS. All sample results for Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SC5 and E4SC6 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4SC5 and E4SC6

Semivolatile-SIM compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	100	10	22	10	130
Fluorene	140	10	22	10	150
Phenanthrene	1200	10	290	10	120
Anthracene	400	10	62	10	150
Fluoranthene	2200	10	900	10	84

Semivolatile-SIM compounds	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Pyrene	1700	10	780	10	74
Benzo(a)anthracene	1100	10	470	10	80
Chrysene	960	10	480	10	67
Benzo(b)fluoranthene	1500	10	710	10	72
Benzo(k)fluoranthene	420	10	200	10	71
Benzo(a)pyrene	1100	10	500	10	75
Indeno(1,2,3-cd)pyrene	820	10	410	10	67
Dibenzo(a,h)anthracene	160	10	78	10	69
Benzo(g,h,i)perylene	640	10	340	10	61

For field duplicates E4SC5 and E4SC6, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all compounds had RPD values above 50%.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The original analysis for samples E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SE4, E4SE6, E4SE9, and E4SF1 was performed using a 10-fold dilution.

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SC4, E4SD2, E4SE4, E4SE9, E4SF1
Benzo(g,h,i)perylene	E4SD2MS, E4SD2MSD
Indeno(1,2,3-cd)pyrene	E4SD2MS, E4SD2MSD, E4SD3
Benzo(k)fluoranthene	E4SD2, E4SD2MS, E4SD2MSD, E4SD3, E4SE9, E4SF1
Acenaphthylene	E4SC7, E4SD0, E4SE6
Chrysene	E4SD2MS, E4SD2MSD, E4SF1
Benzo(a)pyrene	E4SD2MS, E4SD2MSD, E4SD3
Dibenzo(a,h)anthracene	E4SC4, E4SD2, E4SE9, E4SF1
Benzo(a)anthracene	E4SD2MS, E4SD2MSD, E4SD3, E4SF1

Acenaphthene	E4SC6, E4SC9, E4SD2MS
Phenanthrene	E4SD2MS, E4SD2MSD, E4SD3
Fluorene	E4SC6, E4SC7, E4SC9, E4SE4

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J".

Acenaphthene	E4SE6
Anthracene	E4SC5, E4SC6
Benzo(a)anthracene	E4SC5 – E4SC7, E4SD0, E4SE6
Benzo(a)pyrene	E4SC5 – E4SC7, E4SD0, E4SE6
Benzo(b)fluoranthene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6
Benzo(g,h,i)perylene	E4SC5, E4SC7, E4SD0, E4SE6
Benzo(k)fluoranthene	E4SC5, E4SE6
Chrysene	E4SC5 – E4SC7, E4SD0, E4SE6
Fluoranthene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6
Fluorene	E4SE6
Indeno(1,2,3-cd)pyrene	E4SC5 – E4SC7, E4SD0, E4SE6
Phenanthrene	E4SC5, E4SD0, E4SE6
Pyrene	E4SC5 – E4SC7, E4SC9, E4SD0, E4SE4, E4SE6

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

The following pesticide samples are associated with a continuing PEM in which the percent difference between the nominal and calculated amounts for a surrogate compound is outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SD2MS, E4SD2MSD, E4SD3, E4SE4, E4SE6, E4SE6DL, E4SE9, E4SF1

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the surrogate compound Decachlorobiphenyl. All target pesticide compounds are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD3, E4SE4, E4SE6, E4SE9, E4SF1

The following pesticide samples are associated with a CCV with % Difference that exceeded criteria for the target compounds Endosulfan sulfate, Endosulfan II, 4,4'-DDT, Endrin ketone, Endrin, Methoxychlor, 4,4'-DDD, 4,4'-DDE, and Endrin aldehyde. All samples are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SC4 – E4SC7, E4SC9, E4SD0, E4SD2, E4SD3, E4SE4, E4SE6, E4SE9, E4SF1

4. BLANKS

The following pesticide samples have analyte concentrations reported less than the CRQL. The associated method blank concentration is less than the concentration criteria. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Endosulfan II	E4SC5, E4SC5DL, E4SC7, E4SC9, E4SD0, E4SE6DL
4,4'-DDT	E4SD3
Methoxychlor	E4SC4, E4SC5DL, E4SC9, E4SD2, E4SD2MS, E4SD2MSD, E4SE6DL

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns. No sample results were qualified based on surrogate recovery.

However, a surrogate recovery between 150 – 200 % was obtained on only one column for samples E4SC6, E4SD0, E4SE6, and E4SF1. The high recovery likely indicates a coelution or matrix interference

on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

Diluted pesticide sample E4SE6DL, with a dilution factor greater than 5 had a surrogate percent recovery greater than 200%, and a surrogate percent recovery that was less than 10%. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Pesticide MSD sample E4SD2 had a percent recovery greater than the upper acceptance limit on RTX-CLP2 column for gamma-BHC and Heptachlor, and the MS had a percent recovery greater than the acceptance limit for Heptachlor. Also, the relative percent difference (RPD) between the MS and MSD exceeded criteria for Aldrin on the RTX-CLP2 column and for gamma-BHC on the RTX-CLP column. All samples are affected. Detected results for gamma-BHC are qualified "J" in all samples. Detected results for Heptachlor and Aldrin are qualified "J" in samples reported from the RTX-CLP column. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

Results for Endosulfan I, 4,4'-DDE, Endosulfan II, Endrin, and 4,4'-DDD, were rejected in one or both samples in this field duplicate pair for reasons detailed later in this review. Therefore, those values were not used to calculate RPDs

E4SC5 and E4SC6

Pesticide compound	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	4.9	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	1.5	1		1	
Dieldrin	ND	1	3.1	1	
4,4'-DDE		1		1	
Endrin		1		1	
Endosulfan II	0.36	1		1	
4,4'-DDD		1		1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	9.8	1	3.7	1	90

Pesticide compound	E4SC5 µg/kg	DF	E4SC6 µg/kg	DF	%RPD
Methoxychlor	3.9	1	3.5	1	11
Endrin ketone	0.36	1	ND	1	
Endrin aldehyde	2.1	1	3.1	1	39
alpha-Chlordane		1	0.4	1	
gamma-Chlordane	6.2	1	3.6	1	53
Toxaphene	ND	1	ND	1	

For field duplicate samples E4SC5and E4SC6, where calculated, RPD values were less than 50 %, with the exception of 4,4'-DDT and gamma chlordane.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDT	E4SC6, E4SD2MSD, E4SE9
alpha-chlordane	E4SC6, E4SC7, E4SC9, E4SE6
gamma-chlordane	E4SC4, E4SD0, E4SE6, E4SF1
gamma-BHC(Lindane)	E4SC5DL
Dieldrin	E4SD2MS, E4SD2MSD
Methoxychlor	E4SE9
4,4'-DDD	E4SC7, E4SD2
4,4'-DDE	E4SD2MSD, E4SF1, PLCSS1
Endrin aldehyde	E4SC7
Heptachlor	E4SD2MS

The following pesticide samples have percent differences between the results on the two GC columns in the range of 51-100%. Detected compounds are qualified "NJ".

Aldrin	E4SD2MSD

4,4'-DDT	E4SC4, E4SE4, E4SF1
gamma-Chlordane	E4SC5, E4SC7, E4SD2MS
gamma-BHC(Lindane)	E4SD2MS
Endrin	E4SE6
Methoxychlor	E4SC5, E4SC6, E4SC7, E4SD0, E4SE6, E4SF1
4,4'-DDD	E4SD0, E4SD2MS, E4SD2MSD, E4SE6, E4SE6DL
4,4'-DDE	E4SC7, E4SC9, E4SD2MS, E4SE4, E4SE9
Endrin aldehyde	E4SC5, E4SC6
Heptachlor	E4SD2MSD
Endosulfan I	E4SC5, E4SC5DL
Heptachlor epoxide	E4SF1

The following pesticide samples have percent differences between the results on the two GC columns exceeding 50% and the results are below CRQL. Detected compounds are qualified “U” and elevated to the CRQL. Nondetected compounds are not qualified.

Heptachlor epoxide	E4SD2, E4SD3, E4SE9
Endosulfan sulfate	E4SE9
alpha-BHC	E4SC9
beta-BHC	E4SD3
Endosulfan II	E4SC5, E4SC5DL, E4SC7, E4SC9, E4SD0, E4SE6DL
4,4'-DDT	E4SD3
alpha-Chlordane	E4SD2, E4SD2MS, E4SD2MSD, E4SE9, E4SF1
Endrin ketone	E4SC5, E4SC7, E4SC9, E4SD0, E4SE6, E4SE9
Dieldrin	E4SE9
Endrin	E4SC5DL, E4SC7, E4SC9, E4SD0, E4SD2, E4SE6DL, E4SF1
Methoxychlor	E4SC4, E4SC5DL, E4SC9, E4SD2, E4SD2MSD, E4SE6DL
Endrin aldehyde	E4SD0, E4SD2MS, E4SD2MSD, E4SE6DL, E4SE9
Heptachlor	E4SF1

Endosulfan I	E4SC4, E4SD0, E4SD2, E4SD2MS, E4SD2MSD

The following pesticide samples have percent differences between the results on the two GC columns exceeding 100%. Detected compounds are qualified "R".

Heptachlor epoxide	E4SC4, E4SC9, E4SD2MS, E4SD2MSD, E4SE6DL
alpha-BHC	E4SE4
beta-BHC	E4SC9, E4SE4
Endosulfan II	E4SC6, E4SE6
4,4'-DDT	E4SC9, E4SD2
alpha-Chlordane	E4SC5
Gamma-BHC(Lindane)	E4SE6DL
Endrin	E4SC5, E4SC6, E4SE4
Methoxychlor	E4SE4
4,4'-DDD	E4SC4, E4SC5, E4SC6, E4SC9, E4SF1
4,4'-DDE	E4SC4, E4SC5, E4SC6, E4SE6, E4SE6DL
Endrin aldehyde	E4SC5DL
Heptachlor	E4SC4
Endosulfan I	E4SC6

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where provided, the results from the diluted samples should be used for result validation.

4,4'-DDT	E4SC5, E4SE6
4,4'-DDD	E4SE6
gamma-BHC (Lindane)	**E4SC5**

Pesticide sample E4SE6 had an R-flagged result for 4,4'-DDE in both the neat analysis and the dilution. Consequently, no result is available for 4,4'-DDE for this sample. The "reportable result" in the EDD remains the result reported from the neat analysis.

The results for gamma-Chlordane in Pesticide samples E4SC5 and E4SE6 exceeded the calibration range in the neat analysis and were reported as non-detects in the dilutions. The qualified results from the neat analyses should be used for result validation.

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All samples in this SDG had acceptable surrogate recoveries on one or both columns, with the exception of the original analysis of samples E4SC5, E4SC6 and E4SE6, which have ten-fold dilutions; and diluted samples E4SC5DL – E4SC7DL, and E4SE6DL, which have 100-fold dilutions. None of the samples are qualified based on surrogate recovery.

However, a ten-fold dilution was used for the original analysis of Aroclor samples E4SC5, E4SC6, and E4SE6. Due to the dilution, detected and nondetected results are not qualified.

Aroclor samples E4SC5DL – E4SC7DL, E4SE4DL, and E4SE6DL with 100-fold dilutions have multiple surrogate failures. Detected and nondetected compounds are not qualified.

A surrogate recovery between 150 – 200 % was obtained on only one column for sample E4SE4. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4SD2, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260. All samples are affected. Detected results are qualified “J”. Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SC5 and E4SC6 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SC5 and E4SC6

Aroclor compounds	**E4SC5 µg/kg**	**DF**	**E4SC6 µg/kg**	**DF**	**%RPD**
Aroclor-1016	ND	10	ND	10	
Aroclor-1221	ND	10	ND	10	
Aroclor-1232	ND	10	ND	10	
Aroclor-1242	ND	10	ND	10	
Aroclor-1248	890	10	1400	10	44
Aroclor-1254	ND	10	ND	10	
Aroclor-1260	ND	10	ND	10	
Aroclor-1262	ND	10	ND	10	
Aroclor-1268	ND	10	ND	10	

E4SC5DL and E4SC6DL

Aroclor compounds	**E4SC5DL µg/kg**	**DF**	**E4SC6DL µg/kg**	**DF**	**%RPD**
Aroclor-1016	ND	100	ND	100	
Aroclor-1221	ND	100	ND	100	
Aroclor-1232	ND	100	ND	100	
Aroclor-1242	ND	100	ND	100	
Aroclor-1248	290	100	240	100	19
Aroclor-1254	ND	100	ND	100	
Aroclor-1260	ND	100	ND	100	
Aroclor-1262	ND	100	ND	100	
Aroclor-1268	ND	100	ND	100	

For the neat and diluted analysis of field duplicate samples E4SC5 and E4SC6, RPD values were not calculated when both values were nondetects. The RPD for Aroclor-1248 was below 50%.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4SD2MS, E4SD2MSD, E4SE4, E4SE4DL

Aroclor-1016 E4SD2MS, E4SD2MSD, E4SE4, E4SE4DL

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1248 E4SC4

The following Aroclor samples had percent differences between analyte results exceeding 100% for Aroclor-1260. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1260 E4SE4, E4SE9, E4SF1

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used.

E4SC5 – E4SC7, E4SE6	Aroclor-1248
E4SE4	Aroclor-1016

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park (WI)

Case Number: 39668 MRN: none

SDG Number: E4SG8

Number and Type of Samples: Twenty (20) sediment samples

Sample Numbers: E4SG8, E4SG9, E4SH0-E4SH3, E4SK0-E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

Laboratory: KAP Technologies, Inc.

Judy Schofield, CSC

SDG Summary

Introduction: Three coolers containing twenty (20) sediment samples, labeled E4SG8, E4SG9, E4SH0-E4SH3, E4SK0-E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2 and E4SM4 were shipped to KAP Technologies, Inc. located in The Woodlands, Texas. The samples were collected on 04/14/2010 and 04/15/2010 and were received at the laboratory on 04/15/2010 and 04/16/2010 intact at 4.1, 2.6, and 3.3 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The Form 1 for semivolatile SIM analysis of sample E4SK9DL (page 1547) is missing from the data package. The quantitation report, chromatogram and spectral information were provided. The results for this sample are reported in both the spreadsheet and superset EDD.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Sample E4SG9 and E4SH0 are field duplicates. There are no field blanks associated with this SDG. No sample was designated for laboratory QC, i.e. MS/MSD. Sample E4SK9 was selected as the laboratory QC sample.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Sample E4SK9DL is associated with an initial calibration percent relative standard deviation (%RSD) for Pentachlorophenol outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

The following semivolatile samples are associated with a % difference between the continuing calibration response factor and the initial calibration that exceeds criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ. The relative response factor (RRF) for 4- Methyl phenol was greater in the continuing calibration than in the initial calibration, therefore the automated UJ flag affixed for nondetected 4-Methylphenol was overridden because the compound would have been detected if present.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1, E4SK1DL, E4SK1RE, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SMS

2,4-Dimethylphenol	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3
4-Methylphenol	E4SH3DL, E4SK1DL, E4SK1RE
4-Chloro-3-methylphenol	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3
Pentachlorophenol	E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
2-Methylnaphthalene	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1, E4SK1DL, E4SK1RE, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Nitrobenzene-d_5 E4SK1, E4SK1RE
Affected compounds: 2,4-Dinitrotoluene, 2,6-Dinitrotoluene, Acetophenone, Hexachloroethane, N-Nitroso-di-n-propylamine, N-Nitrosodiphenylamine, Nitrobenzene

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene-d_{10} E4SG8, E4SH3, E4SK0, E4SK5, E4SK9, E4SM2, E4SM4
Affected compounds: Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene

Dimethylphthalate-d_6 E4SK1
Affected compounds: 1,1'-Biphenyl, bis(2-Ethylhexyl)phthalate, Butylbenzylphthalate, Caprolactam, Di-n-butylphthalate, Di-n-octylphthalate, Diethylphthalate, Dimethylphthalate

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The percent recovery of 4-Nitrophenol exceeded the upper criterion in sample E4SK9MSD. Detected and nondetected compounds are not qualified.

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified. The automated NFG report mistakenly reported N-Nitroso-di-n-propylamine as an outlier when it was within limits. The J flag was removed for this compound.

E4SK9, E4SK9MS, E4SK9MSD Pyrene, Acenaphthene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Benzaldehyde	ND	ND	
Phenol	ND	ND	
bis(2-chloroethyl)ether	ND	ND	
2-Chlorophenol	ND	ND	
2-Methylphenol	ND	ND	
2,2'-Oxybis(1-chloropropane)	ND	ND	
Acetophenone	ND	ND	
4-Methylphenol	ND	ND	
N-Nitroso-di-n-propylamine	ND	ND	

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Hexachloroethane	ND	ND	
Nitrobenzene	ND	ND	
Isophorone	ND	ND	
2-Nitrophenol	ND	ND	
Bis(2-chloroethoxy)methane	ND	ND	
2,4-Dichlorophenol	ND	ND	
Naphthalene	ND	ND	
4-Chloroaniline	ND	ND	
2,4-Dimethylphenol	ND	ND	
Hexachlorobutadiene	ND	ND	
Caprolactam	ND	ND	
4-Chloro-3-methylphenol	ND	ND	
2-Methylnaphthalene	ND	ND	
Hexachlorocyclopentadiene	ND	ND	
2,4,6-Trichlorophenol	ND	ND	
2,4,5-Trichlorophenol	ND	ND	
1,1'-Biphenyl	ND	ND	
2-Chloronaphthalene	ND	ND	
2-Nitroaniline	ND	ND	
Dimethylphthalate	ND	ND	
2,6-Dinitrotoluene	ND	ND	
Acenaphthylene	ND	ND	
3-Nitroaniline	ND	ND	
Acenaphthene	ND	ND	
2,4-Dinitrophenol	ND	ND	
4-Nitrophenol	ND	ND	
Dibenzofuran	ND	ND	
2,4-Dinitrotoluene	ND	ND	
Diethylphthalate	ND	ND	
Fluorene	ND	ND	
4-Chlorophenyl-phenylether	ND	ND	
4-Nitroaniline	ND	ND	
4,6-Dinitro-2-methylphenol	ND	ND	
N-Nitrosodiphenylamine	ND	ND	
1,2,4,5-Tetrachlorobenzene	ND	ND	
4-Bromophenyl-phenylether	ND	ND	
Hexachlorobenzene	ND	ND	
Atrazine	ND	ND	
Pentachlorophenol	ND	ND	
Phenanthrene	150	280	60.5
Anthracene	ND	ND	
Carbazole	ND	ND	
Di-n-butylphthalate	140	190	30.3

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Fluoranthene	350	600	52.6
Pyrene	230	360	44.1
Butylbenzylphthalate	ND	ND	
3,3'-Dichlorobenzidine	ND	ND	
Benzo(a)anthracene	150	200	28.6
Chrysene	190	250	27.3
Bis(2-ethylhexyl)phthalate	ND	ND	
Di-n-octylphthalate	ND	ND	
Benzo(b)fluoranthene	130	270	70
Benzo(k)fluoranthene	150	210	33.3
Benzo(a)pyrene	150	210	33.3
Indeno(1,2,3-cd)pyrene	110	170	42.9
Dibenzo(a,h)anthracene	ND	ND	
Benzo(g,h,i)perylene	140	190	30.3
2,3,4,6-Tetrachlorophenol	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, were less than 50 percent, with the exceptions of Phenanthrene and Fluoranthene, the RPD values.

7. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Perylene-d_{12} E4SK1, E4SK1RE
Affected compounds: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SK1, E4SK1RE
Affected compounds: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ehtykhexyl)phthalate, Chrysene

8. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

9. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3DL, E4SK0, E4SK1DL, E4SK2, E4SK5, E4SK6, E4SK8, E4SK9, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8

4-Methylphenol E4SH1
bis (2-Ethylhexyl) phthalate E4SK8, E4SK9, E4SK9MS, E4SK9MSD

Anthracene	E4SK0, E4SK5, E4SK9DL
Pyrene	E4SH1, E4SL6, E4SL8
Dibenzofuran	E4SH3DL, E4SK1DL
Benzo(g,h,i)perylene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK6, E4SL6, E4SL8
Indeno(1,2,3-cd)pyrene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK6, E4SL6, E4SL8
Benzo(b)fluoranthene	E4SG8, E4SG9, E4SH2, E4SK1DL, E4SL6, E4SL8
Fluoranthene	E4SH1
Benzo(k)fluoranthene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK1DL, E4SL6, E4SL8
Acenaphthylene	E4SH3
Chrysene	E4SG9, E4SH2, E4SL6, E4SL8
Benzo(a)pyrene	E4SG8, E4SG9, E4SH0, E4SH2, E4SK1DL, E4SL6, E4SL8
Dibenzo(a,h)anthracene	E4SH3DL, E4SK5, E4SK8, E4SK9DL, E4SL5
Benzo(a)anthracene	E4SG9, E4SH0, E4SH2, E4SL6, E4SL8
Acenaphthene	E4SH3DL, E4SK0, E4SK9DL
Di-n-butylphthalate	E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SK0, E4SK2
Phenanthrene	E4SG8, E4SG9, E4SH2, E4SK6, E4SL6, E4SL8
Fluorene	E4SH3DL, E4SK0, E4SK9DL
9H-Carbazole	E4SK9DL
Naphthalene	E4SK0
2-Methylnaphthalene	E4SK9
1,1'-Biphenyl	E4SH3, E4SK9MS

10. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

11. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SH3	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1	Naphthalene, 2-Methylnaphthalene, 1,1’-Biphenyl, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1RE	Naphthalene, 2-Methylnaphthalene, 1,1’-Biphenyl, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene
E4SK9	Phenanthrene, Fluoranthene, Pyrene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(g,h,i)perylene

E4SG8DL, E4SG9DL, E4SH0DL, E4SH1DL, E4SH2DL, E4SH3DL, E4SK0DL, E4SK1DL, E4SK4DL, E4SK5DL, E4SK6DL, E4SK8DL, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5DL, E4SL6DL, E4SL8DL, E4SM2DL, E4SM4DL

Pentachlorophenol

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with an initial calibration with average relative response factors (mean RRFs) below the minimum required RRF for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with a % difference between the continuing calibration response factor and the initial calibration that exceeds criteria. The relative response factor (RRF) for Dibenzo(a,h)anthracene was greater in the continuing calibration than in the initial calibration, therefore the automated UJ flag affixed for nondetected Dibenzo(a,h)anthracene was overridden as the compound would have been detected if present.

E4SH3DL, E4SH3RE, E4SH3RX, E4SK0, E4SK0DL, E4SK1, E4SK1DL, E4SK4, E4SK4DL, E4SK5, E4SK5DL, E4SK6, E4SK6DL, E4SK8, E4SK8DL, E4SK9, E4SK9DL, E4SK9MS, E4SK9MSD, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4, E4SM4DL, SBLK21

Benzo(g,h,i)perylene	E4SH3DL, E4SK0DL, E4SK1DL, E4SK4DL, E4SK6DL, E4SK8DL, E4SK9DL
Benzo(b)fluoranthene	E4SK5DL, E4SK9MS, E4SK9MSD, E4SM4DL

Benzo(k)fluoranthene	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
Dibenzo(a,h)anthracene	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4
Pentachlorophenol	E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) below the minimum required RRF for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SG8, E4SG9, E4SH0, E4SH1, E4SH2, E4SH3, E4SH3RE, E4SH3RX, E4SK0, E4SK1, E4SK2, E4SK3, E4SK4, E4SK5, E4SK6, E4SK8, E4SK9, E4SL5, E4SL6, E4SL8, E4SM2, E4SM4

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Fluoranthene-d_{10} E4SH3, E4SH3RE, E4SH3RX
Affected compounds: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

The following diluted semivolatile samples with dilution factors greater than 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

2-Methylnaphthalene-d_{10} E4SM2DL
Affected compounds: 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Anthracene, Fluorene, Naphthalene, Pentachlorophenol, Phenanthrene

Fluoranthene-d_{10} E4SH3DL, E4SK1DL, E4SM2DL
Affected compounds: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The semivolatile-SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit for all three spiked compounds. Detected compounds are qualified J. Nondetected compounds are not qualified. Because the spiking level was inappropriately low in comparison to the native levels of Acenaphthene and Pyrene present in the samples, no other samples were qualified based on the MS/MSD failure.

E4SK9, E4SK9MS, E4SK9MSD Acenaphthene, Pentachlorophenol, Pyrene

The relative percent difference (RPD) between the following semivolatile-SIM matrix spike and matrix spike duplicate recoveries is outside criteria for all three spiked compounds. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SK9, E4SK9MS, E4SK9MSD Acenaphthene, Pentachlorophenol, Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatile SIM.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following tables, original analyses and diluted analyses. Results for Pentachlorophenol were rejected in one or both samples in this field duplicate pair for reasons detailed elsewhere in this review. Therefore, those values were not used to calculate RPDs. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Naphthalene	ND	12	
2-Methylnaphthalene	ND	4.3	
Acenaphthylene	4.6	ND	
Acenaphthene	10	29	97.4
Fluorene	12	30	85.7
Phenanthrene	170	320	61.2
Anthracene	39	63	47.1
Fluoranthene	490	720	38
Pyrene	370	560	40.9
Benzo(a)anthracene	220	340	42.9
Chrysene	240	350	37.3
Benzo(b)fluoranthene	120	180	40
Benzo(k)fluoranthene	73	110	40.4
Benzo(a)pyrene	100	160	46.2
Indeno(1,2,3-cd)pyrene	78	110	34
Dibenzo(a,h)anthracene	36	52	36.4
Benzo(g,h,i)perylene	84	120	35.3
Pentachlorophenol			

Semivolatile Analyte	E4SG9DL (ug/kg)	E4SH0DL (ug/kg)	%RPD
Naphthalene	ND	ND	
2-Methylnaphthalene	ND	ND	
Acenaphthylene	ND	ND	

Semivolatile Analyte	E4SG9DL (ug/kg)	E4SH0DL (ug/kg)	%RPD
Acenaphthene	ND	ND	
Fluorene	ND	ND	
Phenanthrene	220	400	58.1
Anthracene	70	100	35.3
Fluoranthene	510	720	34.1
Pyrene	370	550	39.1
Benzo(a)anthracene	170	260	41.9
Chrysene	230	320	32.7
Benzo(b)fluoranthene	130	200	42.4
Benzo(k)fluoranthene	130	190	37.5
Benzo(a)pyrene	130	180	32.3
Indeno(1,2,3-cd)pyrene	83	110	28
Dibenzo(a,h)anthracene	53	49	7.8
Benzo(g,h,i)perylene	96	130	30.1
Pentachlorophenol	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples the RPD values were less than 50 percent, with the exception of Acenaphthene, Fluorene and Phenanthrene in the undiluted analysis and Phenanthrene in the diluted analysis.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SH3, E4SH3RE, E4SH3RX, E4SK1, E4SK3, SBLK19

Acenaphthene-d_{10} E4SH3, E4SK1
Affected compounds: Acenaphthylene, Acenaphthene, Fluorene

Perylene-d_{12} E4SH3, E4SH3RE, E4SH3RX, E4SK3
Affected compounds: Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SH3
Affected compounds: Pyrene, Benzo(a)anthracene, Chrysene

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SH2, E4SK3, E4SK4, E4SL6, E4SM2DL, E4SM4, E4SM4DL

Anthracene	E4SK4
Benzo(b)Fluoranthene	E4SM4DL
Benzo(k)fluoranthene	E4SM4DL
Chrysene	E4SM2DL
Dibenzo(a,h)anthracene	E4SK3
Fluorene	E4SM4
Naphthalene	E4SH2
2-Methylnaphthalene	E4SL6

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SG8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SG9	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SH0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH1	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene
E4SH2	Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH3	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SH3RE	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

E4SH3RX	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK0	Naphthalene, 2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK1	Naphthalene, 2-Methylnaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK4	Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene
E4SK5	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK8	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SK9	Naphthalene, 2-Methylnaphthylene, Acenaphthylene, Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL5	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL6	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL8	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM2	Benzo(b)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Benzo(g,h,i)perylene

E4SM4	Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(a)pyrene

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated. "J". No further dilution analysis was performed. Refer to the full-scan analysis for results within the calibrated range.

