

Sediment Project at Scanlon Reservoir

Trail & Road Closure Alert

Timeline

Estimated Start
Fall 2021

Estimated Length
Through 2022

Contaminants

Dioxins/Furans

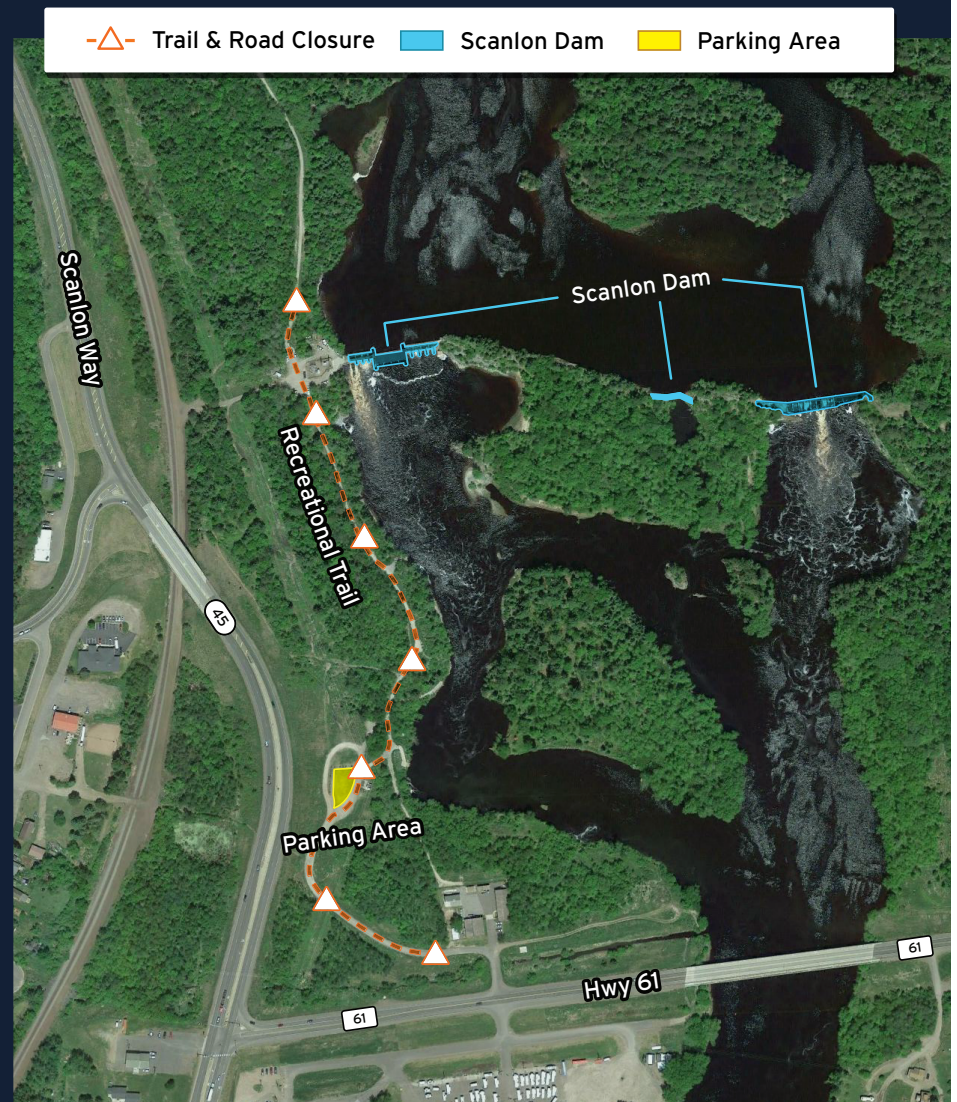

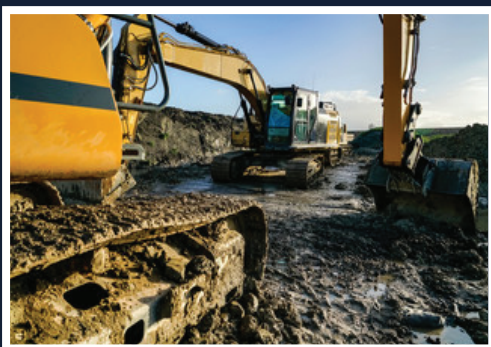

Goal

Remediate
13.5 acres of
contaminated
sediment

What to expect

A sediment remediation project will take place in the Scanlon Reservoir to protect human health and the environment. This work is being conducted by EPA and the Minnesota Pollution Control Agency through a Great Lakes Legacy Act partnership.

Due to project construction, Scanlon River Park and the St. Louis River Recreational Trail, parking area, and road will be closed to vehicle and pedestrian traffic through the end of 2022.