E4SG8DL	Fluoranthene
E4SG9DL	Fluoranthene
E4SH0DL	Fluoranthene, Pyrene
E4SH2DL	Fluoranthene
E4SH3DL	Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene
E4SK0DL	Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Phenanthrene, Pyrene,
E4SK1DL	2-Methylnaphthalene, Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Naphthalene, Phenanthrene, Pyrene
E4SK5DL	Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene
E4SK6DL	Fluoranthene
E4SK8DL	Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Phenanthrene, Pyrene
E4SK9DL	Acenaphthene, Anthracene, Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Fluoranthene, Fluorene, Indeno(1,2,3-cd)pyrene, Phenanthrene, Pyrene
E4SL5DL	Fluoranthene, Pyrene
E4SL6 DL	Fluoranthene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Pesticide sample E4SH3 had Tetrachloro-m-xylene surrogate percent recovery on one column equal to the upper limit of 150%. The NFG automated report stated the surrogate as being greater than 150% but less than or equal to 200%. No data was qualified for surrogate recovery.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Pesticide Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
alpha-BHC	ND	ND	
beta-BHC	ND	ND	
delta-BHC	ND	ND	
gamma-BHC (Lindane)	ND	ND	
Heptachlor	ND	ND	
Aldrin	ND	ND	
Heptachlor epoxide	ND	ND	
Endosulfan I	ND	ND	
Dieldrin	ND	ND	

Pesticide Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
4,4'-DDE	ND	ND	
Endrin	ND	ND	
Endosulfan II	ND	ND	
4,4'-DDD	ND	ND	
Endosulfan sulfate	ND	ND	
4,4'-DDT	1.7	0.82	69.8
Methoxychlor	ND	ND	
Endrin ketone	ND	ND	
Endrin aldehyde	ND	ND	
alpha-Chlordane	ND	ND	
gamma-Chlordane	ND	ND	
Toxaphene	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected.

8. INTERNAL STANDARDS

Not applicable for Pesticides.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide sample has percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

alpha-Chlordane E4SL6

11. SYSTEM PERFORMANCE

No problems were found.

12. ADDITIONAL INFORMATION

For reasons that could not be determined, the NFG automated flagging report flagged 4,4-DDE in the following samples U as not detected at the stated concentration. These compounds are present. The NFG flag was overridden in the spreadsheet and superset EDD.

E4SK5, E4SK8

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following Aroclor matrix spike and matrix spike duplicate recoveries is outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SK9, E4SK9MS, E4SK9MSD Aroclor-1016

The following Aroclor matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified J. Nondetected compounds are not qualified. NFG automated flags were overridden for Aroclor-1260 as the spike recovery was equal to, not greater than, the upper limit.

E4SK9, E4SK9MS, E4SK9MSD Aroclor-1260, Aroclor-1016

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SG9 and E4SH0 were identified as field duplicates**.** Results are summarized in the following table. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Aroclor Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	

Aroclor Analyte	E4SG9 (ug/kg)	E4SH0 (ug/kg)	%RPD
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	ND	
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	ND	
Aroclor-1254	ND	ND	
Aroclor-1260	ND	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

For field duplicates, RPDs were not calculated where one or both results were nondetected.

8. INTERNAL STANDARDS

Not Applicable for Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SM4 Aroclor-1248

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

E4SK1, E4SK5, E4SK6, E4SK8, E4SK8DL, E4SK9MS Aroclor-1248

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

E4SK0, E4SL5 Aroclor-1248

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

E4SL5	Aroclor-1254
E4SM4	Aroclor-1248

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

E4SK8, E4SK8DL, E4SK9, E4SK9MS, E4SK9MSD Aroclor-1254

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Sample E4SK8 reported concentration of Aroclor-1248 that exceeded the calibration range of the instrument and was flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: Twenty (20) sediment samples, labeled E4SH4 – E4SH9, E4SJ0 – E4SJ9, and E4SL0 – E4SL3, were shipped to KAP Technologies, Inc., in The Woodlands, Texas. Samples E4SH4 – E4SH9, and E4SJ0 – E4SJ9 were collected on 4/14/2010 and were received on 4/16/2010. Samples E4SL0 – E4SL3 were collected on 4/15/2010 and were received on 4/16/2010. The cooler temperatures on receipt were 4.2 ºC and at 2.9 ºC.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2. Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

No QC sample was designated on the traffic reports for this SDG. Sample E4SH9 was used for laboratory QC, i.e., MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SL2 and E4SL3 as a field duplicate pair.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

2,4-Dimethylphenol	E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ4, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL0RE, E4SL1, E4SL1RE, E4SL2, E4SL3
4-Chloro-3-methylphenol	E4SJ9DL, E4SL0DL, E4SL0RE, E4SL1RE
Pentachlorophenol	E4SH4, E4SH5, E4SH6, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3
2-Methylnaphthalene	E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ4, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL0RE, E4SL1, E4SL1RE, E4SL2, E4SL3

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene	E4SJ8, E4SJ9, E4SL2, E4SJ9DL

The following semivolatile sample has a deuterated monitoring compound recovery for 4-Nitrophenol-d_4 below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

2,4-Dinitrophenol, 2-Nitroaniline, 3-Nitroaniline, 4-Nitroaniline, 4-Nitrophenol	E4SH9

Semivolatile sample E4SJ9DL, with a dilution factor less than or equal to five, had a deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Sample results for Benzo(a)anthracene, Chrysene, Fluoranthene, and Pyrene are affected. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

E4SL2 and E4SL3

Semivolatile compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1	
Bis(2-chloroethyl)ether	ND	1	ND	1	
2-Chlorophenol	ND	1	ND	1	
2-Methylphenol	ND	1	ND	1	
2,2'-Oxybis(1-chloropropane)	ND	1	ND	1	
Acetophenone	ND	1	ND	1	
4-Methylphenol	ND	1	ND	1	
N-Nitroso-di-n-propylamine	ND	1	ND	1	
Hexachloroethane	ND	1	ND	1	
Nitrobenzene	ND	1	ND	1	
Isophorone	ND	1	ND	1	
2-Nitrophenol	ND	1	ND	1	
Bis(2-chloroethoxy)methane	ND	1	ND	1	
2,4-Dichlorophenol	ND	1	ND	1	
Naphthalene	ND	1	ND	1	
4-Chloroaniline	ND	1	ND	1	
2,4-Dimethylphenol	ND	1	ND	1	
Hexachlorobutadiene	ND	1	ND	1	
Caprolactam	ND	1	ND	1	
4-Chloro-3-methylphenol	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Hexachlorocyclopentadiene	ND	1	ND	1	
2,4,6-Trichlorophenol	ND	1	ND	1	
2,4,5-Trichlorophenol	ND	1	ND	1	
1,1'-Biphenyl	ND	1	ND	1	
2-Chloronaphthalene	ND	1	ND	1	
2-Nitroaniline	ND	1	ND	1	
Dimethylphthalate	ND	1	ND	1	

Semivolatile compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
2,6-Dinitrotoluene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
3-Nitroaniline	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
2,4-Dinitrophenol	ND	1	ND	1	
4-Nitrophenol	ND	1	ND	1	
Dibenzofuran	ND	1	ND	1	
2,4-Dinitrotoluene	ND	1	ND	1	
Diethylphthalate	ND	1	ND	1	
Fluorene	ND	1	ND	1	
4-Chlorophenyl-phenylether	ND	1	ND	1	
4-Nitroaniline	ND	1	ND	1	
4,6-Dinitro-2-methylphenol	ND	1	ND	1	
N-Nitrosodiphenylamine	ND	1	ND	1	
1,2,4,5-Tetrachlorobenzene	ND	1	ND	1	
4-Bromophenyl-phenylether	ND	1	ND	1	
Hexachlorobenzene	ND	1	ND	1	
Atrazine	ND	1	ND	1	
Pentachlorophenol	ND	1	ND	1	
Phenanthrene	230	1	190	1	19
Anthracene	ND	1	ND	1	
Carbazole	ND	1	ND	1	
Di-n-butylphthalate	230	1	230	1	0
Fluoranthene	460	1	380	1	19
Pyrene	320	1	270	1	17
Butylbenzylphthalate	ND	1	ND	1	
3,3'-Dichlorobenzidine	ND	1	ND	1	
Benzo(a)anthracene	230	1	170	1	30
Chrysene	250	1	220	1	13
Bis(2-ethylhexyl)phthalate	240	1	97	1	85
Di-n-octylphthalate	ND	1	ND	1	
Benzo(b)fluoranthene	210	1	210	1	0
Benzo(k)fluoranthene	190	1	170	1	11
Benzo(a)pyrene	210	1	200	1	4.9
Indeno(1,2,3-cd)pyrene	140	1	130	1	7.4
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	150	1	150	1	0
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SL2 and E4SL3, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Bis(2-ethylhexyl)phthalate, the RPD values were less than 50 percent.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified J for the affected compounds. Nondetected compounds are not qualified.

Perylene-d_{12} E4SL0, E4SL0RE, E4SL1, E4SL1RE

Affected analytes: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SL0, E4SL1

Affected analytes: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ethylhexyl)phthalate, Chrysene

As described above, the original semivolatile analysis for samples E4SL0 and E4SL1 had internal standard area counts for Chrysene-d_{12} and Perylene-d_{12} that were above the upper criteria limit. The samples were subsequently reanalyzed by the laboratory as samples E4SL0RE and E4SL1RE. For both E4SL0 and E4SL1, the reanalysis had area counts above the upper criteria limit only for Perylene-d_{12}. Since the target compound results compare favorably between the original analysis and the reanalysis for both samples, the results from the reanalyses should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

Target compound Benzo(a)pyrene had a concentration below the MDL for sample E4SJ0. The sample result is qualified "U" and reported at the CRQL.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

Bis(2-Ethylhexyl)phthalate	E4SH6, E4SH6DL, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ9DL, E4SL0DL, E4SL3
Anthracene	E4SH6DL, E4SJ1, E4SJ2, E4SL0DL
Pyrene	E4SH4, E4SH7, E4SH9, E4SJ0
Dibenzofuran	E4SL0, E4SL0RE
Benzo(g,h,i)perylene	E4SH5, E4SH7, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL0DL, E4SL2, E4SL3
Indeno(1,2,3-cd)pyrene	E4SH5, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL0DL, E4SL2, E4SL3

Benzo(b)fluoranthene	E4SH4, E4SH5, E4SH9MS, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SL3
Fluoranthene	E4SH4, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0
Benzo(k)fluoranthene	E4SH5, E4SH7, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SL2, E4SL3
Chrysene	E4SH4, E4SH5, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ3, E4SJ4, E4SJ5
Benzo(a)pyrene	E4SH5, E4SH7, E4SJ3, E4SJ4, E4SJ5, E4SL3
Dibenzo(a,h)anthracene	E4SH6DL, E4SJ1, E4SJ2, E4SJ9DL, E4SL1RE
Benzo(a)anthracene	E4SH5, E4SH7, E4SJ0, E4SJ3, E4SJ4, E4SJ5, E4SL3
Acenaphthene	E4SH6, E4SH6DL
Di-n-butylphthalate	E4SH4, E4SH5, E4SH6DL, E4SH7, E4SH8, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ6, E4SJ7, E4SJ8, E4SJ9, E4SL0, E4SL0RE, E4SL1, E4SL1RE
Phenanthrene	E4SJ0, E4SJ3, E4SJ5, E4SJ8, E4SL3
Fluorene	E4SH6DL, E4SL0DL, E4SL1, E4SL1RE
9H-Carbazole	E4SH6, E4SH6DL

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibrated range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged estimated, “J”. The results from the diluted samples should be used for result validation. Note that for sample E4SL0RE, the results from the dilution of the original analysis should be used for result validation.

Anthracene	E4SJ9
Benzo(a)anthracene	E4SJ9
Phenanthrene	E4SL0, E4SL0RE
Fluoranthene	E4SH6, E4SJ9, E4SL0, E4SL0RE
Chrysene	E4SJ9
Pyrene	E4SJ9

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile-SIM samples are associated with an initial calibration with an average relative response factor (mean RRF) for pentachlorophenol that are below the minimum required RRF. Detected compounds are qualified J. Nondetected compounds are qualified R.

E4SH4, E4SH4DL, E4SH5, E4SH5DL, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH7DL, E4SH8, E4SH8DL, E4SH9, E4SH9DL, E4SJ0, E4SJ0DL, E4SJ1, E4SJ1DL, E4SJ2, E4SJ2DL, E4SJ3, E4SJ3DL, E4SJ4, E4SJ4DL, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ8DL, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL1, E4SL1DL, E4SL2, E4SL2DL, E4SL3, E4SL3DL

The following semivolatile-SIM samples are associated with initial calibration percent relative standard deviations (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(g,h,i)perylene	ESH9MS, E4SH9MSD, E4SJ5DL
Chrysene	E4SH4, E4SH5, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5
Pentachlorophenol	E4SH4, E4SH4DL, E4SH5, E4SH5DL, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH7DL, E4SH8, E4SH8DL, E4SH9, E4SH9DL, E4SJ0, E4SJ0DL, E4SJ1, E4SJ1DL, E4SJ2, E4SJ2DL, E4SJ3, E4SJ3DL, E4SJ4, E4SJ4DL, E4SJ5, E4SJ6, E4SJ7, E4SJ8, E4SJ8DL, E4SJ9, E4SJ9DL, E4SL0, E4SL0DL, E4SL1, E4SL1DL, E4SL2, E4SL2DL, E4SL3, E4SL3DL

The following semivolatile-SIM samples are associated with an opening or closing CCV percent difference (%D) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Pyrene	E4SH4, E4SH6, E4SH8, E4SH9, E4SJ0
Benzo (b) fluoranthene	E4SH5, E4SH6DL, E4SH6RE, E4SH7, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ5DL
Chrysene	E4SH5, E4SH6DL, E4SH6RE, E4SH7, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5

The following semivolatile-SIM samples are associated with a CCV with a relative response factor (RRF50) for pentachlorophenol below the minimum required RRF. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SH4, E4SH5, E4SH6, E4SH6DL, E4SH6RE, E4SH7, E4SH8, E4SH9, E4SJ0, E4SJ1, E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL, E4SL3DL, SBLK11

4. BLANKS

For the semivolatile-SIM method blank, SBLK11, the nondetected Pentachlorophenol result was flagged "R" by the NFG automated check procedure due to RRF failures in the associated initial and continuing calibrations. This method blank is also associated with samples E4SH9MS, E4SH9MSD, and E4SJ5DL which are not affected by calibration failures. Therefore, the nondetect result for pentachlorophenol in SBLK11 has not been removed from the "B" or "Z" files and is flagged "U," in order to preserve the nondetect flag.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Diluted semivolatile-SIM sample E4SJ8DL with dilution factors *greater* than 5 had a deuterated monitoring compound recovery for Fluoranthene-d_{10} above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

Diluted semivolatile-SIM samples E4SL0DL and E4SL1DLwith dilution factors *less* than or equal to 5 had a deuterated monitoring compound recovery for Fluoranthene-d_{10} above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Affected analytes: Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SL2 and E4SL3 are identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates.

E4SL2 and E4SL3

Semivolatile-SIM compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Pentachlorophenol					
Naphthalene	6.4	1	4.3	1	39
2-Methylnaphthalene	4.8	1	ND	1	
Acenaphthylene	16	1	8.1	1	66
Acenaphthene	14	1	17	1	19

Semivolatile-SIM compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Fluorene	26	1	21	1	21
Phenanthrene	220	1	180	1	20
Anthracene	84	1	63	1	28
Fluoranthene	520	1	460	1	12
Pyrene	430	1	390	1	10
Benzo(a)anthracene	340	1	270	1	23
Chrysene	300	1	260	1	14
Benzo(b)fluoranthene	200	1	180	1	11
Benzo(k)fluoranthene	110	1	93	1	17
Benzo(a)pyrene	180	1	160	1	12
Indeno(1,2,3-cd)pyrene	150	1	130	1	14
Dibenzo(a,h)anthracene	79	1	66	1	18
Benzo(g,h,i)perylene	150	1	130	1	14

E4SL2DL and E4SL3DL

Semivolatile-SIM compounds	E4SL2DL µg/kg	DF	E4SL3DL µg/kg	DF	%RPD
Pentachlorophenol					
Naphthalene	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Acenaphthylene	50	1	ND	1	
Acenaphthene	ND	1	ND	1	
Fluorene	37	1	ND	1	
Phenanthrene	260	1	220	1	17
Anthracene	120	1	98	1	20
Fluoranthene	620	1	540	1	14
Pyrene	440	1	350	1	23
Benzo(a)anthracene	560	1	350	1	46
Chrysene	560	1	360	1	44
Benzo(b)fluoranthene	440	1	400	1	9.5
Benzo(k)fluoranthene	340	1	220	1	43
Benzo(a)pyrene	470	1	360	1	27
Indeno(1,2,3-cd)pyrene	400	1	280	1	35
Dibenzo(a,h)anthracene	210	1	150	1	33
Benzo(g,h,i)perylene	420	1	290	1	37

For field duplicates E4SL2 and E4SL3, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all RPD values for all compounds except Acenaphthylene were below 50%.

For reasons noted elsewhere in this narrative, the pentachlorophenol results for E4SL2 and E4SL3 have been rejected and the results removed from the “B” and “Z” files.

8. INTERNAL STANDARDS

The following semivolatile-SIM samples have internal standard area counts that are outside the upper criteria limit. Detected compounds are qualified J. Nondetected compounds are not qualified.

Phenanthrene-d_{10} E4SH6, E4SH6RE

Affected analytes: 4,6-Dinitro-2-methylphenol, N-nitrosodiphenylamine, 4-Bromophenyl-phenylether, Hexachlorobenzene, Atrazine, Pentachlorophenol, Phenanthrene, Anthracene, Carbazole, Di-n-butylphthalate, Fluoranthene

Perylene-d_{12} E4SH6, E4SH6RE, E4SJ9DL

Affected analytes: Di-n-octylphthalate, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

Chrysene-d_{12} E4SH6, E4SH6RE

Affected analytes: Pyrene, Butylbenzylphthalate, 3,3'-Dichlorobenzidine, Benzo(a)anthracene, Bis(2-ethylhexyl)phthalate, Chrysene

As described above, the original semivolatile analysis for sample E4SH6 had internal standard area counts for Phenanthrene-d_{10}, Chrysene-d_{12} and Perylene-d_{12} that were above the upper criteria limit. The sample was reanalyzed by the laboratory as sample E4SH6RE. The reanalysis had the same internal standard failures. The results from the original analysis should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile-SIM samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J". Nondetected compounds are not qualified.

Anthracene	E4SJ0DL
Acenaphthylene	E4SH7, E4SJ3
Fluorene	E4SL2DL
Pentachlorophenol	E4SJ2, E4SJ3DL

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The results from the diluted samples should be used for result validation.

Naphthalene	E4SL0
2-Methylnaphthalene	E4SH6, E4SL0, E4SL1
Acenaphthylene	E4SJ9, E4SL0, E4SL1
Acenaphthene	E4SH6, E4SJ1, E4SJ2, E4SJ9, E4SL0, E4SL1
Fluorene	E4SH6, E4SJ1, E4SJ2, E4SJ9, E4SL0, E4SL1
Phenanthrene	E4SH4 – E4SH6, E4SH7, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Anthracene	E4SH5, E4SH6, E4SJ1, E4SJ2, E4SJ5, E4SJ8, E4SJ9, E4SJ0, E4SL1, E4SL2, E4SL3,
Fluoranthene	E4SH4, E4SH6, E4SH7 – E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ2, E4SJ3, E4SJ4, E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(a)anthracene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Chrysene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0, E4SJ1, E4SJ2, E4SJ3 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(b)fluoranthene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(k)fluoranthene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(a)pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Indeno(1,2,3-cd)pyrene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3

Dibenzo(a,h)anthracene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3
Benzo(g,h,i)perylene	E4SH4 – E4SH6, E4SH7, E4SH9, E4SH9MS, E4SH9MSD, E4SJ0 – E4SJ5, E4SJ8, E4SJ9, E4SL0, E4SL1, E4SL2, E4SL3

Semivolatile-SIM sample E4SJ1 reported concentrations for Acenaphthene and Fluorene that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The result from the diluted sample was nondetected for Acenaphthene and Fluorene. The result from the original analysis should be used for result validation.

The following diluted semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". No further dilutions were performed. The results from these diluted samples should be used for result validation.

2-Methylnaphthalene	E4SL0DL
Acenaphthene	E4SL0DL
Fluorene	E4SJ9DL, E4SL0DL
Phenanthrene	E4SH6DL, E4SJ2DL, E4SJ9DL, E4SL0DL, E4SL1DL
Anthracene	E4SH6DL, E4SJ9DL, E4SJ0DL, E4SL1DL
Fluoranthene	E4SH6DL, E4SJ2DL, E4SJ3DL, E4SJ4DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL, E4SL3DL
Pyrene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(a)anthracene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Chrysene	E4SH6DL, E4SJ2DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(b)fluoranthene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(k)fluoranthene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Benzo(a0pyrene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Indeno(1,2,3-cd)pyrene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL
Dibenzo(a,h)anthracene	E4SH6DL, E4SJ8DL, E4SJ9DL,E4SL0DL, E4SL1DL, E4SL2DL,
Benzo(g,h,i)perylene	E4SH6DL, E4SJ8DL, E4SJ9DL, E4SL0DL, E4SL1DL, E4SL2DL

Sample E4SH6RE represents a reanalysis performed due to internal standard failure in the original analysis. For this analysis the following compounds had concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. No dilutions were performed for this reanalyses. The results from the dilution of the original analysis should be used for result validation.

Affected analytes: 2-Methylnaphthalene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

No problems were found

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

A surrogate recovery between 150 – 200 % was obtained on only one column for sample E4SL0. The high recovery likely indicates a coelution or matrix interference on that column at the retention time for that surrogate. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. The sample results are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following table. Sample results are not qualified based on the results of field duplicates. No field blank was associated with this SDG.

E4SL2 and E4SL3

Pesticide compound	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	

Pesticide compound	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	3.8	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	ND	1	5.8	1	
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4SL2 and E4SL3, RPDs were not calculated because one or both results were nondetected.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations reported below the MDL. The affected results are elevated to the quantitation limit and are flagged “U”.

4,4’-DDE	E4SH5, E4SJ5, E4SL1, E4SL2, E4SL3
4,4’-DDD	E4SJ5, E4SJ7
Endosulfan II	E4SJ7
4,4’-DDT	E4SJ7, E4SL2
Methoxychlor	E4SJ7
Endrin ketone	E4SJ7
Endosulfan sulfate	E4SJ7

The following pesticide samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

4,4'-DDT	E4SL1

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDE	E4SJ2

The following pesticide sample had a percent difference between the results on the two GC columns exceeding 50% and the result is below the CRQL. Detected compounds are qualified "U" and elevated to the CRQL. Nondetected compounds are not qualified.

4,4'-DDT	E4SJ2

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

Results for the following samples were flagged "U" during the NFG automated checking process. It is unclear why this flag was applied, and based on our review findings the results for the following compounds in the samples are valid. Consequently the "U" validator flags have been removed from the "B" and "Z" files.

Dieldrin	E4SJ5, E4SH9MS, E4SH9MSD
Endrin	E4SJ5, E4SH9MS, E4SH9MSD
4,4'-DDT	E4SL0
4,4'-DDE	E4SH9, E4SJ1, E4SJ9, E4SL0, E4SH9MS, E4SH9MSD

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

All Aroclor samples in this SDG had acceptable surrogate recoveries on one or both columns for the original analyses. No samples were qualified based on surrogate recovery.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared from sample E4S60, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016 and Aroclor-1260, and the RPD exceeded criteria for Aroclor-1260 on one column. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4S60 is affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SL2 and E4SL3 were identified as field duplicates**.** Results are summarized in the following table: Sample results are not qualified based on the results of field duplicates. Note that no field blank was collected for this SDG.

E4SL2 and E4SL3

Aroclor compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	200	1	240	1	18
Aroclor-1254					

Aroclor compounds	E4SL2 µg/kg	DF	E4SL3 µg/kg	DF	%RPD
Aroclor-1260	21	1	49	1	80
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SL2 and E4SL3, RPD values are not calculated when one or both results are nondetects. Aroclor-1260 had an RPD value above 50 percent.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1248 E4SH4, E4SJ2, E4SL1

Aroclor-1254 E4SH4, E4SH7, E4SJ3, E4SJ4, E4SL1

Aroclor-1260 E4SJ9

The following Aroclor samples have percent differences between analyte results in the range of 26 – 50%. Detected compounds are qualified "J".

Aroclor-1260 E4SJ9DL

Aroclor-1254 E4SH9

Aroclor-1248 E4SH5, E4SH6, E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ9, E4SJ9DL, E4SL0, E4SL3

Aroclor-1016 E4SH9MS, E4SH9MSD

The following Aroclor samples had percent differences between analyte results in the range of 51 – 100%. Detected compounds are qualified "NJ".

Aroclor-1254 E4SJ1DL, E4SL0

Aroclor-1248 E4SH9, E4SJ1DL, E4SL2

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260 E4SJ1DL

Aroclor-1254 E4SJ2, E4SJ9DL

Aroclor-1248 E4SH7, E4SJ3, E4SJ4, E4SL1

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1254 E4SH5, E4SH6, E4SH6DL, E4SH9MS, E4SH9MSD, E4SJ1, E4SJ9, E4SL2, E4SL3

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where dilutions are provided the results from the diluted sample should be used.

E4SH6, E4SJ1 Aroclor-1248

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Introduction: Three coolers containing twenty (20) sediment samples, labeled E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5 through E4SM9 and E4SN0 through E4SN8, were shipped to KAP Technologies, Inc. located in The Woodlands, Texas. The samples were collected on 04/15/2010 and 04/16/2010 and were received at the laboratory on 04/16/2010 and 04/17/2010, intact at 3.3, 1.6, and 1.5°C.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2.Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Three sets of field duplicates are associated with this SDG; E4SM0 and E4SM1, E4SM6 and E4SM7, and E4SN5 and E4SN6. There are no field blanks associated with this SDG. Sample E4SM9 was designated for laboratory QC, i.e. MS/MSD.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOM01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatile-SIM, Pesticides, and Aroclors.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Semivolatile method blanks SBLK17 and SBLK19 are associated with an initial calibration in which a surrogate/DMC exceeded percent relative standard deviation (%RSD) criteria. Detected and nondetected compounds are not qualified.

Semivolatile method blanks SBLK17 and SBLK19 are associated with initial calibration percent relative standard deviations (%RSD) for various target analytes were outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria for pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SL9, E4SM3, E4SM7 Pentachlorophenol

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Less sensitivity was found in the continuing calibration than was present in the initial calibration. Nondetected compounds are qualified UJ.

E4SM0, E4SM5, E4SM8DL, E4SN4, E4SN6, E4SN7DL 2,4-Dimethylphenol

Semivolatile method blanks SBLK17 and SBLK19 are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Less sensitivity was found in the continuing calibration than was present in the initial calibration. Nondetected compounds are qualified UJ.

Semivolatile method blanks SBLK17 and SBLK19 are associated with a CCV with relative response factors for Pentachlorophenol (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Semivolatile method blanks SBLK17 and SBLK19 are associated with a continuing calibration in which a surrogate/DMC exceeded percent difference (%D) criteria. Detected and nondetected compounds are not qualified.

4. BLANKS

No problems were found other than those mentioned regarding the calibrations with which they are associated.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

E4SL9 Anthracene-d_{10}	Anthracene, Atrazine, Hexachlorobenzene, Phenanthrene
E4SL9 Phenol-d_5	Benzaldehyde, Phenol
E4SM0 Fluorene-d_{10}	4-Bromophenyl-phenylether, 4-Chlorophenyl-phenylether, Carbazole, Dibenzofuran, Fluorene
E4SL9, E4SM0 Acenaphthylene-d_8	2-Chloronaphthalene, 2-Methylnaphthalene, Acenaphthene, Acenaphthylene, Naphthalene

Diluted semivolatile sample E4SM8DL with dilution factors less than or equal to 5 has deuterated monitoring compound recovery above the upper limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo(a)pyrene-d_{12}	Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Dibenzo(a,h)anthracene, Indeno(1,2,3-cd)pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable for semivolatiles.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Benzaldehyde	ND	ND	
Phenol	ND	ND	
Bis(2-chloroethyl)ether	ND	ND	
2-Chlorophenol	ND	ND	
2-Methylphenol	ND	ND	
2,2'-Oxybis(1-chloropropane)	ND	ND	
Acetophenone	ND	ND

2,3,4,6-Tetrachlorophenol	ND	ND	

With the exception of Bis(2-ethylhexyl)phthalate, all RPD values were less than 50 percent.

7. INTERNAL STANDARDS

No problems were found.

8. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms it appears that compounds were properly identified.

9. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

4-Methylphenol	E4SL7
Bis(2-Ethylhexyl)phthalate	E4SL4, E4SL7, E4SM0, E4SM8, E4SN3, E4SN8

Anthracene	E4SL4, E4SL7, E4SL9, E4SM5, E4SM9, E4SM9MS, 4SM9MSD, E4SN0, E4SN6, E4SN7DL
Pyrene	E4SM3
Dibenzofuran	E4SN1
Benzo(g,h,i)perylene	E4SL9, E4SM3, E4SM6, E4SM7
Indeno(1,2,3-cd)pyrene	E4SL9, E4SM6, E4SM7
Benzo(b)fluoranthene	E4SM3
Benzo(k)fluoranthene	E4SL9, E4SM3, E4SM6, E4SM7
Chrysene	E4SM3
Benzo(a)pyrene	E4SM3
Dibenzo(a,h)anthracene	E4SL4, E4SL7, E4SM0, E4SM1, E4SM8DL, E4SM9, E4SM9MSD, E4SN2, E4SN3, E4SN4, E4SN7DL, E4SN8
Benzo(a)anthracene	E4SM3, E4SM6
Acenaphthene	E4SN1DL, E4SN7
Di-n-butylphthalate	E4SL7, E4SM1, E4SM3, E4SM7, E4SM9MSD, E4SN0, E4SN1DL, E4SN4, E4SN7
Phenanthrene	E4SM6, E4SM7
Butylbenzylphthalate	E4SN1
Fluorene	E4SL4, E4SM8, E4SN1DL, E4SN5, E4SN6
9H-Carbazole	E4SM8, E4SN1DL, E4SN5, E4SN6, E4SN

10. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

11. ADDITIONAL INFORMATION

The following semivolatile samples reported concentrations that exceeded the calibration range of the instrument and were flagged “E” by the laboratory. As per the NFG, these results are flagged “J”. The results from the diluted sample should be used for result validation.

E4SM8	Fluoranthene
E4SN1	Fluoranthene, Pyrene
E4SN7	Fluoranthene

SEMIVOLATILES SIM (PAH-SIM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

All semivolatile SIM samples are associated with an initial calibration percent relative standard deviation for Benzo(g,h,i)perylene (%RSD) outside criteria. Detected Benzo(g,h,i)perylene is qualified J. Nondetected Benzo(g,h,i)perylene is not qualified.

All semivolatile SIM samples are associated with incorrect initial calibration sequences. All compounds listed exhibit a decrease in sensitivity. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

Benzo(g,h,i)perylene	E4SM7DL, E4SM8DL, E4SM9DL, E4SN0DL, E4SN1DL, E4SN2DL, E4SN3DL, E4SN4DL, E4SN5DL, E4SN6DL, E4SN7DL, E4SN8DL
Benzo(b)fluoranthene	E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8
Phenanthrene	E4SL4, E4SL4DL, E4SL7, E4SL7DL, E4SL9, E4SL9DL, E4SM0, E4SM0DL, E4SM1, E4SM1DL, E4SM3, E4SM3DL, E4SM5, E4SM5DL, E4SM6, E4SM6DL, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

The following semivolatile samples are associated with a CCV for Pentachlorophenol with relative response factors (RRF50) outside criteria. Detected Pentachlorophenol is qualified J. Nondetected Pentachlorophenol is qualified R.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted semivolatile samples with dilution factors greater than 5 have deuterated monitoring compound recovery above the upper limit of the criteria window. Detected and nondetected compounds are not qualified.

E4SN7DL Fluoranthene-d_{10}

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The semivolatile-SIM matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit for Pentachlorophenol. Detected compounds are qualified J. Nondetected compounds are not qualified. The MS/MSD samples have negative percent recoveries that are greater than the acceptance limit for Pyrene. As the spiking level was inappropriately low in comparison to the native levels of Pyrene present in the sample, no data were qualified based on the Pyrene failure.

E4SK9, E4SK9MS, E4SK9MSD Pentachlorophenol, Pyrene

6B. LABORATORY CONTROL SAMPLE

Not applicable to semivolatile-SIM.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 and E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Semivolatile Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Naphthalene	4.5	4.3	4.5
2-Methylnaphthalene	3.7	3.8	2.7
Acenaphthylene	7.3	8.7	17.5
Acenaphthene	21	16	27
Fluorene	26	19	31.1
Phenanthrene	310	310	0
Anthracene	74	40	59.6
Fluoranthene	660	750	12.8
Pyrene	490	570	15.1
Benzo(a)anthracene	310	290	6.7
Chrysene	300	350	15.4
Benzo(b)fluoranthene	330	410	21.6
Benzo(k)fluoranthene	230	290	23.1
Benzo(a)pyrene	270	290	7.1
Indeno(1,2,3-cd)pyrene	120	160	28.6
Dibenzo(a,h)anthracene	60	71	16.8
Benzo(g,h,i)perylene	120	160	28.6
Pentachlorophenol	4.5	ND	

With the exception of Anthracene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SM6 ug/kg	E4SM7 ug/kg	%RPD
Naphthalene	6.2	4.9	23.4

Semivolatile Analyte	E4SM6 ug/kg	E4SM7 ug/kg	%RPD
2-Methylnaphthalene	ND	7.8	
Acenaphthylene	37	99	91.2
Acenaphthene	6.7	6.8	1.5
Fluorene	12	12	0
Phenanthrene	140	190	30.3
Anthracene	51	68	28.6
Fluoranthene	480	760	45.2
Pyrene	380	730	63.1
Benzo(a)anthracene	270	480	56
Chrysene	250	390	43.8
Benzo(b)fluoranthene	230	350	41.4
Benzo(k)fluoranthene	180	310	53.1
Benzo(a)pyrene	210	400	62.3
Indeno(1,2,3-cd)pyrene	98	140	35.3
Dibenzo(a,h)anthracene	46	65	34.2
Benzo(g,h,i)perylene	98	140	35.3
Pentachlorophenol	ND	6.5	

With the exception of Acenaphthylene, Pyrene, Benzo(a)anthracene, Benzo(k)fluoranthene, and Benzo(a)pyrene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SM6DL ug/kg	E4SM7DL ug.kg	%RPD
Naphthalene	ND	ND	
2-Methylnaphthalene	ND	ND	
Acenaphthylene	ND	74	
Acenaphthene	ND	ND	
Fluorene	ND	ND	
Phenanthrene	160	210	27
Anthracene	83	96	14.5
Fluoranthene	520	790	41.2
Pyrene	380	790	70.1
Benzo(a)anthracene	210	370	55.2
Chrysene	230	390	51.6
Benzo(b)fluoranthene	99	96	3.1
Benzo(k)fluoranthene	130	120	8
Benzo(a)pyrene	130	150	14.3
Indeno(1,2,3-cd)pyrene	78	58	29.4
Dibenzo(a,h)anthracene	ND	ND	
Benzo(g,h,i)perylene	89	67	28.2
Pentachlorophenol	ND	ND	

With the exception of Pyrene, Benzo(a)anthracene and Chrysene, all RPD values were less than 50 percent.

Semivolatile Analyte	E4SN5 ug/kg	E4SN6 ug/kg	%RPD
Naphthalene	12	18	40
2-Methylnaphthalene	12	12	0
Acenaphthylene	41	32	24.7
Acenaphthene	64	58	9.8
Fluorene	92	95	3.2
Phenanthrene	850	820	3.6
Anthracene	230	210	9.1
Fluoranthene	1700	1900	11.1
Pyrene	1400	1300	7.4
Benzo(a)anthracene	950	870	8.8
Chrysene	910	900	1.1
Benzo(b)fluoranthene	740	1200	47.4
Benzo(k)fluoranthene	520	850	48.2
Benzo(a)pyrene	560	900	46.6
Indeno(1,2,3-cd)pyrene	230	400	54
Dibenzo(a,h)anthracene	110	190	53.3
Benzo(g,h,i)perylene	230	400	54
Pentachlorophenol	5.1	ND	

With the exception of Dibenzo(a,h)anthracene, all RPD values were less than 50 percent.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the selected ion monitoring and chromatograms it appears that compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J.

Anthracene	E4SM3DL
Acenaphthene	E4SL9DL
Pentachlorophenol	E4SM0, E4SM7, E4SM8, E4SN0, E4SN5
2-Methylnaphthalene	E4SL9, E4SM0, E4SM1

11. SYSTEM PERFORMANCE

GC/MS baseline indicated acceptable performance.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SL4	Acenaphthene, Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL7	Fluorene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM8	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM9	Acenaphthylene, Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SL9	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene
E4SM0	Phenanthrene, Anthracene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, Benzo(b)fluoranthene, Benzo(k)fluoranthene, Benzo(a)pyrene, Indeno(1,2,3-cd)pyrene, Dibenzo(a,h)anthracene, Benzo(g,h,i)perylene

E4SN8DL	Fluoranthene, Pyrene

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found in the pesticide method blanks. Several instrument blanks had target compounds present below the CRQL.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The MSD result for Aldrin has percent recovery greater than the upper acceptance limit on one column. Since the surrogate recovery was acceptable on the other column, the extraction procedure is not suspect. Detected compounds and nondetected compounds are not qualified. The "J" flag applied in the automated check process was overridden, unless applied for another reason. Detected and nondetected compounds are not qualified.

E4SM9, E4SM9MSD Aldrin

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. For field duplicates, RPDs are not calculated where one or both results were nondetected. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Pesticide Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
alpha-BHC	ND	ND	
beta-BHC	ND	ND	
delta-BHC	ND	ND	

Pesticide Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD

8. INTERNAL STANDARDS

Not applicable to pesticides.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples are associated with an instrument blank which has compound concentrations below the MDL. Detected compounds are qualified U and reported at the CRQL if the sample concentration is above the MDL but less than the CRQL. Nondetected compounds are not qualified. Sample results above the CRQL are not qualified.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

Heptachlor epoxide, Endosulfan sulfate, gamma-Chlordane, gamma-BHC (Lindane), Dieldrin, Endrin, 4,4'-DDE

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

4,4'-DDT	E4SM5, E4SM7, E4SN1
gamma-BHC (Lindane)	E4SM9MSD
4,4'-DDD	E4SM6
4,4'-DDE	E4SM5, E4SM7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aldrin	E4SM9MSD

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aldrin	E4SM9MS

11. SYSTEM PERFORMANCE

No problems were found.

12. ADDITIONAL INFORMATION

No dilution analyses were required for pesticides.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following Aroclor samples are associated with an opening or closing CCV with % Difference of a surrogate exceeding criteria. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3, E4SM5, E4SM6, E4SM7, E4SM8, E4SM9, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN4, E4SN5, E4SN6, E4SN7, E4SN8

The RT of Aroclor-1248 in the midpoint Aroclor CCV fell outside the RT window established during the initial calibration. Detected and nondetected compounds are not qualified.

E4SL4, E4SL7, E4SL9, E4SM0, E4SM1, E4SM3

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following diluted Aroclor samples with dilution factors greater than 5 have surrogate percent recoveries that are greater than 200%. Detected and nondetected compounds are not qualified.

E4SM8DL, E4SN7DL

Aroclor sample E4SN7 has surrogate percent recoveries which exceed 150% but are less than or equal to 200%. Detected compounds are qualified J. Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The Aroclor matrix spike and matrix spike duplicate sample have percent recovery of Aroclor-1016 that is greater than the upper acceptance limit on one column. The NFG automated flagging of detected Aroclor-1016 as J in the original sample, MS and MSD has been overridden. No data has been qualified based on MS/MSD results.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Three sets of field duplicates are associated with this SDG; E4SM0/E4SM1, E4SM6/E4SM7 AND E4SN5/E4SN6. Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates. No field blank sample was collected for this SDG.

Aroclor Analyte	E4SM0 ug/kg	E4SM1 ug/kg	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	ND	55	
Aroclor-1254	ND	41	
Aroclor-1260	ND	10	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

Aroclor Analyte	E4SM6 ug/kg	E4SM7 ug/kg	
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	250	310	21.4
Aroclor-1254	220	320	37
Aroclor-1260	ND	76	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

Aroclor Analyte	E4SN5 ug/kg	E4SN6 ug/kg	%RPD
Aroclor-1016	ND	ND	
Aroclor-1221	ND	ND	
Aroclor-1232	ND	ND	
Aroclor-1242	ND	ND	
Aroclor-1248	150	ND	
Aroclor-1254	61	ND	
Aroclor-1260	25	ND	
Aroclor-1262	ND	ND	
Aroclor-1268	ND	ND	

RPDs were not calculated where one or both results were nondetects. All calculated RPDs were below the 50% criterion.

8. INTERNAL STANDARDS

Not applicable to Aroclors.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified J. Nondetected compounds are not qualified.

Aroclor-1254	E4SM3, E4SM8DL, E4SN0DL
Aroclor-1248	E4SN2, E4SN4

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified J.

Aroclor-1260	E4SL9, E4SM1, E4SN1, E4SN5
Aroclor-1254	E4SN7DL
Aroclor-1248	E4SL4, E4SM1, E4SM3, E4SM8DL, E4SM9MS, E4SM9MSD, E4SN0, E4SN1, E4SN2, E4SN3, E4SN5

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified NJ.

Aroclor-1254	E4SL4DL, E4SL7, E4SM5, E4SM6, E4SM7, E4SM9, E4SM9MS, E4SM9MSD, E4SN3, E4SN7, E4SN8
Aroclor-1248	E4SL4DL, E4SL7, E4SL9

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified U. Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SL4DL, E4SM8DL, E4SN0DL
Aroclor-1254	E4SM1, E4SM3, E4SM8DL, E4SN0DL, E4SN2
Aroclor-1248	E4SN4

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified R.

Aroclor-1254	E4SL4, E4SL9, E4SM8, E4SN0, E4SN1, E4SN5
Aroclor-1248	E4SN8
Aroclor-1016	E4SM9MS, E4SM9MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibration range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". The results from the diluted sample should be used for result validation.

E4SM8	Aroclor-1248
E4SN0	Aroclor-1248
E4SN7	Aroclor-1248, Aroclor-1254

Sample E4SL4 was analyzed at a dilution, although it was not required, because Aroclor-1248 was within the calibrated range in the original analysis.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG Summary

Sample Receipt: Seventeen (17) sediment samples labeled E4SN9, E 4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, and E4SQ5, were shipped to KAP Technologies, Inc., in The Woodlands, Texas. All samples were collected on 4/16/2010 and were received at the laboratory on 4/17/2010 at 1.4 – 1.5 °C.

Sample Analysis and Data Review: All samples were analyzed according to CLP SOW SOM01.2 . Samples were reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of Data, USEPA Contract Laboratory Program.

Contrary to the CLP reporting requirements that censor results at the sample-specific quantitation limits, the results for some samples in this SDG were reported at values below the sample-specific detection limits and qualified by the lab with the "J" flag. The EDD, Form 1s, and other data summary forms (3 and 10) for the samples in this SDG were affected. As detailed later in this narrative, sample results reported below the reporting detection limit have been elevated to the quantitation limit and qualified "U" in the "B" and "Z" files. GLNPO may wish to obtain revised copies of the summary forms package from the laboratory if there is a problem identifying the appropriate data because of these discrepancies.

When the laboratory detects an analyte at a concentration that is less than the CRQL (but at or above the MDL), the CLP SOW requires that they report the concentration with the "J" flag. In addition, the automated data checking process used at SMO examines the final results on Form 1 and applies a validator flag of "J" if the result is at or below the CRQL, rather than strictly below the CRQL. Examination of the raw data shows that some of the validator "J" flags are applied to results that round up to the CRQL, but that are below the CRQL before rounding. CSC has not removed the validator J flags for such samples.

Tentatively Identified Compounds (TICs): As per the CLP SOW SOMO01.2, for the semivolatile analysis, TICs were identified by the laboratory and reported on the Form 1 for each sample. These compounds are not included in the "B" or "Z" files and were not evaluated by the reviewer.

MS/MSD evaluation: In instances where the matrix spike recoveries or the RPDs are negative, those negative values do not reflect the performance of the analytical method in the matrix of interest, but are a function of disparities between default spiking levels and the background concentrations in the original unspiked sample. Therefore, no sample results will be qualified when negative recoveries or RPDs are encountered.

Samples E4SP6 and E4SP7 failed the acceptance limits for one or more internal standards for SVOA and SVOA-SIM analyses; repeat analyses also failed. Failure was due to the sample matrix.

Sample E4SP6 had target compound concentrations above the calibration range for SVOA analysis and was analyzed using sample dilutions. All samples had target compound concentrations above the calibration range for SVOA-SIMs analysis and were analyzed using sample dilutions.

Sample E4SP6 also had target compound concentrations above the calibration range for Aroclors analysis and was analyzed at dilutions within the calibration range.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples in this SDG. The samples are actually "sediment" samples.

No QC sample was designated on the traffic reports for this SDG. Sample E4SP6 was used for laboratory QC, i.e. MS/MSDs.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified samples E4SP0/E4SP1and E4SP8/E4SP9 as field duplicate pairs.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Pentachlorophenol	E4SP6MS, E4SP6MSD, E4SQ1, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5

The following semivolatile samples are associated with a CCV with a relative response factor (RRF50) for pentachlorophenol below the minimum required RRF. Detected compounds are qualified "J." Nondetected compounds are qualified "R."

E4SP6MS, E4SP6MSD, E4SQ5

The following semivolatile samples are associated with a closing CCV standard that has a percent difference value outside criteria (±50%).

E4SP6MS, E4SP6MSD, E4SQ5

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery for 4-Methylphenol-d_8 above the upper limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are not qualified.

2,4-Dimethylphenol, 2-Methylphenol, 4-Methylphenol	E4SQ1, E4SQ4

The following semivolatile samples have deuterated monitoring compound recovery for Pyrene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(a)anthracene, Chrysene, Fluoranthene, Pyrene	E4SP2, E4SP5, E4SP6, E4SP6RE, E4SP7, E4SP7RE

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Semivolatile compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1	
Bis(2-chloroethyl)ether	ND	1	ND	1	
2-Chlorophenol	ND	1	ND	1	
2-Methylphenol	ND	1	ND	1	
2,2'-Oxybis(1-chloropropane)	ND	1	ND	1	
Acetophenone	ND	1	ND	1	
4-Methylphenol	ND	1	ND	1	
N-Nitroso-di-n-propylamine	ND	1	ND	1	
Hexachloroethane	ND	1	ND	1	
Nitrobenzene	ND	1	ND	1	
Isophorone	ND	1	ND	1	
2-Nitrophenol	ND	1	ND	1	
Bis(2-chloroethoxy)methane	ND	1	ND	1	
2,4-Dichlorophenol	ND	1	ND	1	
Naphthalene	ND	1	ND	1	
4-Chloroaniline	ND	1	ND	1	
2,4-Dimethylphenol	ND	1	ND	1	
Hexachlorobutadiene	ND	1	ND	1	
Caprolactam	ND	1	ND	1	
4-Chloro-3-methylphenol	ND	1	ND	1	
2-Methylnaphthalene	ND	1	ND	1	
Hexachlorocyclopentadiene	ND	1	ND	1	
2,4,6-Trichlorophenol	ND	1	ND	1	
2,4,5-Trichlorophenol	ND	1	ND	1	
1,1'-Biphenyl	ND	1	ND	1	
2-Chloronaphthalene	ND	1	ND	1	
2-Nitroaniline	ND	1	ND	1	

Semivolatile compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Dimethylphthalate	ND	1	ND	1	
2,6-Dinitrotoluene	ND	1	ND	1	
Acenaphthylene	ND	1	ND	1	
3-Nitroaniline	ND	1	ND	1	
Acenaphthene	ND	1	ND	1	
2,4-Dinitrophenol	ND	1	ND	1	
4-Nitrophenol	ND	1	ND	1	
Dibenzofuran	ND	1	ND	1	
2,4-Dinitrotoluene	ND	1	ND	1	
Diethylphthalate	ND	1	ND	1	
Fluorene	ND	1	ND	1	
4-Chlorophenyl-phenylether	ND	1	ND	1	
4-Nitroaniline	ND	1	ND	1	
4,6-Dinitro-2-methylphenol	ND	1	ND	1	
N-Nitrosodiphenylamine	ND	1	ND	1	
1,2,4,5-Tetrachlorobenzene	ND	1	ND	1	
4-Bromophenyl-phenylether	ND	1	ND	1	
Hexachlorobenzene	ND	1	ND	1	
Atrazine	ND	1	ND	1	
Pentachlorophenol	ND	1	ND	1	
Phenanthrene	130	1	200	1	42
Anthracene	ND	1	ND	1	
Carbazole	ND	1	ND	1	
Di-n-butylphthalate	ND	1	ND	1	
Fluoranthene	280	1	500	1	56
Pyrene	250	1	350	1	33
Butylbenzylphthalate	ND	1	ND	1	
3,3'-Dichlorobenzidine	ND	1	ND	1	
Benzo(a)anthracene	160	1	250	1	44
Chrysene	200	1	310	1	43
Bis(2-ethylhexyl)phthalate	ND	1	ND	1	
Di-n-octylphthalate	ND	1	ND	1	
Benzo(b)fluoranthene	150	1	310	1	70
Benzo(k)fluoranthene	140	1	240	1	53
Benzo(a)pyrene	170	1	270	1	46
Indeno(1,2,3-cd)pyrene	130	1	160	1	21
Dibenzo(a,h)anthracene	ND	1	ND	1	
Benzo(g,h,i)perylene	140	1	170	1	19
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SP0 and E4SP1, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Fluoranthene, Benzo(b)fluoranthene, and Benzo(k)fluoranthene, the RPD values were less than 50 percent.

E4SP8 and E4SP9

Semivolatile compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Benzaldehyde	ND	1	ND	1	
Phenol	ND	1	ND	1

Benzo(g,h,i)perylene	790	1	530	1	39
2,3,4,6-Tetrachlorophenol	ND	1	ND	1	

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, with the exception of Phenanthrene, the RPD values were less than 50 percent.

8. INTERNAL STANDARDS

The following semivolatile samples have internal standard area counts that are outside the upper limit of primary criteria. Detected compounds are qualified "J" for the affected analytes. Nondetected compounds are not qualified.

Perylene-d_{12}	E4SP6, E4SP6RE, E4SP7, E4SP7RE

As noted above, the original analysis for samples E4SLP6 and E4SP7 had internal standard area counts for Perylene-d_{12} that were above the upper criteria limit. The samples were subsequently reanalyzed by the laboratory as samples E4SP6RE and E4SP7RE and again failed due to sample matrix. Since the reanalysis provided no additional useful information, the data from the original analyses should be used for result validation.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following semivolatile samples have compound concentrations reported below the MDL. Detected compounds are qualified "U." and reported at the CRQL. Nondetected compounds are not qualified.

Benzo(a)pyrene	E4SP4

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

4-Chloroaniline	E4SP6MSD
Bis (2-Ethylhexyl) phthalate	E4SP5, E4SP7, E4SP8, E4SP9, E4SQ3, E4SQ4
Anthracene	E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP6RE, E4SP7, E4SP7RE, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4
Pyrene	E4SP4
Benzo(g,h,i)perylene	E4SN9, E4SP0, E4SP1, E4SP2
Indeno(1,2,3-cd)pyrene	E4SN9, E4SP0, E4SP1, E4SP2
Benzo(b)fluoranthene	E4SP0, E4SP4
Fluoranthene	E4SP4
Benzo(k)fluoranthene	E4SN9, E4SP0, E4SP4
Chrysene	E4SP0, E4SP4
Benzo(a)pyrene	E4SP0, E4SP2
Dibenzo(a,h)anthracene	E4SP5, E4SP8, E4SP9, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Benzo(a)anthracene	E4SP0, E4SP2
Acenaphthene	E4SQ1

Di-n-butylphthalate	E4SP1, E4SP4, E4SP8, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Phenanthrene	E4SN9, E4SP0, E4SP1, E4SP2, E4SP4, E4SP9

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

Semivolatile sample E4SQ1 reported concentrations that exceeded the calibrated range of the instrument for Fluoranthene. These results were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". The results from the diluted sample should be used for result validation.

SEMIVOLATILES-SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) for Pentachlorophenol below the minimum required RRF. Detected compounds are qualified "J." Nondetected compounds are qualified "R."

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP3DL, E4SP4, E4SP4DL, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9DL, E4SQ0DL, E4SQ1DL, E4SQ2DL, E4SQ3DL, E4SQ4DL, E4SQ5DL

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) for Benzo(g,h,i)perylene outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

E4SN9, E4SN9DL, E4SP0, E4SP0DL, E4SP1, E4SP1DL, E4SP2, E4SP2DL, E4SP3, E4SP3DL, E4SP4, E4SP4DL, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Semivolatile-SIM sample E4SP6 had deuterated monitoring compound recovery for Fluoranthene-d_{10} below the lower limit of the criteria window. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Benzo(a)anthracene, Benzo(a)pyrene, Benzo(b)fluoranthene, Benzo(g,h,i)perylene, Benzo(k)fluoranthene, Chrysene, Dibenzo(a,h)anthracene, Fluoranthene, Indeno(1,2,3-cd)pyrene, Pyrene

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The relative percent difference (RPD) between the following semivolatile matrix spike and matrix spike duplicate recoveries was outside criteria. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Acenaphthene	E4SP6MS, E4SP6MSD

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Semivolatile-SIM compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Pentachlorophenol	ND	1	ND	1	
Naphthalene	5.5	1	5.1	1	7.5
2-Methylnaphthalene	6.5	1	5.5	1	17
Acenaphthylene	12	1	15	1	22
Acenaphthene	14	1	17	1	19
Fluorene	20	1	24	1	18
Phenanthrene	180	1	290	1	47
Anthracene	49	1	76	1	43
Fluoranthene	450	1	740	1	49
Pyrene	370	1	610	1	49
Benzo(a)anthracene	260	1	430	1	49
Chrysene	270	1	440	1	48
Benzo(b)fluoranthene	350	1	570	1	48
Benzo(k)fluoranthene	280	1	430	1	42
Benzo(a)pyrene	300	1	450	1	40
Indeno(1,2,3-cd)pyrene	130	1	210	1	47
Dibenzo(a,h)anthracene	57	1	98	1	53
Benzo(g,h,i)perylene	130	1	210	1	47

E4SP0DL and E4SP1DL

Semivolatile-SIM compounds	E4SP0DL µg/kg	DF	E4SP1DL µg/kg	DF	%RPD
Pentachlorophenol	ND	10	ND	10	
Naphthalene	ND	10	ND	10	
2-Methylnaphthalene	ND	10	ND	10	
Acenaphthylene	ND	10	ND	10	
Acenaphthene	ND	10	ND	10	
Fluorene	ND	10	ND	10	
Phenanthrene	210	10	290	10	32
Anthracene	81	10	93	10	14
Fluoranthene	480	10	710	10	39
Pyrene	330	10	480	10	37

Semivolatile-SIM compounds	E4SP0DL µg/kg	DF	E4SP1DL µg/kg	DF	%RPD
Benzo(a)anthracene	330	10	360	10	8.7
Chrysene	390	10	400	10	2.5
Benzo(b)fluoranthene	420	10	330	10	24
Benzo(k)fluoranthene	320	10	290	10	9.8
Benzo(a)pyrene	400	10	320	10	22
Indeno(1,2,3-cd)pyrene	260	10	210	10	21
Dibenzo(a,h)anthracene	130	10	100	10	26
Benzo(g,h,i)perylene	260	10	210	10	21

For field duplicates E4SP0 and E4SP1, RPDs were not calculated where one or both results were nondetected. Where detected, results were reported for both samples, all RPD values for all compounds except Dibenzo(a,h)anthracene were below 50%.

E4SP8 and E4SP9

Semivolatile-SIM compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Pentachlorophenol	ND	1	ND	1	
Naphthalene	13	1	12	1	8
2-Methylnaphthalene	11	1	8.6	1	25
Acenaphthylene	59	1	47	1	23
Acenaphthene	49	1	28	1	55
Fluorene	61	1	40	1	42
Phenanthrene	880	1	470	1	61
Anthracene	180	1	110	1	48
Fluoranthene	2400	1	1400	1	53
Pyrene	2100	1	1200	1	55
Benzo(a)anthracene	1500	1	860	1	54
Chrysene	1600	1	950	1	51
Benzo(b)fluoranthene	1500	1	1200	1	22
Benzo(k)fluoranthene	900	1	740	1	20
Benzo(a)pyrene	1000	1	860	1	15
Indeno(1,2,3-cd)pyrene	540	1	450	1	18
Dibenzo(a,h)anthracene	260	1	220	1	17
Benzo(g,h,i)perylene	550	1	460	1	18

E4SP8DL and E4SP9DL

Semivolatile-SIM compounds	E4SP8DL µg/kg	DF	E4SP9DL µg/kg	DF	%RPD
Pentachlorophenol	ND	5	ND	10	
Naphthalene	ND	5	ND	10	
2-Methylnaphthalene	ND	5	ND	10	
Acenaphthylene	55	5	ND	10	
Acenaphthene	45	5	ND	10	

Semivolatile-SIM compounds	E4SP8DL µg/kg	DF	E4SP9DL µg/kg	DF	%RPD
Fluorene	55	5	ND	10	
Phenanthrene	920	5	510	10	57
Anthracene	300	5	200	10	40
Fluoranthene	2800	5	1600	10	55
Pyrene	1800	5	1100	10	48
Benzo(a)anthracene	1100	5	660	10	50
Chrysene	1400	5	890	10	45
Benzo(b)fluoranthene	1500	5	830	10	58
Benzo(k)fluoranthene	1300	5	900	10	36
Benzo(a)pyrene	1300	5	880	10	39
Indeno(1,2,3-cd)pyrene	660	5	450	10	38
Dibenzo(a,h)anthracene	390	5	270	10	36
Benzo(g,h,i)perylene	700	5	490	10	35

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. Where detected results were reported for both samples, all RPD values for all compounds were below 50%, except Acenaphthene, Phenanthrene, Fluoranthene, Pyrene, Benzo(a)anthracene, Chrysene, and Benzo(b)fluoranthene.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile-SIM compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The samples E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, and E4SQ5 had target compound concentrations above the calibration range and were analyzed using a dilution within the calibration range.

The following semivolatile samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Acenaphthylene	E4SQ2DL
Acenaphthene	E4SP8DL, E4SQ4DL
Fluorene	E4SQ4DL
Pentachlorophenol	E4SP2

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

The following semivolatile-SIM samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where dilutions are provided, the results from the diluted samples should be used for result validation.

Acenaphthene	E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SQ1
Acenaphthylene	E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SQ0, E4SQ1, E4SQ4, E4SQ5
Anthracene	E4SN9, E4SP0, E4SP1, E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Benzo(a)anthracene	E4SN9, E4SN9DL, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Benzo(a)pyrene	E4SN9, E4SN9DL, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Benzo(b)fluoranthene	E4SN9, E4SN9DL, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Benzo(g,h,i)perylene	E4SN9, E4SP0, E4SP1, E4SP2, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP7, E4SP8, E4SP8DL, E4SP9, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5, E4SQ5DL
Benzo(k)fluoranthene	E4SN9, E4SN9DL, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Chrysene	E4SN9, E4SN9DL, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD,

	E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Dibenzo(a,h)anthracene	E4SN9, E4SP0, E4SP1, E4SP2, E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SP9, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ3, E4SQ4, E4SQ5
Fluoranthene	E4SN9, E4SN9DL, E4SP0, E4SP0DL, E4SP1, E4SP1DL, E4SP2, E4SP2DL, E4SP3, E4SP4, E4SP5, E4SP5DL, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP7DL, E4SP8, E4SP8DL, E4SP9, E4SP9DL, E4SQ0, E4SQ0DL, E4SQ1, E4SQ1DL, E4SQ2, E4SQ2DL, E4SQ3, E4SQ3DL, E4SQ4, E4SQ4DL, E4SQ5, E4SQ5DL
Fluorene	E4SP5, E4SP6, E4SP6MS, E4SP7, E4SQ0, E4SQ1, E4SQ1DL

PESTICIDES

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

The following pesticide samples are associated with a CCV with % Difference for Decachlorobiphenyl, Endrin, and Endosulfan I exceeding criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6MS, E4SP6MSD, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5

4. BLANKS

No problems were found

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

Surrogate recovery for Tetrachloro-m-xylene was greater than 150% but less than or equal to 200% on both columns for sample E4SP2. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

The following pesticide matrix/matrix spike duplicate samples have percent recoveries that are greater than the upper acceptance limit Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aldrin	E4SP6MS, E4SP6MSD
4,4'-DDT	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
Endrin	E4SP6MS, E4SP6MSD
Heptachlor	E4SP6MS, E4SP6MSD

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Pesticide compound	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	2.2	1	1.6	1	32
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	ND	1	ND	1	
Toxaphene	ND	1	ND	1	

For field duplicates E4Sp0 and E4Sp1, RPDs were not calculated where one or both results were nondetected. All RPD values were less than 50 %.

E4SP8 and E4SP9

Pesticide compound	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
alpha-BHC	ND	1	ND	1	
beta-BHC	ND	1	ND	1	
delta-BHC	ND	1	ND	1	
gamma-BHC(Lindane)	ND	1	ND	1	
Heptachlor	ND	1	ND	1	
Aldrin	ND	1	ND	1	
Heptachlor epoxide	ND	1	ND	1	
Endosulfan I	ND	1	ND	1	

Pesticide compound	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Dieldrin	ND	1	ND	1	
4,4'-DDE	ND	1	ND	1	
Endrin	ND	1	ND	1	
Endosulfan II	ND	1	ND	1	
4,4'-DDD	ND	1	ND	1	
Endosulfan sulfate	ND	1	ND	1	
4,4'-DDT	9.7	1	16	1	49
Methoxychlor	ND	1	ND	1	
Endrin ketone	ND	1	ND	1	
Endrin aldehyde	ND	1	ND	1	
alpha-Chlordane	ND	1	ND	1	
gamma-Chlordane	5	1	8.8	1	55
Toxaphene	ND	1	ND	1	

For field duplicates E4SP8 and E4SP9, RPDs were not calculated where one or both results were nondetected. The RPD value for gamma-Chlordane was greater than 50 %.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following pesticide samples have compound concentrations below the MDL for Heptachlor epoxide, Endosulfan sulfate, gamma-Chlordane, gamma-BHC (Lindane), Dieldrin, Endrin, and 4,4'-DDE. Detected compounds are qualified "U." Nondetected compounds are not qualified. Sample results are reported at the CRQL.

E4SN9, E4SP0, E4SP1, E4SP2, E4SP3, E4SP4, E4SP5, E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP7, E4SP8, E4SP9, E4SQ0, E4SQ1, E4SQ2, E4SQ3, E4SQ4, E4SQ5

The following pesticide samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

4,4'-DDT	E4SP6, E4SQ2
alpha-Chlordane	E4SP6MSD
gamma-Chlordane	E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SP9
4,4'-DDE	E4SP6
Endrin aldehyde	E4SP7

The following pesticide samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

alpha-Chlordane	E4SP6MS
gamma-Chlordane	E4SP7, E4SQ0

The following pesticide samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Heptachlor epoxide	E4SP7
4,4'-DDT	E4SP8
gamma-Chlordane	E4SP8
Dieldrin	E4SP7

The following pesticide samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aldrin	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
Heptachlor	E4SP6MS, E4SP6MSD

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

The following pesticide samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged estimated, "J". Where dilutions are provided, the results from the diluted samples should be used for result validation.

4,4'-DDE	E4SP6, E4SP6MS, E4SP6MSD
4,4'-DDT	E4SP6, E4SP6MS, E4SP6MSD
gamma-Chlordane	E4SP6, E4SP6MS, E4SP6MSD
Dieldrin	E4SP6MS, E4SP6MSD
gamma-BHC (Lindane)	E4SP6MS, E4SP6MSD

AROCLORS

1. HOLDING TIME

No problems were found

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

Aroclor sample E4SP6DL with a dilution factor greater than 5 had surrogate percent recoveries that were greater than 200% for Decachlorobiphenyl on one column and exceeded 150% but were less than or equal to 200% on the second column. All compounds are affected. Detected and nondetected compounds are not qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For the Aroclor MS and MSD prepared for sample E4SP6, recoveries on both columns were greater than the upper acceptance limit for Aroclor-1016, and greater than the upper acceptance limit for Aroclor-1260 on one column. In addition, the RPD exceeded criteria on one column for Aroclor-1016 and Aroclor-1260. This is likely due to high levels of Aroclor-1248 and Aroclor-1260 in the unspiked sample. Only sample E4SP6 is affected. Detected results are qualified "J". Nondetected results remain unchanged.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

Samples E4SP0/E4SP1 and E4SP8/E4SP9 were identified as field duplicate pairs**.** Results are summarized in the following tables. Note that results are not qualified based upon the results of the field duplicates.

E4SP0 and E4SP1

Aroclor compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	

Aroclor compounds	E4SP0 µg/kg	DF	E4SP1 µg/kg	DF	%RPD
Aroclor-1248	210	1	170	1	21
Aroclor-1254	ND	1	ND	1	
Aroclor-1260	22	1	14	1	44
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SP0 and E4SP1, RPD values are not calculated when one or both results are nondetects. All RPD values were less than 50 %.

E4SP8 and E4SP9

Aroclor compounds	E4SP8 µg/kg	DF	E4SP9 µg/kg	DF	%RPD
Aroclor-1016	ND	1	ND	1	
Aroclor-1221	ND	1	ND	1	
Aroclor-1232	ND	1	ND	1	
Aroclor-1242	ND	1	ND	1	
Aroclor-1248	96	1	520	1	140
Aroclor-1254	96	1	340	1	110
Aroclor-1260	96	1	170	1	56
Aroclor-1262	ND	1	ND	1	
Aroclor-1268	ND	1	ND	1	

For the analysis of field duplicate samples E4SP8 and E4SP9, RPD values are not calculated when one or both results are nondetects. Aroclor 1248, Aroclor 1254, and Aroclor 1260 RPD values greater than 50 %.

8. INTERNAL STANDARDS

Not applicable

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor samples have compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aroclor-1248 E4SP7, E4SP8, E4SQ5

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1260 E4SP1

Aroclor-1248	E4SP0, E4SP1, E4SQ3

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1254	E4SP7, E4SP9, E4SQ0, E4SQ3, E4SQ4
Aroclor-1248	E4SP2, E4SP6DL, E4SQ2

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SP8
Aroclor-1254	E4SP8
Aroclor-1248	E4SP7, E4SP8

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R" and the results are removed from the "B" and "Z" files.

Aroclor-1254	E4SP6, E4SP6DL, E4SP6MS, E4SP6MSD, E4SQ2
Aroclor-1016	E4SP6MS, E4SP6MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

The following Aroclor samples reported concentrations that exceeded the calibrated range of the instrument and were flagged "E" by the laboratory. As per the NFG, these results are flagged "J". Where dilutions are provided the results from the diluted sample should be used.

Aroclor-1016	E4SP6MS, E4SP6MSD
Aroclor-1248	E4SP6, E4SP6MS, E4SP6MSD
Aroclor-1254	E4SP6, E4SP6MS, E4SP6MSD
Aroclor-1260	E4SP6, E4SP6MS, E4SP6MSD

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Receipt: One (1) water sample labeled E4SQ6 and designated as field QC was shipped to KAP Technologies, Inc., in the Woodlands, TX. Sample E4SQ6 was collected on 4/16/2010 and was received on 4/17/2010, intact and at 1.5 ºC.

Sample Analysis and Data Review: The sample was analyzed according to CLP SOW SOM01.2.

This report is ordered by fraction in the following order: Semivolatiles, Semivolatiles-SIM, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R,” “NJ,” “UJ,” “U,” “J.”

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Pentachlorophenol	E4SQ6

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Use professional judgment to qualify the data.

2,4-Dimethylphenol	E4SQ6
Hexachlorocyclopentadiene	E4SQ6
Pentachlorophenol	E4SQ6

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SQ6

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

The following semivolatile samples have deuterated monitoring compound recovery below the lower limit of the criteria window. Detected compounds are qualified J. Nondetected compounds are qualified UJ.

4,6-Dinitro-2-methylphenol	E4SQ6

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

LCS was not required.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

No additional information to report.

SEMIVOLATILES – SIM

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following semivolatile samples are associated with an initial calibration percent relative standard deviation (%RSD) outside criteria. Detected compounds are qualified J. Nondetected compounds are not qualified.

Benzo (g,h,i) perylene	E4SQ6

The following semivolatile samples are associated with incorrect initial calibration sequence. Detected compounds are qualified J. Nondetected compounds are qualified UJ. Use professional judgment to qualify the data.

Benzo (b) fluoranthene	E4SQ6
Phenanthrene	E4SQ6

The following semivolatile samples are associated with a CCV with relative response factors (RRF50) outside criteria. Detected compounds are qualified J. Nondetected compounds are qualified R.

Pentachlorophenol	E4SQ6

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required

6B. LABORATORY CONTROL SAMPLE

LCS was not required

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No problems were found.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

GC/MS baseline of method blanks indicated acceptable performance.

12. ADDITIONAL INFORMATION

No additional information to report.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found

3. CALIBRATION

No problems were found

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

No additional information to report.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

MS/MSDs were not required.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD BLANK AND FIELD DUPLICATE

Field blanks and field duplicates were not required.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analysis was acceptable.

12. ADDITIONAL INFORMATION

No additional information to report.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.

Case Number: 39668 SDG Number: E4SQ7
Site Name: Lincoln Park Laboratory: KAP, Technologies, Inc.

SDG Summary

Sample Receipt: One water sample labeled E4SQ7 was shipped to KAP Technologies, Inc., in The Woodlands, Texas. The sample was collected on 4/19/2010 and received at the facility on 4/20/2010, intact, and at 3.3 ºC.

Sample Analysis and Data Review: The water sample was prepared using separatory funnel extraction, and esterification by diazomethane, according to SW-846 Method 8151A, and MA 1690.4. The sample was analyzed for herbicide compounds, 2,4-D and 2,4,5-TP (Silvex), by GC/ECD, according to SW-846 Method 8151A and the specifications in MA 1690.4. The sample was reviewed according to the NFG for SOM01.2 and the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program, and according to the specifications in MA 1690.4, SW-846 Method 8151A, and SW-846 Method 1311.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “NJ”, “UJ”, “U”, “J”.

Although specified in MA 1690.4, no MS/MSD was prepared for this SDG. No sample was designated by the samplers to be used for laboratory QC.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicate sets were identified.

HERBICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No MS/MSD was performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

No target herbicide compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

Date: **August 4, 2010**

Subject: **Revised Review Narrative Report**
Review of Data
Received for Review on: June 16, 2010

From: Melody Jensen
Senior Scientist, CSC

To: Data User: GLNPO

This data review narrative supersedes the narrative sent on July 13, 2010 for the review of data in SDG E4S89. The change made to this narrative includes a clarification added to the Aroclor Additional Information section of the narrative. The change has been highlighted in bold face type. In addition, the "reportable results" field in the "Z" file has been updated to reflect the clarification. No sample results or review qualifiers have been changed.

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39668 MRN: 1689.5, 1722.1, and 1723.0 SDG Number: E4SQ8

Number and Type of Samples: 2 Sediment Samples

Sample Numbers: E4SQ7, E4SQ8

Laboratory: KAP Technologies

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Receipt: One (1) investigation-derived waste (IDW) sample labeled E4SQ7 and one (1) trip blank labeled E4SQ8 were shipped to KAP Technologies in Woodlands, Texas. Both samples were collected and shipped on 4/19/2010 and were received on 4/20/2010 at 3.3 °C.

Sample Analysis and Data Review: The IDW sample (E4SQ7) was prepared and analyzed for Volatile (VOA), Semivolatile (SVOA), and Pesticide analytes according to CLP SOW SOM01.2, Modification Reference Numbers 1689.5, 1722.1, and 1723.0, and SW-846 TCLP Method 1311, and for Aroclors according to routine CLP SOW SOM01.2. The trip blank (E4SQ8) was prepared and analyzed for Volatiles only. The sample data were reviewed according to the NFG for SOM01.2, the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program, and Modification Reference Numbers 1689.5, 1722.1, and 1723.0.

Sample E4SQ7 is reported on the traffic report as a "waste" sample, requiring TCLP extraction/analysis for the Volatile, Semivolatile and Pesticide fractions. The Aroclor fraction required routine analysis according to CLP SOW SOM01.2. For the Aroclor fraction, sample E4SQ7 was prepared and reported on the Form 1 as a "soil" sample. The percent moisture for this sample was 26%.

According to Modified Analyses 1689.5, 1722.1, and 1723.0, associated with this SDG, the laboratory was required to provide the supporting data for the TCLP procedure (laboratory bench sheets, logs, and notebook pages). This includes the determination of extraction fluid, amount of liquid (if any) extracted from the solid phase, mass of solid material extracted, and volume of extraction fluid used. These items were missing from the data package

Although not requested in the Modified Analysis (MA), the laboratory reported tentatively identified compounds (TICs) for Volatile and Semivolatile analyses.

The MA reference number 1690.4 is reported on the Form 1s for the Aroclor analysis in error. It is not part of the Aroclor analysis that was performed according to the CLP SOW SOM01.2 (without MA).

MS/MSD evaluation: Although specified in MA 1689.5, no MS/MSD was prepared for Pesticide analysis. An MS/MSD was prepared for Aroclor analyses (E4SQ7MS/E4SQ7MSD). No sample results were qualified.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no samples were identified as field duplicate pairs.

This report is ordered by fraction in the following order: Volatiles, Semivolatiles, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R," "NJ," "UJ," "U," "J."

VOLATILES (LOW MEDIUM)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

The recovery of DMC compound 2-Butanone-d_5 was slightly below criteria. An examination of the raw data was performed, which confirmed that target compounds were not present in the blank.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

SEMIVOLATILES (PAH)

1. HOLDING TIME

No problems were found.

2. GC/MS TUNING AND GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

Semivolatile sample E4SQ7 is associated with an initial calibration in which the surrogate/DMC 2-Butanone-d_5 exceeded percent relative standard deviation (%RSD) criterion. No target compounds were affected. Detected and nondetected compounds are not qualified.

4. BLANKS

No problems found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

Although one of the automated reports specified that an MS/MSD should be prepared for semivolatile analysis, no MS/MSD was prepared, nor was one requested in MA 1723.0. No sample results were qualified.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

After reviewing the mass spectra and chromatograms, it appears that the semivolatile compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC/MS baseline indicated acceptable performance for the samples in this SDG.

12. ADDITIONAL INFORMATION

No additional information.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DEUTERATED MONITORING COMPOUND AND SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No problems were found.

6B. LABORATORY CONTROL SAMPLE

No problems found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

No samples were identified as field duplicates.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the pesticide compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

12. ADDITIONAL INFORMATION

No additional information.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

The following Aroclor sample is associated with an opening or closing CCV with % Difference exceeding criteria. Detected compounds are qualified "J." Nondetected compounds are qualified "UJ."

Aroclor-1248	E4SQ7DL

4. BLANKS

No problems were found

5. SURROGATE RECOVERY

No problems were found

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

For sample E4SQ7, the Aroclor matrix/matrix spike duplicate samples (E4SQ7MS/E4SQ7MSD) have percent recoveries that are greater than the upper acceptance limit for Aroclor-1016 on both columns due to high spike levels. Recoveries for Aroclor-1260 were acceptable. Detected compounds are qualified "J." Nondetected compounds are not qualified.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD DUPLICATE AND EQUIPMENT BLANK

Not applicable.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

The following Aroclor sample has compound concentrations above the MDL and below the CRQL. Detected compounds are qualified "J." Nondetected compounds are not qualified.

Aroclor-1254	E4SQ7DL

The following Aroclor samples have percent differences between analyte results in the range of 26-50%. Detected compounds are qualified "J."

Aroclor-1248	E4SQ7DL, E4SQ7MS, E4SQ7MSD

The following Aroclor samples have percent differences between analyte results in the range of 51-100%. Detected compounds are qualified "NJ."

Aroclor-1016	E4SQ7MS, E4SQ7MSD

The following Aroclor samples have percent differences between analyte results exceeding 50% and the results are below CRQL. Detected compounds are qualified "U." Nondetected compounds are not qualified. Reported sample concentrations have been elevated to the CRQL.

Aroclor-1260	E4SQ7DL
Aroclor-1254	E4SQ7DL

The following Aroclor samples have percent differences between analyte results exceeding 100%. Detected compounds are qualified "R."

Aroclor-1254	E4SQ7, E4SQ7MS, E4SQ7MSD

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor analyses was acceptable.

12. ADDITIONAL INFORMATION

Aroclor sample E4SQ7 reported a concentration for Aroclor-1248 that exceeded the calibration range of the instrument and was flagged "E" by the laboratory. As per the NFG, this result is flagged "J". The result from the dilute analysis should be used for result validation.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No MS/MSD was performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

No target herbicide compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

Case Number: 39668 SDG Number: E4SQ9
Site Name: Lincoln Park Laboratory: KAP, Technologies, Inc.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

CSC

To: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39668 MRN: 1689.5, 1722.1, and 1723.0 SDG Number: E4SR0

Number and Type of Samples: 2 Water Samples; TCLP and Routine CLP Analysis

Sample Numbers: E4SR0, E4SQ9

Laboratory: KAP Technologies, Inc.

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Receipt: One water sample and one wastewater sample, labeled E4SR0 and E4SQ9, were shipped to KAP Technologies, Inc., in The Woodlands, Texas. The samples were collected on 4/23/2010 and received at the facility on 04/24/10, intact, and at 4.6 ºC.

Sample Analysis and Data Review: One investigation-derived waste (IDW) sample, E4SQ9, was prepared and analyzed for Volatile, Semivolatile and Pesticide analytes according to CLP SOW SOM01.2, Modification Reference Numbers 1689.5, 1722.1, and 1723.0, and SW-846 TCLP Method 1311; and for Aroclors according to routine CLP SOW SOM01.2. One trip blank, E4SR0, was prepared and analyzed for Volatiles only. The sample data were reviewed according to the NFG for SOM01.2, the USEPA Region 2 SOPs for data validation of data, USEPA Contract Laboratory Program, and Modification Reference Numbers 1689.5, 1722.1, and 1723.0.

According to Modified Analyses 1689.5, 1722.1, and 1723.0, associated with this SDG, the laboratory was required to provide the supporting data for the TCLP procedure (laboratory bench sheets, logs, and notebook pages). This includes the determination of extraction fluid and volume of extraction fluid used. This information was missing from the data package.

The laboratory reported tentatively identified compounds (TICs) for the Volatile and Semivolatile Analysis, although not requested in the Modified Analysis (MA).

The MA reference number 1690.4 is reported on the Form 1s for the Aroclor analysis in error, and is not part of the Aroclor analyses which were performed according to the CLP SOW SOM01.2, without MA.

This report is ordered by fraction in the following order: Volatiles, Semivolatiles, Pesticides, and Aroclors.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by EXES NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by the EXES NFG is left intact. However, if at least one of the associated qualifiers described by EXES NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “NJ”, “UJ”, “U”, “J”.

VOLATILES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DMC RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No volatile MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. TRIP BLANK AND FIELD DUPLICATE

Trip blank E4SR0 was included with this SDG. No volatile target compounds were detected in this sample. All associated QC was acceptable. No field duplicate samples were collected for this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No target volatile compounds were detected in the samples included in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

SEMIVOLATILES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. DMC RECOVERY

Some deuterated monitoring compound recoveries were below the lower limit of the criteria window. These surrogates were not associated with target compounds for TCLP analysis. No results have been qualified.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No semivolatile MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

Not applicable.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

No problems were found.

9. COMPOUND IDENTIFICATION

No target semivolatile compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

No problems were found.

PESTICIDES

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No pesticide MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

No target pesticide compounds were detected in the sample in this SDG.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

No problems were found.

11. SYSTEM PERFORMANCE

The GC baseline for pesticide analyses was acceptable.

AROCLORS

1. HOLDING TIME

No problems were found.

2. GC INSTRUMENT PERFORMANCE

No problems were found.

3. CALIBRATION

No problems were found.

4. BLANKS

No problems were found.

5. SURROGATE RECOVERY

No problems were found.

6A. MATRIX SPIKE/MATRIX SPIKE DUPLICATE

No Aroclor MS/MSD was designated by the samplers or performed for this SDG.

6B. LABORATORY CONTROL SAMPLE

No problems were found.

7. FIELD BLANK AND FIELD DUPLICATE

No field duplicates or field blanks were collected for this SDG.

8. INTERNAL STANDARDS

Not applicable.

9. COMPOUND IDENTIFICATION

After reviewing the chromatograms, it appears that the Aroclor compounds were properly identified.

10. COMPOUND QUANTITATION AND REPORTED DETECTION LIMITS

In Aroclor sample E4SQ9, Aroclor-1260 had a concentration that was above the MDL and below the CRQL. The result for Aroclor-1260 in this sample is qualified "J."

Aroclor sample E4SQ9 had a percent difference between Aroclor-1248 results in the range of 26-50%. The result for Aroclor-1248 in sample E4SQ9 is qualified "J."

Aroclor sample E4SQ9 had a percent difference between Aroclor-1254 results that exceeded 100%. The result for Aroclor-1254 in sample E4SQ9 is qualified "R." "R" flagged results are removed from the "B" and "Z" files.

11. SYSTEM PERFORMANCE

The GC baseline for Aroclor performance was acceptable.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RS0 - ME4RS9, ME4RT0 - ME4RT6, and ME4RY2 - ME4RY4 were shipped to A4 Scientific, Inc. Samples ME4RS0 - ME4RS9 and ME4RT0-ME4RT6 were collected on 2/25/2010 and samples ME4RY2 - ME4RY4 were collected on 2/24/2010. All twenty sediment samples were received at the facility on 2/27/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4RS1 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4RT5/ME4RT6 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4RS3	Aluminum, Iron
ME4RS4	Aluminum, Iron
ME4RS5	Aluminum, Iron
ME4RS6	Aluminum, Iron
ME4RS7	Aluminum, Iron
ME4RS8	Aluminum, Iron
ME4RS9	Aluminum, Iron
ME4RT0	Aluminum, Iron
ME4RT1	Aluminum, Iron
ME4RT2	Aluminum, Iron
ME4RT3	Aluminum, Iron
ME4RT4	Aluminum, Iron

The following inorganic soil samples are associated with an CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4RS0	Mercury
ME4RS1	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RS0	Barium, Potassium
ME4RS1	Barium, Potassium
ME4RS2	Barium, Potassium
ME4RS3	Barium, Potassium
ME4RS4	Barium, Potassium
ME4RS5	Barium, Potassium
ME4RS6	Barium, Potassium

ME4RS7	Barium, Potassium
ME4RS8	Barium, Potassium
ME4RS9	Barium, Potassium
ME4RT0	Barium, Potassium
ME4RT1	Barium, Potassium
ME4RT2	Barium, Potassium
ME4RT3	Barium, Potassium
ME4RT4	Barium, Potassium
ME4RT5	Barium, Potassium
ME4RT6	Barium, Potassium
ME4RY2	Barium, Potassium
ME4RY3	Barium, Potassium
ME4RY4	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

Metal Analytes	ME4RT5 (mg/kg)	ME4RT6 (Field DUP) (mg/kg)	Both Results >5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	3530	4000	Y	12.5	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	3.7	3.6	N	-	0.1	≤2xCRQL
Barium	91.7	94.5	N	-	2.8	≤2xCRQL
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	1.9	1.3	N	-	0.6	≤2xCRQL
Calcium	76900	89900	Y	15.6	-	-
Chromium	58.4	34.5	Y	51.5	-	-
Cobalt	5	5.4	NA	NA	NA	NA
Copper	37.7	24.6	Y	42.1	-	-
Iron	9130	9130	Y	0	-	-
Lead	120	82.3	Y	37.3	-	-
Magnesium	31100	33900	Y	8.6	-	-
Manganese	404	402	Y	0.5	-	-
Mercury	0.2	0.12	N	-	0.08	≤2xCRQL
Nickel	18.6	12.6	N	-	6	≤2xCRQL
Potassium	443	509	NA	NA	NA	NA
Selenium	ND	ND	NA	NA	NA	NA
Silver	0.88	ND	N	-	0.34	≤2xCRQL
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	10.3	12.1	N	-	1.8	≤2xCRQL
Zinc	175	143	Y	20.1	-	-

6. ICP ANALYSIS

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RS3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RS7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RS8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RT3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RT4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

ME4RS0	Calcium
ME4RS1	Calcium
ME4RS3	Calcium
ME4RS4	Calcium
ME4RS5	Calcium

ME4RS6	Calcium
ME4RS7	Calcium
ME4RS8	Calcium
ME4RS9	Calcium
ME4RT0	Calcium
ME4RT1	Calcium
ME4RT3	Calcium
ME4RT4	Calcium
ME4RT5	Calcium
ME4RT6	Calcium
ME4RY2	Calcium
ME4RY3	Calcium
ME4RY4	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL).

All results below the CRQL are qualified "J".

ME4RS0	Arsenic, Cadmium, Cobalt, Potassium
ME4RS1	Cobalt, Mercury, Potassium
ME$RS2	Cobalt, Mercury, Potassium
ME4RS4	Arsenic, Cadmium, Cobalt, Potassium
ME4RS5	Arsenic, Cobalt, Mercury, Potassium, Silver
ME4RS6	Cobalt, Potassium
ME4RS7	Cobalt, Mercury, Potassium
ME4RS8	Potassium
ME4RS9	Arsenic, Cadmium, Cobalt, Mercury, Potassium
ME4RT0	Cobalt, Mercury, Potassium
ME4RT1	Cobalt, Mercury, Potassium, Silver
ME4RT2	Cobalt, Potassium, Silver
ME4RT3	Beryllium
ME4RT4	Arsenic, Cadmium, Cobalt, Nickel, Potassium
ME4RT5	Cobalt, Potassium, Silver
ME4RT6	Cobalt, Mercury, Potassium

ME4RY2	Arsenic, Cobalt, Mercury, Potassium
ME4RY3	Beryllium, Cobalt, Potassium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RT7-ME4RT 9, ME4RW0-ME4RW 9, ME4RX0-ME4RX 6 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 2/25/2010, and were received at the facility on 2/27/2010, intact and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4RT8 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4RT9/ME4RW0, MERW1/MERW2, and MERW3/MERW4 as field duplicate sets. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to also perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RT7	Barium, Potassium
ME4RT8	Barium, Potassium
ME4RT9	Barium, Potassium
ME4RW0	Barium, Potassium
ME4RW1	Barium, Potassium
ME4RW2	Barium, Potassium
ME4RW3	Barium, Potassium
ME4RW4	Barium, Potassium
ME4RW5	Barium, Potassium
ME4RW6	Barium, Potassium
ME4RW7	Barium, Potassium
ME4RW8	Barium, Potassium
ME4RW9	Barium, Potassium
ME4RX0	Barium, Potassium
ME4RX1	Barium, Potassium
ME4RX2	Barium, Potassium

ME4RX3 Barium, Potassium

ME4RX4 Barium, Potassium

ME4RX5 Barium, Potassium

ME4RX6 Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

Each of the following tables contains data for a sample/field duplicate pair in this SDG.

Metal analytes	ME4RT9 mg/kg	ME4RW0 mg/kg	Both Results> 5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	3750	4390	Y	15.7	-	-

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4RT9/ME4RW0 Copper, Zinc

ME4RW1/ME4RW2 Copper

ME4RW3/ME4RW4 Copper

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4RT8 Potassium

ME4RW1 Potassium

ME4RW2 Potassium

ME4RW3 Potassium

ME4RW5 Potassium

ME4RW6 Potassium

ME4RW7 Potassium

ME4RW8 Potassium

ME4RW9 Potassium

ME4RX4 Potassium

ME4RX5 Potassium

ME4RX6 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RT8 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RW1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RW2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RW9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4RX5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX6 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4RX6 Calcium, Manganese

7. SAMPLE RESULTS

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because

calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4RX6	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4RT7	Cadmium, Mercury
ME4RT8	Beryllium, Mercury
ME4RT9	Cobalt, Mercury, Potassium
ME4RW0	Cadmium, Cobalt, Mercury, Potassium
ME4RW1	Beryllium, Mercury
ME4RW2	Beryllium, Mercury
ME4RW3	Beryllium, Cadmium, Mercury
ME4RW4	Beryllium, Mercury
ME4RW5	Beryllium, Mercury
ME4RW6	Beryllium, Cadmium
ME4RW7	Beryllium, Mercury
ME4RW8	Beryllium, Mercury
ME4RW9	Beryllium, Mercury
ME4RX0	Cobalt, Potassium
ME4RX1	Beryllium, Cadmium, Mercury
ME4RX2	Beryllium, Cadmium, Cobalt, Potassium
ME4RX3	Beryllium, Mercury
ME4RX4	Beryllium, Mercury
ME4RX5	Beryllium, Mercury
ME4RX6	Beryllium, Mercury

Case Number: 39494
Site Name: Lincoln Park
SDG Number: ME4RT7
Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

DATE: 6/2/2010

SUBJECT: Review of Data
Received for Review on: 3/24/2010

FROM: Melody Jensen
Senior Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

Site Name: Lincoln Park

Case Number: 39494 SDG Number: ME4RX7

Number and Type of Samples: 5 Sediment Samples (Metals)

Sample Numbers: ME4RX7, ME4RX8, ME4RX9, ME4RY0, ME4RY1

Laboratory: A4 Scientific

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Five (5) sediment samples labeled ME4RX7, ME4RX8, ME4RX9 ME4RY0, and ME4RY were shipped to A4 Scientific, Inc. All five (5) samples were collected on February 25, 2010,and were received at the facility at 4°C on February 27, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4RX8 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicates were identified.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that samples ME4RX7 and ME4RY1 had more than 20 mL of free standing liquid on top. EPA directed the laboratory to decant the standing water and proceed with the analysis of the samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

Laboratory blanks for mercury had a negative concentration greater or equal to the MDL, but less than or equal to the CRQL. Samples reported as detected (ME4X8, ME4X9, ME4Y1), may have a negative bias and were therefore flagged as “J-”. The sample reported as not found (ME4RY0) may possibly be a false negative, but this cannot be determined from the data.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects found.

3. BLANKS

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL), but less than or equal to the CRQL. Detects may have a negative bias and are qualified as "J-".

ME4RX8 Mercury

ME4RX9 Mercury

ME4RY0 Mercury

ME4RY1 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic sediment samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RX7 Barium, Potassium

ME4RX8 Barium, Potassium

ME4RX9 Barium, Potassium

ME4RY0 Barium, Potassium

ME4RY1 Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) primary criteria. All associated sample results ≥ MDL but < 5× CRQL, and with an absolute difference between sample and duplicate > 2 × CRQL, are qualified "J". Non-detects are qualified "UJ".

ME4RX7 Chromium, Lead, Zinc

ME4RX8 Chromium, Lead, Zinc

ME4RX9 Chromium, Lead, Zinc

ME4RY0 Chromium, Lead, Zinc

ME4RY1 Chromium, Lead, Zinc

6. ICP ANALYSIS

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4RX7 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX8 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RX9 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RY0 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4RY1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

No defects were found due to ICP serial dilution.

7. SAMPLE RESULTS

The following inorganic sample has analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4RY0 Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but

on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4RY5 - ME4S05 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 2/26/2010 and were received on 3/2/2010, intact at the facility at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4RZ1 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4RZ3 and ME4RZ4 as field duplicates.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No issues were identified.

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4RY5	Barium, Sodium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4RY5	Copper, Mercury, Nickel
ME4RY6	Arsenic, Barium, Nickel, Vanadium
ME4RY7	Barium, Cobalt, Potassium, Vanadium
ME4RY8	Barium, Nickel, Vanadium
ME4RY9	Arsenic, Barium, Cadmium, Mercury, Nickel, Vanadium
ME4RZ0	Mercury, Vanadium
ME4RZ1	Cobalt
ME4RZ2	Mercury, Nickel, Vanadium
ME4RZ3	Vanadium
ME4RZ4	Vanadium
ME4RZ5	Arsenic, Barium, Cadmium, Cobalt, Mercury, Nickel, Vanadium
ME4RZ6	Barium, Cobalt, Potassium
ME4RZ7	Mercury, Nickel, Vanadium
ME4RZ8	Arsenic, Cadmium, Mercury, Nickel, Vanadium
ME4RZ9	Mercury, Nickel, Vanadium
ME4S00	Cobalt, Potassium

ME4S01	Cobalt, Potassium
ME4S03	Cadmium, Mercury, Vanadium
ME4S05	Barium, Cobalt, Potassium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SUBJECT: Review of Data
Received for Review on: 3/25/2010

FROM: Melody Jensen
Senior Scientist, CSC

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39494 MRN: None SDG Number: ME4S06

Number and Type of Samples: 5 Sediment Samples (Metals)

Sample Numbers: ME4S06, ME4S07, ME4S08, ME4S09, ME4S10,

Laboratory: A4 Scientific, Inc.

cc: Sara Goehl, EPA
Brenda Jones, EPA
Louis Blume, EPA
Dan Plomb, CH2M Hill
Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Five (5) sediment samples labeled ME4S06, ME4S07, ME4S08 ME4S09, and ME4S10 were shipped to A4 Scientific, Inc. All five (5) samples were collected on February 26, 2010, and were received at the facility at 4 °C on March 2, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4S07 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S07/ME4S08 as a field duplicate set.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that sample ME4S06 contained < 50% solids. EPA directed the laboratory to proceed with the analysis of the sample and report the results on a dry-weight basis using the percent solids determination.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is also less than or equal to the CRQL. Detects are qualified "U" and the sample result was raised to the CRQL.

ME4S06 Mercury

ME4S10 Mercury

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. The sample result is greater than the CRQL. No sample results are qualified based on this issue.

ME4S06 Aluminum, Iron

ME4S07 Aluminum, Iron, Mercury

ME4S08 Aluminum, Iron, Mercury

ME4S09 Aluminum, Iron, Mercury

ME4S10 Aluminum, Iron

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic sediment samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S06 Barium, Potassium

ME4S07 Barium, Potassium

ME4S08 Barium, Potassium

ME4S09 Barium, Potassium

ME4S10 Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found with the laboratory duplicate analysis.

Metal analytes	MES07 mg/kg	MES08 mg/kg	Both Results >5xCR	%RPD	Abs. Diff	Abs Diff Range
Aluminum	6890	6920	Y	0.4	-	-
Antimony	ND	ND	NA	NA	NA	NA

Potassium	751	763	NA	NA	NA	NA
Selenium	ND	ND	NA	NA	NA	NA
Silver	ND	ND	NA	NA	NA	NA
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	17.1	17	N	-	0.1	≤2xCRQL
Zinc	166	177	Y	6.4	-	-

6. ICP ANALYSIS

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S09 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S10 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

No defects were found for the ICP serial dilution.

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium and not perform diluted analyses solely to address calcium.. Sample results are qualified "J".

ME4S06	Calcium
ME4S07	Calcium
ME4S08	Calcium
ME4S09	Calcium
ME4S10	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

ME4S06	Cadmium, Cobalt, Mercury, Potassium
ME4S07	Beryllium, Cobalt, Potassium
ME4S08	Beryllium, Cobalt, Potassium
ME4S09	Beryllium, Cobalt, Potassium
ME4S10	Beryllium, Mercury

Case Number: 39494
Site Name: Lincoln Park
SDG Number: ME4S06
Laboratory: A4

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4S11- ME4S24, ME4S41-ME4S44, ME4S46, and ME4S48 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 03/01/2010, and were received at the facility on 03/03/2010, intact, and at 4 ºC.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S20 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4S14 and ME4S15 as field duplicates. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgement, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No issues were identified.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

SDG Summary

Sample Completeness and Receipt: Sixteen (16) sediment samples labeled ME4S25-ME4S27, ME4S29-ME4S36, ME4S38-ME4S40, ME4S49, and ME4S50 were shipped to A4 Scientific, Inc. All sixteen samples were collected on 03/01/2010 and were received at the facility on 03/03/2010, intact and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4S35 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4S39/ME4S40 as a field duplicate set. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples."

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No problems were found

2. CALIBRATION

No problems were found

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. Because sample results are significantly greater than the CRQL no sample results were qualified based on this issue.

ME4S27	Aluminum
ME4S29	Aluminum
ME4S30	Aluminum
ME4S31	Aluminum
ME4S32	Aluminum
ME4S33	Aluminum
ME4S34	Aluminum
ME4S36	Aluminum
ME4S38	Aluminum
ME4S39	Aluminum
ME4S40	Aluminum
ME4S49	Aluminum
ME4S50	Aluminum

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No Defects were found for matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S25	Barium, Potassium
ME4S26	Barium, Potassium
ME4S27	Barium, Potassium
ME4S29	Barium, Potassium
ME4S30	Barium, Potassium
ME4S31	Barium, Potassium

ME4S34	Barium, Potassium
ME4S35	Barium, Potassium
ME4S36	Barium, Potassium
ME4S38	Barium, Potassium
ME4S39	Barium, Potassium
ME4S40	Barium, Potassium

ME4S49 Barium
ME4S50 Barium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

The following table contains data for a sample/field duplicate pair in this SDG.

Analyte	ME4S39 (mg/kg)	ME4S40 (mg/kg)	Both Results> 5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	3360	2770	Y	19.2	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	3.1	2.6	N	-	0.5	≤2xCRQL
Barium	32.5	31.8	N	-	0.7	≤2xCRQL
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	0.29	0.41	NA	NA	NA	NA
Calcium	105000	83500	Y	22.8	-	-
Chromium	8	7.7	Y	3.8	-	-
Cobalt	7.7	5.4	N	-	2.3	≤2xCRQL
Copper	13.7	11	N	-	2.7	≤2xCRQL
Iron	9240	6960	Y	28.1	-	-
Lead	12.9	19.8	Y	42.2	-	-
Magnesium	54300	41600	Y	26.5	-	-
Manganese	606	444	Y	30.9	-	-
Mercury	0.042	ND	N	-	0.01	≤2xCRQL
Nickel	13.2	9.4	N	-	3.8	≤2xCRQL
Potassium	580	416	NA	NA	NA	NA
Selenium	ND	ND	NA	NA	NA	NA
Silver	ND	ND	NA	NA	NA	NA
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	13.9	10.5	N	-	3.4	≤2xCRQL
Zinc	43.6	50.5	Y	14.7	-	-

The following inorganic sample/field duplicate results are > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4S39/ME4S40 Lead

6. ICP ANALYSIS

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S33	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S34	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S38	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S39	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S40	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S49	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4S50	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4S25	Calcium
ME4S26	Calcium
ME4S27	Calcium
ME4S29	Calcium
ME4S30	Calcium
ME4S31	Calcium
ME4S32	Calcium
ME4S33	Calcium
ME4S35	Calcium
ME4S36	Calcium
ME4S38	Calcium
ME4S39	Calcium
ME4S40	Calcium
ME4S49	Calcium
ME4S50	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4S25	Cadmium, Cobalt, Mercury, Potassium
ME4S26	Cadmium, Cobalt, Mercury, Potassium
ME4S30	Cadmium, Cobalt, Mercury, Potassium
ME4S29	Potassium
ME4S31	Cobalt, Mercury, Potassium
ME4S32	Cobalt, Mercury, Potassium
ME4S38	Cobalt, Mercury, Potassium
ME4S33	Cadmium, Potassium
ME4S34	Arsenic, Cobalt, Mercury, Potassium
ME4S35	Cobalt, Mercury, Potassium, Silver
ME4S36	Cobalt, Mercury, Potassium, Silver
ME4S39	Cadmium, Mercury, Potassium
ME4S40	Cadmium, Cobalt, Potassium
ME4S49	Arsenic, Barium, Copper, Nickel, Vanadium
ME4S50	Arsenic, Barium, Nickel

Case Number: 39494 SDG Number: ME4S25
Site Name: Lincoln Park Laboratory: A4 Scientific, Inc.

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Sixteen (16) sediment samples labeled ME4S51-ME4S66 were shipped to A4 Scientific, Inc. All Sixteen (16) samples were collected on 3/2/2010, and were received at the facility on 3/4/2010, intact at 4° C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S60 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S56/ME4S57, and ME4S65/ME4S66 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic soil samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4S51	Mercury
ME4S52	Mercury

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4S62 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S51	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

SDG SUMMARY

Sample Completeness and Receipt: Thirteen (13) sediment samples labeled ME4S67-ME4S79 were shipped to A4 Scientific, Inc. All thirteen (13) samples were collected on 3/2/2010 and were received intact at the facility on 3/4/2010, at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4S67 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4S78 and ME4S79 as field duplicates.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. The following samples were qualified "UJ".

ME4S67	Mercury
ME4S68	Mercury
ME4S69	Mercury
ME4S70	Mercury
ME4S71	Mercury
ME4S72	Mercury
ME4S73	Mercury

ME4S71	Aluminum
ME4S72	Aluminum
ME4S73	Aluminum
ME4S74	Aluminum
ME4S75	Aluminum
ME4S76	Aluminum
ME4S77	Aluminum
ME4S78	Aluminum
ME4S79	Aluminum

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4S67	Calcium
ME4S68	Calcium
ME4S69	Calcium
ME4S70	Calcium
ME4S71	Calcium
ME4S72	Calcium
ME4S73	Calcium
ME4S74	Calcium
ME4S75	Calcium
ME4S76	Calcium
ME4S77	Calcium
ME4S78	Calcium
ME4S79	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J."

ME4S67	Arsenic, Barium, Cobalt, Sodium
ME4S68	Cobalt
ME4S69	Arsenic, Barium, Cadmium, Nickel, Vanadium
ME4S71	Nickel, Vanadium
ME4S72	Barium, Cobalt, Vanadium

ME4S79	Arsenic, Barium, Potassium

Case Number: 39494 SDG Number: ME4S67
Site Name: Lincoln Park Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4S80-ME4S81, ME4S83-ME4S99, and ME4SA0 were shipped to A4 Scientific, Inc. All twenty (20) samples were collected on 3/3/2010, and were received at the facility on 3/05/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4S95 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4S88/ME4S89 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as "soil" on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed the laboratory to report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4S80	Barium
ME4S81	Barium

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue

ME4S97 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4S81 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S83 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S84	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4S99	Cobalt, Potassium
ME4SA0	Beryllium, Cobalt, Potassium, Silver

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Eighteen (18) sediment samples labeled ME4SA1-ME4SB8 were shipped to A4 Scientific, Inc. All eighteen (18) samples were collected on 3/3/2010 and were received intact at the facility on 3/5/2010, at 4° C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, Sample ME4SB6 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified samples ME4SA3 and ME4SA6 as field duplicates, and ME4SB2 and ME4SB4 as a field duplicates.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic soil samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is also less than or equal to the CRQL. Hits are qualified "U". Sample result is raised to the CRQL.

ME4SA8	Mercury
ME4SB0	Mercury
ME4SB1	Mercury
ME4SB2	Mercury
ME4SB3	Mercury
ME4SB4	Mercury
ME4SB5	Mercury
ME4SB6	Mercury
ME4SB7	Mercury
ME4SB8	Mercury

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than CRQL. No samples were qualified based on this issue.

ME4SA1	Aluminum, Iron
ME4SA2	Aluminum, Iron
ME4SA3	Aluminum, Iron
ME4SA4	Aluminum, Iron
ME4SA5	Aluminum, Iron
ME4SA6	Aluminum, Iron
ME4SA7	Aluminum, Iron
ME4SA8	Aluminum, Iron
ME4SB6	Aluminum, Iron
ME4SA9	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic samples are associated with a matrix spike recovery which is outside expanded low criteria. However, post-digest spike percent recovery was more than or equal to the low limit. Results greater than the MDL are flagged "J". Results less than the MDL are flagged "UJ".

ME4SA1	Selenium
ME4SA2	Selenium
ME4SA3	Selenium
ME4SA4	Selenium

ME4SA5	Selenium
ME4SA6	Selenium

ME4SB8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4SA1	Calcium
ME4SA2	Calcium
ME4SA3	Calcium
ME4SA4	Calcium
ME4SA5	Calcium
ME4SA6	Calcium
ME4SA7	Calcium
ME4SA8	Calcium
ME4SA9	Calcium
ME4SB0	Calcium

ME4SB2	Calcium
ME4SB3	Calcium
ME4SB5	Calcium
ME4SB6	Calcium
ME4SB7	Calcium
ME4SB8	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SA1	Antimony, Cobalt, Mercury, Potassium
ME4SA2	Cadmium, Cobalt, Mercury, Potassium
ME4SA3	Cadmium, Cobalt, Mercury, Potassium
ME4SA6	Cadmium, Cobalt, Mercury, Potassium
ME4SB1	Cadmium, Cobalt, Mercury, Potassium
ME4SB4	Cadmium, Cobalt, Mercury, Potassium
ME4SA4	Beryllium, Cobalt, Potassium
ME4SA5	Antimony, Barium, Mercury, Potassium
ME4SA7	Arsenic, Barium, Mercury, Nickel
ME4SA8	Antimony, Barium, Cadmium, Cobalt, Mercury, Potassium
ME4SA9	Beryllium, Cobalt, Potassium, Silver
ME4SB0	Cobalt, Mercury, Potassium
ME4SB2	Beryllium, Cobalt, Mercury, Potassium
ME4SB3	Arsenic, Barium, Cobalt, Copper, Mercury, Nickel, Potassium
ME4SB5	Arsenic, Barium, Mercury, Nickel, Potassium
ME4SB6	Barium, Mercury, Nickel, Potassium
ME4SB7	Arsenic, Barium, Copper, Lead, Mercury, Nickel, Potassium
ME4SB8	Antimony, Beryllium, Mercury

Case Number: 39494 SDG Number: ME4SA1
Site Name: Lincoln Park Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SB9, ME4SC0, ME4SC2, ME4SC3, ME4SC4, ME4SC5, ME4SC6, ME4SC7, ME4SC8, ME4SC9, ME4SD0, ME4SD2, ME4SD3, ME4SD4, ME4SD5, ME4SD6, ME4SD7, ME4SD9, ME4SE0, and ME4SE1 were shipped to A4 Scientific, Inc. All twenty samples were collected on March 4, 2010, and were received at the facility at 4 °C on March 5, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SD2 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution). The relative percent difference (RPD) for aluminum and manganese exceeded the QC limits. In addition, the percent difference for aluminum exceeded the QC limits in the serial dilution. Interferences are suspected.

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SC5/ME4SC6 as a field duplicate pair.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

Although the automated NFG reports noted that sample ME4SD6 was associated with ICV and CCV standards that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. No defects were found.

3. BLANKS

Although the automated NFG reports noted that sample ME4SD6 was associated with initial or continuing calibration blanks that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. No defects were found.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

For the matrix spike, the RPD for aluminum and manganese exceeded the QC limits. Interferences are suspected.

Although the automated NFG reports noted that sample ME4SD6 was associated with matrix spikes and other laboratory control samples (LCS) that were not analyzed in the required frequency, examination of the hard copy reporting forms and the raw data showed no such discrepancy. Detects and non-detects are not flagged.

The following inorganic soil samples are associated with a solid LCS with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SB9	Barium, Potassium
ME4SC0	Barium, Potassium
ME4SC2	Barium, Potassium
ME4SC3	Barium, Potassium
ME4SC4	Barium, Potassium
ME4SC5	Barium, Potassium
ME4SC6	Barium, Potassium
ME4SC7	Barium, Potassium
ME4SC8	Barium, Potassium
ME4SC9	Barium, Potassium
ME4SD0	Barium, Potassium
ME4SD2	Barium, Potassium
ME4SD3	Barium, Potassium
ME4SD4	Barium, Potassium
ME4SD5	Barium, Potassium
ME4SD6	Barium, Potassium
ME4SD7	Barium, Potassium
ME4SD9	Barium, Potassium
ME4SE0	Barium, Potassium
ME4SE1	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

For the laboratory duplicate, the RPD for aluminum and manganese exceeded the quality control QC limits. Interferences are suspected.

Metal analytes	ME4SC5 mg/kg	ME4SC6 mg/kg	Both Results >5xCR	%RPD	Abs. Diff	Abs Diff Range
Aluminum	8520	8370	Y	1.8	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	5.9	4.9	N	-	1	=2xCRQL
Barium	122	111	N	-	11	=2xCRQL
Beryllium	0.44	0.44	NA	NA	NA	NA
Cadmium	3.6	3.2	N	-	0.4	=2xCRQL
Calcium	90100	94500	Y	4.8	-	-
Chromium	72	54.6	Y	27.5	-	-
Cobalt	7.6	6.7	NA	NA	NA	NA
Copper	55	49.9	Y	9.7	-	-
Iron	17500	15500	Y	12.1	-	-
Lead	163	163	Y	0	-	-
Magnesium	33000	34200	Y	3.6	-	-
Manganese	497	495	Y	0.4	-	-
Mercury	0.31	0.27	N	-	0.04	=2xCRQL
Nickel	33	21.3	N	-	11.7	>2xCRQL
Potassium	1000	993	N	-	7	=2xCRQL
Selenium	2.8	2.5	NA	NA	NA	NA
Silver	0.69	ND	N	-	0.02	=2xCRQL
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	20.2	19.6	N	-	0.6	=2xCRQL
Zinc	265	236	Y	11.6	-	-

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

6. ICP ANALYSIS

The percent difference for aluminum exceeded the QC limits in the serial dilution. Interferences are suspected.

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SC3 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SB9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SC7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SD7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE0 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic sample has analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG Summary

Sample Completeness and Receipt: Seven (7) sediment samples labeled ME4RX7, ME4RX8, ME4RX9 ME4RY0, and ME4RY were shipped to A4 Scientific, Inc. All seven samples were collected on March 5, 2010, and were received at the facility at 4 °C on March 6, 2010.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SC1 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SG1/ME4SG4 as a field duplicate pair.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually "sediment" samples.

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample and not to perform diluted analyses solely to address calcium.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment samples were reviewed for holding time violations using criteria developed for water samples. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

No defects were found.

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SC1	Barium, Potassium
ME4SG0	Barium, Potassium
ME4SG1	Barium, Potassium
ME4SG2	Barium, Potassium
ME4SG3	Barium, Potassium
ME4SG4	Barium, Potassium
ME4SG7	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found with the laboratory duplicate analysis.

Metal analytes	ME4SG1 mg/kg	ME4SG4 mg/kg	Both Results >5xCR	%RPD	Abs. Diff	Abs Diff Range
Aluminum	5050	5920	Y	15.9	-	-

Vanadium	16.2	21.8	N	-	5.6	≤2xCRQL
Zinc	128	171	Y	28.8	-	-

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

The following inorganic sample/field duplicate pair has results > 5×CRQL and RPD ≥ 35% but < 120%. These results are qualified "J."

ME4SG1/ME4SG4 Lead

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SG7 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SC1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SG0 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SG1 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SG2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SG3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SG4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SG7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

No defects were found for the ICP serial dilution.

7. SAMPLE RESULTS

The following inorganic sample has analyte concentrations which exceed the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium. Sample results are qualified "J".

ME4SC1	Calcium
ME4SG0	Calcium
ME4SG1	Calcium
ME4SG2	Calcium
ME4SG3	Calcium
ME4SG4	Calcium
ME4SG7	Calcium

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the CRQL and are qualified "J".

ME4SC1	Beryllium, Cobalt
ME4SG0	Cobalt, Mercury
ME4SG1	Beryllium
ME4SG2	Cadmium, Cobalt

ME4SG3	Cobalt
ME4SG4	Beryllium, Cobalt
ME4SG7	Beryllium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG SUMMARY

Sample Completeness and Receipt: Seventeen (17) sediment samples labeled ME4SE2 - ME4SE9 and ME4SF0 - ME4SF8 were shipped to A4 Scientific, Inc. Thirteen of the seventeen samples were collected on 3/4/2010 and the remaining four samples were collected on 3/5/2010. All seventeen (17) samples were received on 3/6/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SE2 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, we have identified ME4SE1/ME4SE2 as a field duplicate pair. Sample ME4SE1, the field duplicate for ME4SE2, was analyzed in SDG ME4SB9 and is qualified based on any QC failures in that SDG (as detailed in the data review report for SDG ME4SB9). Sample ME4SE2 was analyzed in the SDG reported here. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

The laboratory noted that all samples included small shell fragments, and that calcium levels were very high (approximately 600 ppm). EPA directed that the laboratory should report the initial analysis of calcium for each sample.

The laboratory noted that the chain-of-custody only specified analysis of “total metals.” EPA directed that the laboratory also perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, ‘J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

No defects were found for the calibration blanks or preparation blank

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic soil samples are associated with a solid laboratory control sample (LCS) with analyte-found amounts above the upper control limit criteria. However, because the true value of the LCS is less than or equal to the MDL, no sample results were qualified based on this issue.

ME4SE2	Barium, Potassium
ME4SE3	Barium, Potassium
ME4SE4	Barium, Potassium
ME4SE5	Barium, Potassium
ME4SE6	Barium, Potassium
ME4SE7	Barium
ME4SE8	Barium
ME4SE9	Barium
ME4SF0	Barium, Potassium
ME4SF1	Barium, Potassium
ME4SF2	Barium, Potassium
ME4SF3	Barium, Potassium
ME4SF4	Barium, Potassium
ME4SF5	Barium, Potassium
ME4SF6	Barium, Potassium
ME4SF7	Barium, Potassium
ME4SF8	Barium, Potassium

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

Sample ME4SE1, field duplicate for ME4SE2, was analyzed in SDG ME4SB9 and is qualified based on any QC failures in that SDG (as detailed in the data review report for SDG ME4SB9).

The following table contains data for a sample/field duplicate pair in this SDG.

Metal Analytes	ME4SE1 (mg/kg)	ME4SE2 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	7300	6090	Y	18.1	-	-
Antimony	ND	ND	NA	NA	NA	NA
Arsenic	6.6	6.5	N	-	0.1	≤2xCRQL
Barium	116	107	N	-	9	≤2xCRQL
Beryllium	0.38	0.38	NA	NA	NA	NA
Cadmium	3.1	2.8	N	-	0.3	≤2xCRQL

Chromium	81	59.4	Y	30.8	-	-
Cobalt	6.5	6.8	NA	NA	NA	NA
Copper	52.9	45	Y	16.1	-	-
Iron	15300	12600	Y	19.4	-	-
Lead	170	166	Y	2.4	-	-
Magnesium	32800	30200	Y	8.3	-	-
Manganese	519	525	Y	1.1	-	-
Mercury*	NA	NA	NA	NA	NA	NA
Nickel	25.7	22.8	N	-	2.9	≤2xCRQL
Potassium	902	762	N	-	140	≤2xCRQL
Selenium	3.2	ND	N	-	1.2	≤2xCRQL
Silver	1.6	ND	N	-	0.99	≤2xCRQL
Sodium	ND	ND	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	18.2	18.8	N	-	0.6	≤2xCRQL
Zinc	239	215	Y	10.6	-	-

*CSC was unable to locate data for mercury in SDG ME4SB9 for sample **ME4SE1** for this field duplicate comparison.

6. ICP ANALYSIS

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. .

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SE2 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE3 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE7 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE8 Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SE9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SF8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have calcium concentrations which exceeded the linear range. However, due to anticipated high calcium concentrations in samples for Case 39494, and because calcium is not an analyte of interest for this project, the laboratory was instructed to report the initial analyses for calcium.

Sample results are qualified "J".

ME4SE3	Calcium
ME4SE4	Calcium
ME4SE5	Calcium

ME4SE6	Calcium
ME4SE7	Calcium
ME4SE8	Calcium
ME4SE9	Calcium
ME4SF0	Calcium
ME4SF1	Calcium
ME4SF2	Calcium
ME4SF3	Calcium
ME4SF4	Calcium
ME4SF6	Calcium
ME4SF7	Calcium
ME4SF8	Calcium

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL).

All results below the CRQL are qualified "J".

ME4SE2	Beryllium, Cobalt, Potassium
ME4SE3	Mercury, Potassium
ME4SE4	Cobalt, Mercury, Potassium
ME4SE5	Beryllium, Cobalt, Potassium
ME4SE6	Cobalt, Potassium
ME4SE7	Antimony, Arsenic, Barium, Cadmium, Cobalt, Mercury, Nickel
ME4SE8	Arsenic, Barium, Cobalt, Copper, Mercury, Nickel
ME4SE9	Antimony, Arsenic, Barium, Cobalt, Copper, Mercury, Nickel
ME4SF0	Antimony, Arsenic, Barium, Cobalt, Mercury, Nickel, Potassium
ME4SF1	Cadmium, Cobalt, Mercury, Nickel, Potassium
ME4SF2	Cobalt, Potassium
ME4SF3	Cobalt, Potassium
ME4SF4	Cobalt, Mercury, Potassium
ME4SF5	Antimony, Beryllium, Silver
ME4SF6	Barium, Cadmium, Cobalt, Mercury, Potassium
ME4SF7	Barium, Cobalt, Mercury, Potassium
ME4SF8	Beryllium, Cadmium, Mercury

Case Number: 39494
SDG Number: ME4SE2
Site Name: Lincoln Park
Laboratory: A4

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Heather Hodach, CH2M Hill
Dave Shekoski, CH2M Hill
Huck Raddemann, CH2M Hill
Adrienne Unger, CH2M Hill
Judy Schofield, CSC

SDG SUMMARY

Sample Completeness and Receipt: Two (2) water samples labeled ME4SG5, and ME4SG6 were shipped to A4 Scientific, Inc. Both water samples were collected on 3/5/2010, and were received at the facility on 3/6/2010, intact, and at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As per the scheduling notification lab QC (i.e., matrix spike, duplicate, and serial dilution) was not required for these two water samples. Because these samples are equipment blanks, no samples were designated to be used for laboratory QC.

No field duplicates were collected for this SDG.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-“. In the special case where a result is affected by a “J+” and a “J-“ flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is ≥ MDL, but ≤ CRQL. The detected sample results are also ≥ MDL, but ≤ CRQL and are qualified "U" and the sample results are raised to the CRQL.

ME4SG5 Mercury
ME4SG6 Mercury

The following inorganic samples are associated with an CCB concentration which is ≥ MDL, but ≤ CRQL. The detected sample results are also ≥ MDL, but ≤ CRQL and are qualified "U" and the sample results are raised to the CRQL.

ME4SG5 Mercury
ME4SG6 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

No defects were found for the matrix spike sample.

The following inorganic samples were found in the SMO NFG report to have aqueous laboratory control sample percent recoveries above the upper limit of the expanded criteria. We were unable to confirm that the recoveries were above the upper limit of the expanded criteria and therefore no sample results are qualified based on this issue.

ME4SG5 Mercury
ME4SG6 Mercury

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

6. ICP ANALYSIS

No defects were found for the ICP analysis.

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".
ME4SG5 Mercury
ME4SG6 Mercury

Case Number: 39494
SDG Number: ME4SG5
Site Name: Lincoln Park
Laboratory: A4

SDG SUMMARY

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SG8-ME4SG9, ME4SH0-ME4SH9, and ME4SJ0-ME4SJ7 were shipped to Bonner Analytical Testing Company. All twenty sediment samples were collected on 4/14/2010. Samples ME4SG80-ME4SG9 and ME4SH0-ME4SH3 were received at the facility on 4/15/2010, intact at 4 °C, and samples ME4SH4-ME4SH9 and ME4SJ0-ME4SJ7 were received at the facility on 4/16/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SH9 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SG9/ME4SH0, ME4SH2/ME4SH3, and ME4SJ3/ME4SH4 as a field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SG8	Sodium
ME4SG9	Sodium
ME4SH0	Sodium
ME4SH2	Sodium
ME4SJ2	Sodium
ME4SJ5	Sodium

ME4SH1	Potassium, Sodium
ME4SH3	Potassium, Sodium
ME4SH4	Potassium, Sodium
ME4SH5	Potassium, Sodium
ME4SH6	Potassium, Sodium
ME4SH7	Potassium, Sodium
ME4SH8	Potassium, Sodium
ME4SH9	Potassium, Sodium
ME4SJ0	Potassium, Sodium
ME4SJ1	Potassium, Sodium
ME4SJ3	Potassium, Sodium
ME4SJ4	Potassium, Sodium
ME4SJ6	Potassium, Sodium
ME4SJ7	Potassium, Sodium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SG8	Potassium
ME4SG9	Potassium
ME4SH0	Potassium
ME4SH2	Potassium
ME4SJ2	Potassium
ME4SJ5	Potassium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SG8	Cadmium
ME4SG9	Cadmium
ME4SH0	Cadmium
ME4SH2	Cadmium
ME4SH7	Cadmium
ME4SH8	Cadmium
ME4SH9	Cadmium
ME4SJ5	Cadmium
ME4SJ6	Cadmium
ME4SJ7	Cadmium

ME4SH1	Barium, Cadmium, Nickel, Potassium
ME4SH3	Barium, Cadmium, Nickel, Potassium
ME4SH4	Barium, Cadmium, Nickel, Potassium

ME4SH5	Barium, Cadmium, Potassium

ME4SJ0	Barium, Cadmium
ME4SJ3	Barium, Cadmium
ME4SJ4	Barium, Cadmium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SG8	Barium, Nickel, Potassium, Zinc
ME4SG9	Barium, Nickel, Potassium, Zinc
ME4SH0	Barium, Nickel, Potassium, Zinc
ME4SH2	Barium, Nickel, Potassium, Zinc

ME4SH1	Zinc
ME4SH3	Zinc
ME4SH4	Zinc

ME4SH5	Nickel, Zinc

ME4SH6	Cadmium

ME4SJ1	Barium, Cadmium
ME4SJ2	Barium, Cadmium

ME4SJ5	Barium
ME4SJ6	Barium
ME4SJ7	Barium

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a matrix spike recovery which is outside primary low criteria. Sample results < MDL are flagged “UJ”.

ME4SG8	Antimony

ME4SG9	Antimony
ME4SH0	Antimony
ME4SH1	Antimony
ME4SH2	Antimony
ME4SH3	Antimony
ME4SH4	Antimony
ME4SH5	Antimony
ME4SH6	Antimony
ME4SH7	Antimony
ME4SH8	Antimony
ME4SH9	Antimony
ME4SJ0	Antimony
ME4SJ1	Antimony
ME4SJ2	Antimony
ME4SJ3	Antimony
ME4SJ4	Antimony
ME4SJ5	Antimony
ME4SJ6	Antimony
ME4SJ7	Antimony

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) of ≤ 35%. Associated sample results ≥ CRQL are flagged "J".

ME4SG8	Chromium
ME4SG9	Chromium
ME4SH0	Chromium
ME4SH1	Chromium
ME4SH2	Chromium
ME4SH3	Chromium
ME4SH4	Chromium
ME4SH5	Chromium
ME4SH6	Chromium
ME4SH7	Chromium
ME4SH8	Chromium
ME4SH9	Chromium
ME4SJ0	Chromium
ME4SJ1	Chromium
ME4SJ2	Chromium
ME4SJ3	Chromium
ME4SJ4	Chromium
ME4SJ5	Chromium
ME4SJ6	Chromium
ME4SJ7	Chromium

Samples ME4SG9/ME4SH0, ME4SH2/ME4SH3, and ME4SJ3/ME4SH4 were identified as field duplicates**.** Results are summarized in the following tables.

ME4SG9 and ME4SH0

Metal Analytes	ME4SG9 (mg/kg)	ME4SH0 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	6190	7510	Y	19.3	-	-

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4SH2/ME4SH3 Aluminum, Copper, Lead, Zinc

ME4SJ3/ME4SJ4 Aluminum, Chromium, Lead

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SG8 Potassium
ME4SG9 Potassium
ME4SH0 Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SG8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SG9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SH9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SJ1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The samples in this SDG were analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD.

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SG8	Beryllium, Cadmium, Selenium, Sodium
ME4SG9	Cadmium, Cobalt, Selenium, Sodium
ME4SH0	Beryllium, Cadmium, Cobalt, Selenium, Sodium
ME4SH1	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH2	Cadmium, Cobalt, Selenium, Sodium
ME4SH3	Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH4	Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SH5	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SH6	Cobalt, Potassium, Selenium, Sodium
ME4SH7	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SH8	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium

ME4SH9	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ0	Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Selenium, Sodium
ME4SJ1	Cobalt, Potassium, Selenium, Sodium
ME4SJ2	Beryllium, Cobalt, Selenium, Sodium
ME4SJ3	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ4	Barium, Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ5	Cadmium, Cobalt, Selenium, Sodium
ME4SJ6	Cadmium, Cobalt, Potassium, Selenium, Sodium
ME4SJ7	Cadmium, Cobalt, Potassium, Selenium, Sodium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SJ8, ME4SJ9, ME4SK0 - ME4SK9, ME4SK9D, ME4SK9S, and ME4SL0 - ME4SL8 were shipped to Bonner Analytical Testing Company. The samples were collected on April 14, 2010 and April 15, 2010, and were received at the facility on April 16, 2010, intact, and at 4 °C

Sample Analysis and Data Review: The sample was analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SK9 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SL2/ME4L3 as a field duplicate pair. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1 and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SJ8	Potassium
ME4SJ9	Potassium
ME4SK0	Potassium
ME4SK2	Potassium
ME4SK3	Potassium
ME4SK4	Potassium
ME4SK5	Potassium
ME4SK6	Potassium
ME4SK8	Potassium
ME4SK9	Potassium
ME4SL0	Potassium
ME4SL2	Potassium
ME4SL3	Potassium
ME4SL4	Potassium
ME4SL5	Potassium
ME4SL6	Potassium
ME4SL7	Potassium
ME4SL8	Potassium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SK1	Potassium
ME4SL1	Potassium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SK6	Barium
ME4SK8	Barium
ME4SL2	Barium, Cadmium
ME4SL3	Barium, Cadmium
ME4SL4	Barium, Cadmium
ME4SL5	Barium, Cadmium
ME4SL7	Barium, Cadmium

ME4SL6 Cadmium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SK9 Barium
ME4SL0 Barium, Cadmium
ME4SL1 Barium, Cadmium
ME4SL6 Barium
ME4SL8 Barium, Cadmium

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. No sample results were qualified based on this issue.

ME4SJ8 Mercury
ME4SJ9 Mercury
ME4SK0 Mercury
ME4SK1 Mercury
ME4SK2 Mercury
ME4SK3 Mercury
ME4SK4 Mercury
ME4SK5 Mercury
ME4SK6 Mercury
ME4SK8 Mercury
ME4SK9 Mercury
ME4SL0 Mercury
ME4SL1 Mercury
ME4SL2 Mercury
ME4SL3 Mercury
ME4SL4 Mercury
ME4SL5 Mercury
ME4SL6 Mercury
ME4SL7 Mercury
ME4SL8 Mercury

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

The following inorganic samples are associated with a matrix spike recovery which is outside of the expanded low criteria. Sample results > MDL are flagged "J", and sample results ≤ MDL are flagged "UJ".

ME4SJ8 Antimony
ME4SJ9 Antimony
ME4SK0 Antimony
ME4SK1 Antimony
ME4SK2 Antimony
ME4SK3 Antimony
ME4SK4 Antimony
ME4SK5 Antimony

ME4SK6	Antimony
ME4SK8	Antimony
ME4SK9	Antimony
ME4SL0	Antimony
ME4SL1	Antimony
ME4SL2	Antimony
ME4SL3	Antimony
ME4SL4	Antimony
ME4SL5	Antimony
ME4SL6	Antimony
ME4SL7	Antimony
ME4SL8	Antimony

The following inorganic samples are associated with a matrix spike recovery which is outside of the primary low criteria. However, post-digest spike recovery was more than or equal to the low limit. Sample results > MDL are flagged "J".

ME4SJ8	Chromium, Zinc
ME4SJ9	Chromium, Zinc
ME4SK0	Chromium, Zinc
ME4SK1	Chromium, Zinc
ME4SK2	Chromium, Zinc
ME4SK3	Chromium, Zinc
ME4SK4	Chromium, Zinc
ME4SK5	Chromium, Zinc
ME4SK6	Chromium, Zinc
ME4SK8	Chromium, Zinc
ME4SK9	Chromium, Zinc
ME4SL0	Chromium, Zinc
ME4SL1	Chromium, Zinc
ME4SL2	Chromium, Zinc
ME4SL3	Chromium, Zinc
ME4SL4	Chromium, Zinc
ME4SL5	Chromium, Zinc
ME4SL6	Chromium, Zinc
ME4SL7	Chromium, Zinc
ME4SL8	Chromium, Zinc

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results which did not meet relative percent difference (RPD) of ≤ 35%. Associated sample results ≥ CRQL are flagged "J".

ME4SJ8	Lead, Zinc
ME4SJ9	Lead, Zinc
ME4SK0	Lead, Zinc
ME4SK1	Lead, Zinc
ME4SK2	Lead, Zinc
ME4SK3	Lead, Zinc

ME4SK4	Lead, Zinc
ME4SK5	Lead, Zinc
ME4SK6	Lead, Zinc
ME4SK8	Lead, Zinc
ME4SK9	Lead, Zinc
ME4SL0	Lead, Zinc
ME4SL1	Lead, Zinc
ME4SL2	Lead, Zinc
ME4SL3	Lead, Zinc
ME4SL4	Lead, Zinc
ME4SL5	Lead, Zinc
ME4SL6	Lead, Zinc
ME4SL7	Lead, Zinc
ME4SL8	Lead, Zinc

Samples ME4SL2/ME4SL3 were identified as a field duplicate pair. Results are summarized in the following table:

ME4SL2 and ME4SL3

Metal	ME4SL2 (mg/kg)	ME4SL3 (mg/kg)	Both Results >5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	1610	1240	Y	26	-	-
Antimony	ND	ND	N	-	0	≤2xCRQL
Arsenic	0.89	1	NA	NA	NA	NA
Barium	23.6	23.8	N	-	0.2	≤2xCRQL
Beryllium	0.057	0.065	NA	NA	NA	NA
Cadmium	0.59	0.59	N	-	0	≤2xCRQL
Calcium	75700	82000	Y	8	-	-
Chromium	8.1	7.6	Y	6.4	-	-
Cobalt	2.4	2.3	NA	NA	NA	NA
Copper	4.8	4.6	N	-	0.2	≤2xCRQL
Iron	4020	3560	Y	12.1	-	-
Lead	10.8	15.9	Y	38.2	-	-
Magnesium	34500	34900	Y	1.2	-	-
Manganese	272	227	Y	18	-	-
Mercury	ND	0.058	N	-	0.01	≤2xCRQL
Nickel	4	3.3	NA	NA	NA	NA
Potassium	590	594	N	-	4	≤2xCRQL
Selenium	ND	ND	NA	NA	NA	NA
Silver	ND	ND	NA	NA	NA	NA
Sodium	134	147	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	5.4	5.5	NA	NA	NA	NA
Zinc	30.4	23.3	N	-	7.1	≤2xCRQL

The following inorganic sample/field duplicate pairs have results > 5xCRQL and RPD ≥ 35% but < 120%. These results are qualified "J".

ME4SL2/ME4SL3 Lead

6. ICP ANALYSIS

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4SJ8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SJ9	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK0	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK1	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK2	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK3	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK4	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK5	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK6	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SK9	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL0	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL1	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL2	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL3	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL4	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL5	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL6	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL7	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc
ME4SL8	Arsenic, Calcium, Chromium, Cobalt, Iron, Lead, Magnesium, Manganese, Nickel, Zinc

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SJ8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SJ9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SK9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SL1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SL8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SJ8	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SJ9	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK0	Beryllium, Cobalt, Mercury, Sodium
ME4SK1	Beryllium, Cobalt, Silver, Sodium
ME4SK2	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK3	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK4	Arsenic, Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK5	Beryllium, Cadmium, Cobalt, Mercury, Sodium
ME4SK6	Arsenic, Beryllium, Cadmium, Cobalt, Nickel, Sodium
ME4SK8	Beryllium, Cadmium, Cobalt, Mercury, Sodium, Vanadium
ME4SK9	Beryllium, Cobalt, Mercury, Sodium
ME4SK9D	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SL0	Beryllium, Cobalt, Mercury, Sodium
ME4SL1	Beryllium, Cobalt, Sodium

ME4SL2	Arsenic, Beryllium, Cobalt, Nickel, Sodium, Vanadium
ME4SL3	Arsenic, Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL4	Arsenic, Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL5	Beryllium, Cobalt, Mercury, Nickel, Sodium, Vanadium
ME4SL6	Beryllium, Cobalt, Mercury, Sodium
ME4SL7	Arsenic, Beryllium, Cobalt, Nickel, Sodium, Vanadium
ME4SL8	Beryllium, Cobalt, Mercury, Sodium

TO: Data User: GLNPO

We have reviewed the data for the following case:

SITE Name: Lincoln Park

Case Number: 39668 MRN: NA SDG Number: ME4SL9

Number and Type of Samples: 20 Sediment Samples (Metals)

Sample Numbers: ME4SL9, ME4SM0, ME4SM1, ME4SM2, ME4SM3, ME4SM4, ME4SM5, ME4SM6, ME4SM7, ME4SM8, ME4SM9, ME4SN0, ME4SN1, ME4SN2, ME4SN3, ME4SN4, ME4SN5, ME4SN6, ME4SN7, ME4SN8

Laboratory: Bonner Analytical Testing Co.

SDG Summary

Sample Completeness and Receipt: Twenty (20) sediment samples labeled ME4SL, ME4SM0-ME4SM9, and ME4SN0-ME4SN8 were shipped to Bonner Analytical Testing Co. Six (6) samples labeled ME4SL, ME4SM0-ME4SM4 were collected on 04/15/2010 and were received at the facility on 04/16/2010, intact and at 4 °C. Fourteen (14) samples labeled ME4SM5-ME4SM9 and ME4SN0-ME4SN8 were collected on 04/15/2010 and were received at the facility on 04/17/2010, intact and at 4 °C

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

As designated by the samplers, sample ME4SM9 was used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SM0/ME4SM, ME4SM6/ME4SM71 and ME4SN5/ME4SN6 as field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1a and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.”

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. Samples > CRQL are qualified "J-". Samples < MDL are qualified "UJ-".

ME4SL9	Mercury
ME4SM0	Mercury
ME4SM1	Mercury
ME4SM2	Mercury
ME4SM3	Mercury
ME4SM4	Mercury
ME4SM5	Mercury
ME4SM6	Mercury
ME4SM7	Mercury
ME4SM8	Mercury
ME4SM9	Mercury
ME4SN0	Mercury
ME4SN1	Mercury
ME4SN2	Mercury
ME4SN3	Mercury
ME4SN4	Mercury
ME4SN5	Mercury
ME4SN6	Mercury
ME4SN7	Mercury
ME4SN8	Mercury

The following inorganic samples are associated with a CCB analyte with negative concentration whose absolute value is greater than or equal to the method detection limit (MDL) but less than or equal to the CRQL. Samples > CRQL are qualified "J-". Samples < MDL are qualified "UJ-".

ME4SL9	Mercury
ME4SM0	Mercury

ME4SM3	Mercury
ME4SM4	Mercury
ME4SM5	Mercury
ME4SM6	Mercury
ME4SM7	Mercury
ME4SM8	Mercury
ME4SM9	Mercury
ME4SN0	Mercury

ME4SN1	Mercury
ME4SN2	Mercury

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

No defects were found with the lab control sample. The following inorganic samples are associated with a matrix spike recovery outside primary high criteria. Post-digest spike sample was either not required or it was required but not analyzed. Hits are qualified "J+".

ME4SM4	Mercury
ME4SM5	Mercury
ME4SM6	Mercury
ME4SM9	Mercury
ME4SN2	Mercury
ME4SN3	Mercury
ME4SN4	Mercury
ME4SN5	Mercury
ME4SN7	Mercury

The following inorganic samples are associated with a matrix spike recovery which is outside primary low criteria. Non-detects are flagged "UJ".

ME4SL9	Selenium
ME4SM0	Selenium
ME4SM1	Selenium
ME4SM2	Selenium
ME4SM3	Selenium
ME4SM4	Selenium
ME4SM5	Selenium
ME4SM6	Selenium
ME4SM7	Selenium
ME4SM8	Selenium
ME4SM9	Selenium

ME4SN1	Selenium
ME4SN2	Selenium
ME4SN3	Selenium
ME4SN4	Selenium
ME4SN5	Selenium
ME4SN6	Selenium
ME4SN7	Selenium
ME4SN8	Selenium

The following inorganic samples are associated with a matrix spike recovery which is outside primary low criteria. However, post-digest spike percent recovery was more than or equal to the low limit. Detects are flagged "J".

ME4SL9	Cobalt, Nickel
ME4SM0	Cobalt, Nickel
ME4SM1	Cobalt, Nickel
ME4SM2	Cobalt, Nickel

ME4SM3	Cobalt, Nickel
ME4SM4	Cobalt, Nickel
ME4SM5	Cobalt, Nickel
ME4SM6	Cobalt, Nickel
ME4SM7	Cobalt, Nickel
ME4SM8	Cobalt, Nickel
ME4SM9	Cobalt, Nickel
ME4SN0	Cobalt, Nickel
ME4SN1	Cobalt, Nickel
ME4SN2	Cobalt, Nickel
ME4SN3	Cobalt, Nickel
ME4SN4	Cobalt, Nickel
ME4SN5	Cobalt, Nickel
ME4SN6	Cobalt, Nickel
ME4SN7	Cobalt, Nickel
ME4SN8	Cobalt, Nickel

The following inorganic samples are associated with a matrix spike recovery which is outside expanded low criteria. Post-digest spike percent recovery was also less than the low limit. Detects are flagged "J-" and non-detects are flagged "R".

ME4SL9	Antimony

ME4SN3	Antimony
ME4SN4	Antimony
ME4SN5	Antimony
ME4SN6	Antimony
ME4SN7	Antimony
ME4SN8	Antimony

5. LABORATORY AND FIELD DUPLICATE

No defects were found for the lab duplicate sample.

The following tables contain data for a field duplicate pair in this SDG.

ME4SM0 and ME4SM1

Metal	ME4SM0 (mg/kg)	ME4SM1 (mg/kg)	Both Results >5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	908	933	Y	2.7	-	-
Antimony	ND	ND	N	-	0.2	≤2xCRQL
Arsenic	0.88	1	NA	NA	NA	NA

Iron	4060	3720	Y	8.7	-	-
Lead	27.5	20.2	Y	30.6	-	-
Magnesium	31600	29000	Y	8.6	-	-
Manganese	212	198	Y	6.8	-	-
Mercury	0.078	ND	N	-	0.02	≤2xCRQL
Nickel	5.1	3.8	NA	NA	NA	NA
Potassium	258	252	NA	NA	NA	NA
Selenium	ND	ND	N	-	0	≤2xCRQL
Silver	ND	ND	NA	NA	NA	NA
Sodium	133	128	NA	NA	NA	NA
Thallium	ND	ND	NA	NA	NA	NA
Vanadium	7.2	5.3	N	-	1.9	≤2xCRQL
Zinc	47.8	46.5	Y	2.8	-	-

ND = Not detected
NA = Not applicable (both results are below the sample-specific CRQL)

The following inorganic sample/field duplicate pairs have a result > 5xCRQL and an absolute difference ≥ 4xCRQL. These results are qualified “R”.

ME4SM0/ ME4SM1 Zinc

ME4SN5/ ME4SN6 Copper

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results were qualified based on this issue.

ME4SM4	Potassium
ME4SN7	Sodium

The following inorganic samples have one or more interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results. Associated detects ≥MDL for all analytes (except mercury) are qualified "J+". Results <MDL are not qualified.

ME4SL9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SM8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SM9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SN8	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SL9	Barium, Beryllium, Cadmium, Cobalt, Sodium
ME4SM3	Barium, Beryllium, Cadmium, Cobalt, Sodium

ME4SM0	Arsenic, Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Sodium, Vanadium
ME4SM1	Arsenic, Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Sodium
ME4SN5	Arsenic, Cadmium, Cobalt, Mercury, Nickel, Potassium, Sodium
ME4SM2	Beryllium, Cadmium, Cobalt, Sodium
ME4SM4	Beryllium, Cobalt, Mercury, Sodium
ME4SM5	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SM6	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SN2	Beryllium, Cadmium, Cobalt, Mercury, Potassium, Sodium
ME4SM7	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SM8	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN0	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN1	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SN8	Beryllium, Cadmium, Cobalt, Potassium, Sodium
ME4SM9	Beryllium, Cobalt, Potassium, Silver, Sodium
ME4SN3	Beryllium, Cobalt, Potassium, Sodium
ME4SN4	Beryllium, Cobalt, Potassium, Sodium
ME4SN6	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SN7	Beryllium, Cobalt

8. Serial Dilution

The following inorganic samples are associated with an ICP serial dilution percent difference which is not in criteria. The detected serial dilution result is less than the initial sample result. Hits are qualified "J" and non-detects are qualified "UJ".

ME4SL9	Arsenic
ME4SM0	Arsenic
ME4SM1	Arsenic
ME4SM2	Arsenic
ME4SM3	Arsenic
ME4SM4	Arsenic
ME4SM5	Arsenic
ME4SM6	Arsenic
ME4SM7	Arsenic
ME4SM8	Arsenic
ME4SM9	Arsenic
ME4SN0	Arsenic
ME4SN1	Arsenic
ME4SN2	Arsenic
ME4SN3	Arsenic
ME4SN4	Arsenic

ME4SN5	Arsenic
ME4SN6	Arsenic
ME4SN7	Arsenic
ME4SN8	Arsenic

The following inorganic samples are associated with an ICP serial dilution percent difference which is not in criteria. The serial dilution result is greater than the sample result, indicating a potential negative interference. Hits are qualified "J-" and non-detects are qualified "UJ-".

ME4SL9	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM0	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM1	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM2	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM3	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM4	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM5	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM6	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM7	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM8	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SM9	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN0	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN1	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN2	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN3	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN4	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN5	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN6	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN7	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc
ME4SN8	Aluminum, Barium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Zinc

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

SDG SUMMARY

Sample Completeness and Receipt: Seventeen (17) sediment samples labeled ME4SN9, ME4SP0-ME4SP9, and ME4SQ0-ME4SQ5 were shipped to Bonner Analytical Testing Company. All seventeen sediment samples were collected on 4/16/2010 and were received at the facility on 4/17/2010, intact at 4 °C.

Sample Analysis and Data Review: All samples were analyzed for metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Sample ME4SP6 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, we have identified ME4SP0/ME4SP1 and ME4SP8/ME4SP9 as a field duplicate pairs. No field blanks were collected for this SDG.

The sample matrix is reported as “soil” on Form 1s and in the EDD for the samples included in this SDG. The samples are actually “sediment” samples.

The laboratory noted that the chain-of-custody only specified analysis of total metals. EPA directed the laboratory to perform analysis for mercury, per the Scheduling Notification Form.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

No defects were found.

2. CALIBRATION

No defects were found for the calibration or the CRQL standard.

3. BLANKS

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SN9	Potassium, Sodium
ME4SP0	Potassium, Sodium
ME4SP1	Potassium, Sodium
ME4SP2	Potassium, Sodium
ME4SP3	Potassium, Sodium
ME4SP4	Potassium, Sodium
ME4SP5	Potassium, Sodium
ME4SQ2	Potassium, Sodium
ME4SP6	Antimony, Sodium
ME4SQ1	Potassium
ME4SP7	Sodium
ME4SP8	Sodium
ME4SP9	Sodium
ME4SQ0	Sodium
ME4SQ3	Sodium
ME4SQ4	Sodium
ME4SQ5	Sodium

The following inorganic samples are associated with an ICB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SP6	Potassium
ME4SP7	Potassium
ME4SP8	Potassium
ME4SP9	Potassium
ME4SQ0	Potassium
ME4SQ3	Potassium
ME4SQ4	Potassium
ME4SQ5	Potassium
ME4SQ1	Sodium

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Associated detects ≥ MDL and ≤ CRQL are qualified "U". Sample results are raised to the CRQL.

ME4SN9	Barium, Potassium

ME4SP0	Barium, Potassium
ME4SP1	Barium, Potassium
ME4SP3	Barium, Potassium
ME4SP4	Barium, Potassium
ME4SP2	Potassium
ME4SP5	Potassium
ME4SP6	Antimony

The following inorganic samples are associated with a CCB concentration which is less than or equal to the CRQL. Sample result is greater than the CRQL. No sample results were qualified based on this issue.

ME4SN9	Iron
ME4SP0	Iron
ME4SP1	Iron
ME4SP3	Iron

ME4SQ0	Barium

4. MATRIX SPIKE/MATRIX SPIKE DUPLICATE AND LAB CONTROL SAMPLE

The following inorganic soil samples are associated with a matrix spike recovery which is outside of the expanded low criteria. Sample results > MDL are flagged "J", and sample results ≤ MDL are flagged "UJ".

ME4SN9	Antimony
ME4SP0	Antimony
ME4SP1	Antimony
ME4SP2	Antimony
ME4SP3	Antimony
ME4SP4	Antimony
ME4SP5	Antimony
ME4SP7	Antimony
ME4SP8	Antimony
ME4SP9	Antimony
ME4SQ0	Antimony
ME4SQ1	Antimony
ME4SQ2	Antimony
ME4SQ3	Antimony
ME4SQ4	Antimony
ME4SQ5	Antimony

The following inorganic sample results are associated with a matrix spike recovery which is below low criteria. However, the sample result is also associated with a blank contamination, for

which it has been qualified "U" and its result raised to the CRQL. Therefore, the result for this sample was not further qualified for the matrix spike recovery.

ME4SP6 Antimony

No defects were found for the laboratory control sample.

5. LABORATORY AND FIELD DUPLICATE

The following inorganic samples are associated with duplicate results that have an absolute difference (AD) of greater than 2X the CRQL between the sample and duplicate values. Associated sample results ≥ MDL and < 5X CRQL are flagged "J" and samples < MDL are flagged "UJ".

ME4SN9 Mercury
ME4SP0 Mercury
ME4SP1 Mercury
ME4SP2 Mercury
ME4SP3 Mercury
ME4SP4 Mercury
ME4SP5 Mercury
ME4SP6 Mercury
ME4SP7 Mercury
ME4SP8 Mercury
ME4SP9 Mercury
ME4SQ0 Mercury
ME4SQ1 Mercury
ME4SQ2 Mercury
ME4SQ3 Mercury
ME4SQ4 Mercury
ME4SQ5 Mercury

Samples ME4SP0/ME4SP1 and ME4SP8/ME4SP9 were identified as field duplicates**.** Results are summarized in the following tables.

ME4SP0/ME4SP1

Metal Analytes	ME4SP0 (mg/kg)	ME4SP1 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Aluminum	1380	1400	Y	1.4	-	-
Antimony	ND	ND	N	-	0.2	≤2xCRQL
Arsenic	1.2	1.1	NA	NA	NA	NA
Barium	15.8	13	NA	NA	NA	NA
Beryllium	ND	ND	NA	NA	NA	NA
Cadmium	0.18	0.19	NA	NA	NA	NA
Calcium	71600	79000	Y	9.8	-	-
Chromium	8.9	8.3	Y	7	-	-
Cobalt	2.6	3.8	NA	NA	NA	NA
Copper	3.8	4	N	-	0.2	≤2xCRQL
Iron	4090	4190	Y	2.4	-	-
Lead	35.1	138	Y	118.9	-	-

Metal Analytes	ME4SP0 (mg/kg)	ME4SP1 (Field DUP) (mg/kg)	Both Results>5xCRQL	%RPD	Abs Diff	Abs Diff Range
Manganese	208	241	Y	14.7	-	-
Mercury	ND	0.063	N	-	0.07	≤2xCRQL

6. ICP ANALYSIS

The following inorganic samples have elements other than Al, Ca, Fe, and Mg at concentrations higher than 10 mg/L that may cause potential interference. No sample results are qualified based on this issue.

ME4SP6	Potassium
ME4SQ5	Potassium

The following inorganic samples have one or more known interferents (Al, Ca, Fe, or Mg) present at concentrations more than true amounts added in the ICS solution, which may cause a high bias in associated sample results.

Associated detects ≥ MDL for all analytes (except mercury) are qualified "J+". Results < MDL are not qualified.

ME4SN9	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP6	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SP7	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ0	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ1	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ2	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ3	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc
ME4SQ4	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

ME4SQ5	Aluminum, Antimony, Arsenic, Barium, Beryllium, Cadmium, Calcium, Chromium, Cobalt, Copper, Iron, Lead, Magnesium, Manganese, Nickel, Potassium, Selenium, Silver, Sodium, Thallium, Vanadium, Zinc

The following inorganic samples are associated with an ICP serial dilution percent difference which is > 10% but less than 100%. Associated detects ≥ MDL are flagged "J".

ME4SN9	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP0	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP1	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP2	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP3	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP4	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP5	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP6	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP7	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP8	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SP9	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ0	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ1	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ2	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ3	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ4	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium
ME4SQ5	Calcium, Cobalt, Iron, Manganese, Potassium, Sodium

7. SAMPLE RESULTS

The following inorganic samples have analyte concentrations reported below the quantitation limit (CRQL). All results below the CRQL are qualified "J".

ME4SN9	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SP0	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Selenium, Sodium
ME4SP1	Arsenic, Barium, Cadmium, Cobalt, Mercury, Nickel, Potassium, Sodium, Vanadium
ME4SP2	Cadmium, Cobalt, Mercury, Potassium, Selenium, Sodium
ME4SP3	Barium, Cadmium, Cobalt, Copper, Nickel, Potassium, Selenium, Sodium
ME4SP4	Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium
ME4SP5	Cobalt, Potassium, Selenium, Sodium
ME4SP6	Antimony, Beryllium, Selenium, Sodium, Thallium
ME4SP7	Beryllium, Mercury, Selenium, Silver, Sodium
ME4SP8	Beryllium, Cobalt, Selenium, Sodium

ME4SP9	Beryllium, Cobalt, Selenium, Sodium
ME4SQ0	Beryllium, Selenium, Sodium
ME4SQ1	Cobalt, Potassium, Selenium
ME4SQ2	Arsenic, Barium, Cadmium, Cobalt, Nickel, Potassium, Sodium, Vanadium
ME4SQ3	Beryllium, Cobalt, Selenium, Silver, Sodium
ME4SQ4	Beryllium, Selenium, Sodium
ME4SQ5	Beryllium, Selenium, Silver, Sodium

GLNPO Data Qualifier Sheet

Qualifier	Definition
U	The analyte was analyzed for, but was not detected above the reported sample quantitation limit.
J	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte in the sample.
J+	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased high.
J-	The analyte was positively identified; the associated numerical value is an approximate concentration of the analyte, but may be biased low.
UJ	The analyte was not detected above the reported sample quantitation limit. However, the reported quantitation limit is approximate and may or may not represent the action limit of quantitation necessary to accurately and precisely measure the analyte in the sample.
N	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification.
NJ	The analysis indicates the presence of an analyte for which there is presumptive evidence to make a tentative identification and the associated numerical value represents its approximate concentration.
R	The data are unusable. (The compound may or may not be present.)

Case Number: 39668 SDG Number: ME4SQ6
Site Name: Lincoln Park Laboratory: Bonner

SDG Summary

Sample Completeness and Receipt: One (1) sediment sample labeled ME4SQ6 was shipped to Bonner Analytical Testing Company. The sample was collected on April 16, 2010, and was received at the facility on April 17, 2010, intact, and at 4 °C

Sample Analysis and Data Review: The sample was analyzed for metals according to CLP SOW ILM05.4. Mercury analysis was performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no field duplicate sets were identified.

As per the scheduling notification, laboratory QC (i.e., matrix spike, duplicate, and serial dilution) was not required for the water sample. The laboratory did analyze a laboratory control sample (LCS), per the CLP SOW, and its recoveries were well within the acceptance limits, indicating that laboratory performance was under control. No results were flagged due to the lack of MS or DUP analysis.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, **OR** if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: “R”, “UJ”, “U”, “J”, “J+”, “J-”. In the special case where a result is affected by a “J+” and a “J-” flag, a “J” flag was applied.

1. HOLDING TIME

The inorganic sediment sample was reviewed for holding time violations using criteria developed for water samples. Data on sample pH was not available. No defects were found.

2. CALIBRATION

No defects were found.

3. BLANKS

The sample is associated with an ICB concentration which is less than or equal to the CRQL. The detected sample results was also less than or equal to the CRQL. Detects are qualified "U." Sample results are raised to the CRQL.

ME4SQ6 Sodium

4. MATRIX SPIKE AND LAB CONTROL SAMPLE

Laboratory QC (i.e., matrix spike) was not required for the water sample. No defects were found with the laboratory control sample (LCS).

5. LABORATORY AND FIELD DUPLICATE

Laboratory QC (i.e., duplicate) was not required for the water sample.

6. ICP ANALYSIS

No defects were found.

7. SAMPLE RESULTS

The sample in this SDG was analyzed for metals under CLP SOW ILM05.4. The NFG reports from CADRE employ the solid CRQL values from SOW ILM05.0, which are approximately 2 times higher than the solid CRQLs in the more recent SOW ILM05.4. In response, CSC is not applying the "J" flag to results between the MDL and the CRQL based on the NFG reports, but on the Form 1 information and the lab qualifier flags, results, and CRQLs provided by the laboratory in the EDD. The following inorganic samples have analyte concentrations reported below the CRQL and are qualified "J".

ME4SQ6 Sodium, Zinc

Case Number: 39668 SDG Number: ME4SQ6

Site Name: Lincoln Park Laboratory: Bonner

SDG SUMMARY

Sample Completeness and Receipt: One (1) Sediment sample labeled ME4SQ7 was shipped to Bonner Analytical Testing Company. The sediment sample was collected on 4/19/2010, and was received at the facility on 4/20/2010, intact, and at 4.5 °C.

Sample Analysis and Data Review: The sample was prepared using the Toxicity Characteristic Leaching Procedure (TCLP) according to MA1705.0 and analyzed for the 8 "TC" metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure. Because the sample was subjected to TCLP, and the aqueous leachate was analyzed, the results were reported in weight/volume (w/v) units, as required by the TCLP.

Sample ME4SQ7 was designated by the samplers to be used for laboratory QC (i.e., matrix spike, duplicate, and serial dilution).

Using the field duplicate identification scheme provided by CH2M HILL in the field sampling plan, no field duplicate sets were identified.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

Case Number: 39668 SDG Number: ME4SQ9
Site Name: Lincoln Park Laboratory: Bonner

SDG SUMMARY

Sample Completeness and Receipt: One (1) water sample labeled ME4SQ9 was shipped to Bonner Analytical Testing Company. The water sample was collected on 4/23/2010, and was received at the facility on 4/24/2010, intact, and at 6.7 °C.

Sample Analysis and Data Review: The sample was prepared using the Toxicity Characteristic Leaching Procedure (TCLP) according to MA1705.0 and analyzed for the 8 "TC" metals according to CLP SOW ILM05.4. Mercury analyses were performed using the cold vapor atomic absorption (AA) technique. The remaining inorganic analyses were performed using the inductively coupled plasma-atomic emission spectroscopy (ICP-AES) procedure. Because the sample was subjected to TCLP, and the aqueous leachate was analyzed, the results were reported in weight/volume (w/v) units, as required by the TCLP.

Although MA1705.0 specified that a matrix spike sample be prepared and analyzed, the laboratory did not provide matrix spike results, noting in the data package narrative that "As per scheduling no MS and DUP are required." CSC has not located any scheduling information that confirms the laboratory's assertion about the MS and DUP, but we have not flagged the results due to the lack of an MS or DUP analysis. The laboratory did analyze a laboratory control sample (LCS), per the CLP SOW, and its recoveries were within the acceptance limits, indicating that laboratory performance was under control.

Using the field duplicate identification scheme provided by CH2M Hill in the field sampling plan, no field duplicate sets were identified.

In the following sections, QC failures, resulting qualifiers, and associated results are described for each failure. In instances where multiple qualifiers are associated with a given sample result a single final qualifier is applied to that result. If all associated qualifiers described by CADRE NFG reports for a particular result conform exactly to the Region 2 SOP requirements for the associated failure scenarios, then the final qualifier applied by CADRE is left intact. However, if at least one of the associated qualifiers described by CADRE NFG reports is different from that required by the Region 2 SOP for the relevant failure, OR if a reviewer has chosen a different qualifier for a failure because of best professional judgment, then the most severe qualifier will be applied. Qualifiers from most severe to least severe are: "R", "UJ", "U", "J", "J+", "J-". In the special case where a result is affected by a "J+" and a "J-" flag, a "J" flag was applied.

Appendix B
TOPSC DQE

Data Usability Evaluation
Lincoln Park/Milwaukee River Channel Sediments Site — Phase 2 Remedial Investigation Milwaukee, Wisconsin WA No. 064-RICO-2508 / Contract No. EP-S5-06-01

PREPARED FOR: U.S. Environmental Protection Agency

PREPARED BY: Adrienne Korpela/CH2M HILL

DATE: September 7, 2010

This memorandum presents the data usability evaluation of the sediment samples collected during the field investigation conducted at the Lincoln Park/Milwaukee River Channel Sediments Site in Milwaukee, Wisconsin, from February to April 2010. The sampling was performed by CH2M HILL. The analyses were performed by the USEPA Region 5 Central Regional Laboratory (CRL).

Two-hundred and ninety-four sediment samples were collected and analyzed for one or more of the following methods:

- Total organic carbon by CRL standard operating procedure (SOP) AIG009 Revision 5.1
- Particle size by CRL SOP AIG038A Revision #00 or CRL SOP AIG038 Revision #02

As part of the quality assurance process outlined in the sampling and analysis plan, quality control (QC) samples were collected in the field to complement the assessment of overall data quality and usability.

The data set underwent a forms review by CH2M HILL staff to assess the lab notes and precision of the field duplicate samples. Completeness of the data set was then derived. Data qualifiers were added by CH2M HILL validators when the QC statistics indicated a possible bias to specific compounds or analytes associated with a particular method and sample batch.

Standard data qualifiers were used as a means of classifying the data as to their conformance to QC requirements. The applied data qualifiers are defined as follows:

[U] The sample target was analyzed for, but was not detected above the level of the associated limit of detection or quantitation.

[J] The associated value is an estimated quantity. This qualifier was appended when the data indicated the presence of a specific target analyte but was below the stated reporting (or quantitation) limit, and/or when quality control statistics alluded to an analytical bias.

[UJ] The component was analyzed for, but was not detected at a level equal to or greater than the level of detection or quantification (often the reporting limit). This flag is used when QC measurements indicate a possible low bias in the analytical data.

[R] Rejected. The data were of insufficient quality to be deemed acceptable as reported or otherwise qualified.

Sediment Samples

CH2M HILL conducted a forms review of 100 percent of the sediment samples collected. Table 1 lists the work orders.

TABLE 1
Sample Summary
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Work Order Number	Number of Samples for Total Organic Carbon Analysis	Number of Samples for Particle Size Analysis
1003001	45 samples (41 + 4 FDs)	None
1003003	62 samples (58 + 4 FDs)	13 samples
1003004	28 samples (25 + 3 FDs)	None
1003006	38 samples (35 + 3 FDs)	4 samples
1003008	44 samples (40 + 4 FDs)	5 samples
1004011	46 samples (41 + 5 FDs)	4 samples
1004013	31 samples (27 + 4 FDs)	8 samples

FD = field duplicate

Field Duplicates

Twenty-seven field duplicate (FD) pairs were collected and analyzed for Total Organic Carbon, and precision criteria were met with the following exceptions:

TABLE 2
Field Duplicate Precision
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Sample Location	Unit	Sample Concentration	Field Duplicate Concentration	Relative Percent Difference
LP2-SD21E-J0.5/1.5	%	6.3	3.1	68.1
LP2-SD32N-C1.5/2.5	%	1.0	0.6	50.0
LP2-SD35E-A0.0/0.5	%	ND	1.4	173.3*
LP2-SD35W-A1.5/2.5	%	2.6	0.1	185.2
LP2-SD39W-D0.0/0.5	%	1.3	0.7	60.0
LP2-SD43N-A0.5/1.7	%	1.7	2.9	52.2

*Relative percent difference calculated using the method detection limit (0.1) for the nondetected sample concentration.

When the relative percent difference between the detected sample and FD sample results exceeded 50 percent for sediment, the sample results not previously qualified for any other QC parameter were then qualified for field duplicate precision. Detected concentrations were qualified as estimated and flagged J in the FD pair. If the FD pair had one detected result and one nondetected result, the detect was flagged J and the nondetect was flagged UJ.

Conclusion

The evaluation of the FD data indicates possible bias due to applicable QC statistics. However, the precision was generally acceptable, and the data set completeness was deemed as 100 percent usable and may be used in the project decision making process with qualification.

In addition, 100 percent of the data underwent a comparative review to evaluate the accuracy between the database and the CRL data reports. There were no discrepancies noted.

Data Usability Evaluation
Lincoln Park/Milwaukee River Channel Sediments Site — Phase 2 Remedial Investigation Milwaukee, Wisconsin WA No. 064-RICO-2508 / Contract No. EP-S5-06-01

PREPARED FOR: U.S. Environmental Protection Agency

PREPARED BY: Adrienne Korpela/CH2M HILL

DATE: September 7, 2010

This memorandum presents the data usability evaluation of the sediment samples collected during the field investigation conducted at the Lincoln Park/Milwaukee River Channel Sediments Site in Milwaukee, Wisconsin, from February to April 2010. The sampling was performed by CH2M HILL. The analyses were performed by the USEPA Region 5 Central Regional Laboratory (CRL).

Two-hundred and ninety-four sediment samples were collected and analyzed for one or more of the following methods:

- Total organic carbon by CRL standard operating procedure (SOP) AIG009 Revision 5.1
- Particle size by CRL SOP AIG038A Revision #00 or CRL SOP AIG038 Revision #02

As part of the quality assurance process outlined in the sampling and analysis plan, quality control (QC) samples were collected in the field to complement the assessment of overall data quality and usability.

The data set underwent a forms review by CH2M HILL staff to assess the lab notes and precision of the field duplicate samples. Completeness of the data set was then derived. Data qualifiers were added by CH2M HILL validators when the QC statistics indicated a possible bias to specific compounds or analytes associated with a particular method and sample batch.

Standard data qualifiers were used as a means of classifying the data as to their conformance to QC requirements. The applied data qualifiers are defined as follows:

[U] The sample target was analyzed for, but was not detected above the level of the associated limit of detection or quantitation.

[J] The associated value is an estimated quantity. This qualifier was appended when the data indicated the presence of a specific target analyte but was below the stated reporting (or quantitation) limit, and/or when quality control statistics alluded to an analytical bias.

[UJ] The component was analyzed for, but was not detected at a level equal to or greater than the level of detection or quantification (often the reporting limit). This flag is used when QC measurements indicate a possible low bias in the analytical data.

[R] Rejected. The data were of insufficient quality to be deemed acceptable as reported or otherwise qualified.

Sediment Samples

CH2M HILL conducted a forms review of 100 percent of the sediment samples collected. Table 1 lists the work orders.

TABLE 1
Sample Summary
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Work Order Number	Number of Samples for Total Organic Carbon Analysis	Number of Samples for Particle Size Analysis

LP2-SD43N-A0.5/1.7	%	1.7	2.9	52.2

*Relative percent difference calculated using the method detection limit (0.1) for the nondetected sample concentration.

When the relative percent difference between the detected sample and FD sample results exceeded 50 percent for sediment, the sample results not previously qualified for any other QC parameter were then qualified for field duplicate precision. Detected concentrations were qualified as estimated and flagged J in the FD pair. If the FD pair had one detected result and one nondetected result, the detect was flagged J and the nondetect was flagged UJ.

Conclusion

The evaluation of the FD data indicates possible bias due to applicable QC statistics. However, the precision was generally acceptable, and the data set completeness was deemed as 100 percent usable and may be used in the project decision making process with qualification.

In addition, 100 percent of the data underwent a comparative review to evaluate the accuracy between the database and the CRL data reports. There were no discrepancies noted.

Appendix G
Habitat Survey

Lincoln Park/Milwaukee River Phase 2 Remedial Investigation—Baseline Habitat Survey

PREPARED FOR: USEPA and WDNR

PREPARED BY: CH2M HILL

DATE: September 24, 2010

Introduction

This technical memorandum documents the objectives, approach, and results of the baseline habitat survey associated with the RI activities for the Lincoln Park/Milwaukee River project. The survey was performed on September 16 and 17, 2010, in accordance to the supplemental field sampling plan (FSP) prepared and submitted by CH2M HILL on August 25, 2010.

Objectives

The baseline habitat survey was designed to collect information to document and evaluate stream and riparian habitat conditions within the Lincoln Park Phase 2 project area. The survey collected site-specific information needed to create a baseline of information and assist in decision making during remedial design and remedial action stages of the project. The specific objectives of the baseline habitat survey included the following:

- Identify and record dominant aquatic and riparian vegetation to determine type, diversity, and extent of various habitats, as well as identify invasive species.
- Identify in stream and stream bank characteristics and conditions including the occurrence of bank structures presently providing aquatic wildlife habitat.

Survey Approach

Riparian vegetation inventory surveys were completed while walking the riparian areas (banks, islands, and sediment flats) of the project site. The inventory included listing the dominant vegetation in each stratum (tree, shrub, and herbaceous), percent absolute cover, and indicator status for each species, as well as noting which species are considered invasive. An inventory of aquatic vegetation was conducted within the littoral zones along each shoreline and main river channel to inventory the dominant emergent and submergent species. Riparian and aquatic vegetation survey data was recorded on CH2M HILL vegetation field forms.

Stream characteristics, including bank stability, maximum thalweg depth, stream habitat diversity, substrate, and cover for fish, were qualitatively surveyed from the river using a

canoe to access shallow water areas. Stream characterization data were recorded within WDNR field forms (form 3600-532B) for qualitatively rating fish habitat for streams greater than 10 meters wide.

If a general change in stream characteristics or vegetation occurred, a new respective field form was completed. Riparian and aquatic vegetation survey results and stream characteristics corresponding to individual field forms were recorded on an aerial map of the project site.

Photographic documentation was collected at various locations along the river. Photograph locations were chosen based on characteristics of the river adequately reflecting vegetation and stream habitat features.

Survey Results

The results of the baseline habitat survey are summarized below. Habitat assessment field forms used to record riparian and aquatic vegetation are included in Attachment 1. WDNR field data forms for qualitatively ranking fish habitat ratings are included in Attachment 2. Photographs depicting habitat features and site conditions encountered during the survey are included in Attachment 3. Figure G1 depicts locations and direction of photographs, type and location of stream structures and unique riparian vegetation (Black Walnut and White Paper Birch), and data collection locations of the habitat assessment field forms (denoted by numbers 1 through 16) and qualitative fish habitat field forms (denoted by letters A through H).

Vegetation Survey

Dominant vegetation in the project area is recorded in Table G1. Dominant species are listed by their general location and are classified between riparian or sediment flat areas. Sixteen individual vegetation field forms were composed to depict dominant species and represent the project site (Figure G1 and Attachment 1). Additional non-dominant species identified as well as each species absolute cover, wetland indicator status, and invasive status are recorded in the vegetation field data forms. Locations represented by each vegetation field data form are identified within Figure G1.

Unique vegetation features include a small stand of mature paper birch (*Betula papyrifera)* located along the western bank of the east oxbow and approximately five mature black walnut *(Juglans nigra)* trees located along the western bank of the Milwaukee River across from the east oxbow (Figure G1). Aquatic species were limited to approximately 6 to 10 individual specimens of coontail scattered within the southern half of the east oxbow where water current was very minimal to non-existent. Overall, vegetative cover along the riverbanks is heavily wooded with mature wetland tree species dominated by Black willow, Slippery elm, Green ash, and Box elder, with and understory dominated by Common buckthorn. Sediment flats experiencing temporary inundation due to varying water levels of the Milwaukee River are dominated by opportunistic species capable of seasonal establishment such as (i.e., Nodding smartweed, Purple loosestrife, etc.). However due to the extended relatively low water levels due to Estabrook Dam remaining open since 2009, succession species (i.e., Eastern cottonwood and Black willow seedlings) have begun establishment within the sediment flats.

TABLE G1
Dominant Vegetation Along the Lincoln Park/Milwaukee River Channel Phase 2 Remedial Investigation Area

Location	Stratum	Common Name	Scientific Name
Riparian Areas	Tree	Black willow	*Salix nigra*
		Slippery Elm	*Ulmus rubra*
		Green Ash	*Fraxinus pennsylvanica*
		Box elder	*Acer negundo*
	Shrub	Common buckthorn	*Rhamnus cathartica*
	Herbaceous	Nodding smartweed	*Polygonum lapathifolium*
		Purple loosestrife	*Lythrum salicaria*
		Eastern cottonwood	*Populus deltoides*
		Aster sp.	*Aster sp.*
		Common sneezeweed	*Helenium autumnale*
		Riverbank grape	*Vitis riparia*
		Jewelweed	*Imaptiens capensis*
		Stinging nettle	*Urtica dioica*
Sediment Flats	Tree	N/A	N/A
	Shrub	Black willow	*Salix nigra*
	Herbaceous	Nodding smartweed	*Polygonum lapathifolium*
		Narrow-leaved cattail	*Typha angustifolia*
		Rice cutgrass	*Leersia oryzoides*
		Purple loosestrife	*Lythrum salicaria*
		Eastern cottonwood	*Populus deltoides*
		Aster sp.	*Aster sp.*
		Common sneezeweed	*Helenium autumnale*

Stream Survey

A summary of fish habitat rating results using WDNR qualitative fish habitat field forms is located below in Table G2. A total of eight qualitative fish habitat field forms (A through H) were completed to characterize in stream characteristics of the project area. A stream survey field form was not completed for the northern half of the east oxbow as no visible stream flow was present.

Structures suitable for fish habitat consisted mainly of toppled mature black willow trees and woody debris piles located along the banks of the Milwaukee River with minimal structure located within the center of the active stream channel. Areas exhibiting

boulder/cobble revetment structure were primarily located along each shoreline north of the east and west oxbows (sheets A and B), southern half of the east oxbow (sheet E), and along the northern bank south of the I-43 bridge (sheet H) as shown on Figure G1.

The average fish habitat rating for the project area is 36.5, with the highest rating (70) located north of the west and east oxbows confluences (Sheet A). This area received the highest rating largely due to the excellent ratings for thalweg depth and rocky substrate. In general the habitat feature which impeded scores in areas B through H was the absence of rocky substrate.

TABLE G2

Qualitative Fish Habitat Rating Result Summary

		Rating Item & Score					
Location	Represented Transects	Bank Stability	Max Thalweg Depth	Riffle:Riffle or Bend:Bend Ratio	Rocky Substrate	Cover for Fish	Total Score
A	2-4	8	25	4	25	8	70
B	9-11	8	25	4	0	0	37
C	5-7 & 11-14	8	25	4	0	8	45
D	15-21 & 34-39	8	16	4	0	0	28
E	28-34	8	8	4	0	8	28
F	40-43	4	16	4	0	0	24
G	43-50	8	8	4	8	0	28
H	50-56	12	8	4	8	0	32

Score Definitions:

Bank Stability and Riffle:Riffle or Bend:Bend Ratio: Excellent = 12, Good = 8, Fair = 4, Poor = 0

Maximum Thalweg Depth, Rocky Substrate, Cover for Fish: Excellent = 25, Good = 16, Fair = 8, Poor = 0

Stream Field Forms

Wadable Stream Qualitative Fish Habitat Rating for Streams > 10 m wide

Form 3600-532B (R 6/07)

Sheet A Transect 2-4

Rating Item	Excellent	Good	Fair	Poor	Score
Bank Stability % of bank protected by rock or vegetation	No significant bank erosion; ≥ 90% of bank protected; < 10% bare soil 12	Limited erosion; 70 to 90% of bank protected; 10 - 30% bare soil (8)	Moderate erosion; 50 to 69% of bank protected; 31 - 50% bare soil 4	Extensive erosion; < 50% of bank protected; > 50% bare soil 0	8
Maximum Thalweg Depth Average of the four deepest depths recorded	Stream very deep; ≥ 1.5 m (25)	Stream relatively deep; 1 - 1.5 m 16	Stream moderately deep; 0.6 - 0.9 m 8	Stream relatively shallow; < 0.6 m 0	25
Riffle:Riffle or Bend:Bend Ratio Average distance between riffles or bends divided by average stream width	Diverse habitats; meandering stream with deep bends and riffles common; ratio < 10 12	Diverse habitats; bends and riffles present, but not abundant; ratio 10 to 14 8	Habitat diversity low; occasional riffles or bends, ratio 15 to 25 (4)	Habitat monotonous; riffles or bends rare; generally continuous run habitat; ratio > 25 0	4
Rocky Substrate % of substrate, by area, that is bedrock, boulder, rubble/ cobble, or gravel	Extensive rocky substrate; ≥ 65% of the stream bed (25)	Moderate rocky substrate; 45 - 65% of stream bed 16	Limited rocky substrate; 15 - 44% of stream bed 8	Rocky substrate uncommon; < 15% of stream bed 0	25
Cover for Fish % of the stream area with cover	Cover/shelter for fish abundant; ≥ 12% of stream 25	Cover common, but not extensive; 7 - 12% of stream 16	Occasional cover, limited to one or two areas; 2 - 6% of stream (8)	Cover rare or absent; limited to < 2% of stream 0	8
				Total Score	70

Wadable Stream Qualitative Fish Habitat Rating for Streams > 10 m wide

Form 3600-532B (R 6/07)

Sheet B Transect 9-11

Rating Item	Excellent	Good	Fair	Poor	Score
Bank Stability % of bank protected by rock or vegetation	No significant bank erosion; ≥ 90% of bank protected; < 10% bare soil 12	Limited erosion; 70 to 90% of bank protected; 10 - 30% bare soil (8)	Moderate erosion; 50 to 69% of bank protected; 31 - 50% bare soil 4	Extensive erosion; < 50% of bank protected; > 50% bare soil 0	8
Maximum Thalweg Depth Average of the four deepest depths recorded	Stream very deep; ≥ 1.5 m (25)	Stream relatively deep; 1 - 1.5 m 16	Stream moderately deep; 0.6 - 0.9 m 8	Stream relatively shallow; < 0.6 m 0	25
Riffle:Riffle or Bend:Bend Ratio Average distance between riffles or bends divided by average stream width	Diverse habitats; meandering stream with deep bends and riffles common; ratio < 10 12	Diverse habitats; bends and riffles present, but not abundant; ratio 10 to 14 8	Habitat diversity low; occasional riffles or bends, ratio 15 to 25 (4)	Habitat monotonous; riffles or bends rare; generally continuous run habitat; ratio > 25 0	4
Rocky Substrate % of substrate, by area, that is bedrock, boulder, rubble/ cobble, or gravel	Extensive rocky substrate; ≥ 65% of the stream bed 25	Moderate rocky substrate; 45 - 65% of stream bed 16	Limited rocky substrate; 15 - 44% of stream bed 8	Rocky substrate uncommon; < 15% of stream bed (0)	0
Cover for Fish % of the stream area with cover	Cover/shelter for fish abundant; ≥ 12% of stream 25	Cover common, but not extensive; 7 - 12% of stream 16	Occasional cover, limited to one or two areas; 2 - 6% of stream 8	Cover rare or absent; limited to < 2% of stream (0)	0

Appendix H
COC Screening

APPENDIX H

Summary of Sediment Screening Results

Introduction

The following technical memorandum summarizes the methods and assumptions used during the evaluation of the Lincoln Park sediment chemistry data to determine potential contaminants of concern (COCs) and support the selection of remedial action levels (RALs), if necessary. The final data for pesticides, metals, and total PAHs were used to generate summary statistics for the reference and site locations, determine average background concentrations, and were compared to the Wisconsin Department of Natural Resources (WDNR) Consensus-Based Sediment Quality Guidelines (SQGs).

Methods

Treatment of Non-Detected and Rejected Data Points

For the purposes of this evaluation, only detected values were included in the DDx sums. The PAHs were summed using the method described in Section 4.3.2 of the RI report. Rejected data points were treated as non-detects and were not included in the sums; these data points were included in the summary statistics as non-detected values.

Non-detected values were not screened against any SQGs.

Summary Statistics

The data were grouped using two separate classification schemes to facilitate data comparison among the different sampling areas and sampling depths. In the first grouping, the samples were categorized with no differentiation for sample depths. The second classification scheme grouped the reference and site samples by the general sampling depths (i.e., surface, 0.5 to 1.5 feet, 1.5 to 2.5 feet, etc.). There were some instances where the actual sample depth did not correspond to exactly to the assigned range—in these cases the samples were assigned to the group with the best fit in order to keep the number of subgroups manageable.

The summary statistics were generated using the freeware ProUCL 4.00.02, which has been developed for, and provided by, the United States Environmental Protection Agency (USEPA).

Preliminary Sediment Screening

WDNR SQGs were selected to be used for preliminary data evaluation purposes for metals, pesticides, and PAHs. If WDNR SQGs were not available, USEPA Region III Biological Technical Advisory Group Freshwater Sediment Screening values were used. These values are not to be considered as RALs for the site and were chosen as an initial step to conduct a preliminary evaluation of concentration levels. Further evaluation of metals, pesticides, and PAH data is needed prior to determining appropriate RAL's specific to protecting human

health and ecological risk at the site. The WI SQGs guidance specifies the following three screening values for selected parameters:

- Threshold Effect Concentration (TEC) is defined as the concentration at which, if below, toxicity effects to benthic dwelling organisms are predicted to be unlikely.
- Midpoint Effect Concentration (MEC) is the midpoint concentration between the TEC and PEC concentrations.
- Probable Effect Concentration (PEC) is the concentration at which, if above, toxicity effects to benthic organisms are probable.

There were several pesticides for which values were not specifically listed by the WDNR guidance: alpha chlordane, beta chlordane, alpha endosulfan, beta endosulfan, beta BHC, endrin aldehyde, endrin ketone, methoxychlor, and heptachlor. The USEPA Region III Biological Technical Advisory Group (BTAG) Freshwater Sediment Screening values were used in instances where the WDNR SQGs were not available. A comparison of the USEPA screening values to the WDNR SQGs indicated that the TEC values cited by the WDNR were generally similar, or identical, to the USEPA screening values.

Screening values for endrin aldehyde, endrin ketone, and alpha and beta chlordane were not specifically listed in either guidance. The WDNR SQG values for endrin and chlordane were during the preliminary screening.

The WI SQGs for PAHs and pesticides are based on normalization to 1% total organic carbon (TOC). Normalized PAH and pesticide concentrations were utilized in the screening process. In instances where TOC was not detected in a sample, a value of 1% was retained and the original reported pesticide and PAH concentrations were included in screening evaluation.

Results and Observations

Summary statistics are presented in Tables G-1, G-3, and G-5 for metals, pesticides and total PAHs, respectively. The results of the screening against the SQGs are presented in Tables G-2 (metals), G-4 (pesticides), and G-6 (total PAHs). Three sediment core locations (SD-01E-A, SD-02E-C, and SD-03E-A) located at the northern most upstream extent of the project area were used for comparative purposes to represent background conditions at the site and referred to as the reference area.

Metals

Metals in the reference area samples were either not detected or the average value was lower than either the TEC or EPA screening value; therefore the screening exercise focused on evaluating the detected concentrations against the SQGs. All twelve metals evaluated had detected concentrations in site samples that were between the TEC and MEC. Six metals (cadmium, chromium, lead, nickel, silver, and zinc) had a small number of detected concentrations above the PEC (Table G-2).

Pesticides

The only pesticide detected in the reference area samples was total DDx. Pesticide detections in the site sediment samples were generally low, with total DDx, dieldrin, and alpha- and beta-chlordane being detected most frequently.

Results of the comparison of the TOC normalized pesticide data to the SQGs are presented in Table G-4. Total DDx exceeded the TEC in 26 of the 261 site samples and did not exceed the MEC or PEC at any locations. Normalized dieldrin concentrations in 5 of the 261 samples were greater than the TEC value. Aldrin, endrin, and gamma-BHC concentrations each exceeded the TEC in two samples and alpha- and beta-chlordane, endrin aldehyde, and endrin ketone each exceeded the TEC in one sample; none of these parameters exceeded the MEC.

Total PAHs

The total PAH screening of non-normalized data indicated that of the 261 site samples, 124 had total PAH concentrations between the TEC and MEC; 18 had concentrations between the MEC and PEC; and 13 had concentrations above the PEC. Once normalized to TOC, the PAH screening yielded the following results: 67 samples were between the TEC and MEC, 2 were between the MEC and PEC, and 4 were above the PEC.

Results and Observations

The screening results presented above indicate that the pesticide concentrations present in the sediments are not likely to pose potential risk to benthic organisms since there were no parameters that exceeded the MEC or PEC; therefore, the pesticide data will not be further evaluated during the RI/FS process.

The metals screening did indicate exceedances of the TEC values for all the parameters and PEC exceedances for cadmium (4), chromium (7), lead (14), nickel (2), silver (5), and zinc (2). The most common exceedances were for lead and were generally co-located with locations where the 1 milligram per kilogram RAL for PCBs was exceeded.

Summary Statistics—Total PAHs
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

Parameter (group ID)	Number Detects	Number Non-Detects	% Non-Detect	Min mg/kg	Max mg/kg	Mean mg/kg	Median mg/kg
Grouped by Site and Reference Only							
TPAH (reference)	6	0	0.00%	0.413	2.13	1.405	1.603
TPAH (site)	259	2	0.77%	0.0179	138.6	6.264	2.391
Grouped by Site, Reference, and Sample Depth							
TPAH (reference surface)	5	0	0.00%	0.413	2.13	1.42	1.875
TPAH (reference 0.5-1.5)	1	0	0.00%	1.331	1.331	1.331	1.331
TPAH (site surface)	82	1	1.20%	0.137	117.1	7.807	3.667
TPAH (site 0.5-1.5)	62	1	1.59%	0.0782	37.18	7.817	4.829
TPAH (site 1.5-2.5)	47	0	0.00%	0.0215	138.6	9.173	1.948
TPAH (site 2.5-3.5)	36	0	0.00%	0.0228	11.07	1.349	0.149
TPAH (site 3.5-4.5)	16	0	0.00%	0.0218	2.959	0.711	0.0802
TPAH (site 4.5-5.5)	8	0	0.00%	0.0184	5.245	0.783	0.0551
TPAH (site 5.5-6.5)	4	0	0.00%	0.0179	0.0711	0.045	0.0455
TPAH (site 6.5-7.5)	3	0	0.00%	0.0215	0.0426	0.0295	0.0243
TPAH (site 7.5-8.5)	1	0	0.00%	0.0233	0.0233	0.0233	0.0233

TABLE H-6
Summary of PAH Screening Results
Lincoln Park/Milwaukee River Remedial Investigation Phase 2 Project

	Total PAH	Total PAH, Normalized to TOC
Total Samples between TEC and MEC	124	67
Total Samples between MEC and PEC	18	2
Total Samples >PEC	13	4
